² The positions of an additional Under Secretary and an additional Assistant Secretary were established under the provisions of an act approved July 22, 1954 (5 U. S. C. 244, 246).

PRINCIPAL ADMINISTRATIVE AND STAFF OFFICERS OF THE TREASURY DEPARTMENT AS OF DECEMBER 16, 1957

SECRETARY

ROBERT B. ANDERSON

Fred C. Scribner, Jr.....	Under Secretary.
Robert D. Hartshorne, Jr....	Assistant to the Under Secretary.
William W. Parsons.....	Administrative Assistant Secretary.
James H. Stover.....	Head, Management Analysis Staff.
Paul McDonald.....	Director of Administrative Services.
John D. Larson.....	Assistant Director of Administrative Services.
Willard L. Johnson.....	Budget Officer.
Howard M. Nelson.....	Assistant Budget Officer.
S. T. Adams.....	Director of Personnel.
Nils A. Lennartson.....	Assistant to the Secretary (for public affairs).
Francis J. Gafford.....	Assistant to the Secretary and Personnel Security Officer.
Julian B. Baird.....	Under Secretary for Monetary Affairs.
William T. Heffelfinger.....	Fiscal Assistant Secretary.
Martin L. Moore.....	Assistant to the Fiscal Assistant Secretary.
George F. Stickney.....	Technical Assistant to the Fiscal Assistant Secretary (Systems and Methods Staff).
Hampton A. Rabon, Jr....	Technical Assistant to the Fiscal Assistant Secretary.
Boyd A. Evans.....	Technical Assistant to the Fiscal Assistant Secretary.
Frank F. Dietrich.....	Technical Assistant to the Fiscal Assistant Secretary.
Paul I. Wren.....	Assistant to the Secretary.
Frank A. Southard, Jr.....	Special Assistant to the Secretary.
Robert P. Mayo.....	Chief, Debt Analysis Staff.
Laurence B. Robbins.....	Assistant Secretary.
Robert W. Benner.....	Assistant to the Assistant Secretary.
Tom B. Coughran.....	Assistant Secretary.
A. Gilmore Flues.....	Assistant Secretary.
Captain Q. R. Walsh, U. S. C. G.	Aide to Assistant Secretary.
James P. Hendrick.....	Assistant to the Secretary.
Myles J. Ambrose.....	Assistant to the Secretary for Law Enforcement.
Nelson P. Rose ¹	General Counsel.
David A. Lindsay ²	Assistant to the Secretary and Head, Legal Advisory Staff.
Dan Throop Smith.....	Deputy to the Secretary (in charge of tax policy).
Douglas H. Eldridge.....	Chief, Tax Analysis Staff.
Nathan N. Gordon.....	Chief, International Tax Staff.

OFFICE OF THE GENERAL COUNSEL

Nelson P. Rose ¹	General Counsel.
Elting Arnold.....	Assistant General Counsel.
John K. Carlock.....	Assistant General Counsel.
John P. Weitzel.....	Assistant General Counsel.
Arch M. Cantrall ³	Assistant General Counsel.
David A. Lindsay ²	Head, Legal Advisory Staff (Assistant to the Secretary).
Raphael Sherfy.....	Associate Head, Legal Advisory Staff.

Footnotes at end of list.

Frederick C. Lusk	Assistant Head, Legal Advisory Staff.
Edward C. Rustigan	Assistant Head, Legal Advisory Staff.
Hugo A. Ranta	Assistant to the General Counsel.
Lawrence Linville	Special Assistant to the General Counsel.
Kenneth S. Harrison	Chief Counsel, U. S. Coast Guard.
Trevor V. Roberts	Chief Counsel, Office of the Comptroller of the Currency.
Robert Chambers	Chief Counsel, Bureau of Customs.
Edwin F. Rains	Chief Counsel, Foreign Assets Control.
Arch M. Cantrall ³	Chief Counsel, Internal Revenue Service.
Elting Arnold	Chief Counsel, Office of International Finance.
Alfred L. Tennyson	Chief Counsel, Bureau of Narcotics.
Thomas J. Winston, Jr.	Chief Counsel, Bureau of the Public Debt.
George F. Reeves	Chief Counsel to the Fiscal Assistant Secretary.

OFFICE OF INTERNATIONAL FINANCE

George H. Willis	Director.
Elting Arnold	Acting Director, Foreign Assets Control.

OFFICE OF THE COMPTROLLER OF THE CURRENCY

Ray M. Gidney	Comptroller of the Currency.
L. A. Jennings	First Deputy Comptroller of the Currency.
W. M. Taylor	Second Deputy Comptroller of the Currency.
G. W. Garwood	Third Deputy Comptroller of the Currency.
H. S. Haggard	Chief National Bank Examiner.

BUREAU OF CUSTOMS

Ralph Kelly	Commissioner of Customs.
David B. Strubinger	Assistant Commissioner of Customs.
Walter G. Roy	Deputy Commissioner of Appraisement Administration.
C. A. Emerick	Deputy Commissioner of Investigations.
Lawton M. King	Deputy Commissioner of Management and Controls.
B. H. Flinn	Chief, Division of Entry, Value and Penalties.
W. E. Higman	Chief, Division of Classification and Drawbacks.
J. W. Gulick	Chief, Division of Marine Administration.
George Vlases, Jr.	Chief, Division of Technical Services.

BUREAU OF ENGRAVING AND PRINTING

Henry J. Holtzelaw	Director, Bureau of Engraving and Printing.
Frank G. Uhler	Assistant Director.

BUREAU OF ACCOUNTS (IN THE FISCAL SERVICE)

Robert W. Maxwell	Commissioner of Accounts.
Harold R. Gearhart	Assistant Commissioner.
Howard A. Turner	Deputy Commissioner—Central Accounts.
Sidney S. Sokol	Deputy Commissioner—Accounting Systems.
Samuel J. Elson	Deputy Commissioner—Central Reports.
Edmund C. Nussear	Deputy Commissioner—Deposits and Investments.
Wallace E. Barker, Jr.	Assistant Commissioner for Administration.
Harold A. Ball	Chief Auditor.
Julian F. Cannon	Chief Disbursing Officer.
Charles O. Bryant	Assistant Chief Disbursing Officer.
Maurace E. Roebuck	Assistant Chief Disbursing Officer.
George Friedman	Technical Assistant to the Commissioner.
Louis L. Collie	Executive Assistant to the Commissioner.

Footnotes at end of list.

XIV PRINCIPAL ADMINISTRATIVE AND STAFF OFFICERS

BUREAU OF THE PUBLIC DEBT (IN THE FISCAL SERVICE)

Edwin L. Kilby.....	Commissioner of the Public Debt.
Donald M. Merritt.....	Assistant Commissioner.
Ross A. Heffelfinger, Jr.....	Deputy Commissioner in Charge, Washington Office.
Charles D. Peyton.....	Deputy Commissioner in Charge, Chicago Office

OFFICE OF THE TREASURER OF THE UNITED STATES (IN THE FISCAL SERVICE)

Ivy Baker Priest.....	Treasurer of the United States.
William T. Howell.....	Deputy Treasurer.
Willard E. Scott.....	Assistant Deputy Treasurer.

INTERNAL REVENUE SERVICE

Russell C. Harrington.....	Commissioner of Internal Revenue.
O. Gordon Delk.....	Deputy Commissioner.
Wilber A. Gallahan.....	Administrative Assistant to the Commissioner.
Harry J. Trainor.....	Assistant Commissioner (Inspection).
Clifford W. Stowe.....	Assistant Commissioner (Operations).
Richard W. Nelson.....	Assistant to the Commissioner.
Justin F. Winkle.....	Assistant Commissioner (Technical).
Arch M. Cantrall ³	Chief Counsel.
George C. Lea.....	Director of Practice.
Leo Speer.....	Technical Advisor to the Commissioner.

BUREAU OF THE MINT

William H. Brett.....	Director of the Mint.
Leland Howard.....	Assistant Director.

BUREAU OF NARCOTICS

Harry J. Anslinger.....	Commissioner of Narcotics.
George W. Cunningham.....	Deputy Commissioner.
Henry L. Giordano.....	Assistant to the Commissioner.

OFFICE OF DEFENSE LENDING

Edward T. Stein.....	Director.
----------------------	-----------

UNITED STATES COAST GUARD

Vice Admiral Alfred C. Richmond..	Commandant, U. S. Coast Guard.
Rear Admiral James A. Hirshfield..	Assistant Commandant and Chief of Staff.
Captain Walter C. Capron.....	Deputy Chief of Staff.
Rear Admiral Kenneth K. Cowart..	Engineer in Chief.
Rear Admiral Henry T. Jewell....	Chief, Office of Merchant Marine Safety.
Rear Admiral Frank T. Kenner....	Chief, Office of Operations.
Rear Admiral Allen Winbeck.....	Chief, Office of Personnel.
Commander Paul E. Trumble.....	Comptroller.

UNITED STATES SAVINGS BONDS DIVISION

James F. Stiles, Jr. ⁴	National Director.
Bill McDonald.....	Assistant National Director.
Arthur B. Hill.....	Assistant to the National Director.

UNITED STATES SECRET SERVICE

U. E. Baughman.....	Chief, U. S. Secret Service.
Russell Daniel.....	Deputy Chief.
E. A. Wildy.....	Assistant Chief—Security.
Michael W. Torina.....	Chief Inspector.
George W. Taylor.....	Administrative Officer.

⁴Footnotes at end of list.

TREASURY MANAGEMENT COMMITTEE

William W. Parsons.....	Chairman.
Captain Walter C. Capron, U. S. C. G.	Member.
John K. Carlock.....	Member.
George W. Cunningham.....	Member.

² Appointed January 2, 1958.

³ Appointed January 29, 1958.

⁴ Appointed January 22, 1958.

The General Counsel serves as legal advisor to the Secretary, his associates, and heads of bureaus.

¹ The General Counsel serves as legal advisor to the Secretary, his associates, and heads of bureaus.
² The Assistant to the Secretary for Law Enforcement coordinates enforcement activities of the Secretaries, and Internal Revenue Service.

ANNUAL REPORT ON THE FINANCES

TREASURY DEPARTMENT,
Washington, D. C., January 31, 1958.

SIRS: I have the honor to report to you on the finances of the Federal Government for the fiscal year ended June 30, 1957.

Present conditions of world tension emphasize the importance of wise handling of our finances. Essential military and civilian needs must be met; and at the same time, the total demands on our available resources must be kept within sustainable limits.

On the fiscal front, we must continue to examine every expenditure—military and civil—from the point of view of its contribution to national defense or to the stability and good health of the economy. Priority of national security over lesser needs must be recognized, and Federal participation in programs which might be undertaken by private business or which are the primary responsibility of States and localities must be held to a minimum. This is a sound policy at all times, but it is particularly urgent at present when an increasing share of Federal revenues must be allocated to military research, training, and procurement.

A full report follows on the Treasury's operations during the 1957 fiscal year. During that period my predecessor, George M. Humphrey, was Secretary of the Treasury.

ROBERT B. ANDERSON,
Secretary of the Treasury.

TO THE PRESIDENT OF THE SENATE.

TO THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

1

REVIEW OF FISCAL OPERATIONS

Summary of Fiscal Operations

The Government's budget has been balanced for the second consecutive year with a surplus of \$1.6 billion for the fiscal year 1957, approximately the same as that achieved in the fiscal year 1956. Net budget receipts of \$71.0 billion and expenditures of \$69.4 billion were slightly higher than estimated, while the surplus was \$0.1 billion lower than estimated in January 1957. This surplus, together with an excess of receipts in trust account and other transactions, and a reduction in the balance in the account of the Treasurer of the United States, made possible a reduction in the public debt of \$2.2 billion. As of June 30, 1957, the public debt outstanding was \$270.5 billion compared with \$272.8 billion on June 30, 1956, while the Treasurer's balance on these dates was \$5.6 and \$6.5 billion, respectively.

Results of the Government's budget operations and the change in the public debt for the fiscal years 1956 and 1957 are summarized in the table that follows. It will be noted that net receipts for the fiscal year 1957 were \$2.9 billion higher than in fiscal 1956, while the expenditures were also \$2.9 billion higher.

	1956	1957
	In billions of dollars	
Budget results:		
Net receipts.....	68.2	71.0
Net expenditures.....	66.5	69.4
Budget surplus.....	1.6	1.6
Plus:		
Trust account and other transactions, excess of receipts, or expenditures (—) ¹3	— .3
Change in Treasurer's balance: decrease, or increase (—).....	— .3 (*)	1.0 .6
Equals: Public debt decrease.....	1.6	2.2

*Less than \$50 million.

¹ Includes net trust account transactions, etc.; net investment by Government agencies in public debt securities; net sales or redemptions of obligations of Government agencies in the market; changes in clearing and other accounts necessary to reconcile to Treasury cash; and changes in amount of cash held outside the Treasury.

The President's budget message for the fiscal year 1959 indicates an estimated deficit of \$0.4 billion in 1958 and an estimated surplus of \$0.5 billion in 1959. Net budget receipts are estimated at \$72.4 billion for the fiscal year 1958 and \$74.4 billion for 1959. Expenditures for these fiscal years are estimated at \$72.8 billion and \$73.9 billion, respectively. Table 8 shows budget receipts and expenditures, actual

for the fiscal year 1957 and estimated for the fiscal years 1958 and 1959, and table 10 shows the effect of financial operations on the public debt.

CHART 2.

In furtherance of the policy enunciated by the President in his Budget message of January 16, 1956, further progress was made in reducing the unexpended balances of appropriations, including the balances of revolving and management funds and other authorizations. The progress in reducing these balances is indicated in the following table. It shows an appreciable decline in unexpended balances of appropriations from \$78.4 billion on June 30, 1953, to \$43.9 billion on June 30, 1957. The total unexpended balances which were \$102.8 billion on June 30, 1953, declined to \$68.8 billion on June 30, 1957. During the fiscal year 1957 unexpended balances were reduced by \$4.2 billion. The table that follows shows the amounts of balances at the end of each fiscal year from June 30, 1953 to 1957.

Unexpended balances

[In billions of dollars]

June 30	Appropriated funds	Revolving and management funds	Other authorizations	Total
1953.....	78.4	1.7	22.7	102.8
1954.....	67.8	2.9	23.6	94.2
1955.....	52.1	5.4	22.2	79.7
1956.....	46.0	4.1	22.9	73.0
1957.....	43.9	3.4	21.7	68.8

SOURCE: *Budget of the United States Government for the Fiscal Year Ending June 30, 1959.*

In fiscal 1957 there was a somewhat more even flow of net budget receipts than in 1956. Receipts in the first half of the fiscal year 1957 were not only \$2.8 billion greater than in the same part of the prior year but also they comprised 40 percent of the total receipts for 1957 as compared with 37 percent in 1956. While the budget deficit of \$5.7 billion in the first half of 1957 was \$2.2 billion less than the first-half deficit of 1956, there was still need for substantial amounts of temporary borrowing. Budget receipts and expenditures and their imbalances by quarters of the fiscal years 1956 and 1957 are shown in the table which follows.

Federal budget operations

[In billions of dollars]

Period	1956			1957		
	Net budget receipts	Budget expenditures	Surplus, or deficit (—)	Net budget receipts	Budget expenditures	Surplus, or deficit (—)
July-September.....	13.0	16.9	—3.9	14.7	16.4	—1.7
October-December.....	12.2	16.2	—3.9	13.4	17.4	—4.0
Total first half.....	25.2	33.1	—7.9	28.1	33.8	—5.7
January-March.....	22.2	15.6	6.6	21.7	17.4	4.3
April-June.....	20.7	17.8	2.9	21.2	18.2	3.0
Total second half.....	42.9	33.4	9.5	42.9	35.6	7.3
Total fiscal year.....	68.2	66.5	1.6	71.0	69.4	1.6

The increase in the proportion of total receipts which was received in the first half of the fiscal year is due in most part to the acceleration of the payment schedule for corporation income tax under the 1954 Internal Revenue Code. This requires for corporations with tax liabilities in excess of \$100,000 a gradual shift over a 5-year period to a payment of 25 percent of estimated tax in each of the third and fourth quarters of the taxable year and 25 percent in each of the ensuing quarters. The schedule will be fully effective in the fiscal year 1960. In fiscal 1957 the calendar year corporations to which this schedule applies were required to pay 10 percent of their estimated tax on 1956

income in September 1956 and 10 percent in December 1956 and 40 percent each in March and June 1957. The progressive redistribution of these corporation tax payments will tend to mitigate the seasonal borrowing problem of the Treasury. However, payment of estimated corporation taxes in the first half of the fiscal year are reduced by the \$100,000 exemption and by the leeway permitted in the amounts estimated. In addition, only one quarterly payment of estimated individual income tax is received in the July-December period. Therefore, comparatively large proportions of total receipts will continue to be received in the January-June period. If expenditures for the first six months of a fiscal year remain as high as they have in the past, the Treasury will continue to be required to resort to considerable seasonal borrowing.

BUDGET RECEIPTS AND EXPENDITURES

BUDGET RECEIPTS IN 1957

Net budget receipts in the fiscal year 1957 amounted to \$71.0 billion, an increase of \$2.9 billion over the previous high record of \$68.2 billion collected in 1956. Certain excise taxes included in net budget receipts in 1956 were treated as trust fund receipts in 1957. If the classification of these receipts had not been changed, the rise in 1957 would have been substantially larger. The increase in 1957 receipts reflected substantial gains in personal incomes and a moderate rise in corporate profits.

A comparison of receipts, by major sources, in the two fiscal years is shown in the following table.

Source	1956	1957	Increase, or decrease (—)	
			Amount	Percent
	In billions of dollars			
Internal revenue:				
Individual income taxes.....	35.3	39.0	3.7	10.5
Corporation income taxes.....	21.3	21.5	.2	1.1

Refunds of receipts.....	3.7	3.9	.2	6.3
Net budget receipts.....	68.2	71.0	2.9	4.2

*Less than \$50 million.

All major sources of revenue increased in 1957 except for the nontax source, miscellaneous receipts. However, a large part of the rise in gross receipts in 1957 did not carry through to net budget receipts, principally because of initial transfers of certain excise tax collections to the highway trust fund. The increase in 1957 may therefore be attributed principally to the large increase in receipts from the individual income tax.

Individual income taxes.—Receipts from individual income taxes increased to \$39,030 million, \$3,696 million greater than the receipts of \$35,334 million in 1956. The continued increase in personal incomes accounted for the rise.

Corporation income taxes.—Corporation income tax receipts amounted to \$21,531 million in the fiscal year 1957, as compared with receipts of \$21,299 million in 1956. The increase of \$232 million reflected larger profits in liability years 1955 and 1956, the liabilities which determined receipts in fiscal 1957, as compared with profits in 1954 and 1955. Other factors of a technical nature affecting the 1956-1957 comparison of receipts were largely offsetting.

Excise taxes.—Receipts from this source are listed in the table which follows.

Source	1956	1957	Increase, or decrease (—)	
			Amount	Percent
	In millions of dollars			
Alcohol taxes	2,921	2,973	53	1.8
Tobacco taxes	1,613	1,674	61	3.8
Taxes on documents, other instruments, and playing cards	115	108	—7	—6.4
Manufacturers' excise taxes	3,456	3,762	306	8.9
Retailers' excise taxes	322	336	14	4.4
Miscellaneous excise taxes	1,608	1,719	110	6.8
Undistributed depositary receipts and unapplied collections	—31	66	97	(1)
Gross excise taxes	10,004	10,638	533	6.3
Deduct:				
Transfer to highway trust fund		1,479	1,479	-----
Net excise taxes	10,004	9,159	—846	—8.5

¹ Percentage comparison inappropriate.

Gross excise tax receipts in 1957 of \$10,638 million were \$633 million higher than receipts in 1956. Most of this increase was due to higher tax rates and new taxes enacted in the Highway Revenue Act of 1956 (26 U. S. C. 4426, 4481). Tax rate changes were primarily responsible for the large gains reported in receipts from taxes on gasoline, tires and tubes (including the new tax on tread rubber), and diesel fuel, and for the moderate rise in receipts from the tax on automobile trucks and buses. Initial receipts from the new use tax on certain vehicles also contributed to the increase in 1957.

Most of the excise taxes were unaffected by rate changes and showed moderate increases consistent with the gains in consumer incomes and general business activity. However, the general increase throughout the excise tax list was offset to a considerable degree by the very large decrease of \$232 million in receipts from the tax on passenger automobiles. This decline reflected a drop in automobile production from the unusually high level attained in the calendar year 1955.

Collections of certain excise taxes in effect prior to the enactment of the Highway Revenue Act are required by the act to be transferred, together with receipts from increased rates and new taxes, to the highway trust fund. The deduction for transfers of previously existing taxes, made for the first time in 1957, resulted in a decline in net excise taxes in the fiscal year 1957 as compared with 1956.

Employment taxes.—Receipts from the various employment taxes are shown in the following table.

Source	1956	1957	Increase, or decrease (—)	
			Amount	Percent
	In millions of dollars			
Federal Insurance Contributions Act and Self-Employment Contributions Act.....	6,337	6,634	298	4.7
Railroad Retirement Tax Act.....	634	616	—18	—2.9
Federal Unemployment Tax Act.....	325	330	5	1.7
Total employment taxes.....	7,296	7,581	285	3.9
Deduct:				
Transfer to Federal old-age and survivors insurance trust fund.....	6,337	6,301	—36	—.6
Transfer to Federal disability insurance trust fund.....		333	333	
Transfer to railroad retirement account.....	634	616	—18	—2.9
Net employment taxes.....	325	330	5	1.7

Receipts from the Federal Insurance Contributions Act and the Self-Employment Contributions Act increased in the fiscal year 1957, principally as a result of higher tax rates in connection with the establishment of the Federal disability insurance trust fund. Receipts from the Railroad Retirement Tax Act decreased slightly.

Estate and gift taxes.—Receipts from estate and gift taxes amounted to \$1,378 million in 1957, an increase of \$207 million over the \$1,171 million received from this source in 1956.

Customs.—Customs receipts increased by \$50 million to \$754 million in 1957.

Miscellaneous receipts.—Miscellaneous receipts declined to \$2,749 million in 1957. The drop of \$258 million from the \$3,006 million received in 1956 was principally accounted for by smaller receipts from rents of Outer Continental Shelf lands and smaller receipts from the sale of surplus property.

Refunds of receipts.—Refunds of receipts increased \$233 million to \$3,917 million in 1957. The increase over the \$3,684 million refunded in 1956 was mainly accounted for by an increase in individual income tax refunds.

ESTIMATES OF RECEIPTS IN 1958 AND 1959

The Secretary of the Treasury is required each year to prepare and submit in his annual report to Congress estimates of the public revenue for the current fiscal year and for the fiscal year next ensuing (act of February 26, 1907 (5 U. S. C. 265)).

The estimates of receipts from taxes and customs for the current and ensuing fiscal years are prepared in December of each year by the Treasury Department. In general, the estimates of miscellaneous receipts are prepared by the agencies depositing the receipts in the Treasury.

The receipts estimates are based on the assumption that business activity will resume expansion in 1958. It is also assumed for the fiscal year 1959 that legislation will be enacted extending tax rates at their present levels for a year beyond July 1, 1958, as recommended by the President.

Detailed estimates of budget receipts under both existing and proposed legislation are contained in table 8.

Net budget receipts in the fiscal year 1958 are estimated to be \$72,400 million, an increase of \$1,371 million over actual receipts of \$71,029 million in 1957. A further rise of \$2,000 million to \$74,400 million is expected for 1959.

Fiscal year 1958

Actual receipts in 1957 and estimated receipts in 1958 are compared by major sources in the following table. The amounts shown are the net amounts after deductions of refunds and transfers to trust funds and therefore differ from the amounts shown in table 8 which are on a gross basis.

Source	1957 actual	1958 estimate	Increase, or de- crease (—), 1958 over 1957
In millions of dollars			
Individual income taxes.....	35,620	37,200	1,580
Corporation income taxes.....	21,167	20,385	—782
Excise taxes.....	9,055	8,898	—157
Employment taxes.....	328	339	11
Estate and gift taxes.....	1,365	1,486	121
Taxes not otherwise classified.....	14	5	—9
Customs.....	735	765	30
Miscellaneous receipts.....	2,746	3,322	576
Net budget receipts.....	71,029	72,400	1,371

Receipts from the most important revenue source, the individual income tax, are estimated to increase in 1958 by a substantial amount. A large increase is also estimated for miscellaneous receipts which consist almost entirely of nontax revenues. Offsetting these and other smaller increases are estimated declines of 4 percent for corporation income taxes and 2 percent for net excise taxes (after transfers to the highway trust fund).

Individual income taxes.—The yield from this source on a gross and net basis is shown in the following table.

Source	1957 actual	1958 estimate	Increase 1958 over 1957
In millions of dollars			
Individual income taxes:			
Withheld.....	26,728	28,200	1,472
Other.....	12,302	12,600	298
Gross individual income taxes.....	39,030	40,800	1,770
Less refunds.....	3,410	3,600	190
Net individual income taxes.....	35,620	37,200	1,580

The increase in individual income taxes results from the higher levels of income affecting fiscal year 1958 receipts.

Corporation income taxes.—Corporation receipts on a gross and net basis are shown in the following table.

Source	1957 actual	1958 estimate	Increase, or de- crease (—), 1958 over 1957
In millions of dollars			
Corporation income taxes.....	21,531	20,800	—731
Less refunds.....	364	415	51
Net corporation income taxes.....	21,167	20,385	—782

The decline in corporation tax receipts reflects an estimate of lower corporation profits in the calendar year 1957 than in 1956 and an

irregularity in the flow of corporation receipts that raised the fiscal year 1957 total in comparison with those estimated for 1958.

Excise taxes.—Receipts from this source are listed in the table which follows.

Source	1957 actual	1958 estimate	Increase, or de- crease (—), 1958 over 1957
In millions of dollars			
Alcohol taxes.....	2,973	3,036	63
Tobacco taxes.....	1,674	1,735	61
Taxes on documents, other instruments, and playing cards.....	108	112	4
Manufacturers' excise taxes.....	3,762	4,184	422
Retailers' excise taxes.....	336	355	19
Miscellaneous excise taxes.....	1,719	1,770	51
Undistributed depository receipts and unapplied collections.....	66	-----	-66
Gross excise taxes.....	10,638	11,192	554
Deduct:			
Refunds of receipts.....	103	174	71
Transfer to highway trust fund.....	1,479	2,120	641
Net excise taxes.....	9,055	8,898	-157

Gross excise taxes in 1958 are estimated to increase to \$11,192 million from actual receipts of \$10,638 million in 1957. The full year effect of increased and new taxes under the Highway Revenue Act of 1956 (26 U. S. C. 4426, 4481), as compared with the part year effect in 1957, together with estimated higher levels of taxable goods and services, is responsible for the estimated rise in gross receipts. All major excise tax sources are expected to increase with the manufacturers' taxes showing the largest advances. Receipts from the gasoline tax furnish almost half of the increase shown for this group.

Although gross excise taxes are estimated to increase \$554 million in 1958, a decline of \$157 million is estimated for net excise taxes. Transfers of tax receipts to the highway trust fund will increase in 1958, not only because of increases in the revenue yields of the taxes transferred, but also because transfers of both increased or new taxes and taxes in effect prior to the act will occur on a full year basis in 1958. Refunds will also increase because of the gasoline tax refund provision of the act.

Employment taxes.—The yield of the employment taxes is shown in the following table.

Source	1957 actual	1958 estimate	Increase, 1958 over 1957
In millions of dollars			
Federal Insurance Contributions Act and Self-Employment Contributions Act.....	6,634	7,763	1,129
Railroad Retirement Tax Act.....	616	620	4
Federal Unemployment Tax Act.....	330	342	12
Gross employment taxes.....	7,581	8,725	1,144
Deduct:			
Refunds of receipts.....	3	3	
Transfer to Federal old-age and survivors insurance trust fund.....	6,301	6,900	599
Transfer to Federal disability insurance trust fund.....	333	863	530
Transfer to railroad retirement account.....	616	620	4
Net employment taxes.....	328	339	11

All employment taxes are expected to increase in fiscal 1958. Higher levels of taxable wages and a full year effect of the higher rates enacted to finance the Federal disability insurance trust fund are primarily responsible.

Estate and gift taxes.—The yield from estate and gift taxes on a gross and net basis is shown in the following table.

Source	1957 actual	1958 estimate	Increase, 1958 over 1957
In millions of dollars			
Estate and gift taxes.....	1,378	1,500	122
Less refunds.....	13	14	1
Net estate and gift taxes.....	1,365	1,486	121

Higher asset valuation is responsible for the estimated rise in these receipts in the fiscal year 1958.

Customs.—The yield of receipts from this source on a gross and net basis is shown in the table which follows.

Source	1957 actual	1958 estimate	Increase, 1958 over 1957
In millions of dollars			
Customs.....	754	785	31
Less refunds.....	20	20	
Net customs.....	735	765	30

The estimated annual increase in customs receipts for the fiscal year 1958 is expected to be concentrated mainly in the first half of the year.

Miscellaneous receipts.—Receipts from this source on a gross and net basis are shown in the following table.

Source	1957 actual	1958 estimate	Increase, 1958 over 1957
	In millions of dollars		
Miscellaneous receipts.....	2,749	3,325	576
Less refunds.....	3	3	
Net miscellaneous receipts.....	2,746	3,322	576

Miscellaneous receipts are estimated to increase substantially in the fiscal year 1958. Interest payments by Government enterprises and foreign countries, rents and royalties on the Outer Continental Shelf, and larger deposits by the Federal Reserve Board are primarily responsible.

Fiscal year 1959

Estimated net receipts in 1958 and 1959 are compared by major sources in the following table.

Source	1958 estimate	1959 estimate	Increase, 1959 over 1958
	In millions of dollars		
Individual income taxes.....	37,200	38,500	1,300
Corporation income taxes.....	20,385	20,490	15
Excise taxes.....	8,898	9,280	382
Employment taxes.....	339	347	8
Estate and gift taxes.....	1,486	1,570	84
Taxes not otherwise classified.....	5	5	
Customs.....	765	789	15
Miscellaneous receipts.....	3,322	3,518	196
Net budget receipts.....	72,400	74,400	2,000

Receipts are estimated to increase \$2,000 million in the fiscal year 1959 as compared with 1958. Major increases are estimated to occur in receipts from the individual income taxes and from excise taxes. Other receipt sources are expected to show small gains or to remain virtually unchanged.

Individual income taxes.—Receipts from the individual income taxes on a gross and net basis are as follows:

Source	1958 estimate	1959 estimate	Increase, 1959 over 1958
	In millions of dollars		
Individual income taxes:			
Withheld.....	28,200	29,400	1,200
Other.....	12,600	12,900	300
Gross individual income taxes.....	40,800	42,300	1,500
Less refunds.....	3,600	3,800	200
Net individual income taxes.....	37,200	38,500	1,300

An expected rise in personal income accounts for the increased receipts from individual income taxes.

Corporation income taxes.—Receipts from this source on a gross and net basis are shown in the following table.

Source	1958 estimate	1959 estimate	Increase, 1959 over 1958
	In millions of dollars		
Corporation income taxes.....	20,800	20,815	15
Less refunds.....	415	415	-----
Net corporation income taxes.....	20,385	20,400	15

Virtually unchanged receipts of corporation income taxes from fiscal year 1958 to 1959 reflect the assumption that corporate profits will be about the same in calendar year 1958 as in 1957. Although corporate profits declined in the latter part of 1957, they are expected to improve and average for the whole of 1958 at about the same level as in the calendar year 1957.

Excise taxes.—Receipts from this source, by major groups, are listed in the following table.

Source	1958 estimate	1959 estimate	Increase, 1959 over 1958
	In millions of dollars		
Alcohol taxes.....	3,036	3,098	62
Tobacco taxes.....	1,735	1,780	45
Taxes on documents, other instruments, and playing cards.....	112	112	-----
Manufacturers' excise taxes.....	4,184	4,418	234
Retailers' excise taxes.....	355	367	12
Miscellaneous excise taxes.....	1,770	1,858	88
Gross excise taxes.....	11,192	11,633	441
Deduct:			
Refunds of receipts.....	174	189	15
Transfer to highway trust fund.....	2,120	2,164	44
Net excise taxes.....	8,898	9,280	382

Excise taxes under proposed legislation are estimated to increase in 1959 on both a gross and a net basis. Expanded business activity and increased consumer incomes are estimated for 1959 and these are reflected in advances throughout the excise tax group.

These estimated increases also reflect enactment of legislation (1) extending existing excise tax rates for another year and (2) providing a new tax of 3½ cents a gallon on jet fuels and an increase in the existing tax rate on aviation gasoline to 3½ cents from the present 2 cents. Receipts from taxes on aviation gasoline and tires are presently transferred into the highway trust fund; it is also proposed that starting in 1959, receipts from aviation gasoline and tires be retained in general receipts.

Employment taxes.—The yield of the employment taxes is shown in the following table.

Source	1958 estimate	1959 estimate	Increase, 1959 over 1958
In millions of dollars			
Federal Insurance Contributions Act and Self-Employment Contributions Act.....	7,763	7,988	225
Railroad Retirement Tax Act.....	620	625	5
Federal Unemployment Tax Act.....	342	350	8
Gross employment taxes.....	8,725	8,963	238
Deduct:			
Refunds of receipts.....	3	3	
Transfer to Federal old-age and survivors insurance trust fund.....	6,900	7,100	200
Transfer to Federal disability insurance trust fund.....	863	888	25
Transfer to railroad retirement account.....	620	625	5
Net employment taxes.....	339	347	8

All employment taxes are estimated to increase in fiscal 1959 as a result of higher levels of taxable wages.

Estate and gift taxes.—Receipts from this source are shown in the following table.

Source	1958 estimate	1959 estimate	Increase, 1959 over 1958
In millions of dollars			
Estate and gift taxes.....	1,500	1,585	85
Less refunds.....	14	15	1
Net estate and gift taxes.....	1,486	1,570	84

An expected rise in asset valuation accounts for the estimated increase in receipts in the fiscal year 1959.

Customs.—Receipts from this source on a gross and net basis are shown in the following table.

Source	1958 estimate	1959 estimate	Increase, 1959 over 1958
	In millions of dollars		
Customs.....	785	800	15
Less refunds.....	20	20	-----
Net customs.....	765	780	15

An estimated rise in business activity is responsible for the expected increase in customs receipts.

Miscellaneous receipts.—Receipts from this source on a gross and net basis are shown in the following table.

Source	1958 estimate	1959 estimate	Increase, 1959 over 1958
	In millions of dollars		
Miscellaneous receipts.....	3,325	3,521	196
Less refunds.....	3	3	-----
Net miscellaneous receipts.....	3,322	3,518	196

The estimated increase of \$196 million in miscellaneous receipts is attributable for the most part to larger collections of principal and interest payments on loans.

BUDGET EXPENDITURES IN 1957

For the fiscal year 1957 the net budget expenditures were \$69.4 billion, or \$2.9 billion more than in the preceding fiscal year. The following table gives comparative annual budget expenditure figures, beginning with an average of 1949–50, the two fiscal years preceding the Korean action, classified under major functional categories.

Fiscal year	Major national security ¹	Inter- national affairs and finance	Interest	Veterans' services and benefits	Other ²	Adjustment to daily Treasury statement basis	Total
	In billions of dollars						
1949-50 average-----	13.0	5.4	5.6	6.7	8.6	+0.3	39.6
1951-----	22.4	3.7	5.7	5.3	7.5	— .7	44.1
1952-----	✓ 46.0	✓ .8	5.9	4.9	8.7	— .9	65.4
1953-----	✓ 51.8	✓ .7	6.6	4.3	10.8	-----	74.3
1954-----	✓ 47.9	✓ .8	6.5	4.3	8.4	-----	67.8
1955-----	✓ 42.1	✓ .7	6.4	4.5	10.9	-----	64.6
1956-----	✓ 41.8	✓ .7	6.8	4.8	12.4	-----	66.5
1957-----	44.4	.8	7.3	4.8	12.1	-----	69.4

NOTE.—The classification in this table is taken from the 1959 Budget document. The figures beginning with 1953 are on the basis of the *Monthly Statement of Receipts and Expenditures of the United States Government* (see "Bases of Tables"). Further details will be found in the tables section of this report.

¹ Revised for change in classification.

² Includes, principally, military functions of the Defense Department, Mutual defense military assistance, Atomic Energy Commission, acquisition of strategic and critical materials under the General Services Administration, and defense production expansion.

² Functional breakdown shown in the accompanying table.

The cost of major national security increased to \$44.4 billion, which accounts for \$2.6 billion of the total increase. This increase in major national security is represented by increased expenditures of the military services in the amount of \$2.6 billion and the development and control of atomic energy in the amount of \$0.3 billion, partly offset by decreased expenditures for mutual defense assistance in the amount of \$0.3 billion, and for stockpiling and defense production expansion in the amount of \$0.1 billion. The increased expenditures of the military services consisted of \$1.6 billion for Air Force defense, \$0.4 billion for Army defense, and \$0.7 billion for naval defense. Expenditures for international affairs and finance show increases for economic and technical development, foreign information and exchange activities, and the conduct of foreign affairs amounting to \$0.2 billion. Interest expenditures, all of which related to public debt obligations except \$63 million, rose \$0.5 billion from those in 1956, reflecting the general rise in money rates. Veterans' services and benefits did not change materially over the previous year, although the various programs showed nominal increases and decreases.

Other programed expenditures of the Government, as identified in the table below, show nominal increases and decreases as follows: Under "Labor and welfare" the grants and other assistance for health, education, and welfare increased by \$0.2 billion; under "Agriculture and agricultural resources" the price support program decreased by \$1.0 billion which was offset by increased payments of \$0.7 billion under the soil bank and other agricultural programs for a net decrease of \$0.3 billion; under "Natural resources" the expenditures for conservation and development increased by \$0.2 billion; under "Commerce and housing" a reduction of \$0.6 billion represents primarily the classification of Federal highway expenditures for 1957 as trust

fund transactions; and under "General government" the increase of \$0.2 billion is due principally to the Federal payment of \$0.5 billion to the civil service retirement and disability fund, partially offset by reduced expenditures for other functions.

Budget expenditures—other

[In billions of dollars]

Fiscal year	Labor and welfare	Agriculture and agricultural resources	Natural resources	Commerce and housing	General government	Total

TRUST ACCOUNT AND OTHER TRANSACTIONS

In addition to the foregoing transactions of Federal agencies relating to budgetary receipts and expenditures, there are other financial activities which affect the cash balance of the Treasurer of the United States as well as the cash held outside the Treasurer's account. These transactions do not affect the Federal budget and are classified in Treasury reports under: Trust and deposit fund transactions; net investments by Government agencies in public debt securities; or net sales or redemptions of obligations of Government agencies in the market. Data as to monthly and fiscal year transactions in these categories will be found in the tables section of this report. For the fiscal year 1957 the aggregate of these transactions resulted in an excess of receipts of \$195 million, as compared with an excess of expenditures of \$194 million in 1956.

Trust and deposit fund accounts.—These accounts are explained on p. 331, under "Description of Accounts Relating to Cash Operations: Nonbudget accounts." The trust funds are maintained to account for moneys held by the Government for use in carrying out programs in accordance with trust agreements or statutes. Deposit fund accounts are used to account for moneys held by the Government as banker or agent for others, or to account for funds held in suspense temporarily and later refunded or paid into some other account of the Government. Receipts and expenditures of most of the trust funds are reported on a gross basis, although certain trust accounts operate as revolving or working funds and are reported net. Deposit fund transactions are reported net. Major trust funds include the Federal old-age and survivors insurance trust fund, the unemployment trust fund, the veterans' insurance funds, the civil service retirement and disability fund, and the highway trust fund. During the fiscal year 1957 the aggregate of transactions in trust and deposit fund accounts resulted in an excess of receipts in the amount of \$1,409 million, as compared with \$2,250 million in 1956.

Investments of Government agencies in public debt securities (net).—These transactions are shown separately since they represent an exchange of assets and have no effect on operating programs of the fund involved. The investments provide interest earnings for the trust and investment accounts until the moneys are needed to meet the cash requirements of the programs. During the fiscal year 1957 the aggregate of investment transactions showed net purchases of public debt and guaranteed securities amounting to \$2,300 million as compared with \$2,617 million in 1956. These figures are exclusive of net purchases by Government-sponsored enterprises amounting to \$39 million in 1957 and \$548 million in 1956.

Sales and redemptions of obligations of Government agencies in market (net).—These transactions are also stated separately, representing financing operations between the Government agencies and the public. The transactions are reported at the par value of the securities and are classified as to those guaranteed and those not guaranteed by the United States. Currently, these financing operations are confined to nonguaranteed securities, except for debentures issued by the Federal Housing Administration in exchange for defaulted mortgages, and redemptions of matured guaranteed obligations still outstanding in nominal amounts. During the fiscal year 1957 the aggregate of these transactions showed net sales of obligations of Government agencies in the amount of \$1,085 million as compared with \$173 million in 1956. These figures are exclusive of net sales of obligations of Government-sponsored enterprises amounting to \$86 million in 1957 and \$872 million in 1956.

ACCOUNT OF THE TREASURER OF THE UNITED STATES

The assets held in the account of the Treasurer of the United States consist of gold, silver, paper currency, coin, unclassified collection items, and deposit balances in the Federal Reserve Banks and other depository banks. The liabilities consist of gold and silver certificates outstanding, gold reserve, Treasurer's checks outstanding, balances to the credit of the Board of Trustees of the Postal Savings System, and uncollected items, exchanges, etc. The difference between the assets and liabilities constitutes the balance in the account of the Treasurer. The principal components of this balance represent the Treasury's major operating funds, consisting of the gold balance, available funds on deposit in the Federal Reserve Banks, and the balances in the Treasury tax and loan accounts with special depositories. Details of assets and liabilities are shown under the caption "Account of the Treasurer of the United States" in the *Daily Statement of the United States Treasury*. The balance in the Treasurer's account at the close of the fiscal year 1957 amounted to \$5,590 million, a decrease of \$956 million during the fiscal year.

The net change in the balance in the "Account of the Treasurer of the United States" during the fiscal year, on the basis of the *Daily Statement of the United States Treasury*, is accounted for as follows:

		<i>(In millions of dollars)</i>	
Balance June 30, 1956.....			6, 546
Add:			
Net deposits.....	81, 875		
Certain public debt redemptions included as cash withdrawals below ¹	2, 243	84, 118	
Total.....			90, 664
Deduct:			
Cash withdrawals.....	79, 183		
Investments of Government agencies in public debt securities, net.....	2, 460		
Sales of obligations of Government agencies in market, net.....	-743		
Accrual of discount on savings bonds and Treasury bills.....	1, 951		
Net decrease in gross public debt.....	2, 224	85, 074	
Balance June 30, 1957.....			5, 590

¹ Represents principally discount included in savings bond redemptions.

A comparative analysis of the assets and liabilities in the accounts of the Treasurer of the United States as of June 30, 1956, and June 30, 1957, is shown in table 50.

The balance in the Treasurer's account during the fiscal year ranged from a low of \$2,112 million on January 16, 1957, to a high of \$7,831 million on March 28, 1957.

PUBLIC DEBT OPERATIONS AND OWNERSHIP OF FEDERAL SECURITIES

A net decrease of \$2.2 billion in the public debt and guaranteed obligations during the fiscal year reduced the total Federal debt outstanding to \$270.6 billion on June 30, 1957. This brought the total decline in the debt during the past two fiscal years to \$3.8 billion. The reductions achieved in these two years were the first since the fiscal year 1951.

Interest-bearing public issues outstanding decreased by \$3.1 billion. This was accounted for entirely by the decline of \$3.9 billion in non-marketable securities, offset slightly by an increase of \$0.8 billion in marketable securities. Special issues to Government investment accounts also were increased by \$1.7 billion. The small decreases in matured debt and in debt bearing no interest accounted for the remainder of the net change.

THE PUBLIC DEBT

CHART 3.

*Excluding Victory Loan proceeds used to repay debt in 1946.

A summary of changes in the debt during the year is shown in the accompanying table. Changes in the level of the debt outstanding since 1916 are illustrated in chart 3.

Class of debt	June 30, 1956	June 30, 1957	Increase, or decrease (—)
In billions of dollars			
Public debt:			
Interest-bearing:			
Public issues:

Total public debt and guaranteed obligations	272.8	270.6	-2.2

*Less than \$50 million.

Progress toward debt management objectives

The Treasury continued in 1957 to shape its debt management policy so as to make a maximum contribution to economic stability and growth. Since January 1953 continued progress has been made in improving the maturity structure of the debt as well as in distribut-

ing the ownership of the debt as widely as possible among the various investor groups, particularly among nonbank investors.

During the fiscal year 1957 there was a heavy demand for credit throughout the economy, and the Federal Reserve continued its policy of credit restraint in order to bring demand more closely in line with the supply of funds. Credit tightness made the situation unfavorable for the issuance of long-term bonds; the Treasury was successful, however, in placing over \$3 billion of its new marketable offerings in the medium-term area during the year. Treasury offerings in February, in March, and in May included medium-term notes varying in maturity from 3 to 5 years, along with certificates of 1-year or less maturity. These medium-term offerings helped to offset partially the effect of the passage of time, which is always operating to shorten the average length of the marketable debt.

The maturity structure of the debt made it necessary to refund a large volume of maturing obligations during the year. The Treasury was able to reduce the frequency of borrowing operations, however, through a grouping of nearby maturities into single refunding operations. A considerable amount of new borrowing was required, owing to seasonal operating deficits and to cash needs resulting from other factors. Among these were heavy redemptions of savings bonds (particularly Series F, G, J, and K) and a sizable amount of maturing marketable issues turned in for cash during exchange operations. Of importance also were large drawings on the International Monetary Fund by foreign countries and the Treasury's cash pay-off of tax-exempt bonds in September. At the end of the year, approximately \$79 billion of the total marketable debt was in the over-one-year category. The structure of the debt at the end of the 1957 fiscal year is shown in chart 4.

A significant feature of debt ownership changes during the year was the continued substantial liquidation of Government securities by the commercial banking system. As in the previous year this development was associated with heavy demands for private credit. By the close of the fiscal year 1957 commercial bank holdings were down to a little under \$56 billion, the lowest year-end figure since June 1943. Insurance companies and savings banks also continued to liquidate Government securities to help meet the demands of mortgage and corporate financings.

Although individuals reduced their holdings of Governments slightly during 1957, they continued to make up the largest single investor group in the debt ownership structure. In line with the Treasury's policy of encouraging individual ownership, improvements were made in the savings bonds program during the year. The most important step was revision of the terms for Series E and H savings bonds—the

STRUCTURE OF THE PUBLIC DEBT, JUNE 30, 1957

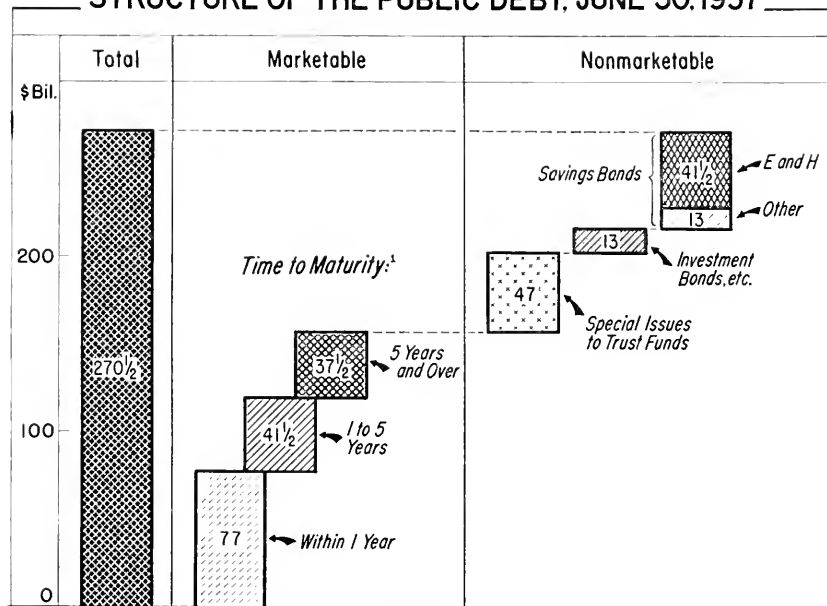

CHART 4.

¹ Callable bonds to earliest call date.

securities which best meet the needs of the small saver. Although these bonds are sold primarily on their merits of convenience, liquidity, redemption at the option of the holder, and protection from market price fluctuations, the Treasury nevertheless believed that new buyers of E and H bonds should share in the higher returns available on other forms of savings. Interest rates on both series were raised accordingly from 3 percent to 3 1/4 percent for bonds issued on or after February 1, 1957 (after Congress had approved an amendment to the Second Liberty Bond Act, as amended, to permit the higher rate), and at the same time interim yields on new bonds during the early years of ownership were increased. The sale of Series J and K savings bonds, primarily bought by larger investors, was discontinued on April 30, 1957. Detailed information on revisions in the savings bonds program during 1957 may be found in exhibits 4 through 7.

An account of the operations in the public debt and changes in the ownership of the Federal securities during the year is given in the pages immediately following. Further detail on the debt and its ownership is given in the exhibits and tables sections of the report.

PUBLIC DEBT OPERATIONS

As noted previously, the demand for long-term Government bonds was not sufficient to warrant further long-term offerings during the

fiscal year. In the first two major financings of the year, those of July and December 1956, only securities in the one-year area were offered. In the exchange offerings of February, however, holders of maturing securities were offered a choice between a one-year certificate and a note maturing in $3\frac{3}{4}$ years. The same choice was presented to investors in the cash offering of March. The May exchange offering again included a medium-term note, this time with a maturity of 4 years $9\frac{1}{2}$ months. In all, a little over \$2 billion of the medium-term notes were issued in exchange for maturing securities, and about \$1 billion of the notes were issued for cash. Optional exchange offerings into a 1-year or a longer term security have characterized most of the Treasury's market refinancing operations since the beginning of the calendar year 1953.

Seasonal needs in the July–December deficit period were met through the issuance of tax anticipation certificates, bills of the tax anticipation series, and special bills. This borrowing was repaid out of heavy tax receipts the following spring. The seasonal borrowing brought the public debt to a high point for the year in late November when debt subject to limit was within \$1.3 billion of the temporary statutory limit of \$278 billion. A comparison of the statutory debt limit with the public debt outstanding subject to the limit since June 30, 1953, is shown in chart 5.

CHART 5.

An act approved July 9, 1956, had provided for a temporary increase of \$3 billion in the \$275 billion statutory limit on outstanding debt in effect at that time. The increase was made effective for the period beginning July 1, 1956, and ending June 30, 1957. For further information on the statutory limit on the public debt and guaranteed obligations as of June 30, 1957, see table 26, and for earlier years, see table 27.

The Treasury paid off in cash approximately \$1.0 billion of partially tax-exempt 2½ percent bonds of 1956–59 which were called for redemption on September 15, 1956. This was in line with the Treasury's policy of making use of every opportunity to retire securities with tax-exempt features.

The following tables summarize the financing operations during the fiscal year and show the results of the public offerings of marketable notes, certificates of indebtedness, and bills.

Public offerings of marketable Treasury securities excluding refinancing of regular weekly bills, fiscal year 1957

¹ Including amounts redeemed for taxes in the case of tax anticipation issues.

² These special bills were replaced by tax anticipation bills at their maturity.

In handling its regular weekly offering of 91-day Treasury bills during the year, the Treasury raised \$1.1 billion of new cash by increasing the level of weekly offerings for seven consecutive weeks. The issues of January 31, February 7, and February 14 exceeded the maturities of those dates by approximately \$100 million a week while the issues of February 21, February 28, March 7, and March 14 exceeded the respective maturities by approximately \$200 million a week. The other weekly issues were refunded by new bills in approximately equivalent amounts. The thirteen issues of regular weekly bills outstanding at the close of the fiscal year 1957 totaled \$21.9 billion, as compared with \$20.8 billion at the close of the previous fiscal year.

To raise cash for current requirements, the Treasury also issued 91-day special bills in October and November 1956, amounting to

\$3.4 billion. Upon maturity in January and February 1957, these were refunded into tax anticipation bills, with both issues maturing on June 24, 1957. In addition, \$1.0 billion 95-day tax anticipation bills were issued on December 17, 1956, maturing March 22, 1957, and \$1.5 billion 119-day tax anticipation bills were issued on May 27, 1957, maturing September 23, 1957. All tax anticipation bills were acceptable at par in payment of taxes on the fifteenth of the month in which they matured. (For additional information on all bill issues see exhibit 3.)

Credit tightness throughout the year was reflected in increased borrowing costs for the Treasury. The average rate on new Treasury bills, for example, ranged from about $2\frac{1}{4}$ percent at the beginning of the year to a high of more than 3% percent in June 1957. The weekly average rates on new bill offerings throughout the year are shown in exhibit 3. The average annual interest rate as computed on the total interest-bearing public debt was 2.730 percent on June 30, 1957, as compared with 2.576 percent a year earlier. (For further detail on the computed annual interest rate by security classes, see table 42.)

The public nonmarketable debt declined \$3.9 billion during the fiscal year. Changes in this category of the debt, by type of security, are shown in the following table.

Class of security	June 30, 1956	June 30, 1957	Increase, or decrease (-)
In billions of dollars			
United States savings bonds:			
Series E	37.9	38.0	0.1
Series F and G	13.5	10.1	-3.4
Series H	3.0	3.5	.5
Series J and K	3.1	3.0	-.1
Subtotal, savings bonds	57.5	54.6	-2.9
Treasury bonds, investment series	12.0	11.1	-.9
Depository bonds3	.2	-.1
Total interest-bearing nonmarketable issues	69.8	66.0	-3.9

The decline of \$0.9 billion in investment series bonds outstanding was due principally to the exchange of the 2¾ percent convertible Series B-1975-80 bonds for marketable 5-year 1½ percent notes. The decline also reflected the direct redemption for cash of approximately \$0.3 billion of 2¾ percent bonds for Treasury investment accounts.

The largest portion of the nonmarketable debt is, of course, in United States savings bonds. The total of all series of interest-bearing savings bonds outstanding at the close of the fiscal year was \$54.6 billion as compared with \$57.5 billion at the close of the previous fiscal year. The decline of almost \$3.0 billion in outstanding savings bonds was due entirely to the large redemption of Series F, G, J, and K savings bonds, both matured and unmatured.

As shown in chart 6, sales of the investment-type Series J and K bonds combined (which replaced the F and G bonds beginning May 1, 1952) have been declining since the fiscal year 1955 while redemptions have been rising. As previously noted, the sale of Series J and K bonds was discontinued on April 30, 1957.

The amount of E and H bonds outstanding (including accrued interest) reached an alltime peak of \$41.5 billion on June 30, 1957, as compared with \$40.9 billion on June 30, 1956. An excess of redemptions of E and H bonds over sales during the fiscal year was more than counter-balanced by the accrual in interest. Throughout the period sales of the smaller denomination E bonds (\$200 or under) continued at record levels, while sales of the larger denomination bonds declined. (For further detail on savings bonds sales by denomination, see table 37.)

The redemptions of savings bonds as a percentage of the total sold, by yearly series, are summarized in the accompanying table. Detailed information on savings bonds from March 1935, when this type of security was first offered, through June 30, 1957, is given in tables 35 through 40.

NOTE.—The percentages shown in this table are proportions of the value of the bonds sold in any calendar year which are redeemed before July 1, of the next calendar year and before July 1 of succeeding calendar years. Both sales and redemptions are taken at maturity value.

¹ Percentages by denominations may be found in table 40.

² Similar detail for Series A through E savings bonds may be found in the 1952 annual report, p. 77.

OWNERSHIP OF FEDERAL SECURITIES

Private nonbank investors held an estimated \$136.2 billion of Federal securities at the end of the fiscal year 1957—one-half of the total debt outstanding. Private nonbank investors include individuals, insurance companies, mutual savings banks, nonfinancial corporations, pension funds, foreign accounts, State and local governments, and nonprofit associations. Commercial banks and Federal Reserve Banks together held \$78.9 billion, representing about 30 percent of the debt. The remaining 20 percent of the debt, \$55.6 billion, was held by Government investment accounts, primarily social security and unemployment trust funds, veterans' insurance funds, and Government retirement funds.

CHART 8.

Private nonbank investors decreased their holdings by \$2.3 billion during the fiscal year. Commercial banks decreased their Federal security portfolios by \$1.2 billion, while the Federal Reserve Bank holdings declined by \$0.7 billion. Ownership of the debt by Federal Government investment accounts increased by \$2.1 billion during the year. The following table presents figures on bank and nonbank ownership, together with pertinent details on the holdings of Federal securities by the various investor classes. Their holdings as of June 30, 1957, are shown in chart 8.

*Ownership of Federal securities by investor classes on selected dates, 1941-1957*¹

¹ Revised.² Gross public debt, and guaranteed obligations of the Federal Government held outside the Treasury.³ Immediate postwar peak of debt.⁴ Includes partnerships and personal trust accounts. Nonprofit institutions and corporate pension trust funds are included under "Miscellaneous investors."⁵ Exclusive of banks and insurance companies.⁶ Includes savings and loan associations, nonprofit institutions, corporate pension trust funds, dealers and brokers, and investments of foreign balances and international accounts in this country.

Individuals' holdings (including personal trust accounts) amounted to \$67.4 billion on June 30, 1957, with savings bonds accounting for nearly three-fourths of this total. Series E and H savings bonds increased \$0.6 billion to a new high of \$41.5 billion. Individuals' holdings of Series F, G, J, and K savings bonds decreased by \$1.8 billion, resulting in a net decline in total savings bonds held by individuals of \$1.2 billion. Individuals' holdings of securities other than savings bonds, principally marketable, after showing a decline in the first half of the year, increased significantly in the second half and were up \$1.1 billion for the year as a whole.

Federal securities held by insurance companies at the end of the fiscal year amounted to \$12.3 billion, a decrease of \$1.0 billion during the year. Life insurance companies accounted for more than \$7.2 billion, or almost 60 percent of total insurance holdings at the end of the year. During 1957 these companies reduced their holdings by

\$0.7 billion in order to provide funds for investment in the increased supply of mortgages and corporate securities. This was a somewhat smaller reduction than the liquidation of \$1.1 billion in the fiscal year 1956.

Fire, casualty, and marine insurance companies held \$5.1 billion of Federal securities on June 30, \$0.3 billion lower than a year earlier. The securities held by these companies are primarily concentrated in issues with a maturity of less than 10 years.

Mutual savings banks' holdings of Federal securities at the end of the fiscal year were \$7.9 billion, \$0.4 billion lower than on June 30, 1956. Like the life insurance companies, mutual savings banks have been increasing their mortgage and corporate securities portfolios since the end of World War II and liquidating some of their holdings of Federal securities to aid in financing these acquisitions.

Average maturity of both life insurance companies' and mutual savings banks' portfolios of Federal securities declined during the course of the year and ended at approximately 8 years to first call or maturity. This was below their prewar averages.

Federal securities held by corporations other than banks and insurance companies decreased by \$1.7 billion during the fiscal year, bringing their holdings down to \$15.7 billion. While outstanding Federal income tax liabilities of these corporations were almost the same in June 1957 as in June 1956, credit conditions continued tight and corporations used more of their available funds to meet current operating needs. This reduced the amount of corporate funds available for short-term investment in Government securities.

Holdings of Federal securities by State and local governments amounted to \$16.9 billion at the close of the fiscal year, an increase of \$1.2 billion over the preceding year. About one-third of the Federal security holdings of these governmental units are in State and local government employee retirement funds.

The holdings of all other private nonbank investors amounted to \$16.1 billion on June 30, 1957, a decrease of \$0.1 billion. Savings and loan associations increased their holdings by \$0.5 billion as they built up their secondary reserves against larger share balances. Corporate pension trusts decreased their holdings of Federal securities by \$0.3 billion, bringing them down to \$2.7 billion at the close of the year. Ownership of Federal securities by foreign and international accounts also declined by \$0.3 billion, bringing the total down to \$7.6 billion on June 30, 1957. Holdings of the remaining classes in this group (nonprofit associations, dealers and brokers, and certain smaller institutional groups), showed very little change during the year.

Government investment accounts increased their holdings of Federal securities by \$2.1 billion during the year. This was less than

the \$3.0 billion increase of the previous fiscal year, and primarily reflected a slower rate of accumulation by the Federal old age and survivors insurance trust fund. Of the \$55.6 billion held by these accounts, \$46.8 billion, or approximately 84 percent, was in the form of special issues held only by these accounts. Details on the ownership of securities by Government investment accounts are shown in table 51.

As already noted, holdings of Federal securities by banks and private nonbank investors decreased during the year. An analysis of the estimated changes in bank versus nonbank ownership of Federal securities during the fiscal year 1957 is shown by type of issue in the following table.

Estimated changes in ownership of Federal securities¹ by type of issue, fiscal year 1957

*Less than \$50 million.

¹ Gross public debt, and guaranteed obligations of the Federal Government held outside the Treasury.

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES OF THE UNITED STATES GOVERNMENT

Corporations and certain other business-type activities of the Government finance their lending and other operations from their own receipts, from capital stock subscriptions or by appropriations, from the sale of their obligations to the public, or from borrowing from the United States Treasury. The Secretary of the Treasury is authorized not only to purchase obligations of many of the agencies, but he is also, under certain circumstances, authorized to approve the terms and conditions of such obligations. Under provisions of the Government Corporation Control Act (31 U. S. C. 868), the obligations of most agencies issued to the public must be approved by the Secretary of the

Treasury; the few agencies which are exempt from this requirement must consult with the Secretary of the Treasury before issuing obligations to the public. Most Government corporations and all other business-type activities are required to maintain their checking accounts with the Treasurer of the United States, although, with the approval of the Secretary of the Treasury, such accounts may be kept with the Federal Reserve Banks or with private banks designated as depositories or fiscal agents of the United States.

Advances by the Treasury

Cash advances during the fiscal year 1957 were made by the Treasury to Government corporations and certain other business-type activities pursuant to statutory authorizations in the amount of \$19,229 million. Repayments and refundings amounted to \$16,550 million, and cancellations authorized by law amounted to \$3,671, resulting in net advances during the year of \$2,679 million. As of June 30, 1957, the outstanding borrowings from the Treasury amounted to \$22,727 million. Detailed information relating to the advances is shown in table 117.

Interest on advances by Treasury

The rates of interest on borrowings from the Treasury, except where fixed by statute, are determined by the Treasury from month to month, taking into account the cost which the Treasury would have to pay to borrow money in the current market, as reflected by prevailing market yields on Government obligations with maturities corresponding to the approximate duration of the advances to be used by the agencies for their programs. A description of the obligations of Government corporations and activities held by the Treasury for borrowing outstanding as of June 30, 1957, together with the applicable rates of interest, is given in table 116.

Borrowing authority and outstanding obligations

The borrowing authority of Government corporations and activities is established by law, and the Secretary of the Treasury is authorized to purchase the obligations of many of the agencies. New authorizations to borrow from the Secretary of the Treasury in the fiscal year 1957 amounted to \$4,747 million and reductions in authorizations were \$178 million, resulting in a net increase in authorizations of \$4,569 million. As of June 30, 1957, the unused borrowing authority of these corporations and activities amounted to \$17,294 million. Table 114 shows the status of the borrowing authority and the outstanding obligations of corporations and activities issued to the Secretary of the Treasury.

Assets, liabilities, and net investment of the United States

Treasury Department Circular No. 966, as supplemented, requires the submission of periodic financial statements by Government corporations and certain other business-type activities, to disclose fully the results of their financial operations. The circular is designed to provide, as completely as may be desirable and practicable, the necessary data regarding the assets, liabilities, and financial operations of such activities. On the basis of reports to the Treasury, as of June 30, 1957, the combined assets were \$89,812 million, the combined liabilities were \$5,317 million, leaving a net of \$84,496 million representing the Government's investment in these agencies. The major assets consisted of inventories, loans, and real properties. The major liability items consisted of accounts payable and obligations issued to the public.

The statements of financial condition of the reporting agencies are published quarterly, while the income and expense statements and the source and application of funds statements are published semiannually in the *Treasury Bulletin*. In this annual report, the combined statement of financial condition as of June 30, 1957, is shown in table 119; the income and expense statement for the fiscal year 1957 is shown in table 120; and the source and application of funds statement for fiscal 1957 is shown in table 121. A comparative statement of assets, liabilities, and net investment is shown in table 118.

Subscriptions to and repayments of capital stock of Government corporations

During the fiscal year 1957 there was a net reduction in the capital stock of Government corporations amounting to \$24.4 million. The principal increases were subscriptions to the Federal Crop Insurance Corporation of \$13 million and Federal National Mortgage Association (secondary market operations) of \$50 million. The principal repayments were \$65 million made by the Reconstruction Finance Corporation and \$13.9 million, by the Federal Savings and Loan Insurance Corporation. Table 113 gives detail relating to the capital stock outstanding and the net changes during the fiscal year.

Other payments to the Treasury by Government corporations, etc.

During the fiscal year 1957, deposits into the Treasury by Government corporations and activities, representing payments of interest, dividends, and other earnings, amounted to \$612 million as compared with \$619 million deposited in the fiscal year 1956. Table 124 gives detailed information concerning such payments into the Treasury.

Guaranteed obligations of Government agencies

With the approval of the Secretary of the Treasury, the Federal Housing Administration issues debentures in exchange for foreclosed

mortgages. Such debentures, guaranteed as to principal and interest by the United States, were issued in the amount of \$72 million and redemptions amounted to \$39 million, showing a net increase of \$33 million for the fiscal year 1957. The amount outstanding on June 30, 1957, was \$106 million. In addition, the nominal amount of \$0.7 million in matured guaranteed securities, representing obligations issued by the Federal Farm Mortgage Corporation and the Home Owners' Loan Corporation, was outstanding on June 30, 1957. Funds for payment of these obligations are on deposit with the Treasurer of the United States. Table 23 gives detailed information relating to these securities.

SECURITIES OWNED BY THE UNITED STATES GOVERNMENT

Various types of securities are held by the Government as a result of its financing of certain Government activities and other programs authorized by the Congress. The principal classes of securities consist of capital stock, bonds, and notes of Government corporations and certain other business-type activities. Table 113 gives further information relating to these securities. Securities evidencing loans to home owners, farmers, railroads, foreign governments, etc., are summarized in table 119, Part C. The amounts of securities representing mortgages acquired from the sale of real estate and other property, and the securities evidencing United States participation in the International Bank for Reconstruction and Development, the International Monetary Fund, and other international organizations are shown in table 119, Part D, in summary. The amounts of these securities by agencies holding such securities were published in the *Treasury Bulletin* of December 1957.

TAXATION DEVELOPMENTS

The President in his January 1957 Budget Message reaffirmed his concern with the high level of tax rates and the importance of reducing taxes further as soon as possible. "It is my firm belief that tax rates are still too high," he said, "and that we should look forward to further tax reductions as soon as they can be accomplished within a sound budgetary policy. Reductions in tax rates would give relief to taxpayers and would also release funds for the activity and investment necessary for sustained economic growth through private initiative. However, the reduction of tax rates must give way under present circumstances to the cost of meeting our urgent national responsibilities."

In the fiscal year 1957, the budget was balanced for the second consecutive year. Receipts exceeded expenditures in fiscal 1956 and 1957 by \$1.6 billion each, and a balanced budget was proposed by the

President for fiscal 1958. It was the President's objective to safeguard this budgetary balance as a contribution to sound national economic growth and assistance in restraining the inflationary pressures which have developed with widespread national prosperity. Moreover, the President wished to hold the line against preferential tax reduction, group by group, because that would delay the time when general tax relief could be given to every taxpayer in the United States.

Corporate and excise rate extensions

In conformity with his fiscal policy, the President requested continuation of existing excise tax rates on tobacco, liquor, and automobiles, scheduled to be reduced on April 1, 1957, under existing law. He recommended also continuation of the existing corporate tax rates for another year. Without these extensions, fiscal 1958 budget receipts would have fallen short of expenditures by approximately \$1 billion. "It would be neither fair nor appropriate," the President said, "to allow excise and corporate tax reductions to be made at a time when a general tax reduction cannot be undertaken." In testifying before the Finance and Ways and Means Committees in support of these tax rate extensions, former Secretary Humphrey noted that "after two years of balanced budgets as a result of the continued hard work of the Congress and the administration, it would be inexcusable to slip back into deficit financing for next year." (See exhibit 12.)

Legislation to extend the corporation income and the three groups of excise tax rates to June 30, 1958, was passed by the House of Representatives on March 14, the Senate on March 27, and approved by the President on March 29, 1957 (Public Law 85-12). The full year revenue effect of these extensions is estimated to be \$3,052 million of which \$2,200 million is accounted for by the corporation income tax, \$231 million by the alcohol taxes, \$185 million by the cigarette tax, and \$436 million by the automotive excises. The cumulative revenue effect of the 15-month extensions was estimated to be \$3,824 million, with \$186 million falling into fiscal 1957, \$2,496 million into 1958, and \$1,142 million into 1959.

Technical and administrative aspects of excises

During the fiscal year further consideration was given to technical and administrative provisions of the Revenue Code relating to excise taxes. A complete review of this general area of the Code had been deferred at the time of the 1954 revenue revision and the Committee on Ways and Means subsequently authorized and directed the appointment of a special subcommittee to make a study of these problems.

On the basis of public hearings held during fiscal year 1956 and legislative suggestions developed by the Treasury and congressional

staffs, the subcommittee approved specific recommendations on technical excise revision for the consideration of the full Committee on Ways and Means, which culminated in H. R. 12298. The Committee held additional public hearings in November and December 1956, directed both to the content of H. R. 12298 and phases of excise taxation not covered by it. After organization of the 85th Congress, the Subcommittee on Excise Taxes was reconstituted and the bill H. R. 12298 reexamined in light of the additional testimony received from industry and the general public and the suggestions for revisions and deletions suggested by the Treasury. The Department cooperated in the development of this legislation but opposed a number of the items in the bill either because of tax principle or on account of the revenue loss involved. An excise revision bill was subsequently reintroduced in the new Congress as H. R. 7125, the Excise Tax Technical Changes Act of 1957, reported favorably by the Committee on Ways and Means on May 24, 1957, and passed by the House of Representatives on June 20, 1957.

Technical revision of income, estate, and gift tax provisions

The Department also worked with a subcommittee on Internal Revenue Taxation of the Committee on Ways and Means which is developing legislation to correct unintended benefits and hardships in provisions of the Internal Revenue Code passed over at the time of the 1954 revenue revision or which require further tightening. The subcommittee held public hearings in November 1956 and was supplied with the results of Treasury studies on a number of problems.

The Committee's findings are incorporated in H. R. 8381, the Technical Amendments Act of 1957, which the Committee on Ways and Means reported favorably on July 9, 1957. The bill would amend numerous sections of the Revenue Code, including, among others, those pertaining to the retirement income credit, dealers in tax-exempt securities, nonbusiness bad debts, charitable contributions, amortizable bond premium, net operating loss deduction, and the taxation of annuities.

Special amortization

Further progress was made in cutting back the special amortization program adopted in 1950 in connection with the Korean emergency. While special amortization may have served a useful purpose during that emergency, the Department regards it as a dangerous type of artificial stimulus which should be discontinued as rapidly as defense requirements permit. Although some degree of defense mobilization on a substantial scale may be essential for years to come, the vigorous growth of our free economy will be better served if expansion of major

productive facilities comes as an integral part of long-range economic growth rather than the result of artificial stimulus.

Between November 1950 and March 20, 1957, almost 22,000 certificates were issued under the five-year amortization program, involving total project costs of \$39 billion. The five-year writeoff was made available to almost \$23 billion or about 60 percent of these costs. The revenue lag from certificates issued through 1956 probably exceeds \$5 billion during these early years. Although these revenues will be substantially recovered in the years after 1960, they will ultimately involve an interest cost to the Government of about \$3 billion on that portion of the public debt which could be repaid if the taxes associated with these amortization certificates were not deferred.

In view of these considerations, the Department supported enactment of the provisions of S. 1795 (amending H. R. 232) to restrict the future issuance of certificates for rapid amortization to emergency facilities devoted to producing new or specialized defense items and to provide research, developmental, or experimental services for the use of the Department of Defense or Atomic Energy Commission in the national defense program. (See exhibits 14 and 15.) These provisions, together with that for the complete termination of the program as of December 31, 1959, were enacted by the Congress and approved by the President on August 26, 1957 (Public Law 85-165).

Other taxation developments

The taxation of small business was given further consideration. Although small business is benefiting materially from the tax reductions and revisions of the Revenue Code enacted during the present administration, the President recommended that the Congress take additional action to broaden the opportunities to small business by enacting those tax relief proposals of the Cabinet Committee on Small Business "which will give help with a minimum loss of revenue." He reviewed these suggestions in light of the budget situation in a letter to Chairman Cooper of the Committee on Ways and Means in July 1957 and suggested in addition that original investors in small businesses be permitted to deduct, for income tax purposes, a limited amount of losses realized on such stock investments. (See exhibit 16.)

During the first session of the 85th Congress several hundred tax bills were introduced, some providing tax relief for restricted groups of taxpayers, others providing large-scale tax reduction. In response to requests from the committees of Congress the Treasury prepared analyses and stated its position on many of these legislative items. In conformity with the policy of the President, the Department consistently advised against enactment of legislation which would afford special relief to limited groups of taxpayers, thereby postponing the time when tax reduction might be provided to all taxpayers.

During the past congressional session a number of bills were enacted to amend the revenue laws. Public Law 85-74, approved June 29, 1957, increased to 2.5 cents per mile the mileage rate limit on fares eligible for the transportation tax exemption allowed servicemen on official leave, furlough, or pass. Public Law 85-27, approved April 25, 1957, continued until June 30, 1958, the suspension of duties and import taxes on metal scrap. Public Law 85-211, approved August 28, 1957, provided for duty-free entry of samples and advertising material and films to implement international conventions. Public Law 85-235, approved August 30, 1957, suspended until June 30, 1960, the three-cent coconut oil tax on imported tanning material extracts.

A number of bills were enacted also affecting the old age, survivors, and disability insurance systems. Public Law 85-109, approved July 17, 1957, extended through June 30, 1958, the time for filing an application for preservation of insurance rights. Public Law 85-226, approved August 30, 1957, authorized interstate instrumentalities, and Public Law 85-227, approved August 30, 1957, authorized California, Connecticut, Rhode Island, and Minnesota to divide retirement systems for social security purposes. Public Law 85-229, approved August 30, 1957, amended provisions relating to social security coverage for certain State and local employees and Public Law 85-238, approved August 30, 1957, amended provisions relating to benefits for alien survivors of certain members of the Armed Forces. Public Law 85-239, approved August 30, 1957, extended the time within which a minister may elect social security coverage as a self-employed individual and included in the net earnings of ministers electing coverage the rental value of a parsonage and the value of meals and lodgings furnished them for the convenience of the employer.

International tax developments

Efforts were accelerated during the year to initiate and conclude bilateral tax conventions to eliminate or mitigate international double taxation and to remove other tax impediments to the international movement of private capital and skilled personnel. These tax conventions establish rules for the allocation of income between the signatory countries, provide for credits by one country for income taxes paid to the other country on income derived within its borders, provide tax exemption by one country under certain circumstances to income derived by residents of the other, and establish the basis for consultation between tax authorities to adjust excessive tax burdens arising out of differences in tax concepts and administrative practices.

These more or less traditional elements of tax treaties entered into by the United States and other countries have been supplemented by a

new principle. At a Meeting of Ministers of Finance and Economy, in Rio de Janeiro in 1954, the Secretary of the Treasury announced that in connection with bilateral tax agreements the United States would consider recognition, with appropriate safeguards, of foreign tax incentive laws to promote private investment. Such recognition was provided for the first time in a convention with Pakistan, signed July 1, 1957, on which final action by the Senate had not been taken when the first session of the 85th Congress ended.

Instruments of ratification of income tax and estate tax conventions were exchanged with Italy and became effective on January 1 and October 26, 1956, respectively. Instruments of ratification of an income tax convention with Honduras were also exchanged, bringing into operation the first treaty with a Latin-American country, on January 1, 1957. The Senate gave its consent, and the President ratified an income tax convention with Austria, a supplementary convention modifying the income tax treaty with Japan, and a supplementary convention modifying the income tax treaty with Canada.

Supplementary conventions with Belgium and the United Kingdom were concluded and transmitted to the Senate for advice and consent to ratification. The one with Belgium would extend the income tax convention with Belgium to the Belgian Congo and Ruanda-Urundi, at the same time making certain modifications in the basic Belgian convention in its application to these territories. The supplement to the British convention modifies the conditions under which tax exemption is granted to royalties paid from sources in one country to enterprises in the other. The United Kingdom also served notice, in accordance with the procedure laid down in the income tax convention, of its desire to have the treaty extended to a number of overseas colonies and protectorates of the United Kingdom. In accordance with commitments made to the Senate Foreign Relations Committee at the time the British convention was under consideration, United States acceptance of the notification must await the approval of the Senate.

Negotiations with Mexico and Cuba, initiated in previous years, were carried further during the year. Negotiations were also initiated with Peru, and exploratory discussions were held with Chile.

International Financial and Monetary Developments

The fiscal year was generally characterized by world-wide prosperity. Levels of production rose and world trade expanded. Inflationary pressures were intensified in most countries, however, as the demand for capital tended to outstrip savings. Many countries took counter-inflationary action in the fiscal and monetary fields,

though at the close of the period, inflationary tendencies continued to be a problem of world-wide interest and importance.

Inflationary tendencies affected the balances of payments of many countries while the Suez crisis in the last quarter of 1956 further influenced the level of exchange earnings and reserves. The accumulation of gold and dollar resources of all types by foreign countries from transactions with the United States, which had continued without interruption since 1952, was sharply reduced during the fiscal year—a reflection of losses during the second and third quarters. There was evidence, however, of a substantial unrecorded increase in dollar assets held by foreigners. While some countries gained reserves, others lost considerably. The International Monetary Fund made short-term credits available to some of its members in an unprecedented amount. The United States and the United Kingdom agreed upon certain modifications to the Anglo-American Financial Agreement and the Export-Import Bank extended a special line of credit to the United Kingdom. The U. S. Government continued to give military and economic assistance to various countries. The U. S. Treasury also made exchange agreements to assist several countries in carrying out programs of financial and exchange reform.

During the year several countries returned silver lend-leased to them during the war and arrangements were made with others for settlement of their silver lend-lease obligations.

Some countries further liberalized exchange and trade restrictions, though others intensified their exchange restrictions. Several arrangements providing for wider transferability of currencies and projects for trade liberalization on a regional basis were initiated during the year.

The United States balance of payments and gold movements

During the fiscal year 1957 the United States exported \$28.1 billion in goods and services (including \$2.3 billion under military aid programs), representing an increase of \$3.8 billion over the previous year. United States imports increased by \$1.0 billion in the fiscal year 1957, amounting to \$20.2 billion (including \$3.1 billion in military expenditures abroad). The surplus of exports, excluding goods and services exported under military aid programs, thus amounted to \$5.6 billion, more than double the \$2.4 billion surplus in the fiscal year 1956. The net outflow of United States private capital in the fiscal year 1957 amounted to \$4.0 billion, a record high level representing an increase of \$2.2 billion over the previous fiscal year. The U. S. Government provided \$2.4 billion net to foreign countries through nonmilitary grant aid and by loans and other capital trans-

actions, in addition to the \$3.1 billion in military expenditures included in the import figures above. As a result of all of the international transactions of the United States during the fiscal year 1957, the rest of the world, including international institutions, made net recorded gains of \$432 million in gold and long- and short-term dollar assets of all types. Moreover, the "errors and omissions item" in the United States balance of payments, which amounted to \$1.2 billion for 1957 as compared with \$292 million for the preceding fiscal year, probably included a substantial unrecorded increase in dollar assets held by foreigners. This overall result comprised gains of \$1.5 billion by foreign countries and losses of \$1.1 billion by international institutions, reflecting, to a large extent, substantial dollar drawings by foreign countries from the International Monetary Fund.

The gold and short-term dollar assets ¹ of foreign countries (excluding U.S.S.R. gold holdings) amounted to an estimated \$28.4 billion on June 30, 1957, an increase of \$1.0 billion over the \$27.4 billion held on June 30, 1956. The Federal Republic of Germany gained \$1.0 billion in gold and short-term dollar assets, matching the amount gained by all foreign countries; other Western European countries lost \$520 million, in spite of \$824 million in drawings from the International Monetary Fund by the United Kingdom and France. Venezuela gained \$713 million, while holdings of other Latin American countries as a group declined by \$189 million after a \$75 million Fund drawing by Argentina. Canadian gold and short-term dollar holdings rose by \$310 million and Japanese assets fell by \$413 million. At the end of fiscal 1957, foreign countries also held \$1.3 billion in U. S. Government bonds and notes, an increase of \$150 million over the end of fiscal 1956, with the gain shared fairly equally by Canada and Western Europe.

Reflecting the large dollar drawings by member countries on the International Monetary Fund, the gold and short-term dollar assets of international organizations declined by over \$1.0 billion during the fiscal year 1957. These assets amounted to \$2.7 billion on June 30, 1957. These organizations also held \$366 million of U. S. Government bonds and notes, representing a small increase over the previous year.

Total estimated world gold holdings on June 30, 1957 (exclusive of the U.S.S.R.) were \$39.0 billion, of which the United States held \$22.7 billion and international organizations held \$1.1 billion. Thus

¹ Includes official gold reserves, and official and private holdings of short-term dollar assets as reported by United States banking institutions. The short-term dollar assets include approximately \$6 billion of Treasury bills and certificates of indebtedness.

the United States held 58 percent of world gold reserves and 60 percent of gold reserves held by individual countries.

United States gold policy was unchanged during the year.

Amendment to Anglo-American Financial Agreement

An Amendment to the Anglo-American Financial Agreement of 1945 was signed by the Secretary of the Treasury and the British Ambassador on March 6, 1957, and approved by the Congress on April 20, 1957. (See exhibits 18-21.) The purpose of the Amendment was to replace the waiver of interest provisions of the Agreement, which it had become substantially impossible to apply.

The original Agreement, which was signed on December 6, 1945, and approved by the Congress on July 15, 1946, authorized a loan to the United Kingdom of \$3¾ billion at 2 percent interest. Repayment of principal and interest was to be made in 50 equal annual installments beginning December 31, 1951. (A financial agreement between Canada and the United Kingdom was also concluded in 1946 providing for a loan to the United Kingdom of \$1¼ billion under similar terms.) A settlement of Britain's lend-lease and surplus property obligations to the United States in the amount of \$622 million on the same terms was also agreed on December 6, 1945. The total annual installment of principal and interest due the United States on the two agreements is about \$138.4 million.

Under these arrangements the United Kingdom paid in full the principal and interest due in the years 1951 through 1955 and the principal installment for 1956—total payments amounting to \$773 million. In December 1956 the Government of the United Kingdom, acting on its understanding of the provisions of the Agreement, informed the Government of the United States that the United Kingdom claimed a waiver of the interest portion—\$81.6 million—of the December 31, 1956, payment and set that amount aside in a special account in the Federal Reserve Bank of New York until the matter of the waiver could be determined.

The waiver clauses in the original Agreement provided that interest due on the loans would be canceled in any year upon British Government request in certain circumstances related to the foreign exchange position of the United Kingdom and to the United Kingdom's sterling balance liabilities to other countries. Because of changes in conditions since the time when the Agreement was signed, the applicability of these waiver clauses had become unclear. For all practical purposes, it became impossible to say whether the conditions prescribed for the waiver had or had not been satisfied. On the other hand, the spirit of the Agreement—that the United Kingdom should have some relief when its international exchange situation so warranted—was

clear. Discussions were held by the two Governments to determine appropriate modifications of the Agreement to carry out the spirit of the original document.

The Amendment, as approved, substitutes for the waiver provisions of the original Agreement the following: The Government of the United Kingdom may defer the payment of the annual installment of principal and interest in any calendar year in which it advises the Government of the United States that it finds that a deferment is necessary in view of the present and prospective conditions of international exchange and the level of Britain's gold and foreign exchange reserves. Not more than seven annual installments may be so deferred. The first of any such deferred installments shall be paid on December 31, 2001, and the others shall be paid annually thereafter, in order. In addition, the 1956 interest installment of \$81.6 million was deferred until the year after all other payments under the Agreement have been completed. Interest of 2 percent is to be paid annually on the total amount of each deferred installment.

The terms of the Canadian loan to the United Kingdom made in 1946 were also amended to provide comparable postponement terms. If the United Kingdom avails itself of the right to postpone, it must do so under both the American and Canadian agreements.

Lend-lease silver

During World War II, the United States transferred a total of 410.8 million ounces of Treasury silver to certain foreign governments under authority of the Lend-Lease Act of March 11, 1942. While the agreements differed somewhat in detail, they provided that the debtor countries were to return a like kind and quantity of silver within five years after termination of the National Emergency as determined by the President. Accordingly, the lend-lease silver was due to be returned by April 27, 1957, although the agreements with several of the countries permitted a postponement of part of the repayment for an additional two years. In the course of the fiscal year, 97 million ounces of fine silver were returned and arrangements were made for the return of an additional 227 million ounces. The Government of Belgium had returned its lend-lease silver in 1947. The Governments of Australia, the Netherlands, and the United Kingdom had begun the return of silver prior to the due date. By the close of the fiscal year 1957, the entire amount of silver due from Australia and the United Kingdom (also acting for the Government of the Fiji Islands) had been returned and taken into the account of the Treasurer of the United States. At the close of the fiscal year all but a small amount of the silver due from the Netherlands had been returned.

Lend-lease silver transactions (fine ounces), as of June 30, 1957

[In millions of fine ounces]

Country	Silver transferred from the Treasury to lend-lease for account of foreign governments	Silver returned and taken into the account of Treasurer of United States	Silver being returned	Silver to be returned
Australia.....	11.8	11.8		
Belgium.....	.3	.3		
Ethiopia.....	5.4			5.4
Fiji.....	.2	.2		
India.....	172.5	3.3	169.3	
Netherlands.....	56.7	52.4	4.3	
Pakistan.....	53.5		53.5	
Saudi Arabia.....	¹ 22.3			22.3
United Kingdom.....	88.1	88.1		
Total.....	¹ 410.8	156.0	227.1	27.8

¹ Includes 1,031,250 ounces lost at sea while in transit.

During the fiscal year, negotiations were conducted with the Governments of India and Pakistan relative to the conclusion of agreements for the return of 225,999,904 ounces of silver furnished during the war under lend-lease for use in undivided India. By agreement between the Governments of India and Pakistan subsequent to the partition, this obligation was divided—172,542,107 ounces to be returned by India and 53,457,797 ounces by Pakistan. The United States Government agreed to this division of the liability.

Agreement was reached with the Government of India in April, and the first shipment of silver to the United States was made before the date when the obligation became due—April 28, 1957. Under the terms of the agreement, India agreed to ship to the United States as soon as possible the 50,322,101 ounces which India had available in refined form. Title to the remaining 122,219,999 ounces, which was in alloy, was delivered to the United States Embassy in New Delhi on June 5. Shipment to the United States of this portion of the silver was to be arranged as soon as possible.

Agreement with Pakistan was reached in June relative to the return of the 53,457,797 ounces of silver due from that country. Under the agreement, Pakistan agreed to ship 15 million ounces of refined silver to the United States as soon as possible and to turn over title to the balance of its existing holdings of silver (approximately 15.5 million ounces). The transfer of title was effected in Karachi on June 26, 1957. The United States agreed to an extension of time for the repayment of the balance of Pakistan's silver obligation (approximately 22.9 million ounces).

International Monetary Fund and Treasury exchange agreements

During the fiscal year 1957 greater use was made of the International Monetary Fund's resources by its member countries than during all of

the previous years of the Fund's operations. Of the total drawings on the Fund of slightly more than \$2.5 billion as of June 30, 1957, nearly \$1.3 billion represented transactions of the year under review. More than \$400 million of the current year's drawings were made under terms of standby arrangements between the Fund and member countries, which give assurance to members that, during a specified period of time, they will be able to draw on the Fund up to a specified maximum if the need arises for the currency or currencies covered by the arrangement. As of June 30, 1957, the unutilized balances of such arrangements still in effect amounted to \$814.5 million.

The largest transactions with the Fund were by the United Kingdom, which in December 1956, drew \$561.5 million, and in addition entered into a standby arrangement, permitting further drawings up to the equivalent of \$738.5 million. No drawings were made under this standby arrangement. Other large drawings during the fiscal year were by France (\$262.5 million), India (\$200 million), Argentina (\$75 million), and Belgium (\$50 million). Some of these drawings were under standby arrangements which had been entered into with the Fund during the current or earlier fiscal years.

The large drawings on the Fund during the year constituted a substantial drain on its holdings of United States dollars. In order to replenish its holdings, the Managing Director was authorized to sell a portion of the Fund's holdings of gold to the United States Treasury. Under this authority the Fund sold the equivalent of \$600 million in gold to the Treasury in two transactions of \$300 million each.

Several changes in par values occurred in the period under review. In January 1957 an initial par value of 18 pesos per United States dollar was established for the Argentine peso, and in March 1957, an initial par value was also established for the Israeli pound, of 1.80 Israeli pounds per United States dollar. In May 1957, the par value of the Iranian rial was changed from 32.25 to 75.75 rials per United States dollar.

The membership of the Fund (and of the International Bank) stood at 60 countries on June 30, 1957. Ghana, Ireland, Saudi Arabia, and the Sudan subsequently became members of the two institutions. There were several upward revisions of quotas in the Fund and Bank during the year under review, but all of the increases were relatively small.

The Twelfth Annual Meeting of the Board of the Governors of the International Monetary Fund was held in conjunction with the Twelfth Annual Meeting of the International Bank for Reconstruction and Development and the First Annual Meeting of the International Finance Corporation in September 1957. Secretary Anderson, as United States Governor of the three international institutions, headed

the delegation. Deputy Under Secretary of State Dillon was Alternate Governor and Under Secretary of the Treasury Burgess and Special Assistant to the Secretary of the Treasury Frank A. Southard, Jr. (U. S. Executive Director of the Fund), served as temporary alternate governors. The delegation also included members of the Senate and House Committees on Banking and Currency, members of the National Advisory Council on International Monetary and Financial Problems, and the President of the Federal Reserve Bank of New York.

President Eisenhower addressed the opening joint session. He stressed the importance of action by the member countries in restraining inflationary tendencies in their economies. Secretary Anderson reviewed the activities of the Bank and the Fund and also stressed the importance of counter-inflationary policies as a means of realizing the full benefits of increasing world trade and investment. (See exhibit 22.) In his discussion of the Fund Annual Report, Under Secretary Burgess commented on the use of the Fund's resources during the year and noted the importance of maintaining the Fund's liquidity through repurchase of currencies drawn. (See exhibit 23.)

In the course of the fiscal year the Treasury Department renewed or made new exchange agreements with various foreign countries. These agreements were supplementary to standby arrangements entered into between the International Monetary Fund and the respective countries. In November 1956 the International Monetary Fund made a standby arrangement with Bolivia in the amount of \$7.5 million and shortly thereafter the Treasury made an exchange agreement for an additional \$7.5 million. (See exhibit 27.) The International Cooperation Administration also made \$10 million available to support the Bolivian Government's stabilization program. Under this program a single free market rate for the boliviano replaced the former multiple rate system.

In February 1957, the International Monetary Fund renewed its standby arrangement, and the Treasury renewed its exchange agreement with Peru. Each agreement provided for standby reserves up to \$12.5 million to assist Peru in maintaining external trade and payments substantially free of restrictions. (See exhibit 28.)

In March and April 1957, there was an extension for an additional year of arrangements made a year earlier to assist Chile in its efforts to achieve economic stability and freedom for trade and exchange transactions. The International Monetary Fund extended its standby arrangement of \$35 million. A group of American banks renewed credit lines amounting to \$30 million and the Treasury extended its exchange agreement in the amount of \$10 million. (See exhibit 29.)

All of these agreements provide for the repurchase with dollars of any local currencies purchased by the Stabilization Fund. No purchases of dollars were made under these agreements during the fiscal year.

Foreign investment, the Export-Import Bank, the International Bank, and the International Finance Corporation

A record increase of almost \$4 billion (including reinvested earnings) in American private investment abroad in calendar 1956 brought such investment to an estimated total of \$33 billion by December 31, 1956. The book value of direct investments in branches and subsidiaries of United States corporations rose by \$2.8 billion to a total of over \$22 billion, and other long-term investments (principally portfolio holdings) and short-term claims rose by smaller amounts to a total of \$11 billion. Half of the increase in direct investment was attributable to the petroleum industry, but investment in manufacturing also increased substantially, while mining, public utilities, and trade and service industries showed smaller rises. Although substantial investments were made in all major geographical areas of the world, Canada and Latin America continued to account for nearly two-thirds of total American private investment abroad. During the first half of 1957 a high rate of investment abroad was maintained.

The indebtedness of foreign countries to the United States Government under various loan and credit agreements, concluded principally since the end of World War II, amounted to \$11.5 billion as of June 30, 1957. (See table 112.) These agreements included settlement of lend-lease, surplus property, and similar obligations, the loan under the Anglo-American Financial Agreement, loans by the Export-Import Bank, and obligations arising under the mutual security and foreign aid program.

The Export-Import Bank.—The Export-Import Bank authorized 182 new credit commitments totaling \$1.1 billion during the fiscal year 1957, including 143 credits totaling approximately \$55 million established at the request of United States exporters or financial institutions. In addition, the Bank established eight new exporter credit lines, totaling about \$13.2 million. By far the largest single Bank authorization was a line of credit of \$500 million, established on December 21, 1956, in favor of the British Government. This authorization made dollars available for the importation of United States goods and services, and of dollar costs of petroleum and petroleum products. This credit, together with the \$1.3 billion made available by the International Monetary Fund, was designed to relieve the pressure on the British pound which accompanied the Suez Canal difficulties. Other large credits included \$151.4 million

to Brazil and \$100 million to the Argentine for various development projects, and \$60 million to Japan for the import of United States cotton.

As of June 30, 1957, 124 exporter credit lines were outstanding in an aggregate amount of \$167.1 million. These credit lines give the exporters assurance that, providing acceptable transactions are proposed, financing will be available within agreed amounts during a particular period. In each instance the exporter finances a portion of the credit extended to the foreign importer, with or without the assistance of a financial institution, and the importer makes a substantial down payment.

The Bank disbursed \$233 million on loan commitments during the fiscal year, and received \$278 million in repayments of principal. Net income for the year was \$60.6 million, and, after paying a dividend of \$22.5 million on the capital stock of the Bank held by the Secretary of the Treasury, the Bank's reserves and undistributed earnings stood at \$442.9 million on June 30, 1957. The total commitments charged against the Bank's lending authority amounted to \$4.2 billion, leaving \$811 million of uncommitted authority.

The International Bank.—The International Bank made 20 loans, equivalent to \$388 million, in 15 countries during the fiscal year 1957. The total was slightly under the approximate \$400 million which had been loaned in each of the two preceding years, but disbursements, at \$332 million, exceeded those of the earlier years. The largest loans, \$75 million to Iran, \$75 million to Italy, and \$59 million to Australia, were made in conjunction with broad programs of agricultural and industrial development. Other loans were made for specific projects, such as expansion of electric power or steel production, and development of port and highway facilities. The private capital market assisted in a number of the loans, either through direct participation by taking early maturities of the Bank's loans without the Bank's guarantee, or by providing funds along with the Bank in separate, but related, transactions. As of June 30, 1957, the Bank had made 170 loans totaling \$3.1 billion in 45 countries and territories, and had disbursed \$2.3 billion. The outstanding funded debt of the Bank on the same date totaled \$1.0 billion.

International Finance Corporation.—As reported last year, the International Finance Corporation came into being on July 20, 1956, when the minimum requisites for membership and subscribed capital had been attained. The United States subscription of \$35,168,000 was paid in August 1956, through a public debt transaction. The Corporation has an authorized capital of \$100 million, with subscriptions of member countries proportionate to their subscriptions to the capital of the International Bank. As of June 30, 1957, 49

countries had become members of the IFC, with subscriptions totaling approximately \$92 million.

On June 20, 1957, the International Finance Corporation entered into its first investment transaction, when it agreed to invest \$2 million in Siemens do Brasil Companhia de Electricidade. The IFC's investment will be accompanied by an investment of the equivalent of \$8.5 million by Siemens of Germany, and the funds will be used to expand the plant and facilities of Siemens do Brasil. The Corporation received an option on shares in Siemens do Brasil, which may be exercised at a later date. At the close of the year other investments were under consideration.

International trade and payments

Although most countries still maintain exchange restrictions, there were some further relaxations in restrictions on exchange operations, as well as in exchange discriminations, in the fiscal year 1957.

During the year several European countries (the Netherlands, Italy, Sweden, and Belgium-Luxembourg) established arrangements for wider use of their currencies in transactions among other non-dollar countries, along the lines of the transferable sterling system of the United Kingdom and the partly convertible deutsche mark system of Germany. Steps were also taken by some European countries, especially Germany, to provide greater freedom for international capital movements.

There was a further lessening by some European countries of restrictions on dollar expenditures. Austria, Norway, Italy, Sweden, and Germany reduced restrictions on imports from dollar countries during the year. Norway and the United Kingdom extended the foreign exchange allowances for travel in nondollar countries to include travel to the dollar area. Outside Europe, Ceylon virtually ended its discrimination against dollar imports. France, on the other hand, withdrew in June 1957 all measures of trade liberalization previously in force and imposed quantitative restrictions on virtually all imports from the EPU and dollar areas, and Indonesia, earlier in 1957, likewise reimposed trade restrictions.

The number and restrictiveness of bilateral payments arrangements among members of the International Monetary Fund have also been reduced, particularly those involving Argentina, Brazil, Japan, and the OEEC countries. Although the number of bilateral payments arrangements between members of the Fund and nonmembers has increased, the restrictive effects of these arrangements have somewhat diminished.

The European Payments Union was renewed in May 1957, for another year (to June 30, 1958) without change in the settlement

basis of 75 percent in gold and 25 percent in credit, which has been in effect since August 1, 1955, and also without change in the provision for replacing the Payments Union with a European Monetary Agreement if the Union should be terminated.

Ministerial meetings of the Organization for European Economic Cooperation were held in July 1956 and February 1957. The July meeting was devoted to an analysis of the European economic situation and the proposal for a European free trade area, which would include both the six countries intending to form a European common market and the other OEEC countries. The February meeting agreed to begin negotiations looking toward the establishment of the European free trade area. Under Secretary Burgess attended the July ministerial meeting and the Treasury was represented at the February meeting by Special Assistant to the Secretary Frank A. Southard, Jr.

The Treasury also participated in the eleventh regular meeting of the Contracting Parties to the General Agreement on Tariffs and Trade, as well as in a subsequent special meeting held on the initiative of the United States in June 1957. This special meeting consisted of consultations, in cooperation with the International Monetary Fund, with a group of countries employing quantitative import restrictions for balance-of-payments reasons, many of them discriminatory with respect to American goods. As a result of these consultations, significant progress was made in the relaxation of such restrictions.

At their eleventh regular meeting the Contracting Parties also considered proposals of the International Chamber of Commerce designed to abolish or ameliorate the incidence of certain onerous customs formalities. These proposals pertained to the certification of consular invoices, the nationality of imported goods, and marks of origin. Further consideration of these items is scheduled for the twelfth meeting of the Contracting Parties.

Officers of the Treasury participated in various other international conferences dealing with economic and financial problems. At the Paris ministerial meeting of the North Atlantic Treaty Organization, in December 1956, a report, prepared by a special committee of three NATO foreign ministers calling for wider consultation among the NATO countries on nonmilitary matters, was considered and approved. Secretary Humphrey and Assistant Secretary Overby attended this meeting.

Secretary Anderson headed the United States delegation to the Economic Conference of the Organization of American States, held at Buenos Aires, Argentina, in August 1957. The Secretary made the principal statement for the United States at this conference. (See exhibit 17.) The Treasury also was represented on the United

States delegations to various United Nations bodies, the Southeast Asia Treaty Organization, and the Colombo Plan Organization.

Foreign assets control

For the purpose of preventing Communist China from obtaining foreign exchange through the exportation of merchandise to the United States, the Foreign Assets Control Regulations¹ prohibit the unlicensed purchase and importation into the United States of Communist Chinese or North Korean merchandise, as well as numerous other commodities therein specified which are of types that have historically come from China in the past. The Control does not issue licenses authorizing importation of Chinese-type merchandise unless satisfactory evidence of their non-Communist Chinese origin is presented.

Importation under general licenses is authorized with respect to specific shipments of Chinese-type merchandise certified to be of non-Communist Chinese origin by the government of a foreign country from which they were directly exported, provided that the country in question has set up procedures for certification pursuant to standards agreed to by the Treasury Department. The following Governments now have such certification procedures: Australia, Formosa, France, Hong Kong, Italy, Japan, the Netherlands, Switzerland, Viet-Nam, and the Republic of Korea. Notices of the availability of certificates of origin for particular commodities and of the governments prepared to issue them are published from time to time in the Federal Register. During the year, the Governments of Switzerland and Viet-Nam entered into certification agreements, and a number of additional individual items became available for certification under existing agreements with other governments.

The enforcement measures of the Control resulted in a number of successful criminal prosecutions. In addition to the substantial sums recovered as criminal penalties imposed by the Courts, large sums were paid to the Treasury Department in mitigation of civil penalties incurred in cases in which misdescribed merchandise was imported in violation of the Regulations. Also, substantial quantities of Chinese merchandise, such as human hair nets and silk waste, have been seized either because such goods were smuggled into the United States or because they were imported in violation of the Regulations.

On July 31, 1956, the Egyptian Assets Control Regulations were issued by the Secretary of the Treasury pursuant to the authority of Section 5 (b) of the Trading with the Enemy Act. These Regulations blocked assets of the Government of Egypt and of the Suez Canal Company in this country on that date, and placed under Treasury licensing procedures all transactions affecting such assets.

¹ Described on page 125.

ADMINISTRATIVE REPORTS

Management Improvement Program

The objectives of the Treasury Department's management improvement program are to reduce costs and provide better services by improving the organization, methods, staffing, and general management of the Department and by eliminating any unessential activities.

The Secretary's full-scale search for economies which began in the previous fiscal year was brought to a successful conclusion as a project in March 1957. The encouragement and enthusiasm generated among officers and employees engaged in the search indicates that many continuing and additional benefits will accrue from this effort.

The economy search was further emphasized in a meeting held by the Secretary on March 4, 1957, with his principal assistants and bureau heads to review the budget program and to explore the operations of the Department for further economy possibilities. Also, the Secretary directed the bureaus not to increase personnel above the March 31, 1957, level without his specific approval. A system was set up to establish and maintain ceiling and expenditure controls by reviewing personnel and financial reports from the bureaus.

Reports received from the various bureaus show that significant management improvements made during the year resulted in economies of over \$6 million. In addition, 22 parcels of land having a fair market value of \$307,900 were declared surplus to the needs of the United States Coast Guard, and total warehouse and office space used by the various bureaus throughout the country was reduced considerably. All these economies have been accomplished without adversely affecting the collection of revenue or reducing essential services to the public although at a time when revenue collections and major workload factors continued to increase.

Employees throughout the Department are drawn into the economy efforts through the incentive awards program, and special survey, inspection, and review personnel are constantly searching for more efficient and effective operating practices.

Incentive awards program.—Promotion highlights during the year included a poster contest, wherein 238 employees submitted over 500 posters; issuance of a booklet, *Better Management through Incentive Awards*, which provides all officials with a handy reference guide; issuance of revised incentive awards regulations; and increased publicity through field offices. Awards were made to 3,005 employees, 52 percent more than in 1956. Total awards paid increased 74 percent to \$175,051, and total estimated savings increased 172 percent to \$1,794,904. A detailed comparison of results of the incentive awards program for the fiscal years 1956 and 1957 appears in table 128.

Executive and supervisory development.—Continuing programs are carried on to improve the quality of Treasury leadership in all phases of management. Typical programs include the Fiscal Service executive development program and Internal Revenue's executive development class and summer management institutes, in which over 500

executives and supervisors participated during 1957. Short-term management conferences were conducted and lectures given in various field offices throughout the country.

Accounting improvement.—Further progress was made in improving and modernizing accounting in the Treasury Department. Action was taken with a view to practical compliance with the objectives of the act approved August 1, 1956 (31 U. S. C. 66a (c)), relating to accrual accounting. A number of improvements were made in procedures followed in accounting for taxes and duties and public debt transactions. Improvements were made also in the integration of the accounts relating to such matters with the central accounts of the Government. There was published for the first time in the *Combined Statement of Receipts, Expenditures and Balances of the United States Government* a comprehensive statement of the cash assets and liabilities of the Government. Further details will be found in the *Report on Accounting Developments in the Treasury Department for the fiscal year 1957*, prepared by the Bureau of Accounts.

Safety program.—The Treasury Safety Council was reorganized along functional lines. There are now four committees as follows: Promotion and Publicity, Records and Reports, Rules and Regulations, and Training. The substantial decline in the accident frequency rate is a very encouraging sign of achievement. The Treasury Department is one of six agencies with more than 50,000 employees nominated for the Presidential Safety Award for the accident prevention program for the calendar year 1956. Although the accident frequency rate increased slightly from 4.7¹ in 1955 to 4.8¹ in 1956, it has decreased 26 percent since 1949.

A pamphlet, *Guidelines for Safety* was prepared and distributed to supervisory employees for use as a ready reference for the day-to-day execution of the safety program. The Secretary's Safety Award was presented to the Office of the Treasurer of the United States and to the Office of Production and Defense Lending, each of which worked at least one full year and over two million man-hours without a lost time injury.

Equipment replacement.—At the end of the fiscal year 1957 the first of eight new sheet-fed rotary currency presses was undergoing production testing in the Bureau of Engraving and Printing. The second press was being installed. The introduction of 32-subject printing by the dry printing process will lead to substantial economies. Associated with the new currency printing program was the development of new currency paper and new ink formulas suitable for use in printing currency by the dry intaglio process.

The fifth new postage stamp press was installed during the year. Almost all postage stamps are now being produced on these presses. In spite of unexpected technical difficulties that arose both in the production of stamps and in the experimental perforating-coiling machine, significant savings are anticipated from the new equipment.

The installation of new melting and rolling equipment in the Philadelphia Mint was practically completed by the end of the fiscal year. Also, two new hydraulic presses for production of medals and proof coins were installed. It is expected that unit manufacturing costs

¹ The number of disabling injuries per million man-hours worked.

will be reduced significantly by this equipment modernization program.

The Coast Guard has installed an electric accounting machine in the Norfolk District for preparation of pay checks, money lists, and related pay record postings and distribution vouchers. Reserve personnel accounting will also be performed on this machine. Similar installations are being considered for other districts.

Advancement in electronic data processing.—Certain bureaus with large volume operations have initiated use of high-speed electronic equipment and improved operations and savings in administrative expenses are expected to result. Feasibility studies are continuing in several areas. Accomplishments during the fiscal year included: The successful operation of the electronic system installed in the Office of the Treasurer of the United States which consolidated the check payment and check reconciliation functions of the Government, with an estimated saving of \$2,250,000 when all phases of the conversion are completed; the installation in the Boston regional office of high-speed electronic check writing equipment which consists of a single unit capable of printing, tabulating, and listing over 85,000 checks daily, far exceeding the output on conventional addressing machines; and a plan to install electronic equipment for processing Series E savings bonds was approved and facilities in Parkersburg, W. Va., were established by the Bureau of the Public Debt for the processing of the new punch card bond commencing October 1, 1957. Savings in printing costs of the new bond will amount to \$500,000 annually and further savings are expected in the processing steps.

Paperwork management.—The bureaus continued their efforts to control paperwork in conjunction with other management studies. Considerable progress was noted in records disposal which was 17 percent over last year, and in total records holdings which were reduced 9 percent or 121,500 cubic feet. Forms analysis and control programs resulted in the elimination of 438 forms and the revision of 179. Several large bureaus conducted surveys concerned with the preparation and use of reports which resulted in the elimination of at least 90 types of reports, as well as a number of feeder reports. Several bureaus conducted correspondence and letter writing workshops.

Significant accomplishments.—Brief examples of other significant actions taken during the fiscal year follow.

The regulation of monthly personnel ceilings, by the Division of Disbursement in the Bureau of Accounts, on the basis of volume of work, cost, and application of production standards resulted in personnel ceiling reductions of 16 employees with total annual salaries of \$50,000. Consolidation of operating units and redistribution of work in the Washington regional disbursing office made possible a net reduction of 25 employees with salaries totaling \$91,300.

Preparation of an additional 3,000,000 income tax refund checks by the bill feed method resulted in savings of \$56,000. The use of lighter weight check envelopes at a lower contract price will save \$57,000 annually.

A simplified passenger's baggage declaration form is expediting the customs clearance of persons arriving from abroad and eliminates for many the requirement of actually listing articles purchased abroad. This is calculated to save 10 man-years valued at \$50,000.

Customs inspection teams covered 50 of the 104 collection, appraiser, and other field districts, making staffing surveys and procedural improvements that produced economies of over \$200,000. Included in the procedural improvements was a method of examining merchandise on the wharves, and by sample, rather than hauling packages to appraisers' stores for examination.

The Bureau of Engraving and Printing obtained new equipment for packaging postage stamp books which eliminated 21 jobs valued at \$74,500 previously needed for the manual operation. Manpower utilization and other surveys in this Bureau resulting in the consolidation of functions, reorganizations, and improvement of operating procedures made possible a reduction of 23 positions having total annual salaries of \$78,700.

The Bureau of the Public Debt adopted the duo-style method of microfilming Series E savings bond registration stubs, saving approximately 70 percent in film and cabinet costs. Based on current volume, the savings will amount to \$59,000 annually. Consolidation of small units and subunits in the Bureau resulted in the elimination of 11 positions having total annual salaries of \$48,000.

The Office of the Treasurer of the United States devised multiple-forms for use in connection with stoppages of payment against checks drawn on the Treasurer and the handling of certain checks as canceled items, resulting in economies in printing costs and personnel totaling \$56,000.

Maintenance of the merchant seaman locator file in the Coast Guard was converted to a tabulating operation, eliminating the need for 12 clerical personnel having annual salaries of \$39,000.

The requirement for salvage equipment on U. S. Coast Guard oceangoing tugs has been eliminated, resulting in savings in maintenance costs of approximately \$65,000.

Removal of antisubmarine warfare equipment from Coast Guard aircraft will result in a \$50,000 savings in maintenance, training, and ammunition costs.

Consolidation of certain Coast Guard activities in the Baltimore area and their relocation at the Coast Guard Yard will increase effectiveness of port security forces and provide better utilization of personnel resulting in savings of \$60,000.

Realignment of United States Savings Bonds Division area boundaries within States and relocation of area managers' posts of duty resulted in the abolishment of 3 positions with annual salaries of \$22,600. A review of the organization and operations of the Division's printing plant and distribution center resulted in reduction of 4 positions with annual salaries of \$17,000. Reassignment of program functions and responsibilities in headquarters and field offices of the Division resulted in a reduction of 7 positions valued at \$50,000.

Manufacturing, processing, and shipping practices involving proof coins produced by the Mint were streamlined and further mechanized during the year, resulting in the reduction of 13 employees and estimated savings of \$68,000.

The Internal Revenue Service adopted an improved method of packaging income tax and other forms for shipment to field offices

that will reduce the cost of transportation by \$113,000 annually. Shipment of internal revenue stamps by insured motor freight instead of by registered parcel post will result in estimated savings of \$220,000 annually.

The Service realized additional benefits in the fiscal year 1957 due to improved methods, installed in 1956, to assist the public during filing periods. Fewer technical employees had to be detached from their regular jobs of auditing returns and collecting tax accounts. This reduced the cost of the taxpayer assistance program by an estimated \$776,000, and placed more emphasis on the audit and collection functions.

In addition, a notice of adjustment form was revised and constructed in snap-out sets to provide for the preparation of the multiple copies in one writing. It is estimated that a saving of 85 man-years valued at \$290,000 will be realized annually.

The receipt stamping of certain tax and information returns has been discontinued, resulting in annual savings of 51 man-years valued at \$151,000.

The program for processing high volume, low complexity work in Internal Revenue Service centers was extended with the opening of a Western Service Center at Ogden, Utah, in December 1956. Work of the Center includes mailing blank returns, processing Form 1040A and certain Form 1040 income tax returns, and processing information returns.

Bureau of the Comptroller of the Currency ¹

The Bureau of the Comptroller of the Currency is responsible for the execution of laws relating to the supervision of national banking associations. Duties of the office include those incident to the formation and chartering of new national banking associations, the examination of all national banks, the establishment of branch banks, the consolidation of banks, the conversion of State banks into national banks, recapitalization programs, and the issuance of Federal Reserve notes.

Changes in the condition of active national banks

The total assets of the 4,654 active national banks in the United States and possessions on June 6, 1957, amounted to \$112,792 million, as compared with the total assets of 4,675 banks amounting to \$111,036 million on June 30, 1956, an increase of \$1,756 million during the year. The deposits of the banks in 1957 totaled \$101,295 million, which was \$159 million more than in 1956. The loans in 1957 were \$48,560 million, exceeding the 1956 figure by \$2,561 million. Securities held totaled \$39,610 million, a decrease of \$108 million during the year. Capital funds of \$8,744 million were \$490 million more than in the preceding year.

¹ More detailed information concerning the Bureau of the Comptroller of the Currency is contained in the separate annual report of the Comptroller of the Currency.

Abstract of reports of condition of active national banks on the date of each report from June 30, 1956, to June 6, 1957

[In thousands of dollars]

	June 30, 1956 (4,675 banks)	Sept. 26, 1956 (4,671 banks)	Dec. 31, 1956 (4,659 banks)	Mar. 14, 1957 (4,657 banks)	June 6, 1957 (4,654 banks)
ASSETS					
Loans and discounts, including over- drafts	45,999,400	47,031,601	48,248,332	48,001,120	48,560,163

Summary of changes in number and capital stock of national banks

The authorized capital stock of the 4,647 national banks in existence on June 30, 1957, consisted of common stock aggregating \$2,709 million, an increase during the year of \$136 million, and preferred stock aggregating \$3.8 million, a decrease during the year of \$68 thousand. The total net increase of capital stock was \$135.3 million. During the year charters were issued to 33 national banks having an aggregate of \$11 million of common stock. There was a net decrease of 31 in the number of national banks in the system by reason of voluntary liquidations, statutory consolidations and mergers, conversions to and mergers or consolidations with State banks under the provisions of the act of August 17, 1950 (12 U. S. C. 214), and 2 receiverships.

More detailed information regarding the changes in the number and capital stock of national banks in the fiscal year 1957 is shown in the following table.

Organizations, capital stock changes, and liquidations of national banks, fiscal year 1957

	Number of banks	Capital stock	
		Common	Preferred
Charters in force June 30, 1956, and authorized capital stock ¹	4, 678	\$2, 572, 319, 671	\$3, 859, 170
Increases:			
Charters issued.....	33	10, 560, 000	-----
Capital stock:			
229 cases by statutory sale.....		47, 432, 552	-----
322 cases by statutory stock dividends.....		71, 213, 852	-----
29 cases by statutory consolidation.....		6, 014, 562	-----
19 cases by statutory merger.....		7, 692, 500	-----
Total increases.....	33	143, 213, 466	-----
Decreases:

3 cases by retirement.....		-----	68, 000
Total decreases.....	64	6, 893, 032	68, 000
Net change.....	31	136, 320, 434	-68, 000
Charters in force June 30, 1957, and authorized capital stock.....	4, 647	2, 708, 640, 105	3, 791, 170

¹ These figures differ from those in the preceding table. The figures as of June 30, 1956, include 2 newly chartered banks not yet open for business, and 2 banks in the process of merging or consolidating with State banks under the provisions of the act of Aug. 17, 1950 (12 U. S. C. 214).

Bureau of Customs

The Bureau of Customs is responsible for the assessment and collection of duties and taxes on imported merchandise and baggage; prevention of smuggling, undervaluations, and frauds on the customs revenue; apprehension of violators of the customs and navigation laws; entry and clearance of vessels and aircraft; issuance of documents and

signal letters to vessels of the United States; admeasurement of vessels; collection of tonnage taxes on vessels engaged in foreign commerce; supervision of the discharge of imported cargoes; inspection of international traffic; control of the customs warehousing of imports; determination and certification for payment of the amount of drawback due upon the exportation of articles produced from duty-paid or tax-paid imports; enforcement of the antidumping and export control acts; regulation of the movement of merchandise into and out of foreign trade zones; and enforcement of the laws and regulations of other Government agencies affecting imports and exports.

Collections

Revenue collected by the Customs Service during the fiscal year 1957 totaled \$1,059 million, the largest in history. Compared with \$983 million collected in 1956, there was an increase of 7.7 percent. The total includes, in addition to customs collections, certain internal revenue taxes for the Internal Revenue Service and some collections for other Government agencies.

Customs collections alone amounted to almost \$761 million, an increase of 7 percent over the \$711 million collected in 1956. They consisted of duties, tonnage taxes, fees, and fines and penalties for the violation of customs and navigation laws, etc. There was again a substantial increase in collections by Customs of internal revenue taxes on imported liquors, wines, perfumes, etc., which amounted to \$298 million, 9.6 percent more than the \$272 million collected in 1956.

Of the customs collections, more than \$754 million were derived from duties (including import taxes) levied on imported merchandise. The source of duty collections by type of entry is shown in table 12 and by tariff schedule in table 86. Since the data in table 86 are restricted to commercial importations, the totals shown are somewhat smaller than the duties collected on all types of dutiable merchandise and correspond roughly to duties collected on consumption entries and on warehouse withdrawals.

In 1957 slightly less than one-half of all imports into the United States were duty free and included some commodities imported free for Government stockpile purposes or authorized by special acts of Congress for free entry although dutiable under the Tariff Act of 1930, or taxable under the Internal Revenue Code, such as copper and iron and steel scrap. The 52 percent which was dutiable constituted the basis of customs duties on imports.

In only two months of this fiscal year, November and February, were collections of customs duties at a lower level than for the corresponding months of 1956. The 7 percent increase in duty collections, however, was not as great percentagewise as the 12 percent increase in value of dutiable imports, which amounted to \$6.5 billion in fiscal 1957, as compared with \$5.8 billion in fiscal 1956.

By customs districts.—Of the 45 customs districts in which collections are covered into the Treasury of the United States, all but 12 reported larger customs collections than in 1956. The collections for each customs district are shown in table 85.

By commodities.—As in the five immediately preceding years, imports of metals and manufactures were the largest single source of

customs revenue in fiscal 1957, with an increase of 22.7 percent more in duty collections than in fiscal 1956. The sundries schedule rose to second place with an increase of 12.7 percent. Although the wool and agricultural schedules decreased percentagewise, they ranked third and fourth place, respectively, in the amount of duties collected.

The value of dutiable and taxable imports for consumption and duties and taxes collected, by tariff schedules for fiscal years 1956 and 1957, will be found in table 86.

Tables 88 and 89 show the value of and duties collected on imports for consumption by calendar years from 1946 to 1956, and monthly from January 1956, through June 1957. The trends in value and duty yield for goods dutiable at specific, ad valorem, and compound rates by fiscal years from 1942 through 1957 are shown in table 87.

By countries of origin.—For the second consecutive year since World War II imports from Japan were again the largest source of customs revenue. Duties collected were 17.3 percent more than in fiscal year 1956. The United Kingdom retained second place with an increase of 9.5 percent, while West Germany, with an increase of 22.7 percent ranked third, and Canada, with an increase in duty collections of 4 percent dropped to fourth place. The value of dutiable imports for consumption and the duties collected by countries for the fiscal years 1956 and 1957, are shown in table 90.

Extent of operations

Movement of persons.—During the fiscal year 1957, an alltime high was reached in the number of persons entering the United States. More than 132 million people came through our seaports or across our land borders last year, all subject to customs inspection. Mathematically, this means more than four persons every second, day and night, 365 days of the year! More than 38 million vessels, aircraft, automobiles, busses, and trains brought in nearly 108 million passengers, while 25 million actually walked across our borders.

The number of various types of vehicles and persons entering the United States during the fiscal years 1956 and 1957 is shown in table 92 and the number of aircraft and passengers arriving in districts where this mode of travel is most prevalent is shown in table 93.

Entries of merchandise.—Formal entries of merchandise comprising consumption, warehouse, and rewarehouse entries passed the one million mark for the second consecutive year. There were 1,116,211 of these entries filed, or 4.4 percent more than in fiscal year 1956. Informal entries and baggage declarations covering both mail importations and other shipments valued at less than \$250 jumped 10 percent over 1956 to a record total of 3,660,738. Almost all other types of entries showed similar increase. The number of each type of entry filed during each of the past two fiscal years is shown in table 91.

Drawback transactions.—Drawback, which is allowed on the exportation of merchandise manufactured from imported materials and for certain other export transactions, usually amounts to 99 percent of the customs duties paid at the time the goods are entered. More than 95 percent of the drawback allowed in 1957 was due to the export of products manufactured from imported raw materials. The principal imported materials used in the manufactured exports in 1957 were

iron and steel semimanufactures, motor vehicle and aircraft parts, crude petroleum, lead ore, matte, and pigs, tobacco, watch movements, and sugar.

Tables 94 and 95 show the drawback transactions for the fiscal years 1956 and 1957. The amount of drawback allowed, as shown in table 94 does not correspond exactly with the drawback payments shown in table 95 since not all drawbacks certified for payment are paid during the same fiscal year.

Appraisalment of merchandise (including Customs Information Exchange).—The number of invoices and packages examined by appraisers' personnel again increased in 1957. There were 1,790 thousand invoices handled in 1957 and 1,733 thousand in the previous year, a 3 percent increase. The total packages examined by appraisers' personnel increased from 1,297 thousand to 1,365 thousand, a 5 percent increase.

Despite several drastic revisions of procedures which were introduced in 1954 to enable existing staffs to handle the increased workload, increases in the volume and variety of merchandise since that time have again caused a rise in the backlog of unappraised invoices. During 1957, this backlog increased from 157 thousand to 190 thousand, or by 21 percent.

As a result of a provision in the Customs Simplification Act of 1956 (19 U. S. C. 1402) a large amount of appraisalment manpower was devoted to the investigations preceding the establishment of the list of commodities on which average decreases in valuation of 5 percent or more would result from the application of new valuation standards prescribed by that act. This diversion of manpower from regular appraisalment duties contributed materially to the increased unappraised invoice backlog.

The activities of the Customs Information Exchange, New York, N. Y., continued to increase as shown by the number of reports received from and disseminated to appraising officers. Appraisers' reports of value and classification, covering a cross section of importations of merchandise received at each port, totaled 54 thousand in 1957, as compared with 45 thousand in the previous year. These reports indicate the relative number of commodity items received at any given port for the first time, as well as regular items received at new prices or subject to different terms of sale from previous shipments.

Differences in value and classification indicate the number of instances where information varied at different ports as to value or classification and in which additional study and analysis were required before establishment of a uniform price or rate. There were 6,118 reports of value differences in 1957 as compared with 4,563 in the previous year.

The number of classification differences totaled 3,154 in 1957, as against 2,568 in the previous year, indicating a substantial increase in the number of new commodities received.

Continuing efforts to make an appraisalment without resort to a foreign investigation brought about a drop in the number of such foreign inquiries, from 471 in 1956 to 412 in 1957.

Antidumping and countervailing duty.—The Bureau of Customs worked with the office of the Secretary in preparing a report to Congress on the operation and effectiveness of the Antidumping Act, as required

by Section 5 of the Customs Simplification Act of 1956. The report summarized administration of the Antidumping Act over the years and recommended changes in the law designed to provide for greater certainty, speed, and efficiency in its enforcement. There was an increased volume of complaints received during the fiscal year, at the same time that the number of cases considered on the initiative of customs appraisers also increased. The number of dumping cases received in fiscal 1957 was 41, well over twice the comparable 1956 figure of 18. Fourteen dumping cases were disposed of during the year, and 39 were on hand at the end of the year. The volume of countervailing duty cases, on the other hand, was lower in fiscal 1957 than in the previous year. Twelve complaints were received, as compared with 17 in 1956. Thirteen countervailing duty cases were disposed of during the year and 15 remained on hand at the end of the year.

Technical services.—This branch of the Customs Service furnishes chemical, engineering, statistical sampling, and other scientific and technical services; provides proper weighing and gauging equipment; designs and oversees the construction of border inspection stations; and directs the field operations of customs laboratories.

The laboratories analyzed over 110 thousand samples in 1957. About one-half of the samples analyzed consisted of ores and metals, sugar, and wool. The large majority were "import" samples of dutiable merchandise analyzed to develop and report facts needed for tariff identification purposes. Other types of samples tested included those taken from customs seizures, mostly narcotics and other prohibited items; preshipment samples of articles intended for shipment to the United States, analyzed to assist in establishing a firm classification of such articles; and samples of stockpile items brought in by official agencies.

Statistical quality control of sample weighing operations, by making analyses of the cargo sample weighing data to assure that accuracy and precision were within the control limits, was continued during the fiscal year 1957. There were 827 such weighing operations, consisting of 625 cargoes of raw sugar, 70 of refined sugar, 127 of cigarette tobacco, and 5 of other merchandise. Statistical control over the sample verification of liquidations (final determinations of duties and taxes due) was continued.

To facilitate the assessment of duties on imported coal-tar dyes, the Customs Regulations were modified (T. D. 53593) to require certain additional information on invoices of imported dyes. Simultaneously there was set up in the Customs Laboratory, New York, N. Y., a file of domestically produced dyes, with similar information, for comparative purposes. Approximately 5,000 samples from domestic manufacturers are filed in the laboratory. When an imported sample is examined, it is compared with the file of domestic samples. This file is kept current by additions and withdrawals.

Arrangements were made with the Synthetic Organic Chemical Manufacturers Association for submitting specifications of domestic coal-tar intermediates to the New York Laboratory on a voluntary basis for use in expediting the analysis of imported coal-tar intermediates in New York and elsewhere. Specifications covering several thousand items are now on file.

Export control.—More export declarations were authenticated in 1957 than in 1956. While there was a decline in the number of shipments examined, there was a substantial increase in the number and value of seizures. The following table shows the volume of export control activities during the fiscal years 1956 and 1957.

Activity	1956	1957	Percentage increase, or decrease (—)
Export declarations authenticated.....	4,387,465	4,596,141	4.8
Shipments examined.....	563,866	339,127	—39.9
Number of seizures.....	252	309	22.6
Value of seizures.....	\$216,934	\$718,891	231.4
Export control employees.....	161	198	23.0

Protests and appeals.—For the second consecutive year fewer protests were filed by importers against the rate and amount of duty assessed and other decisions by the collectors. The number of appeals for reappraisement filed by importers who did not agree with appraisers as to the value of merchandise was slightly higher than in 1956. The following table shows the number of protests and appeals filed and acted on during the fiscal years 1956 and 1957.

Protests and appeals	1956	1957	Percentage increase, or decrease (—)
Protests:			
Filed with collectors by importers.....	30,074	29,400	—2.2
Allowed by collectors.....	2,018	2,651	31.4
Denied by collectors and forwarded to customs court.....	31,842	25,664	—19.4
Appeals for reappraisement filed with collectors.....	15,003	15,272	1.8

Marine activities.—The following table shows the number of entrances and clearances of vessels during the fiscal years 1956 and 1957.

Vessel movements	1956	1957	Percentage increase
Entrances:			
Direct from foreign ports.....	49,700	54,423	9.5
Via other domestic ports.....	28,837	28,857	0.1
Total.....	78,537	83,280	6.0
Clearances:			
Direct to foreign ports.....	47,885	57,511	20.1
Via other domestic ports.....	27,401	29,630	8.1
Total.....	75,286	87,141	15.7

The steady growth of the American merchant marine influenced the activities of the Division of Marine Administration. At the beginning of the fiscal year there were 43,538 documented vessels. This figure increased to 44,579 as of June 30, 1957, even though 1,041 vessels went out of documentation. There were 3,231 complete admeasurements of vessels and 486 readmeasurements or adjustments of tonnage during the fiscal year.

The following table shows the volume of marine documentation activities during the fiscal years 1956 and 1957.

Activity	1956	1957	Percentage increase
Documents issued (registers, enrollments, and licenses).....	14, 380	15, 371	6.9
Licenses renewed and changes of master endorsed.....	45, 577	47, 748	4.8
Mortgages, satisfactions, notices of lien, bills of sale, abstracts of title, and other instruments of title recorded.....	12, 595	13, 681	8.6
Abstracts of title and certificates of ownership issued.....	6, 400	6, 822	6.6
Navigation fines imposed.....	2, 138	2, 414	12.9
Tonnage tax payments.....	21, 993	24, 739	12.5

Construction of the Saint Lawrence Seaway and Power Project was facilitated through the issuance of a series of waivers of the navigation laws permitting the use of the seaway of otherwise unqualified but needed vessels. In each case the action taken was found by the Department of Defense to be necessary in the interest of national defense. A general outline of the marine activities is covered in the management improvement program under marine activities.

Legal problems and proceedings.—The Office of the Chief Counsel considered many legal problems and questions arising under the administration and enforcement of the customs and navigation laws and other related laws. Matters of particular interest included questions about the American selling price of certain rubber-soled footwear; whether a person entering the United States under certain circumstances was a “resident” for the purpose of applying exemptions from duty under the tariff act; and questions about the method of marking imported merchandise to show the country of origin and exemptions from the marking requirements in certain cases.

Special consideration was given to the implementation of the provisions of the Customs Simplification Act of 1956 and regulations and instructions were issued on the new currency rate system provided for in this act. Reports to committees of Congress on pending bills were prepared or reviewed and proposed legislation was drafted. Considerable time and effort went into the preparation of a proposed customs administrative bill for submission to Congress.

Liaison was maintained with the office of the Assistant Attorney General in charge of customs litigation and assistance given in the preparation of customs cases for trial and appeal. Procedures were effected in cooperation with the Department of Justice to obtain computations of overtime services and the amounts due in the remaining customs overtime cases involving the former customs border patrol service.

Law enforcement and investigative activities.—The Customs Agency Service conducted 16,473 investigations during fiscal 1957 as compared with 16,404 investigations in fiscal 1956. These investigations arose not only under the customs, navigation, and related laws administered by the Bureau of Customs, but also in connection with a number of laws administered by other Government agencies and enforced by Customs. Table 97 shows the investigative activities for the fiscal years 1956 and 1957.

The major enforcement problems involved the smuggling into the United States of narcotic drugs, watches and watch movements, and diamonds.

There was a substantial increase in the number of investigations of narcotic drug and marihuana smuggling and market value which resulted in large measure from the augmentation of the force of the Customs Agency Service in the United States and abroad. The requirement of the Narcotic Control Act of 1956 (18 U. S. C. 1407) that addicts and previous narcotic law violators register when departing from and returning to this country, added to the investigative workload.

During fiscal 1957 there was a decline both in the number of seizures of narcotic drugs and marihuana and in the amount of these drugs seized. There were 166 seizures made during the year as compared with 259 last year. Total drugs seized included 151 ounces of heroin, 180 ounces of smoking opium, 39 ounces of raw opium, and 25,905 ounces of marihuana. These totals are considerably below the total seizures of these drugs shown in the Annual Report for 1956 which, as noted in that report, included two unusually large seizures. The number of marihuana cigarettes seized this year by Customs was 7,868 as compared with 4,377 in 1956.

It is significant to note that seizures of narcotics and marihuana by Customs during the first three months of fiscal 1958 are up substantially over the first three months of the past year. Over 115 ounces of heroin and 374 ounces of smoking opium have been intercepted in this period.

Heroin continues to be received from both Europe and the Far East. A year ago, traffickers from Europe appeared to have developed a transit route through Canada, but following several seizures made in Paris, New York, and Montreal, this channel seems to have been abandoned. Heroin from the Far East has been entering at West Coast ports. There also have been several important seizures at our southern ports which may indicate a changing pattern. Mexico continues to be the source of practically all important shipments of marihuana.

The Narcotic Control Act of 1956 provided sharply increased penalties for violators of laws covering both narcotic drugs and marihuana. In substantial cases, where the evidence has been clear, little difficulty has been experienced in obtaining convictions, followed by sentences according to the more severe scale.

There is evidence that the smuggling of watches and watch movements increased during the year. There were a number of important arrests and seizures of these commodities, the largest seizure consisting of 21,258 watches having an appraised value of \$165,000. As an added enforcement measure, the Bureau of Customs has invoked the provisions of the Swiss Trade Agreement, approved by the President on January 9, 1936, which provides for the cooperation of the Swiss Government in the suppression of this type of smuggling.

The smuggling of diamonds is apparently continuing on a substantial scale. It is undoubtedly motivated by the savings effected by the offenders by evading income and luxury taxes and also by avoiding the customs duty imposed by this Government. These diamond

shipments usually originate in Antwerp, Belgium, and their ultimate point of destination is New York.

Seizures of merchandise throughout the country for violations of laws enforced by the Customs Service numbered 14,812 with an appraised value of \$11,596,706 during 1957, as compared with 13,640 seizures in 1956, having an appraised value of \$18,723,776. This was an increase of 8.6 percent in the number of seizures but a decrease of 38.1 percent in the appraised value. Title to only a small fraction of these seizures actually passes to the Government, as the majority are destroyed or remitted to their owners upon payment of fines or penalties. Details of seizures are shown in table 96.

There were 899 arrests for violations of laws enforced by the Bureau of Customs in 1957, as compared with 910 in 1956. A large majority of these arrests were made on the southern border. The following tabulation shows the number of arrests and dispositions during fiscal years 1956 and 1957.

Activity	1956	1957	Percentage increase, or decrease (—)
Arrests.....	910	899	—1.2
Convictions.....	460	457	—0.7
Acquittals.....	61	35	—42.6
Nolle prossed.....	29	86	196.6
Dismissed.....	121	86	—28.9
Not indicted.....	50	58	16.0

Trade-mark information published.—In March 1957, the Bureau published a pamphlet entitled *Tourists Trade-Mark and Trade Name Import Information*. The pamphlet contains a list of the trade-marks which have been recorded in the Treasury Department that pertain to some of the more popular items purchased by tourists. The publication also indicates the type of consent, if any, which the trade-mark owner has granted for the importation of its merchandise as well as explanatory information concerning trade-marks.

Fines, penalties, and forfeiture data made available.—In September 1956 the Commissioner of Customs instructed collectors at the various ports of entry to make available to the public information concerning closed fine, penalty, and forfeiture cases arising under the customs and navigation laws administered by the Customs Service. Monthly lists are prepared at each headquarters port showing the cases closed during the previous month.

Foreign trade zones.—Foreign Trade Zone No. 1 on Staten Island, N. Y., lost one of its most important activities when a large tobacco warehouse ceased operations on June 30, 1957. The firm had occupied quarters in the zone for the past 18 years, but the dwindling demand for Sumatra tobacco forced the discontinuance of their zone warehouse. Fourteen vessels used the zone facilities for discharging foreign cargo and 78 ships berthed in the zone to lade domestic ship's stores. Operations at this zone were at a considerably lower level than during the previous year.

Operations at Foreign Trade Zone No. 2 in New Orleans, La., are still climbing; there were 1,452 more entries than in 1956, and approxi-

mately \$220 thousand more in duties were collected than in the previous year.

The volume of operations in Foreign Trade Zone No. 3 in San Francisco, Calif., decreased. This was reflected in the number of entries, the amount of duties collected, and in the tonnage and value of merchandise received in and delivered from the zone.

There has been an upward trend in the amount of duties collected in Foreign Trade Zone No. 5 in Seattle, Wash. While the number of entries has not materially changed, increases occurred in the tonnage of merchandise received in and delivered from the zone and in the amount of duties collected.

The following table contains a brief summary of foreign trade zone operations.

Trade zone	Number of entries	Received in zone		Delivered from zone		Duties and internal revenue taxes collected
		Long tons	Value	Long tons	Value	
New York.....	5,669	27,760	\$26,009,430	39,094	\$30,280,221	\$2,869,468
New Orleans.....	5,200	44,795	14,980,413	41,223	15,057,818	1,032,558
San Francisco.....	9,790	26,467	4,767,743	4,839	56,282	979,204
Seattle.....	510	9,937	696,644	11,174	963,891	106,562

Customs districts, ports of entry, stations, and airports.—A new customs collection district was created by statute in the early part of the year comprising the State of New Mexico. The district was designated Customs Collection District No. 50. The port of Columbus, N. Mex., was transferred from the El Paso District and became the headquarters port of the newly created district.

The limits of the following ports were extended to include areas not heretofore covered: Philadelphia, Pa.; Wilmington, Del.; Baton Rouge, La.; Chicago, Ill.; Toledo, Ohio; Lake Charles, La.; and Beaumont, Port Arthur, Orange, and Sabine, Tex. Ely, Minn., was designated as a customs station while Fort Pierce, Fla., and Cheboygan, Mich., were redesignated as customs stations. The designation of East Chicago, Ill., and Winton, Minn., as customs stations was revoked. Port O'Minot Airport, Minot, N. Dak., and Miller International Airport, McAllen, Tex., were designated as airports of entry during the year.

Cost of administration

During 1957 regular customs employment again decreased, but the addition of 171 new positions financed by the Department of Agriculture in connection with the joint efforts of that Department and the Bureau to strengthen import controls over the importation of potentially dangerous plant and animal products, and an increase in export control employment brought the total 1957 employment in the Bureau 1.3 percent above that of 1956. The following table shows employment data during the fiscal years 1956 and 1957.

Operation	1956	1957	Percentage increase, or decrease (-)
Regular customs operations:			
Nonreimbursable.....	7,266	7,175	-1.3
Reimbursable ¹	298	289	-3.0
Total regular customs employment.....	7,564	7,464	-1.3
Export control.....	161	198	23.0
Additional inspection for Department of Agriculture.....		171	100.0
Total employment.....	7,725	7,833	1.4

¹ Salaries reimbursed to the Government by those private firms who received the exclusive services of these employees.

Customs operating expenses totaled \$46,005,355, including export control expenses for which the Bureau was reimbursed by the Department of Commerce, and the cost of additional inspection reimbursed by the Department of Agriculture.

Management improvement program

Significant improvements were made in many areas of customs activity, and the realized savings of nearly \$450 thousand were used to meet the demands of an ever-increasing workload. In addition, the necessity for additional funds in the amount of \$115 thousand was obviated and space having an annual rental value of more than \$35 thousand was released. The management improvement program itself was strengthened through a series of conferences held in the Washington headquarters for principal customs field officers to stress the importance of good management.

Travel and air commerce.—A new type of baggage declaration was adopted to accelerate the clearance of passengers through customs. The new form provides simple “yes” and “no” type questions which indicate for the passenger whether he must list articles acquired abroad. In many instances, the listing of these articles is no longer required. In the old type of declaration, all items acquired abroad had to be itemized, whether subject to duty or not. A similar form for passengers arriving from Mexico, where the United States resident exemption requirements are slightly different, has also been adopted.

The Customs Air Facilitation Committee (see page 69 of the 1956 Annual Report) in its study of passenger and baggage clearance at New York International Airport developed a radically new concept of inspection and examination. Applying the methods followed in modern supermarkets for “checking out” customers, the committee evolved a plan to channel air passengers and their baggage through a number of fixed inspection points which are manned by as many customs officials as the incoming traffic requires. The system utilizes conveyor belts for transporting baggage to the examining inspectors. Facilities incorporating these features are now being installed at New York International Airport, and the operators of other air terminals are being encouraged to consider these arrangements in future planning.

Certain changes made in the assignments of customs officers to inspect private aircraft and pleasure vessels will greatly reduce overtime charges to private operators who arrive at ports of entry during periods when customs inspection is not regularly scheduled.

Entry of merchandise.—Substantial progress was made during the year in improving the handling and processing of foreign mail. At New York the installation of modern conveyor belts to replace obsolete hand-operated equipment was almost completed. These belts will eliminate most of the drudgery in moving some 15 million parcels through customs inspection and examination.

Arrangements were completed also with the Post Office Department for Customs to separate the dutiable foreign airmail parcels from nondutiable parcels at three major air terminals. The nondutiable parcels are then dispatched to destination from the airport. This saves the Post Office considerable expense in hauling between the airport and the downtown post office and expedites delivery.

The policy of eliminating all documentation not essential to customs was further extended by exempting from customs invoice requirements all shipments of crude oil imported in bulk.

New regulations governing the licensing of customhouse brokers were issued following the transfer of this licensing function from the Office of the Director of Practice in the Internal Revenue Service to the Commissioner of Customs. The new directives require that both the general knowledge examination and the character investigation be completed before the applications are forwarded to Washington for final action.

As an added convenience to the public, the shipment of baggage in-bond to customs stations (locations served by customs but without full port of entry status) was authorized, and a list of customs stations added to the regulations. Prior to this action, baggage could be shipped in-bond only to customs ports of entry.

Other actions taken during the year: (1) Allowed vessel operators to make a simple certification of passengers' baggage on passenger lists rather than prepare a description of the baggage of each passenger as was formerly required; (2) combined the forms for the listing of passengers and crew; (3) eliminated the need for customs supervision of the discharge of dutiable bulk cargo under certain conditions which reduces overtime costs to vessel operators; and (4) established standard procedures for handling tariff classification inquiries.

Liquidation of entries.—In the face of a continuing increase in the number of formal entries filed, the backlog of entries awaiting liquidation continued to increase despite improved procedures. ("Liquidation" is the final determination of duties and taxes due on imported merchandise.) Unconditionally free entries filed at subports, formerly sent to headquarters ports, are now being liquidated at the subports.

Rapid handling procedures for liquidating simple type entries are being installed wherever advantageous, and additional personnel have been authorized at the ports where the bulk of the backlog exists.

Examination and appraisalment.—Revised examination procedures at nine major ports produced considerable savings in cartage and other costs. The new methods, designed to fit conditions at each port, allow many additional types of merchandise to be examined on the wharves, and by sample, instead of the hauling of sample packages to

the appraiser's store for examination. In addition procedures for requesting foreign value investigations were clarified and a branch of the Miami appraiser's office was established at the Miami International Airport to expedite the examination and release of merchandise arriving by air.

Marine activities.—A special committee established to study marine problems made a number of recommendations to improve marine administration. Among the improvements were: Clarification of the conditions under which vessels require boarding by customs; elimination of the requirement for certificates of lading on residue cargo movements; reduction of outward manifest requirements for vessels that have loaded merchandise at several domestic ports; authority granted for collectors of customs to permit diversions of vessels; transfer to the Coast Guard of the function of certifying copies of shipping articles; consolidation of forms used in awarding official vessel numbers; revision and simplification of the reports of laid-up vessels; relaxation of the requirements for oaths to be taken when renewal space on vessel documents are filled; revision and simplification of the tonnage tax forms; and authority for collectors of customs to approve all designations of home ports of vessels.

Legislation.—Public Law 927, entitled "The Customs Simplification Act of 1956," became law on August 2, 1956. One provision of this act (19 U. S. C. 1402a-1402g) amended Section 402 of the Tariff Act of 1930 relating to the valuation of merchandise imported into the United States. Under the previous law the primary bases for appraisement were: The foreign market value, or the export value, whichever was higher. This required that both values be determined before an appraisement could be made. The 1956 act eliminated foreign market value from consideration in the appraisement of many commodities, and thus made it possible to simplify what has been in effect, a duplicate appraisal operation. The act excepted from this simplified valuation procedure any commodity to which application of the new valuation standards would result in average decreases in valuation of 5 percent or more over those which would result under the old valuation. It further provided for the preparation of a list of the commodities on which such decreases would occur, and continued the valuation of these commodities under the old law. This list was published in August 1957. Other provisions of the 1956 act amended Section 522 of the Tariff Act of 1930 relating to the conversion of foreign currencies for customs purposes, and repealed certain obsolete provisions of the Tariff Act of 1930. These provisions have been implemented by appropriate regulations.

Delegations of authority.—A number of delegations of authority to principal customs field officers were made during the fiscal year. Collectors of customs were authorized to approve manufacturers' statements covering five categories of products under the general drawback rates. This delegation facilitates prompt action at the field level on drawback statements filed by manufacturers of burlap bags and meat wrappers; sugar and sirups; linseed oil, cake, and meal; piece goods; and fur and fur skin articles.

Authority was delegated to collectors to settle all claims for liquidated damages not exceeding \$20 thousand assessed against bonded carriers for shortages, or irregular or nondelivery of imported

merchandise shipped in-bond. Extended authority was granted to collectors to remit or mitigate penalties and forfeitures imposed under a number of conditions set forth in the Tariff Act of 1930 and the Air Commerce Act of 1926 (49 U. S. C. 176). The authority of principal customs field officers to act in personnel matters, including disciplinary cases, was extended and clarified.

Other management improvements.—The supervision of the lading for exportation of non-tax-paid alcoholic beverages and tobacco products now conforms to the supervision of merchandise exported under bond. This permits collectors to accept documentary and other types of evidence, in lieu of actual physical supervision of lading, as proof of exportation.

In cooperation with the Immigration and Naturalization Service, several hundred signs are being erected along the Canadian and Mexican borders to direct travelers to the customs and immigration inspection stations. This should help to reduce the number of instances in which a traveler, through lack of proper information, fails to report his arrival.

During the year various improvements were made in the customs laboratories. A master reference file of information on American-made coal-tar products was established to permit accurate comparisons to be made between imported and competitive domestic coal-tar products for duty purposes. The sampling of Philippine raw sugar is no longer required when satisfactory commercial test results are available. The chief chemist at Baltimore was assigned to develop data leading to the formulation of statistically controlled sampling and weighing techniques. Further developments were made in the application of spectrographic and X-ray diffraction apparatus in chemical analysis.

During the fiscal year management inspection teams visited 50 of the 104 collection, agency, appraiser, comptroller, and laboratory districts, and improvements directly attributable accounted for over \$200 thousand of the management savings. Employees submitted 750 suggestions under the incentive awards program, of which 151 were adopted with awards totaling \$3,845. Identifiable savings resulting from the suggestions adopted amounted to \$9,200 annually.

Progress continued to be made in records management. During the fiscal year a total of 11,184 cubic feet of records were disposed of, and another 23,000 cubic feet transferred to Federal records centers. Records holdings of the Bureau of Customs were reduced by 6,000 cubic feet.

Future plans and programs.—Representations have been made to the Canadian Government for the institution at Dorval Airport, Montreal, of preflight customs clearance for persons departing on direct flights to the United States. Clearing air passengers through United States Customs prior to departure enables them to proceed without further delay upon arrival in the United States. This is an extension of a similar procedure in effect at the Toronto Airport for several years.

The sustained and continuing interest of the Bureau of Customs in furthering the program of customs simplification begun in 1953, and in improving marine administration, is reflected in a number of legislative proposals which have been prepared for submission to

Congress. These would permit: Final determination of duties and taxes on imported merchandise without awaiting final appraisement; administrative review of appraisements which are now subject only to judicial review; administrative designation of classes of imported merchandise for which domestic merchandise may be substituted to obtain payment of drawback (i. e., refund of import duties) on exportation; and merchandise to be imported under bond without payment of duty, subjected to manufacturing processes, and exported (present law requires payment of duty on importation with 99 percent refunded after exportation of the manufactured product).

Many proposals affecting marine administration, both legislative and administrative, are under study. These would permit: Combining the several forms of vessel documents into one form; the use of declarations rather than oaths on marine documents; clarifying the laws governing coastwise trade; simplification of the regulations governing vessel entry and clearance, admeasurement of vessels, and port-to-port movement of vessels carrying residue foreign cargo, and other improvements in marine administration.

Bureau of Engraving and Printing

The Bureau of Engraving and Printing designs, engraves, and prints United States currency, Federal Reserve notes, securities, postage and revenue stamps, various commissions, certificates, and other forms of engraved work for Government agencies. The Bureau also prints bonds and postage and revenue stamps for the governments of insular possessions of the United States.

Deliveries of finished work during the fiscal year 1957 totaled 728,694,224 sheets. This reflected an increase in currency sheets of 5,145,111, or approximately 6 percent, and an increase in other work of 17,844,358 sheets, or approximately 3 percent, as compared with the quantities delivered in 1956. A comparative statement of deliveries of finished work in the two years is shown at the end of this report.

The rise in deliveries of finished products in 1957 resulted mainly from increased requirements for currency, U. S. savings bonds, and postage stamps. There was a decrease in production of Government paper checks, because of the conversion to punchcard checks. The increase in currency requirements was met through reduction of the substantial inventory in the Bureau. By the close of the year plans were being made to eliminate the production of E savings bonds on paper, since thereafter the bonds are to be purchased in punch-card form from a commercial firm.

Organizational changes

On June 17, 1957, an assistant director was appointed and given immediate supervision over the offices of Administrative and Maintenance Services, Industrial Relations, and Research and Development Engineering. The remaining offices report directly to the Director.

The Office of Assistant to the Director was abolished. The Internal Audit Staff, formerly designated the Internal Audit Branch under the supervision of the Assistant to the Director, now reports directly to the Director. The Chief of the Office of Industrial Relations was given

additional duties and the title of Executive Officer. In this capacity he assists the Assistant Director on projects which the Assistant Director has been authorized to assign to him.

Management improvements

Through studies relating to the Department's programs "*A Search for Economies*" and "*Manpower Utilization*," a number of projects were brought to completion. In addition, other regular and special studies made by management officials at the request of the Director resulted in abolition of certain positions.

Technical improvement during the year was directed primarily toward the dry intaglio printing of currency 32-subjects to the sheet. Since 1955 two rotary, sheet-fed, experimental presses had been in the process of evaluation. Upon completion of this phase of the program invitations to bid were issued to eight firms to furnish presses for production purposes. Only one company submitted a bid and this was accepted. The two experimental presses originally installed in the Bureau, and used in the evaluation program, were purchased later. These presses are being used to conduct experiments on a continuing basis for production where needed, and for training personnel. At the end of the year final tests were in progress to determine acceptability of the first of the eight new production rotary, sheet-fed, currency presses.

Intensive research to develop paper and inks suitable for printing currency by the dry intaglio process was associated with the development of the new press equipment. As a result, an improved paper and new ink formulas were developed for use in printing currency by this method.

The inscription "In God We Trust" will appear on the notes printed on the 32-subject, rotary, sheet-fed currency presses, in accordance with an act of Congress approved by the President on July 11, 1955 (31 U. S. C. 324a). This is the first time this inscription has appeared on paper currency.

The fifth postage stamp press on order was put into operation during 1957. Although as yet no downward adjustment has been possible in the billing rates for postage stamps, it is anticipated that savings will be realized when certain problems associated with the operation of these presses and related processing operations have been resolved. It is expected that the processing of coil stamps will be greatly expedited when machinery is built to process coils from wide webs of 432-subject stamps printed on the new presses. Prototype equipment for winding stamps into coils is being evaluated.

Through consolidation of duties, reassignment of employees, and by not filling vacancies which occur from resignations and deaths, a number of positions were declared excess during the year. This led to savings of 45 man-years and over \$153,200 on an annual basis. One major improvement, which permitted a reduction of 21 jobs, was the installation of new automatic equipment for packaging postage stamp books. The new equipment includes a machine for shaping the cartons which contain the books to be delivered, and machinery which automatically seals and wraps the cartons. The addressograph process is being introduced to print information on employees' pay envelopes to replace the typographic process used in the past. It

is estimated that this change will result in savings of approximately \$3,000 on an annual basis.

Savings on a one-time basis amounted to \$12,100. These savings came about through several instances of advantageous contracting for products and through use of a cheaper filler in packages of book stamps.

As a result of a complete review of the organization, work methods, and procedures in the Currency Overprinting Branch, new equipment was introduced, organization was improved, and better methods and accountability controls were installed. Greater security, better control of the work in process, and improved appearance of the working area are the resulting benefits.

During the year plans were made for changes in procedures for requisitioning postage stamps. Bulk requisitions will be submitted by the various field offices directly to this Bureau instead of through the Post Office Department central office as previously. In addition, the Post Office Department has agreed to allow the Bureau to establish desirable reserves of stock within the estimate rather than to adhere to quarterly reserves previously established. This will enable the Bureau to reduce the peaks and valleys experienced in the workload during the year.

In the program for paperwork management, the Bureau disposed of 516 cubic feet of obsolete records and established reports controls and instructions and manuals in a number of clerical and operational areas. There were 1,245 requests for forms processed, of which 1,114 were for reprints and 131 for new forms. Also, 188 forms were declared obsolete and 42 were eliminated by consolidation.

Industrial relations activities

The total number of employees on the rolls at the beginning of 1957 was 3,568 and on June 30, 1957, there were 3,590.

Wage increases affecting approximately 2,861 ungraded employees, and amounting to approximately \$326,500, were made to keep wage rates for Bureau jobs alined with those for comparable jobs in the Government Printing Office and the American Bank Note Company.

The Bureau acted upon 384 contributions under incentive awards programs in 1957 and adopted 108. Savings arising from the suggestion program and the special services program during the year amounted to an estimated \$32,500. The rate of participation by employees in the suggestion program increased from 100 suggestions per 1,000 employees during 1956 to 104 suggestions during 1957. In addition, there was a notable increase in the number of recommendations for awards for superior work performance and for special services. Supervisors submitted recommendations for 91 employees and 3 employee groups, as compared with recommendations for only 23 individual awards and no group awards in 1956.

A new promotion policy for supervisory positions has been prepared in final draft. Arrangements have been made to provide eye tests for all employees who are being considered for promotion to positions involving the examination of any printed product. These tests will also be used in hiring new employees.

The Bureau has intensified in-service training of personnel to coincide with the modernization program throughout the Bureau. In

addition to operational, management, and clerical training, the management intern training program was revised with the approval of the Civil Service Commission. Also, for the first time in many years, an apprenticeship program was developed for the training of two employees as apprentice-siderographers. The siderography craft is essential in the manufacture of engraved steel printing plates. The Bureau secured the cooperation of the National Bureau of Standards and the Bell Vocational School in providing training in electronics for some of the Bureau's electricians.

Training courses now under preparation include one in administrative procedures, with particular reference to the purchasing processes, and a refresher course in stenography.

The Bureau's safety program continued to emphasize that improvements can be achieved only through complete participation by all supervisory and nonsupervisory personnel, and all employee and union groups. Great progress was made during the year by a safety shoe program, by a program to show safety films in production areas, by installing numerous additional safety guards, by the safety staff's participation in the review of designs and blueprints, and in inspecting pilot equipment involved in the Bureau's modernization program for the purpose of seeing that every safety device possible is installed on new types of equipment when first used.

Because positions are available in the Federal Government for which high school graduates might qualify, the Bureau arranged with the Civil Service Commission to publicize the positions to the thousands of students who visit this Bureau every year on tours. This was accomplished during the year by the display of eye-catching posters for visitors entering the main building, and by distributing publications. In their remarks to student groups the tour leaders included a statement regarding the jobs which are available, and the location of descriptive literature.

Continuing efforts to reduce the use of sick leave have resulted in a reduction of three-fourths of a man-day per employee during the calendar year 1956.

Long range research program

Through continuing research and development the Bureau has been able to produce significant technological improvements over a period of years. In addition to its broad program of developing new and modern types of operating equipment, new types of nonoffset inks have been developed, and improvements in currency paper made. Plans for the fiscal year 1958 include further refinement of inks, other materials, equipment, and procedures. A study of the relative length of life of currency in circulation printed by the wet and dry intaglio printing processes is to be made for the Bureau by the National Bureau of Standards during 1958.

Development of machinery which will automatically replace defective currency notes is being continued. It is expected that a prototype model will be delivered by a contractor in the near future.

New issues of stamps

Orders were received and dies were engraved for new issues of postage stamps as follows:

Issue	Denomination (cents)
Nassau Hall, Commemorative, Series 1956.....	3
Labor Day, Commemorative, Series 1956.....	3
Devil's Tower, Commemorative, Series 1956.....	3

¹ Fixed assets acquired prior to July 1, 1950, are capitalized at appraised values (estimated replacement cost as of July 1, 1951, reduced to recognize the depreciated condition of the assets being capitalized); subsequent additions have been capitalized at cost, except that on and after July 1, 1951, all costs of manufacturing dies, rolls, and plates have been charged to current operations.

The act approved August 4, 1950 (31 U. S. C. 181-181e), which established the Bureau of Engraving and Printing Fund, specifically excluded from the assets of the fund the land and buildings occupied by the Bureau. In accordance with the Comptroller General's decision of October 4, 1951 (B-104492), however, replacements of building facilities and improvements to buildings made on and after July 1, 1951, have been financed by the fund. Such items of significant dollar amounts have been capitalized at cost and appear in the foregoing balance sheets under the caption "Building appurtenances."

² Earned surplus or deficit arises through billing for products at unit prices established prior to the development of actual costs. Section 2 (c) of the act of August 4, 1950, requires that any surplus accruing to the revolving fund during any fiscal year be deposited into the general fund of the Treasury as miscellaneous receipts during the ensuing fiscal year, provided that such surplus may first be applied to offset any deficit resulting from operations in prior years.

Fiscal Service

The Fiscal Service of the Treasury Department is comprised of the Office of the Fiscal Assistant Secretary, the Bureau of Accounts, the Bureau of the Public Debt, and the Office of the Treasurer of the United States. Their operations are under the general supervision of the Fiscal Assistant Secretary.

The Fiscal Assistant Secretary, under the direction of the Under Secretary for Monetary Affairs, administers the financing operations of the Treasury; prepares estimates of the future cash position of the Treasury for use of the Department in its financing; directs the distribution of funds between the Federal Reserve Banks and other Government depositaries; prepares calls for the withdrawal of funds from the special depositaries to meet current expenditures; directs fiscal agency functions in general; and administers the Treasury responsibilities with respect to the purchase, custody, transfer, and sale of foreign exchange acquired by the United States under various executive agreements with foreign governments in connection with United States programs operated abroad.

In carrying out the responsibilities of the Fiscal Assistant Secretary, liaison has to be maintained with the other departments, agencies, and branches of the Government with respect to their financial operations and the coordination of these operations with those of the Treasury. The Fiscal Assistant Secretary supervises the administration of accounting functions and related activities of all units of the Treasury Department through the Commissioner of Accounts; and carries out the Treasury's role in the joint accounting improvement program of the Secretary of the Treasury, the Director of the Bureau of the Budget, and the Comptroller General of the United States in accordance with the Budget and Accounting Procedures Act of 1950.

The several responsibilities of the Fiscal Assistant Secretary are indicated more fully in the operations detailed in the following reports by the Commissioner of Accounts, the Commissioner of the Public Debt, and the Treasurer of the United States.

BUREAU OF ACCOUNTS

Many of the varied fiscal functions of the Bureau of Accounts relate to the responsibilities placed by law upon the Secretary of the Treasury and have Government-wide significance. These responsibilities include: Maintenance of a system of central accounts and preparation of central financial reports of the Government required by the act of July 31, 1894 (5 U. S. C. 255) and the Budget and Accounting Procedures Act of 1950 (31 U. S. C. 66b); participation with the Office of the Fiscal Assistant Secretary in the joint program for improving and strengthening Government accounting and financial reporting; preparation of checks to Government creditors in payment of obligations incurred by the executive departments and agencies with certain exceptions; investment of social security and other trust funds; determination of qualifications and underwriting limitations of surety companies to write fidelity and other surety bonds to cover Government activities; administrative work relating to the designation

of Government depositaries; administration of loans made by the Treasury to Government corporations and other Federal agencies; and maintenance of accounts and reporting of foreign currencies held by the Treasury for use of Government agencies.

The Bureau of Accounts also makes payment of claims under international agreements, maintains accounts and collects amounts due from foreign governments under lend-lease and other agreements, furnishes Treasury bureaus with technical guidance and assistance in accounting matters, generally administers and coordinates internal audit activities of Treasury bureaus, and assists the bureaus in developing comprehensive audit programs.

Accounting, Reporting, and Related Matters

Central accounting

The system of central accounts for the Federal Government (provided for in Section 114 of the Budget and Accounting Procedures Act of 1950, and prescribed by Treasury Department Circular No. 945, dated May 11, 1954, as amended) was installed progressively throughout the fiscal year 1956 and placed in complete operation during the fiscal year 1957. The central accounts record receipts of the Government by sources and expenditures according to each appropriation and fund, as well as related data concerning the cash operations of the Treasurer of the United States and other fiscal officers of the Government.

Through the use of accounts for deposits in transit and related reconciling procedures, the central accounts constitute an internal check on deposits made by disbursing and collecting officers of the Government for credit to the account of the Treasurer of the United States. The Treasury's central accounts also provide the accounting basis for reports of receipts and expenditures published in the official financial statements of the Government, such as the *Monthly Statement of Receipts and Expenditures of the United States Government*, the annual *Combined Statement of Receipts, Expenditures and Balances of the United States Government*, and the actual figures for the last completed year in the *Budget of the United States Government*. As a result of current maintenance of the Treasury's central system of accounts, more effective integration of accounting between administrative agencies and the Treasury has been achieved. For example, under the central accounting system, the various types of cash transactions in transit during the closing days of the fiscal year, which heretofore had been processed for recording during the first month of the succeeding fiscal year, are now taken up in the central accounts as of June 30, the last day of each fiscal year.

Other central accounting developments include provision for revised statements of accountability in which collectors of customs and district directors of internal revenue report receipts on the same basis as other Government agencies. Accordingly, receipts of the two largest revenue collecting agencies of the Government are now reported and recorded in the central accounts on the basis of collections received rather than on a deposits accomplished basis. Also, installation of revised procedures for United States disbursing officers in foreign

countries permits the statements of accountability by such officers to be used as direct posting media to the central accounts.

The volume of accounting items processed through the central and regional accounting offices of the Division of Central Accounts during the fiscal year 1957, as compared with fiscal 1956, was as follows:

Classification	Work volume	
	1956	1957
Receipts.....	* 2, 211, 145	2, 121, 118
Expenditures.....	* 3, 153, 370	3, 106, 785
Other items.....	8, 950	11, 383
Total.....	* 5, 373, 465	5, 239, 286

* Revised.

Accounting procedures and systems

Technical assistance was given Treasury bureaus in developing their accounting systems, including collaboration with the Internal Revenue Service in revenue accounting and with the Bureau of the Public Debt in the revision of accounting for transactions in the public debt. Effective January 1, 1957, the number of monthly reports of deposits of withheld taxes in Federal Reserve Banks was reduced from a potential maximum of one to each of the sixty-four directors of internal revenue from each Federal Reserve Bank to a maximum of twelve reports (one from each Federal Reserve Bank covering all internal revenue districts), sent direct to the Bureau of Accounts in Washington.

Bureau participation in Government-wide projects under the joint program for improvement of accounting included preparation of proposals for legislation to improve procedures for substitute and uncurrent checks; collaboration with the General Accounting Office and the Bureau of the Budget in developing procedures under the act approved July 25, 1956 (31 U. S. C. 701-708), for handling claims and balances of expired appropriations; and in developing procedures for the disposition of checks which cannot be delivered to the payees because of changes of address and other reasons.

The Bureau staff also worked with the General Accounting Office and the United States Civil Service Commission in developing revised procedures, effective July 1, 1957, for the deposit of the Government's share of contributions to the civil service retirement and disability fund. This revision was based upon the act approved July 31, 1956 (50 U. S. C. 2254 (a)), which provided for charging the Government's share of the cost of retirement of each agency's employees to its appropriation. This revision was accompanied by an amendment to Joint Regulation No. 3, dated May 20, 1957 (exhibit 48), which permits all retirement fund receipts to be treated as available for disbursement for authorized purposes immediately after credit in the accounts of the disbursing officer.

An act approved August 1, 1956 (31 U. S. C. 18c, 24, 66a (c), 665 (g)), provides for consistency in budgeting and accounting classifications; improving support for budget justifications; accrual methods of accounting to accomplish full disclosure of the results of financial

operations; and simplifying agency allotment patterns. The Secretary of the Treasury assigned to the Bureau of Accounts and the Treasury Department Budget Office the responsibility of working with each bureau to the extent necessary to carry out the Treasury Department's program to implement the act.

Following a study of the budgeting and accounting procedures in each bureau, the Treasury Department under date of April 26, 1957, issued Department Circular No. 987 (exhibit 47), which requires the head of each bureau whose accounts currently develop only obligation and disbursement data to refine such accounts so as to produce also information on accrued expenditures, that is, cost of goods and services received. These additional data are to be disclosed as of the end of each fiscal year beginning with 1958, or more frequently if necessary.

Central reporting

Emphasis was continued during the year on the review and modernization of central financial reporting to meet the changing requirements of the executive branch, the Congress, and the public.

The Bureau also worked with Government agencies for the purposes of: Obtaining more comprehensive reports of assets, liabilities, commitments, and contingencies; improving reports of cash transactions for purposes of cash position management; developing and utilizing agency administrative reports for substitution in place of those required by the Treasury; continuing the improvement of the *Monthly Statement of Receipts and Expenditures of the United States Government* for more effective use by the Bureau of the Budget in budget formulation and execution; eliminating duplication and overlapping of financial reporting where possible in collaboration with the Bureau of the Budget and the General Accounting Office; and continuing the development of reports designed to serve the special needs of other Government agencies and congressional committees.

Control of foreign currencies

Control of foreign currencies acquired without dollars since 1953 has been the responsibility of the Secretary of the Treasury pursuant to provisions of law and executive orders. (See the Annual Report for 1954, p. 101.) Additional laws enacted since 1953, as published in exhibit 56 of the 1956 report and revised reporting instructions have expanded the scope of foreign currency operations (see exhibit 50) and Treasury responsibility for controlling collections and withdrawals, and the preparation of statements and reports of the transactions. The bulk of foreign currency activity is the result of operations under the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U. S. C. 1701, 1704, 1705), commonly referred to as Public Law 480.

During 1957, the amount of foreign currencies collected or acquired by Government agencies from all sources, without purchase with dollars, was the equivalent of \$1,636.0 million. Withdrawals of foreign currencies which the Treasury Department sold to United States Government agencies for dollars amounted to \$258.6 million, while transfers of foreign currencies made without reimbursement, pursuant to provisions of law, were in the equivalent amount of \$575.5 million. The balances of foreign currencies in Treasury

accounts as of June 30, 1957, amounted to the equivalent of \$1,128.1 million. In addition, the unexpended balances of foreign currencies transferred without reimbursement and held for the account of various Federal agencies as of June 30, 1957, amounted to the equivalent of \$351.5 million. A summary statement showing foreign currency collections, withdrawals, and balances for the fiscal year 1957, is included in this report as table 107.

Internal auditing

Progress was made toward perfecting and coordinating internal audit programs in Treasury Department bureaus generally. The improvements, which varied in different bureaus, included better programming, greater attention to operations where potential findings may be material, gradual expansion in the scope of fiscal audits, improvements in format and content of audit reports and related working papers, and better follow-up action on audit recommendations.

General administration and the coordination of the internal audit activities of the Department as a whole were provided in several ways. Assistance was given to particular bureaus in improving audit policies and programs; regular liaison was maintained with auditors of the General Accounting Office on mutual problems, and particularly those of department-wide significance; general meetings of the Treasury internal auditors were held for exchange of audit information and ideas; and professional publications on auditing were circulated to the Treasury internal auditors for their information and assistance. Also, studies and appraisals were made of the internal audit systems in operation in several bureaus and, where appropriate, suggestions were offered for strengthening the system.

The audit of the Bureau of Accounts' activities continued in the pattern of 1956 with some further expansion into new audit areas. The latter included audits of certain segments of the central accounts of the Government, the highway trust fund, and the individual retirement records of employees of the Bureau of Accounts. Comprehensive audits were concluded in five regional disbursing and accounting offices, bringing to fourteen the number completed since establishment of the new audit program in 1956. Also, the audit policy of the Bureau was rewritten and strengthened.

Commodity Credit Corporation appraisal

The act of March 8, 1938, as amended (15 U. S. C. 713 a-1), requires the Secretary of the Treasury, as of June 30 of each year, to appraise all of the assets and liabilities of the Commodity Credit Corporation to determine the Corporation's net worth. The amended act defines asset values, for the purpose of determining the net worth, as the cost of such assets to the Corporation.

The appraisal, which included an examination of accounting policies and practices, disclosed an impairment of the Corporation's capital for the fiscal year ended June 30, 1956, in the amount of \$1,239,788,671. This amount does not include losses from programs under specific legislation which authorize separate appropriations to reimburse the Corporation for the losses. An amount equivalent to the capital impairment as determined by the appraisal was appropriated by Public Law 85-118, approved August 2, 1957.

Table 122 of this report shows by years the elimination of capital impairment by appropriations or cancellation of obligations of the Corporation, and the amounts of surplus returned to the Treasury by the Corporation.

Disbursing Operations

The Division of Disbursement, through its 21 regional offices, performs disbursing services for 1,466 separate Government offices located throughout the United States, its Territories, and the Philippines. The Division serves all civilian executive departments and agencies except the Department of Defense, the Post Office Department, the United States Marshals, the Panama Canal, and certain other agencies and corporations. Its operations include: Disbursing from appropriated, trust, and deposit funds; issuing substitute checks pursuant to the act of December 3, 1945 (31 U. S. C. 528 (a)-(g)), for all disbursing officers; issuing United States savings bonds under the payroll savings plan for Federal employees; preparing monthly payments to veterans, social security beneficiaries, retired Government employees, and others; preparing payrolls for check payments to Government employees; and miscellaneous services such as preparing index and other record cards.

In addition to the foregoing activities, small cash payments are made by delegation through more than 1,500 agents who are employees of other agencies, but who, in making payments, operate under the direction of the Division of Disbursement. For the most part, agent cashiers are located at hospitals, penal institutions, and other stations where on-the-spot cash payments must be made.

The Division exercises technical supervision over the disbursing operations performed under delegation of authority from the Chief Disbursing Officer by 97 disbursing officers stationed at embassies and consulates in foreign countries, and serves as the focal point in arranging for disbursing services in those countries for all civilian agencies of the United States Government. Technical supervision is exercised also over 180 assistant disbursing officers attached to other agencies both in the United States and foreign countries.

Recurring annual savings of \$451,877 were effected during the fiscal year 1957 (considering carryover, the actual fiscal year savings amounted to \$365,600) through further improvements in mechanical processes and streamlining of procedures carried out under the management improvement program. Improvements were made in the payment files by consolidating files for veterans' benefit payments. Procedures were developed for making address changes and redirecting checks directly from original correspondence from payees rather than only at the request of administrative agencies. Improvements were made also in procedures for payroll processing and salary check issuance. During the third quarter of the fiscal year a prototype model of a new high speed electronic printer was installed in the Boston regional office for use in preparing checks and accounting records of checks issued. In the test operation approximately one million checks for income tax refunds were prepared.

For the fiscal year 1957 the unit cost for processing checks was reduced to 4.09 cents from 4.34 ¢ cents in 1956. The volume of payments made during 1957 compared with that in 1956 was as follows:

Classification	Number	
	1956	1957
Payments made:		
Social security.....	91, 748, 764	104, 293, 035

Deposits, Investments, and Related Operations

Federal depositary system

Government depositaries furnish the various departments and agencies with certain banking and financial services other than those provided by the Office of the Treasurer of the United States and the Bureau of the Mint. In addition to the Office of the Treasurer of the United States and the twelve Federal Reserve Banks and their branches, more than 11,000 commercial banks have been designated by the Secretary of the Treasury to serve as depositaries. Most of these are designated to receive proceeds from deposits from taxpayers and sale of public debt securities, and about 3,700 are authorized also to receive deposits from Government agencies and to furnish other fiscal services. The supervision of the depositaries, under the general direction of the Fiscal Assistant Secretary, is exercised through the Bureau and is administered through Department regulations governing the authority, qualifications, and other requirements.

Investments

The Secretary of the Treasury, in accordance with various provisions of law, has the duty of investing trust and other funds in obligations of the United States. The Investments Branch is charged with handling investment transactions of various trust funds and maintaining records of such investments. Records of securities held in safekeeping by the Treasurer of the United States and the Federal Reserve Banks subject to the order of the Secretary of the Treasury also are maintained by this Branch. Investment accounts handled primarily by the Treasury are shown in table 51. The facilities of the Treasury Department are used also for investment transactions for other agencies of the Government, for quasi-governmental funds, and for the Government of the District of Columbia.

 Revised.

Highway trust fund.—Pursuant to Section 209 of the Highway Revenue Act of 1956 (23 U. S. C. 173), approved June 29, 1956, the highway trust fund was established in the Treasury Department. The act requires the Secretary of the Treasury to estimate the amounts of Federal excise taxes on gasoline, tires, trucks, and other highway-user levies to be transferred from the general fund and the amounts which will be available for expenditures, and to invest such portion of the fund as is not, in his judgment, required to meet current withdrawals. Under the act it is also the duty of the Secretary of the Treasury, after consultation with the Secretary of Commerce, to report annually to the Congress on the financial condition and the results of operations of the trust fund. The first such report was transmitted in a letter from the Secretary of the Treasury, dated February 28, 1957 (exhibit 52). Appropriations made to the trust fund during 1957 amounted to \$1,478,925,050.21 and interest on investments amounted to \$3,094,002. Expenditures during the same period amounted to \$965,683,564. Table 63 shows the status of the fund as of June 30, 1957.

Loans and advances by the Treasury

Loan agreements with Government corporations and other agencies which are authorized to borrow from the Treasury are prepared in the Investments Branch. Records are maintained relating to loans and also to subscriptions to the capital of Government corporations paid by the Treasury.

Table 117 shows the status of loans made by the Treasury to Government corporations and business-type activities, and repayments, cancellations, and balances in the fiscal year 1957.

Saint Lawrence Seaway Development Corporation.—The act of May 13, 1954 (33 U. S. C. 981-985), established the Saint Lawrence Seaway Development Corporation to construct that part of the Saint Lawrence Seaway in United States territory in the interest of national security. The act provided that the corporation may issue revenue bonds payable from corporate revenue to the Secretary of the Treasury to finance its activities, and authorized and directed the Secretary to purchase any obligations of the corporation. Public Law 85-108, approved July 17, 1957, amended the original act by increasing the total face value of all bonds which may be so issued from \$105,000,000 to \$140,000,000; increased the amount of bonds which may be issued in any one year from 40 percent to 50 percent of the total, and also provided that any interest accrued on such bonds and deferred by the Treasury Department during the period prior to the collection of revenues may not be charged against the debt limitation of \$140,000,000.

During the fiscal year the Secretary of the Treasury purchased bonds totaling \$32,300,000. As of June 30, 1957, total purchases amounted to \$48,300,000.

Colorado River Dam fund.—The act of December 21, 1928 (43 U. S. C. 617a) established the Colorado River Dam fund. An explanation of the purposes and financial operation of the fund appeared in the Annual Report for the fiscal year 1946, page 119. The status of the fund is shown in table 55 of this report.

Refugee relief.—The Refugee Relief Act of 1953, Section 16 (50 App. U. S. C. 1971n), authorized the Secretary of the Treasury to make loans, not to exceed \$5,000,000 in the aggregate, to public or private agencies of the United States to finance the transportation, from ports of entry to the places of resettlement in the United States, of persons receiving immigrant visas under the act who lacked the resources to finance the expense involved. During the life of the act, which expired December 31, 1956, twenty-nine agencies were certified by the Department of State to the Treasury as eligible organizations to make applications for loans. During the fiscal year ended June 30, 1957, applications for loans aggregating \$30,000 were approved by the Secretary of the Treasury of which \$15,000 was advanced. Table 74 shows those agencies which have had loans approved and the status of such loans.

District of Columbia.—Under the District of Columbia Appropriation Act of June 2, 1950, as amended (D. C. Code, Sec. 43-1540, 1951 edition), the Commissioners of the District of Columbia are authorized to borrow funds not to exceed \$35,000,000 from the United States Treasury to finance the expansion and improvement of the water system of the District of Columbia. Loans made during the fiscal year amounted to \$3,900,000. Through June 30, 1957, total loans made for this purpose amounted to \$8,100,000.

Surety bonds

Certificates of authority are issued by the Secretary of the Treasury to corporate sureties making application and qualifying under the act approved July 30, 1947 (6 U. S. C. 8) to execute bonds in favor of the United States. The Treasury publishes annually, on or about May 1, a list of companies holding such certificates of authority. The Bureau of Accounts examines the applications of companies requesting authority to write Federal bonds and currently reviews the qualifications of the companies so authorized. It also examines and approves as to corporate surety practically all bonds in favor of the United States, except certain bonds of the Post Office Department and Department of the Army, and has custody of a large portion of the bonds examined with the exception of contract bonds.

As of June 30, 1957, there were 171 companies holding certificates of authority, qualifying them as sole sureties on recognizances, stipulations, bonds, and undertakings permitted or required by the laws of the United States, to be given with one or more sureties. There were also 19 companies holding certificates of authority as acceptable reinsurers only, issued under Department Circular No. 297, as amended. During the fiscal year certificates of authority to act as sole sureties were issued to 16 additional companies and the authority of 3 was revoked. Certificates were issued to 2 additional companies as acceptable reinsurers only under Department Circular No. 297, as amended. The authority of 2 reinsurers was revoked and the authority of 1 reinsurer was extended to that of a sole surety. During the year, 37,067 bonds and consent agreements cleared through the Bureau for approval as to corporate surety.

Public Law 323, approved August 9, 1955 (6 U. S. C. 14), requires the head of each department and independent establishment in the

executive branch of the Federal Government to obtain, under regulations promulgated by the Secretary of the Treasury, blanket, position schedule, or other types of surety bonds covering civilian officers and employees and military personnel of each department or independent establishment who are required to be bonded, and to pay bond premiums from any funds available for administrative expenses of the employing agency.

The act also requires the Secretary of the Treasury to transmit to Congress on or before October 1 of each year a comprehensive report of bonding activities under the act. A summary of the information reported by agencies for transmission to Congress in October 1957, showing bonds in force June 30, 1957, as compared with coverage April 30, 1956, follows.

	Status of coverage in force	
	As of April 30, 1956	As of June 30, 1957
Number of officers and employees covered.....	930,164	957,585
Number in Internal Revenue Service covered ¹	¹ 24,859	(1)
Aggregate penal sums of bonds procured.....	\$3,291,163,250	\$3,459,393,385
Penal sums procured by Internal Revenue Service coverage ¹	¹ \$140,675,000	(1)
Total premiums paid by:		
Government.....	\$598,256	\$720,904
Internal Revenue Service ¹	¹ \$30,236	(1)
Administrative expenses.....	\$24,896	² \$20,748

¹ Bonds were originally procured by the Internal Revenue Service under the provisions of the Internal Revenue Code of 1954 (26 U. S. C. 7803 (c)), for one year. Bonds were renewed during the fiscal year 1957 under the act of August 9, 1955.

² Administrative expenses were lower in fiscal 1957 as few bonds were procured during that year.

Foreign Indebtedness

World War I

The Government of Finland made its annual payment in the amount of \$396,161.86 to the Treasury Department during the fiscal year 1957 representing installments of principal and interest which became due December 15, 1956, and June 15, 1957, under the funding agreement of May 1, 1923, and the moratorium agreements of May 1, 1941, and October 14, 1943, relating to indebtedness growing out of World War I. This amount was made available to the Department of State for financing educational exchange activities in Finland and the United States in accordance with provisions of the act of August 24, 1949 (20 U. S. C. 222).

Tables 109 and 110 show the status of World War I indebtedness of foreign governments to the United States.

Mixed Claims Commission, United States and Germany

The amount of \$3,000,000 was received from the Federal Republic of Germany in April 1957. This represents the fifth annual installment due under the terms of the agreement signed at London on February 27, 1953, in partial settlement of German debts arising from World War I. A summary of the terms of this agreement was included in the Annual Report for 1954, page 109. This payment permitted a further distribution of 5.3 percent on account of interest

accrued on Class III awards (those over \$100,000) of the Mixed Claims Commission, United States and Germany, and of payments under Private Law No. 509, approved July 19, 1940. A statement showing payments on awards and the status of the accounts as of June 30, 1957, is shown in table 102.

World War II

The Treasury Department received payments during 1957 from debtor governments under lend-lease and surplus property agreements in United States dollars amounting to \$129.8 million, foreign currencies having an equivalent value in United States dollars of approximately \$56.7 million, and real property and improvements to real property having an estimated value of \$.1 million, resulting in credits totaling \$186.6 million to the debtor governments' accounts.

From inception of the lend-lease and surplus property programs, payments in foreign currencies and real property and improvements represent a total estimated value received of \$392.4 million, while the total United States dollar receipts and other credits have amounted to \$2,780.4 million.

Treasury silver bullion totaling 409,782,670.47 fine troy ounces and valued at \$291,401,009.98 was transferred to certain foreign governments during World War II for coinage and industrial use, pursuant to the Lend-Lease Act of March 11, 1941 (22 U. S. C. 411-419). A total of 97,142,341 fine troy ounces of silver, valued at \$67,585,043, was received by the Treasury Department as repayments on these accounts during the year. As of June 30, 1957, foreign governments have returned a total of 155,973,431 fine troy ounces having a dollar value of \$110,914,440.

The indebtedness of foreign governments under lend-lease and surplus property sales agreements is stated in table 112. As of June 30, 1957, the accounts receivable amounted to \$2,080 million, including the silver transferred under the lend-lease program.

Credit to the United Kingdom

The sixth annual payment of principal in the amount of \$48,950,-802.52 against the loan of \$3,750,000,000 under the Anglo-American Financial Agreement dated December 6, 1945, was made by the United Kingdom on December 31, 1956. The amount of \$70,385,447.48 representing interest due December 31, 1956, was deferred under an amendment to the original agreement dated March 6, 1957, and approved by Public Law 85-21 dated April 20, 1957. This amendment also permitted the deferment of interest installments which became due on December 31, 1956, on the lend-lease and surplus property accounts. (See exhibit 19.)

Germany, postwar (World War II) economic assistance

The agreement signed February 27, 1953, by the Federal Republic of Germany and the United States provided for the settlement of the claim of the United States for postwar (World War II) economic assistance furnished Germany. The interest payments provided for in the agreement in the amount of \$12,500,000 each were received on July 1, 1956, and January 1, 1957. Payments on the principal are not due until July 1, 1958.

Claims Against Foreign Deposits

Foreign Claims Settlement Commission

The International Claims Settlement Act of 1949, as amended by an act approved August 9, 1955 (22 U. S. C. 1641-1641q), provides a program for receiving and determining claims of nationals of the United States against Soviet Russia which arose prior to November 16, 1933, and a preferred category for judgment and attachment lien-holders on Russian properties transferred to the United States under the Litvinov Assignment. It also provides for receiving and determining claims of American nationals against the Government of Italy arising out of the war in which Italy was engaged from June 10, 1940, to September 15, 1947, and for which no provision was made in the Italian Peace Treaty. It further provides for receiving and determining claims for war damages, nationalization of property, etc., and a limited category of contract claims of American nationals against the Governments of Rumania, Bulgaria, and Hungary. The time for filing claims against the Soviet Union expired on March 31, 1956, and for claims against the Governments of Bulgaria, Hungary, Rumania, and Italy, on September 30, 1956. The foregoing claims are currently being adjudicated by the Foreign Claims Settlement Commission of the United States. The Treasury Department has been designated as the paying agent for awards of the Commission based on these claims and certified for payment under the above act. Under the law, the claims program is to be completed by August 9, 1959. The Secretary of the Treasury has authorized payment from the Soviet, Italian, and Rumanian claims funds in full of the principal amount of each award of \$1,000 or less, and payment of \$1,000 on account of the principal of each award in excess of \$1,000.

Soviet claims fund.—The United States has collected the sum of \$9,114,444 representing the net proceeds of properties liquidated under the so-called Litvinov Assignment. This amount, less a 5 percent statutory deduction for administrative expenses, is to be paid out to claimants as their interests may appear. Over 4,000 claims were filed with the Commission. As of June 30, 1957, the Treasury had received certifications from the Commission on 194 Soviet claim awards for payment in the total principal sum of \$1,231,537.

Italian claims fund.—Under the so-called Lombardo Agreement with Italy, the Government of Italy deposited the sum of \$5,000,000 with the Government of the United States for the settlement of the American claims against Italy. This amount, less a 5 percent statutory deduction for administrative expenses, is to be paid out to claimants as their interests may appear. Over 2,000 claims were filed with the Commission. As of June 30, 1957, the Treasury had received certifications from the Commission on two Italian claims awards for payment in the total principal sum of \$15,462.

Rumanian claims fund.—A claims payment fund of 20 to 24 million dollars is expected to become available from the net proceeds of the disposition of certain vested Rumanian assets by the Office of Alien Property, Department of Justice. As of June 30, 1957, there have been received from the Office of Alien Property for credit to the Rumanian claims fund amounts aggregating \$15,362,841. This amount, less the 5 percent statutory deduction for administrative

expenses, is to be paid out to claimants as their interests may appear. Over 1,000 claims were filed with the Commission. As of June 30, 1957, the Treasury has received certifications from the Commission on 47 Rumanian claims awards for payment in the total principal sum of \$127,244.

Hungarian and Bulgarian claims funds.—Claims payment funds of approximately \$3,000,000 each are expected to become available from the net proceeds of the disposition of certain vested Hungarian and Bulgarian assets by the Office of Alien Property. Over 2,700 Hungarian claims and approximately 400 Bulgarian claims were filed with the Commission. As of June 30, 1957, the Treasury had received certifications from the Commission on 29 Hungarian claims awards and 64 Bulgarian claims awards in the total principal sums of \$25,462 and \$121,913, respectively. At the present time, sufficient funds have not been received from the Office of Alien Property to enable the Secretary of the Treasury to authorize an initial distribution of these awards.

Yugoslav claims fund

The status of the Yugoslav claims fund as of June 30, 1957, is shown in table 103. A final distribution has been suspended pending the outcome of litigation brought by certain claimants.

American-Mexican Claims Commission

The final distribution on awards under the Convention of November 19, 1941, with Mexico was authorized during the fiscal year 1956. Payments amounting to \$21,440.50 were made during fiscal 1957 to individuals who had not previously submitted an appropriate voucher for the final distribution or who had not in previous years furnished adequate evidence of their right to payment. A statement of the Mexican claims fund appears as table 101.

Trading with the Enemy Act, as amended

The act of August 6, 1956 (50 App. U. S. C. 6b), authorized the Attorney General to dispose of the remaining assets seized under the Trading with the Enemy Act prior to December 18, 1941. Pursuant to the provisions of Section 1 (c) of the act, the Assistant Attorney General of the United States transmitted \$86,879.36 and \$30,621.40 to be placed in blocked accounts in the names of Czechoslovakia and Poland respectively, and \$86,879.36 to be deposited in the Rumanian claims fund created by Section 302 of the International Claims Settlement Act of 1949, as amended.

Payment of pre-1934 Philippine bonds

The Treasury Department makes payments of principal and interest on pre-1934 bonds issued by the Government of the Republic of the Philippines through the use of funds held in a trust account established in the United States Treasury, as provided in the act of August 7, 1939, as amended (22 U. S. C. 1393 (g) (4) (5)). Table 71 shows the status of this trust account as of June 30, 1957.

Withheld foreign checks

Treasury Department Circular No. 655, dated March 19, 1941, as amended, prohibiting the delivery of United States Government

checks to payees residing in certain foreign areas, continued in effect during 1957. This restriction applied during the year to Albania, Bulgaria, Communist-controlled China, Czechoslovakia, Estonia, Hungary, Latvia, Lithuania, Rumania, the Union of Soviet Socialist Republics, the Russian Zone of Occupation of Germany, the Russian Sector of Occupation of Berlin, and to Poland for most of the year. On June 7, 1957, Treasury Department Circular No. 655 was amended by Supplement No. 11 to permit the delivery of United States Government checks to payees residing in Poland. (See exhibit 49.)

Delivery of checks to nationals of North Korea is also prohibited by Foreign Assets Control regulations issued by the Treasury Department on December 17, 1950, except to the extent that delivery has been authorized by appropriate license.

Other Activities

Management improvement program

Total annual savings for the Bureau arising from improvements adopted during the year will equal 128.6 man-years with estimated annual recurring savings of \$497,388. Nonrecurring savings amounted to \$23,418. Effects of the improvement program are revealed by examples of some of the more significant money-saving achievements. These included, with the estimated annual savings indicated, the realignment and redistribution of work and reorganization of production line activities, \$111,000; the purchase of lighter weight check envelopes, \$57,000; the preparation of income tax refund checks by bill feed method, \$56,000; and the reduction of personnel ceilings based on increased production standards, \$50,000.

In the field of electronics, the Bureau's continuous search for new machine applications and improved methods is yielding dollar savings.

The Bureau has continued its efforts to provide effective training for its employees and participation in special safety training sessions. The procedure for reports control was applied in all divisions of the Bureau. Employees of the Bureau submitted 232 suggestions during the year under the cash awards program. Adopted suggestions numbered 126 on which awards aggregating \$1,985 were approved. There were 27 suggestions submitted by employees of other Government departments and agencies, of which 6 were adopted and awards of \$325 paid. There were also 16 outstanding and superior work performance awards.

The Government Actuary

The Government Actuary prepares for the Secretary of the Treasury estimates of the annual appropriations required to be made to the foreign service retirement and disability fund and the District of Columbia teachers' retirement and annuity fund, and makes actuarial valuations of each fund at intervals of 5 years or oftener if deemed necessary by the Secretary. The Government Actuary also prepares for the Secretary cost estimates of proposed legislation regarding other Government retirement systems, as requested; such as the policemen and firemen's retirement and disability system for the District. In addition, the Actuary is a member of the Board of Actuaries for which provision is made in the Uniformed Services Contingency Option Act

(10 U. S. C. 1443). The second annual report on the operations under the act was submitted in fiscal 1957.

Other work carried out by the Government Actuary includes analyses and schedules in connection with Treasury loan and borrowing operations. Analyses and schedules are prepared also for other Government agencies requesting actuarial assistance from the Treasury Department.

Donations and contributions

So-called "Conscience fund" contributions amounting to \$64,386 and other unconditional donations amounting to \$75,618 were deposited in the general fund by the Treasury Department during the year. Other Government agencies received and deposited into the general fund "Conscience fund" contributions and unconditional donations amounting to \$23,636 and \$3,928 respectively. There was also deposited to the credit of Library of Congress trust funds, permanent loan account \$217,152, representing cash donations and proceeds from the sale of securities belonging to the funds. Conditional gifts in the amount of \$711,000 were received to further the defense effort. This amount was transferred to appropriation accounts deemed proper to carry out the purposes for which the gifts were made.

Government losses in shipment

By a self-insurance plan the Government assumes the risk on its shipments of money, bullion, securities, and other valuables while in transit between the Treasury, other Government departments and agencies, and depositories. The plan, which supplanted contracts with private insurance companies, effective July 1, 1937, was established by the Government Losses in Shipment Act (5 U. S. C. 134-134h; 31 U. S. C. 528, 738a, 757c (i)), and is under the jurisdiction of the Treasury Department. The Bureau of Accounts is responsible for the administrative work in connection with the payment of claims for losses. On December 7, 1956, the regulations governing claims were amended by Department Circular No. 577, Supplement No. 4 (see exhibit 45).

During the fiscal year 1957, claims amounting to \$46,224.98 were paid from the revolving fund established under the act, while recoveries amounted to \$710.58, making a net expenditure of \$45,514.40 for losses. Detailed statements relating to the operation of the Government Losses in Shipment Act are given in table 100.

Deposits of interest charged on Federal Reserve notes

Section 16 of the Federal Reserve Act (12 U. S. C. 414) authorizes the Board of Governors of the Federal Reserve System to charge Federal Reserve Banks interest on the amount of unredeemed Federal Reserve notes issued to such banks in excess of gold certificates held as collateral against such notes. By the exercise of this authority, annual interest payments equal to approximately 90 percent of the net earnings of the Federal Reserve Banks have been made to the United States Treasury beginning in 1947.

The amount deposited in the fiscal year 1957 was \$433,500,482 as compared with the deposit of \$287,280,500 in 1956. The total deposits since 1947 have amounted to \$2,570,942,461 as shown in table 13.

Withholding of income taxes for States and Territories

An agreement with the State of Indiana was concluded under the act of July 17, 1952 (5 U. S. C. 84b, 84c), which authorizes the Secretary of the Treasury to enter into agreements with States for the withholding of State income taxes from the compensation of Federal employees regularly employed in the State. The agreement, which was the thirteenth one made with States and Territories, provided that withholding would commence with wages paid on or after July 1, 1957, or as soon thereafter as possible, but not later than August 15, 1957.

BUREAU OF THE PUBLIC DEBT

The Bureau of the Public Debt, in support of the management of the public debt, has responsibility for the preparation of offering circulars, the formulation of instructions and regulations pertaining to each security issue, the direction of the handling of subscriptions and making of allotments, the issuance of the securities and the conduct or direction of transactions in the issues outstanding, the final audit and custody of retired securities, the maintenance of the control accounts covering all public debt issues, the keeping of individual accounts with owners of registered securities and the issue of checks in payment of interest thereon, and the handling of claims on account of lost, stolen, destroyed, or mutilated securities.

Two principal offices are maintained, one in Washington, D. C., which issues and conducts the subsequent transactions in public debt securities (including governmental agency securities) outstanding other than savings bonds, and audits and maintains custody of these securities as they are retired; the other in Chicago, Ill., where the functions relate to transactions in savings bonds after their issue to the public. In addition to the two principal offices, three field branch audit offices, located in New York, Chicago, and Cincinnati, are maintained for the purpose of auditing retired savings bonds and preparing records reflecting their retirement.

Under Bureau supervision, many transactions in public debt securities are conducted through nationwide agents, which are, principally, Federal Reserve Banks, as fiscal agents of the United States, and their branches; selected post offices, financial institutions, industrial organizations and others, approximately 23,000 in all, which cooperate in the issuance of savings bonds; and over 18,000 financial institutions that redeem savings bonds.

Bureau administration

Management improvement.—The fiscal year 1957 has been marked by major accomplishments in the field of management improvement. Three studies of major importance culminated in decisions with far-reaching effects.

The Secretary approved the issue of United States savings bonds of Series E in punch card form. The punch card bond will closely resemble the present paper type bond but the size will be reduced from 7¼ by 4¼ inches to 7½ by 3¼ inches. A contract for the manufacture of the card bond was let and the first punch card bonds were

issued on October 1, 1957. The Bureau's administrative appropriation for the fiscal year 1958 was reduced by \$500,000 in anticipation of the savings to be realized in printing costs as a result of the conversion from the paper bonds to the card bonds. (See also exhibit 8.)

The Bureau also received approval for the employment of electronic data processing equipment and techniques in the issue and retirement operations for card bonds. This decision was the result of more than a year's study of various electronic systems, their capabilities, and possible application to this Bureau's large volume operations. The adoption of the punch card bond makes possible the use of electronic machines which should result in the processing of masses of data with greater efficiency and at a lower cost. Arrangements for the procurement and installation of such equipment are now being made. In order to further the development of a more effective performance of Bureau-wide operations, a new processing center was established in Parkersburg, W. Va., during August 1957, equipped to handle the registration stubs from card bonds issued and card bonds retired.

Largely as a result of the decision to ship all retired card bonds to the Parkersburg Processing Center, plans have been made to close the Chicago savings bond audit branch of the Division of Retired Securities. All shipments of bonds to that office were discontinued on June 1, 1957, and the office ceased operations on August 1, 1957. All retired paper bonds will continue to be handled by the two remaining savings bond audit branches in New York and Cincinnati. Savings realized from the closing of the Chicago savings bond audit branch will offset in part the cost of the new installation at Parkersburg.

As a result of the study of the major phases of the cash public debt accounting system completed during 1957, the responsibility of maintaining detailed cash accounts relating to public debt principal charges and principal credits in the accounts of the Treasurer of the United States was transferred, effective July 1, 1957, from the Office of the Treasurer to the Bureau of the Public Debt. Such charges and credits will thereafter be reported daily to the Treasurer's Office only at the summary public debt level. These operations have been programmed to utilize fully punched-card techniques. A monthly report, reflecting all public debt principal debits and credits, will be submitted to the Bureau of Accounts in lieu of various detailed reporting media. This revised procedure eliminates duplication of accounting records, reduces the flow of documentation between Fiscal Service offices, and simplifies the report form which provides the basis for appropriation action.

In addition to these three major developments, the Bureau has continued to implement its management improvement program in other areas. A review of the procedures followed by the Federal Reserve Banks in reusing bearer securities received in exchange transactions has led to changes in departmental requirements, which, in turn, have made it possible for the banks to simplify their handling procedures and reduce costs. The Chicago departmental office has adopted the duo method of filming savings bond registration stubs, which employs a greater reduction ratio and permits substantial economies in the use of film. Fees due paying agents who redeem savings bonds are now paid by checks drawn on the Treasurer

of the United States, rather than by drafts drawn on the Federal Reserve Banks. This change greatly simplified procedures in the Banks and in this Bureau, and the Federal Reserve Banks have been relieved of the necessity of carrying the "float" on paid drafts between the date of their payment and the date of reimbursement by the Treasury. An adjustment ticket prepared in the savings bond audit branch offices in connection with discrepancies disclosed in audit has been revised so that the Federal Reserve Banks can use copies of the same document as a basis for reimbursing the paying agents.

Among the continuing programs of the Bureau, the training and records management programs have been particularly active during the year. The executive and supervisory development phases of the training program have been especially emphasized. Bureau representatives attended several outside training courses on various aspects of management. On-the-job, technical, and supervisory training sessions conducted by Bureau personnel were continued, the most extensive having been a series of six sessions to familiarize supervisors with all phases of the Bureau's management improvement program. The records management program received additional impetus from the approval of a comprehensive Bureau disposal schedule. The program has been formalized, and emphasis on the disposal aspect has resulted in a decrease of more than 25 percent in the record accumulation in Washington. One of the more significant developments was the adoption of procedures bringing the forms control and records management programs together more effectively.

Fifty-seven suggestions were adopted under the incentive awards program; estimated savings totaled \$24,089 and awards paid amounted to \$1,380. Superior performance awards were made to 144 employees, and 47 employees shared in four group awards. The Bureau has been active in developing plans for recognizing and awarding employees engaged in measurable work of a repetitive nature whose production or accuracy is superior.

The public debt.—A summary of public debt operations handled by the Bureau appears on pages 26 to 33 of this report, and a series of statistical tables dealing with the public debt will be found in tables 16 to 49.

The public debt of the United States falls into two broad categories: (1) public issues, and (2) special issues. The public issues are classified as to marketable obligations, consisting chiefly of Treasury bills, certificates of indebtedness, Treasury notes, and Treasury bonds; and nonmarketable obligations, consisting chiefly of United States savings bonds and Treasury bonds of the investment series. Special issues are made by the Treasury directly to various Government funds and payable only for account of such funds.

During the fiscal year 1957 the gross public debt decreased by \$2,224 million and the guaranteed obligations held outside the Treasury increased by \$33 million. The most significant change in the composition of the outstanding debt during the year was the decrease of \$3,863 million in interest-bearing nonmarketable public issues, nearly

three-fourths of which was due to the decrease during the year of all United States savings bonds outstanding. Total public debt issues, including issues in exchange for other securities, amounted to \$189,975 million during 1957, and retirements amounted to \$192,198 million. The following statement gives a comparison of the changes during the fiscal years 1956 and 1957 in the various classes of public debt issues.

Classification	Increase, or decrease (—) (In millions of dollars)	
	1956	1957
Interest-bearing debt:		
Treasury bonds, investment series.....	—579	—874
Treasury savings notes.....	—1,913	
United States savings bonds.....	—869	—2,875
Marketable obligations.....	—254	752
Special issues.....	1,864	1,713
Other.....	—107	—114
Total interest-bearing debt.....	—1,858	—1,398
Matured debt and debt bearing no interest.....	235	—826
Total.....	—1,623	—2,224

United States savings bonds.—In terms of volume of work, the issue and redemption of United States savings bonds represent the largest administrative problem of this Bureau. Since these bonds are in registered form and in the hands of millions of people, establishing and maintaining alphabetical and numerical records of nearly 1.9 billion of these bonds which have been issued since 1935, replacing lost, stolen, and destroyed bonds, and handling and recording retired bonds present administrative tasks of considerable magnitude.

Receipts from the sales of savings bonds during the year were \$4,881 million and accrued discount charged to the interest account and credited to the savings bonds principal account amounted to \$1,216 million, a total of \$6,097 million. Expenditures for redeeming savings bonds charged to the Treasurer's account during the year, including about \$4,115 million of matured bonds, amounted to \$8,958 million. The amount of savings bonds of all series outstanding on June 30, 1957, including accrued discount and matured bonds, was \$54,996 million, a decrease of \$2,861 million from the amount outstanding on June 30, 1956. Detailed information regarding savings bonds will be found in tables 35 to 40, inclusive, of this report.

During the fiscal year 1957, 91.1 million stubs representing issued bonds of Series E were received for registration, making a total of 1,896.9 million, including reissues, received through June 30, 1957. These original stubs are first arranged alphabetically in semiannual blocks, by name of owner, and microfilmed. They are then arranged in the numerical sequence of their bond serial number in a full calendar year file and microfilmed, after which they are destroyed. The microfilms serve as permanent registration records. Of the aggregate of 1,896.9 million Series E bond stubs received, 1,649.1 million have been completely processed and destroyed, leaving a balance of 247.8

million stubs in process at various stages of completion. The following table shows the processing, by steps, of the registration stubs of Series E savings bonds.

Period	Stubs of issued Series E savings bonds in Chicago Office (In millions of pieces)					
	Stubs received	Alphabetically sorted		Alphab- etically filmed	Numeri- cally filmed	Destroyed after filming
		Restrict- basis sort ¹	Fine sort prior to filming ²			
Cumulative through June 30, 1952.....	1,456.3	1,434.0	1,408.5	1,375.4	1,293.0	1,286.7
Fiscal year:						
1953.....	82.8	84.0	59.8	62.3	66.4	67.9
1954.....	88.2	89.0	82.0	82.2	72.7	73.3
1955.....	87.0	88.4	99.3	88.1	25.7	29.9
1956.....	91.5	87.2	85.0	88.0	5.8	
1957.....	91.1	88.9	90.4	108.1	192.3	191.3
Total.....	1,896.9	1,871.5	1,825.0	1,804.1	1,655.9	1,649.1

¹ Not in complete alphabetical arrangement but sorted to such a degree that individual stubs can be located. Includes those stubs fine sorted.

² Completely sorted.

The audit of retired savings bonds is conducted in the savings bond audit branch offices of the Division of Retired Securities. There were 100.2 million retired savings bonds of all series received in the branch audit offices during the year. Retired bonds are audited and then microfilmed, after which the bonds may be destroyed. The bonds of all series received in these offices have been audited, micro-filmed, and destroyed to the extent indicated in the following table.

Period	Retired savings bonds of all series in the branch audit offices (In millions of pieces)					
	Bonds received	Audited	Micro- filmed	Balance unaudited	Balance unfilmed ¹	Destroyed
Cumulative through June 30, 1952.....	580.9	579.0	563.3	1.9	17.6	485.0
Fiscal year:						
1953.....	88.4	88.5	92.1	1.8	13.9	111.0
1954.....	97.3	96.0	95.5	3.1	4.6	81.6
1955.....	99.0	98.1	98.7	4.0	4.9	102.0
1956.....	97.4	96.5	96.0	4.9	6.3	117.9
1957.....	100.2	102.1	99.8	3.0	6.7	100.0
Total.....	² 1,063.2	1,060.2	1,045.4	3.0	6.7	997.5

¹ Beginning June 30, 1954, excludes 9.4 million pieces of unfilmed spoiled stock transferred to permanent storage and 1.7 million pieces of unissued stock to be destroyed without microfilming.

² Includes 1,008 million pieces of redeemed Series A-E bonds. Does not include approximately 460 million bonds paid and filed prior to establishment of branch audit offices.

After the retired bonds have been audited in the branch audit offices, a list of the serial numbers is transmitted to the Chicago departmental office where the serial numbers are posted to numerical registers, and the postings are verified. The following statement shows the status of the posting of all series of retired savings bonds.

Period	Retired savings bonds of all series recorded in Chicago Office (In millions of pieces)				
	Number of retired bonds re- ported	Status of posting			
		Posted	Verified	Unposted	Unverified
Cumulative through June 30, 1952.....	1, 042. 0	1, 041. 7	1, 039. 5	0. 3	2. 2
Fiscal year:					
1953.....	87. 7	88. 0	87. 5	-----	2. 7
1954.....	94. 6	89. 9	88. 7	4. 7	3. 9
1955.....	101. 3	102. 7	¹ 23. 7	3. 3	-----
1956.....	98. 2	96. 7	93. 4	4. 8	8. 1
1957.....	100. 1	99. 0	102. 3	5. 9	4. 8
Total.....	1, 523. 9	1, 518. 0	1, 435. 1	5. 9	4. 8

¹ During the period October 1954 to June 1955, only a 7 percent test verification was made of the postings.

Of the 93.0 million Series A-E savings bonds redeemed prior to release of registration and received in the branch audit offices during the year, 91.2 million, or 98.1 percent, were redeemed by more than 18,000 paying agents. These agents were reimbursed for this service in each quarter-year at the rate of 15 cents each for the first 1,000 bonds paid and 10 cents each for all over the first 1,000. The total amount paid to agents on this account during the year was \$11,358,654, which was at the average rate of 12.45 cents per bond.

The following table shows the number of issuing and paying agents for Series A-E savings bonds, by classes.

June 30	Post offices	Banks	Building and sav- ings and loan asso- ciations	Credit unions	Companies operating payroll plans	All others	Total
Issuing agents

¹ Includes all others.

² Estimated by the Post Office Department. Sale of Series E savings bonds was discontinued at post offices at the close of business on December 31, 1953, except in those localities where no other public facilities for their sale were available.

During the fiscal year 1957, 6,368,154 interest checks were issued on current income type savings bonds with a value of \$368,758,161. This was a decrease of 555,332 checks from the number issued during 1956, and a decrease of \$29,449,602. A total of 217,194 new accounts

was established compared with 368,066 in the previous year. As of June 30, 1957, there were 2,266,440 active accounts with owners of this type savings bonds, a decrease of 254,425 accounts from the previous year. There was a reduction of 357,063 in accounts of Series G bonds which have been maturing since May 1, 1953, and an increase of 102,094 in accounts of Series H bonds, which were first sold on June 1, 1952, and 544 in accounts of Series K which were first sold on May 1, 1952, and discontinued effective at the close of business April 30, 1957.

There were 55,014 applications during the year for the issue of duplicates of lost, stolen, or destroyed savings bonds, in addition to 1,765 cases on hand at the beginning of the year, making a total of 56,779 cases. In 34,413 cases the bonds were recovered, and in 20,519 cases the issuance of duplicate securities was authorized. On June 30, 1957, 1,847 cases remained unsettled.

Other United States securities

During the year 25,795 individual accounts covering publicly held registered securities were opened and 35,491 were closed. This reduced the total of open accounts on June 30, 1957, to 198,964 covering registered securities in the principal amount of \$19.1 billion. There were 380,722 interest checks with a value of \$526,398,120 issued to owners of record during the year. This was a decrease of 18,045 checks from the number issued during 1956, and a decrease in value of \$44,150,190.

Redeemed and canceled securities received for audit included 3,011,000 bearer securities and 212,000 registered securities, a total of 3,223,000, as compared with 3,180,000 in 1956; and 13,460,000 coupons were received, which was 540,000 less than in 1956.

OFFICE OF THE TREASURER OF THE UNITED STATES

The Treasurer of the United States is charged by law with the receipt, custody, and disbursement upon proper order of the public moneys and is required by law and administrative authority with maintaining records and making periodic reports on the source, location, and disposition of these funds.

Although the Treasurer does not maintain branch or field offices, the Federal Reserve Banks, as fiscal agents of the United States, perform many fiscal functions for the Treasurer throughout the country. These include the verification and destruction of United States paper currency, the redemption of public debt securities from the Treasurer's funds, holding on deposit most of the operating cash of the Treasury, charging the Treasurer's account for the majority of the checks drawn on the Treasurer, and the acceptance of deposits made by Government officers for credit of the Treasurer.

Commercial banks within the United States and its possessions, and in foreign countries also are utilized by the Treasurer to provide banking facilities for local activities of the Government. Information on the transactions handled in the name of the Treasurer by the Federal

Reserve Banks and commercial banks flows into Washington where it is taken into the Treasurer's general accounts.

Specifically, the Treasurer maintains current accounts of all receipts and expenditures; pays the principal and interest on the public debt; provides checking account facilities for Government disbursing officers, corporations, and agencies; pays checks drawn on the Treasurer of the United States; procures, stores, issues, and redeems United States currency; audits redeemed Federal Reserve currency; examines and determines the value of mutilated currency; acts as special agent for the payment of principal and interest on certain obligations of corporations of the United States Government, Puerto Rico, and the Philippine Islands; and maintains facilities in the Main Treasury building for (a) the deposit of public moneys by Government officers, (b) the cashing of United States savings bonds and checks drawn on the Treasurer, (c) the receipt of excess and/or unfit currency and coins from local concerns and banks, and (d) the conduct of transactions in both marketable and nonmarketable public debt securities for banks and for the public. The Office of the Treasurer prepares the *Daily Statement of the United States Treasury* and the monthly *Circulation Statement of United States Money*.

Under authority delegated by the Comptroller General of the United States, the Treasurer acts upon claims arising from the forgery of endorsements and other irregularities involving checks paid by the Treasurer and, in the case of unpaid checks which are lost or destroyed, instructs the claimants how to obtain substitute checks.

The Treasurer of the United States is also Treasurer of the Board of Trustees of the Postal Savings System, and custodian of bonds held to secure public deposits in commercial banks, bonds held to secure postal savings on deposit in such banks, and miscellaneous securities and trust funds.

Management improvement and internal audit

Continuing its program of appraising and reviewing operations and methods, the Office has made changes during the fiscal year which resulted in economies and increased efficiency. Among the more significant improvements were the following:

Nearing completion is the program to pay and reconcile through the use of electronic equipment an annual volume of approximately 390 million checks drawn on the Treasurer of the United States. This program requires that all such checks be in card form payable only in Washington, and that checking accounts be converted to 4-digit symbols. As of June 30, 1957, checking accounts with an annual volume of approximately 285 million checks had been converted. The remaining accounts will be converted on or before January 1, 1958.

Even before installation of the electronic equipment, this Office began an intensive program to place in continuing positions employees who would be affected by the changeover. During the past fiscal year 90 employees of the Check Payment and Reconciliation Division were reassigned to other jobs in the Office or Department, or were transferred to other agencies. Indications are that the Office will be successful in completing the installation of the new system without dismissals of any employees.

Adoption in disbursing operations of standard multiple-part forms in connection with stoppages of payment against checks drawn on the Treasurer and the handling of certain checks as collection items effected savings in personnel and printing costs. Requisitioning Treasurer's blank checks on a yearly instead of a continual basis also resulted in personnel savings and better use of manpower in disbursing operations.

The loss of coin bags furnished by the Treasurer when issuing coin to local banks and public utilities has been materially reduced by personal contacts and close followups. Additional savings have been made by repairing and reclaiming those bags cut or torn in use which formerly had been discarded.

The Bureau released over 16,000 square feet of space for other assignment, and a considerable quantity of furniture and equipment was declared surplus.

Internal audits provide management with independent appraisals of the fiscal activities of the Bureau. During the past fiscal year the internal audit program was expanded to include the Division which maintains the Treasurer's accounts, expendable supplies and personal property of the Bureau, contractual policies relating to purchase and selection of bids, and processing of claims and issuing of settlement checks out of the reclamation suspense and forgery accounts. Audits of cash, securities, and other assets aggregating many millions of dollars were made. A number of recommendations resulting from the audits were adopted to improve accountability for and control over the assets for which the Treasurer is responsible.

Reports control, supervisory training, forms analysis and control, and records management are all continuing programs. Under the incentive awards program 7 cash awards were made for suggestions adopted, 20 for outstanding performances, 19 for sustained superior performance, and 9 were cited in group awards. Also, two employees received the Treasury's Meritorious Civilian Service Honor Award and another employee was given an Honorary Certificate, in addition to a cash award, as the top winner of the Treasury Awards Committee Poster Contest.

Moneys received and disbursed by the Treasurer

Moneys collected by Government officers are deposited with the Treasurer at Washington, in Federal Reserve Banks, and in designated Government depositories for credit of the account of the Treasurer of the United States, and all payments are charged against this account. Total moneys received and disbursed for the fiscal years 1956 and 1957 are shown in the following table on the basis of the *Final Statement of Receipts and Expenditures of the United States Government* for the fiscal year 1957.

Receipts, expenditures, and Treasurer's account	1956	1957

^r Revised due to reclassification of accounts.

¹ Total budget receipts less amounts transferred to the Federal old-age and survivors insurance trust fund and the railroad retirement account and refunds of receipts. For details of receipts for 1957, see table 3.

² For details for 1957, see table 5.

³ For details for 1957, see table 28.

⁴ See table 1, footnote 3. For details for 1957, see table 3.

Assets and liabilities of the Treasurer's accounts.—The assets of the Treasurer consist of gold and silver bullion, coin and paper currency, deposits in Federal Reserve Banks, and deposits in the commercial banks designated as Government depositaries.

A summary of the assets and liabilities in the Treasurer's accounts at the close of the fiscal years 1956 and 1957 is shown in table 50.

Gold.—Gold receipts during 1957 amounted to \$1,042.6 million and disbursements totaled \$219.2 million, a net increase of \$823.4 million based on the daily Treasury statement. This increase brought the total gold assets to \$22,622.6 million on June 30, 1957. Liabilities against these assets were \$21,977.2 million of gold certificates and credits payable in gold certificates and \$156.0 million for gold reserve against currency. The gold balance in the Treasurer's account on June 30, 1957, was \$489.3 million.

Silver.—During the year 5.3 million ounces of silver bullion, which had been carried in the Treasurer's account at a cost of \$4.8 million, were monetized at a monetary value of \$6.9 million. This \$6.9 million increase in silver assets was offset by a decrease of \$17.6 million in holdings of silver dollars, making a net decrease of \$10.7 million in assets during the year. As of June 30, 1957, the silver assets of the Treasurer (exclusive of subsidiary coin and bullion held in the Treasurer's account at cost and recoinage value) amounted to \$2,438.8 million.

Liabilities against silver at the end of the year amounted to \$2,409.3 million for silver certificates outstanding and \$1.1 million for Treasury notes of 1890 outstanding, leaving a net balance of \$28.4 million in the Treasurer's account.

The silver bullion held in the Treasurer's account at cost value (exclusive of the \$28.4 million at monetary value) increased from \$40.0 million on June 30, 1956, to \$70.4 million on June 30, 1957. This increase of \$30.5 million is accounted for as follows: \$68.4 million net purchases of silver less \$4.8 million of silver monetized and less \$33.1 million of silver used for coinage.

Paper currency.—Under the laws of the United States the Treasurer is the agent for the issue and redemption of United States currency. All United States paper currency is procured by the Treasurer from the Bureau of Engraving and Printing and issued from Washington under the supervision of the Cashier.

The redemption of United States currency, except that received from local sources in Washington and burned and mutilated currency, is now accomplished by the Federal Reserve Banks and their branches acting as agents of the Treasury.

An interesting phase in the redemption of burned or mutilated currency is the highly specialized work of a group of women in the Currency Redemption Division. These women minutely examine and succeed in identifying for lawful redemption millions of dollars worth of such currency each year. Money which has been charred, torn, become moldy, or even in clay-like chunks, is identified. Under Treasury regulations (Department Circular No. 55), material submitted must not only be identifiable as currency, but must be in such condition as to permit positive identification of the engraved designs on the face side. Identification has often been made of burnt paper currency when combustion was incomplete. Tools employed by these examiners include spatulas, needles, tweezers, magnifying glasses, electric lights, skill, and patience. Mutilated currency is so examined for approximately 45,000 claimants annually, from all States of the Union and the Territories. In fiscal 1957, the value of such currency identified for lawful redemption amounted to more than \$6,500,000.

Table 83 shows by class and denomination the value of paper currency issued and redeemed during the fiscal year 1957, and the amounts outstanding at the end of the year. A comparison of the amounts of paper currency of all classes, including Federal Reserve notes, issued, redeemed, and outstanding, during the fiscal years 1956 and 1957 follows.

	1956		1957	
	Pieces	Amount	Pieces	Amount
Outstanding at beginning of year.....	3, 213, 753, 534	\$32, 486, 328, 270	3, 316, 440, 817	\$33, 017, 044, 203
Issues during year.....	1, 808, 868, 363	8, 156, 080, 000	1, 743, 010, 238	8, 087, 208, 000
Redemptions during year.....	1, 712, 181, 080	7, 625, 364, 067	1, 685, 386, 962	7, 661, 416, 915

Special depositories, Treasury tax and loan accounts.....	10,965	4,081,776,860.23
Insular and territorial depositories.....	40	47,355,207.99
Foreign depositories ²	39	67,186,015.30
Total.....	12,566	5,321,302,407.33

¹ Does not include limited depositories which have been designated for the sole purpose of receiving deposits made by Government officers for credit in their official checking accounts with such depositories and which are not authorized to accept deposits for credit of the Treasurer of the United States.

² Principally branches of institutions in the United States.

Checking accounts of disbursing officers and agencies.—As of June 30, 1957, the Treasurer maintained 2,503 disbursing accounts as compared with 2,832 accounts on June 30, 1956. This reduction, like that of last year, was caused mainly by consolidation of disbursing accounts, principally in the Post Office Department. The number of checks paid, classified according to disbursing officers, during the fiscal years 1956 and 1957 follows.

Disbursing officers	Number of checks paid	
	1956 [†]	1957 ¹
Treasury.....	232,574,656	244,991,164
Army.....	29,111,565	27,963,906
Navy.....	33,362,755	33,201,413
Air Force.....	26,326,581	28,376,769
Other.....	24,256,885	28,568,675
	345,632,442	363,101,927

[†] Revised.

¹ To be revised when final count is available.

Of the 363,101,927 checks paid during the fiscal year, 253,372,241 were paid by the Federal Reserve Banks and the Manila branch of the First National City Bank of New York acting as fiscal agents of the Treasurer and the remaining 109,729,686 checks were paid by the Treasurer in Washington.

Approximately one out of every four checks issued by the Government and its agencies in fiscal 1957 was for a payment from the Federal old-age and survivors insurance trust fund. Also, one out of every four checks was for the Department of Defense. These two categories of expenditure accounted for approximately 53 percent of the checks paid in the fiscal year.

Check claims.—During the fiscal year the Treasurer of the United States handled 112,433 paid check claims, of which 24,857 cases were referred to the United States Secret Service for investigation of the forging, altering, counterfeiting, or fraudulent issuance and negotiation of Treasury checks. The Treasurer reclaimed \$1,679,252 from those

having liability to the United States as the result of improperly negotiated checks and made settlements and adjustments in the sum of \$1,943,299 from funds recovered during and prior to the 1957 fiscal year. Disbursements from the check forgery insurance fund, established by Congress to enable the Treasurer to expedite settlement of check claims, totaled \$134,215. Claims for the proceeds of 72,262 outstanding checks were processed, resulting in the issuance of 42,934 substitute checks totaling \$14,310,605 by the Chief Disbursing Officer to replace checks which were not received or were lost, stolen, or destroyed.

The Treasurer adjudicated 536 forgery claims for the proceeds of the Philippine War Damage Commission and Veterans Administration United States depository checks payable to residents of the Philippines in indigenous currency and certified 188 disbursements totaling 87,854 pesos.

Under an additional delegation of authority from the Comptroller General of the United States, dated December 13, 1956, the Treasurer of the United States now reviews, examines, and disallows paid check claims, the recognition of which is barred by applicable statutes of limitation. Also, under the authorization contained in general regulations promulgated November 9, 1956, by the Comptroller General, the function of canceling unavailable 4-digit symbol card checks, the proceeds of which are not due the payees or representatives of their estates, has been delegated to the Treasurer.

Treasurer's Cash Room.—The commercial checks, drafts, money orders, etc., deposited by Government officers in the Treasurer's Cash Room in Washington for collection aggregated 6,328,095 items for the fiscal year 1957, as compared with 5,770,974 items for the fiscal year 1956.

The Cash Division also prepared and sold to collectors approximately 46,000 sets of uncirculated coins minted in 1956. This service was rendered at no expense to the Government as, in addition to the face value of the coins, a fee of 50 cents a set was charged for the cost of assembling and handling the coins.

Securities held in custody.—The face value of securities held in the custody of the Treasurer as of June 30, 1956 and 1957, is shown in the following table.

Purpose for which held	1956	1957
As collateral:		
To secure deposits of public moneys in depository banks.....	\$340,367,400	\$221,609,400
To secure postal savings funds.....	29,677,800	27,615,000
In lieu of sureties.....	7,438,700	6,588,700
In custody for Government officers and others:		
For the Secretary of the Treasury ¹	23,142,665,041	26,010,142,520
For the Board of Trustees, Postal Savings System.....	1,378,937,000	1,096,937,000
For the Comptroller of the Currency.....	12,428,000	12,925,500
For the Federal Deposit Insurance Corporation.....	1,157,709,000	1,197,509,000
For the Rural Electrification Administration.....	43,781,810	62,042,956

Other ²	192,825,786	108,916,090
For servicing outstanding Government issues: Unissued bearer securities	314,452,400	394,883,550
Total.....	38,773,651,799	41,285,465,376

¹ Includes those securities listed in table H13 as in the custody of the Treasury.

² Includes United States savings bonds in safekeeping for individuals.

Servicing of securities for Federal agencies and for certain other governments

In accordance with agreements between the Secretary of the Treasury and various Government corporations and agencies and Puerto Rico, the Treasurer of the United States acts as special agent for the payment of principal of and interest on their securities (including pre-1934 bonds of the Philippine Government). The amounts of such payments during the fiscal year 1957, on the basis of the daily Treasury statement, were as follows:

	Principal	Interest paid in cash	Registered interest ¹	Coupon interest
Federal home loan banks.....	\$1,671,630,000	\$34,725,952.40		
Federal farm loan bonds.....	429,776,200	120,529.04	\$1,513,898.91	\$35,665,070.62
Federal Farm Mortgage Corporation.....	29,300	87.00		2,858.89
Federal Housing Administration.....	39,043,650	304,279.31	3,470,899.36	
Federal National Mortgage Association.....	199,890,000	4,853,507.95		14,254,525.00
Home Owners' Loan Corporation.....	55,150			5,662.17
Philippine Islands.....	69,000	1,517.50	1,822.50	171,690.00
Puerto Rico.....	957,000	1,680.00	62,625.00	205,100.00
Total.....	2,341,450,300	40,907,553.20	5,049,245.77	50,304,906.68

¹ On the basis of checks issued.

Internal Revenue Service ¹

The Internal Revenue Service is responsible for the collection of the internal revenue and for the enforcement of the internal revenue laws and certain other statutes. These other statutes include the Federal Alcohol Administration Act (27 U. S. C. 201-212); the Liquor Enforcement Act of 1936 (18 U. S. C. 1261, 1262, 3615); the Federal Firearms Act (15 U. S. C. 901-909), and the National Firearms Act (26 U. S. C. 5801-5862).

Review of operations

Collections.—Internal revenue collections for the fiscal year 1957 totaled \$80.2 billion, an increase of \$5.1 billion from the 1956 total. While all major classes of taxes contributed to the increase, the largest gain occurred in individual income tax collections where the continued rise in personal incomes was reflected.

Collections by tax sources for the fiscal years 1929-57 are shown in detail in table 11 in the tables section of this report. A comparison of collections from the principal sources of tax revenue for the fiscal years 1956 and 1957 follows.

¹ More detailed information will be found in the separate annual report of the Commissioner of Internal Revenue.

NOTE.—Collections in the fiscal year 1957 are adjusted to exclude transfers to the Government of Guam under the act approved August 1, 1950 (48 U. S. C. 1421 h). Excluded for 1957 were \$3,363,000 in individual income tax withheld and \$401,000 in corporation income tax.

¹ Estimated. Collections of individual income tax withheld are not reported separately from old-age and disability insurance taxes on wages and salaries. Similarly, collections of individual income tax not withheld are not reported separately from old-age and disability insurance taxes on self-employment income. The amount of old-age and disability insurance tax collections shown is based on estimates made by the Secretary of the Treasury pursuant to the provisions of Sec. 201 (a) (4) of the Social Security Act as amended (42 U. S. C. 401 (a)), and includes all old-age insurance taxes and disability insurance taxes. The estimates shown for the two classes of individual income taxes were derived by subtracting the old-age and disability insurance tax estimates from the combined totals reported.

² Includes amounts of unidentified and excess collections, depository receipts outstanding 6 months or more for which no tax account can be found, and profit from sale of acquired property.

Receipt and recording of returns.—The total number of tax returns filed during fiscal 1957 was 93.2 million, representing an increase of 3.0 million in the returns processing workload as compared with 1956. Income tax returns filed by individuals and fiduciaries accounted for 60.2 million or nearly two-thirds of the total number received. The number of information documents received and processed totaled approximately 245 million.

About half of the increase in returns filed was accounted for by individual and fiduciary income tax returns which rose 1.5 million. Employment tax returns increased in number with the extension of Federal Unemployment Tax Act coverage to include employers of 4 or more persons (formerly 8 or more) beginning with the tax year 1956. An increase in the number of excise tax returns resulted from enactment of the Highway Revenue Act of 1956 (26 U. S. C. 4226, 4481).

The processing operations included the assessment of the taxes reported, verification of tax credits, computation or verification of tax liability, the issuance of bills for unpaid accounts, and the scheduling of tax refunds. The tax liability was computed by the Service on 4.8 million Form 1040A returns, or about one-third of the 14.1 million individual income tax returns filed on this form; the remaining two-thirds comprised returns on which taxpayers computed their own tax prior to filing, under the option newly provided on Form 1040A for 1956. Income tax credits and refunds were scheduled for

over 35 million individuals whose prepayments exceeded their liabilities.

Verification of the mathematical steps shown in the taxpayers' computations on income tax returns resulted in tax changes in 1,705,000 returns with tax increases aggregating \$98,123,000 and tax decreases totaling \$42,979,000. The number and amount of these adjustments increased, owing principally to the expansion of the verification operation to include the Form 1040A returns previously mentioned on which taxpayers took the new option of figuring their own tax.

Enforcement activities.—Through continued improvement of selection and examination procedures and taxpayer assistance methods the productivity of audit personnel was increased substantially. This gain was reflected in the number of income tax returns examined, which rose to 2,310,000 for the year as compared with 2,117,000 in 1956. A detailed comparison of the examined returns disposed of by the Audit Division in the 2 years follows.

Type of return	In thousands of returns	
	1956	1957
Income tax:		
Corporation.....	166	170
Individual and fiduciary.....	1,951	2,140
Total income tax.....	2,117	2,310
Estate and gift taxes.....	27	28
Excise and employment taxes ¹	245	284
Total examined returns disposed of.....	2,389	2,622

¹ Excludes examinations in which there were no tax changes and which were completed as part of examinations covering both income and excise and/or employment tax returns.

The additional tax, interest, and penalties resulting from audit totaled \$1,451,674,000 for 1957, showing a gain of more than \$200 million over the preceding fiscal year and representing the highest total reached for any year since 1952. The amount saved through the audit and disallowance of improper refund claims totaled \$497,653,000 as compared with \$552,046,000 in the preceding year.

More attention was devoted to persons and firms who have failed to file required returns and, as a result, the amount of tax, interest, and penalty on delinquent returns was increased to \$111,557,000 in 1957. A comparison of the overall enforcement revenue results for 1956 and 1957 follows.

Source	In thousands of dollars	
	1956	1957
Additional tax, interest, and penalty resulting from audit.....	1,249,868	1,451,674

Tax, interest, and penalty on delinquent returns.....	86,689	111,557
Total.....	1,412,823	1,661,354
Claims disallowed.....	552,046	497,653
Grand total.....	1,964,869	2,159,007

For the second straight year inventories of past-due tax accounts were reduced. At the close of fiscal 1957 delinquent accounts on hand numbered 1,488,000 compared with 1,505,000 a year ago, and the amount involved was \$1,560,530,000 compared with \$1,588,008,000 on the earlier date. Although the reductions were small, they were of major significance in contrast to the pattern of steadily rising backlogs which had prevailed in earlier years. The number of accounts placed in the past-due category during 1957 was about 20 percent greater than in the preceding year, mainly as a result of procedural changes adopted in 1956 to provide earlier contact with delinquent taxpayers. The number of closings was increased likewise, by strengthening the office collection force assigned to the newer and relatively simpler accounts, thus permitting collection officers to concentrate on the more difficult and older accounts. The amount collected on past-due accounts totaled \$943,249,000 as compared with \$824,504,000 for 1956.

In fraud investigations, emphasis was placed on cases considered to have the greatest deterrent effect on other would-be violators. Full-scale investigations completed by special agents during 1957 totaled 4,538, including 2,271 cases in which prosecution was recommended. In the preceding year 4,650 cases were completed, with 2,379 containing recommendations for prosecution. Indictments were returned against 1,666 defendants during 1957 compared with 1,593 defendants indicted in 1956. In the cases reaching the courtroom, 1,118 defendants pleaded guilty or *nolo contendere*, 138 were convicted after trial, 64 were acquitted, and 289 were dismissed. The following table presents the record of convictions including pleas of guilty or *nolo contendere*, for the years 1953 through 1957, in cases involving all classes of internal revenue taxes except alcohol or tobacco taxes.

Fiscal year	Number of individuals convicted
1953.....	929
1954.....	1,291
1955.....	1,339
1956.....	1,572
1957.....	1,256

The International Operations Division, newly organized in 1956 to administer the revenue laws applicable to United States taxpayers abroad, established a full program of enforcement activities at its Washington, D. C., headquarters and in its permanent field offices in France, Germany, Canada, the Philippines, Puerto Rico, and the Canal Zone. In addition, provisions were made to supply tax assistance during the filing period to persons residing in 30 other countries and to overseas military personnel.

Alcohol tax enforcement procedures were revised during 1957 to place primary emphasis on (1) the prosecution of organized groups of large-scale operators, (2) the planning of raids so as to increase the number of violators arrested, and (3) an intensified program to reduce

the supply of raw materials available for illicit operations. The number of stills seized in 1957 decreased as a result of these policies, while the number of arrests showed an increase. The following table compares 1957 results with those for 1956 and earlier years.

Fiscal year	Number of stills seized	Wine gallons of mash seized	Number of arrests made ¹
1940.....	10, 663	6, 480, 200	25, 638
1945.....	8, 344	2, 945, 000	11, 104
1950.....	10, 030	4, 892, 600	10, 236
1955.....	12, 509	7, 375, 300	10, 545
1956.....	14, 499	8, 643, 200	11, 380
1957.....	11, 820	6, 756, 600	11, 513

¹ Includes arrests for firearms violations and, beginning 1955, tobacco tax violations. Arrests involving these two classes of violations during 1957 numbered 415 and 4, respectively.

Further progress was made this year in the legislative program for simplifying alcohol tax administration and bringing up to date the statutory requirements relating to production, warehousing, processing, removal, and use of all types of distilled spirits. The proposals of the Service for extensive revision of the distilled spirits provisions of the Code were incorporated, with minor modifications, in H. R. 7125 which was passed by the House of Representatives on June 20, 1957.

Refunds.—Refunds of internal revenue taxes and the interest thereon, as required by law, are paid out of appropriations separate from that covering the Internal Revenue Service administrative expenses. The total amount of these payments for the fiscal year 1957 was \$4,009,346,000 ¹ as compared with \$3,772,359,000 ¹ in the preceding year, with individual income tax refunds accounting for the increase. Interest payments on refunds (included in these totals) increased from \$53,747,000 ² in 1956 to \$57,009,000 in 1957.

Status of appellate inventories.—Cases in which an agreement cannot be reached in the Audit Division are referred, at the taxpayer's request, to the Appellate Division for consideration of taxpayers' protests. Reflecting the upward trend in audit activity, the number of protests referred to the Appellate Division has increased each year since 1954. In the face of these increases in workload, appellate offices nevertheless acted upon protested cases about as rapidly as taxpayers and their representatives were prepared to proceed. As a result, the inventories at the close of the year were in a substantially current condition even though the number of pending cases had increased. The inventory of protested income, profits, estate, and gift tax cases pending in the Appellate Division totaled 12,576 as of June 30, 1957, as compared with 9,839 cases on hand at the beginning of the year. The inventory of docketed Tax Court cases, in which the Appellate Division endeavors to reach agreements with taxpayers prior to trial, increased

² Revised.

¹ Figures have not been reduced by amounts of \$58,190,000 in 1957 and \$66 million in 1956, reimbursed from the Federal old-age and survivors insurance trust fund. These amounts were covered into the Treasury as repayments to the account for refunding internal revenue collections.

slightly, from 8,422 cases at the beginning of the year to 8,761 cases at the close of fiscal 1957.

Rulings and other technical functions.—The technical functions of the Internal Revenue Service include the preparation and issuance of rulings and advisory statements to the public and revenue officials, the preparation of regulations and other tax guide materials, technical advice and assistance in the preparation and issuance of tax forms, and the development of programs for clarification and simplification of tax rules. Technical assistance also is provided in programs for legislative revision and in conducting the negotiation of tax treaties.

Twenty-six notices of proposed rule making and 29 Treasury Decisions relating to regulations under the 1954 Code were published during the year. In the case of subtitle B, relating to estate and gift taxes, publication of regulations in proposed form was completed. Of the total of 139 separate Treasury Decisions (not including alcohol and tobacco tax provisions) scheduled for preparation and issuance under the 1954 Code to date, 60 have been published in final form and an additional 34 in proposed form. Some of the more important regulations published during the year related to pension, profit-sharing, and stock bonus plans (T. D. 6203), tax on transportation of persons, (T. D. 6206), annuities and certain proceeds of life insurance contracts (T. D. 6211), income taxation of estates and trusts (T. D. 6217), and accounting periods (T. D. 6226). One notice of proposed rule making and 5 Treasury Decisions were published during the fiscal year 1957 under public laws other than the 1954 Code.

A total of 40,157¹ requests for tax rulings and technical advice were processed during the year. The requests included 35,672 from taxpayers and 4,485 from field offices.

The total number of revenue rulings and revenue procedures published in the *Internal Revenue Bulletin* during the year was 737, compared with 672 in fiscal 1956.

Approximately 186 tax forms, instructions, and circulars for public use were revised under a continuous program of seeking designs which balance the needs of taxpayers for clarity and simplicity, the needs of revenue officials for efficient processing and audit, and the overriding necessity for legal accuracy.

Personnel.—The employees on Internal Revenue Service rolls at the close of the year numbered 51,364, consisting of 2,832 employees in the national office and 48,532 in the regional and district offices. At the close of the preceding year the number of persons employed totaled 50,682, comprising 2,689² national office employees and 47,993² regional and district office employees.

The number of employees in the various branches of the Internal Revenue Service at the close of the fiscal years 1956 and 1957 is shown in the following table.

¹ Requests relating to alcohol and tobacco taxes are included for the first time. These numbered 2,328 for 1957.

† Revised.

¹ National office figures include International Operations Division personnel (headquarters and field offices) numbering 106 for 1956 and 230 for 1957. This group was included with regional and district office personnel in the 1956 report.

Cost of administration.—The entire cost of Internal Revenue Service operations during the year, including all items of expense except amounts refunded to taxpayers, was \$305,537,814. The amount available for administrative expenses was \$305,803,505 leaving an unobligated balance of \$265,691.

Management improvements

Efforts to improve management practices and procedures resulted in more effective utilization of personnel and increased production in each of the principal functional areas of the Service. The principal management actions and organizational changes stemming from these efforts are summarized below.

Development of a "Blue Ribbon" career service.—Attention was focused during the year on the development of a "Blue Ribbon" career service to attract and retain the highest possible caliber of people for Revenue Service work. This program consists of seeking better qualified individuals for employment, providing more extensive training for both new employees and for those who are about to enter upon more difficult assignments, setting salary grades which are consistent with high professional standards of performance, assuring prompt promotion of individuals who have demonstrated qualifications for more responsible work, and selecting executive and supervisory officials strictly on a merit basis.

Organizational changes.—Several components of the national office were reorganized to clarify their staff functions and to enable them to give more direct assistance to the Commissioner. The former office of Assistant Commissioner (Administration) was redesignated Administrative Assistant to the Commissioner and made a part of the Commissioner's personal staff. The former office of Assistant Commissioner (Planning) was redesignated Assistant to the Commissioner, was transferred to the Commissioner's personal staff, and was given additional duties in the management planning and reporting field (see Treasury Department Orders Nos. 150-43 and 150-44 in exhibit 43). Budgetary functions were separated from other administrative activities and were assigned to a fiscal management officer who was also made a part of the Commissioner's personal staff. The training function was separated from the personnel management function and was established as a separate division.

Expansion of service center program.—The program for large-scale mechanical processing of individual income tax returns and declarations of estimated tax was expanded by the establishment of a third service center at Ogden, Utah. This installation, together with the two centers previously established at Kansas City, Mo., and Lawrence, Mass., handled returns from 38 internal revenue districts covering 29 States. In addition, the service centers processed the claims received throughout all district offices for refunds of excise taxes on gasoline used on farms.

Informal conferences and appeals.—Procedures for handling tax disputes in directors' offices were strengthened by the designation of conference coordinators with basic responsibility for the direction of informal conferences with taxpayers. Provisions for administrative appeals in excise and employment tax cases were changed to permit Appellate Division consideration of unagreed cases prior to the assessment of additional tax. Previously, excise and employment taxpayers could obtain an Appellate Division hearing only by filing a claim for abatement or refund after the unagreed tax had been assessed.

Change in depositary receipt accounting.—Under revised procedure effective January 2, 1957, tax payments received through banks under the depositary receipt system are accounted for centrally by the Treasury Bureau of Accounts and such information is reported monthly to the Internal Revenue Service for inclusion in its consolidated reports of tax receipts. This new procedure is in lieu of the former method under which the Federal Reserve Banks were required to maintain accounting and reporting relationships with the 64 individual district directors' offices.

Revision of enrollment procedure.—The regulations governing the enrollment of tax practitioners were revised in October 1956 to provide that an application for renewal may be submitted at any time during a 24-month period commencing 12 months before and ending 12 months after the expiration of an enrollment card. The purpose of providing for this 24-month period is to stagger the renewal of enrollments on a voluntary basis.

Shipping of revenue stamps.—A new procedure involving the shipment of revenue stamps by truck, instead of registered parcel post, was put into effect with an estimated annual savings of \$220,000.

Office of International Finance

The Office of International Finance assists the officers of the Department in the formulation and execution of policies and programs in international financial and monetary matters.

By direction of the Secretary, the responsibilities of the Office of International Finance include the Treasury's activities in relation to international financial and monetary problems, covering such matters as the convertibility of currencies, exchange rates and restrictions, and the extension of stabilization credits; gold and silver policy; the Bretton Woods Agreements Act, and the operations of the International Monetary Fund, the International Bank for Reconstruction and Development, and the International Finance Corporation; foreign lending and assistance; the North Atlantic Treaty Organization; the activities of the National Advisory Council on International Monetary and Financial Problems; the Anglo-American Financial Agreement; the United States Exchange Stabilization Fund; and the Foreign Assets Control.

The Office also acts for the Treasury on the financial aspects of international treaties, agreements, and organizations in which the United States participates, and it takes part in negotiations with foreign governments with regard to matters included within its responsibilities. It assists the Secretary on the international financial aspects of problems arising in connection with his responsibilities under the Tariff Act. The Office also represents the Treasury in the work of the subordinate organs of the National Advisory Council on International Monetary and Financial Problems, of which the Secretary of the Treasury is chairman.

The Office of International Finance advises Treasury officials and other departments and agencies of the Government concerning exchange rates and other financial problems encountered in operations involving foreign currencies. In particular, it advises the Department of State and the Department of Defense on financial matters related to their normal operations in foreign countries and on the special financial problems arising from defense preparation and military operations. In conjunction with its other activities, the Office studies the financial policies of foreign countries, exchange rates, balances of payments, the flow of capital, and other related problems.

The Division of Foreign Assets Control administers certain regulations and orders issued under Section 5 (b) of the Trading with the Enemy Act. The Foreign Assets Control Regulations block all property in the United States in which any Communist Chinese or North Korean interest exists and prohibit all trade or other financial transactions with those countries or their nationals. The Control carries on licensing activities in connection with transactions otherwise prohibited, takes action to enforce the regulations, and has taken a census of Chinese and Korean assets located in the United States.

The Control administers the Egyptian Assets Control Regulations, which were issued on July 31, 1956. These regulations block certain assets of the Government of Egypt and the Suez Canal Company in this country and require transactions affecting such assets to be

effected pursuant to licensing procedures administered by the Control.

The Control also administers regulations which prohibit persons in the United States from purchasing, selling, or arranging the purchase or sale of strategic commodities outside the United States for ultimate shipment to the Soviet bloc. These latter regulations supplement the export control laws administered by the Department of Commerce. In addition, the Control has responsibilities with respect to blocked accounts of approximately \$9 million received from the sale of a Czechoslovak-owned steel mill sold pursuant to an order issued by the Secretary on March 25, 1954.

Bureau of the Mint ¹

The principal functions of the Bureau of the Mint include the manufacture of coin, both domestic and foreign; the distribution of domestic coin between the mints, the Federal Reserve Banks and branches, and the Treasurer of the United States in Washington, D. C.; the custody, processing, and movement of gold and silver bullion; the administration of the regulations issued under the Gold Reserve Act of 1934, as amended (31 U. S. C. 440-446) and Section 5b of the act of October 6, 1917, as amended (12 U. S. C. 95a), including the issuance and denial of licenses, the purchase of gold, and the sale of gold bullion for industrial use; the administration of silver regulations issued under the acts of July 6, 1939 (31 U. S. C. 316c), and July 31, 1946 (31 U. S. C. 316d); the manufacture of historic and special Government medals; and other technical services.

Coinage

The Philadelphia and Denver Mints manufactured a total of 1.9 billion domestic coins during the fiscal year 1957, an increase of 35 percent over the the previous year's output. No silver dollars were coined during the year as the mint stock continues to be adequate. The last dollar coins were manufactured in September 1935. Production of fractional coins in 1957 is shown in the following table.

Denomination	Composition	Number of coins produced ¹	Face value	Gross weight ²
				Short tons
		In millions		
1-cent pieces.....	Bronze (95% copper, 5% zinc and tin).	1,385.8	\$13.9	4,751
5-cent pieces.....	Cupronickel (75% copper, 25% nickel).	152.0	7.6	837
Dimes.....	900 parts silver, 100 copper.	214.8	21.5	592
Quarter dollars.....	do.....	126.3	31.6	870
Half dollars.....	do.....	27.1	13.6	374
Total.....		1,906.0	88.1	7,424

¹ Includes 1,248,140 sets of proof coins manufactured.

² Consists of 1,652 tons of silver; 5,325 tons of copper; 209 tons of nickel; and 238 tons of zinc and tin.

¹ More detailed information concerning the Bureau of the Mint is contained in the separate annual report of the Director of the Mint.

The Philadelphia Mint manufactured 85,059,500 coins for four foreign governments during the fiscal year 1957, as follows:

Government and denomination	Composition	Number of coins produced
Dominican Republic: 1 centavo.....	Bronze (95% copper, 5% zinc and tin).....	3,000,000
El Salvador: 5 centavos..... 1 centavo.....	Cupronickel (75% copper, 25% nickel)..... Bronze (95% copper, 5% zinc).....	8,000,000 10,000,000
Haiti: 20 centimes.....	German silver (70% copper, 18% zinc, 12% nickel).....	18,000,000 2,500,000
Honduras: 10 centavos..... 5 centavos..... 2 centavos..... 1 centavo.....	Cupronickel (75% copper, 25% nickel)..... do..... Bronze (95% copper, 5% zinc and tin)..... do.....	7,559,500 6,000,000 18,000,000 30,000,000
Total.....		61,559,500 85,059,500

During the fiscal year 1957 a continuing large demand for coins in the United States required the mints to ship 66.7 million more coins for circulation than in 1956. As usual, the one-cent denomination was in greatest demand. Shipments of the six denominations in 1957 are shown in the following table.

Denomination	Number of coins shipped ¹	Face value	Gross weight
	In millions		Short tons
1-cent pieces.....	1,385.5	\$13.9	4,750
5-cent pieces.....	151.7	7.6	836
Dimes.....	210.0	21.0	579
Quarter dollars.....	94.0	23.5	647
Half dollars.....	21.9	11.0	302
Silver dollars.....	15.2	15.2	448
Total.....	1,878.3	92.1	7,562

¹ Includes 1,244,504 sets of proof coins sold by the Philadelphia Mint.

The stock of coins in the United States, comprising the amount held in the mints and other Treasury offices, in Federal Reserve and commercial banks, and the estimated amount held by the public, is compared at the beginning and close of the fiscal year in the following statement.

Stock of coins in the United States	Face value (in millions)		
	July 1, 1956	June 30, 1957	Increase, or decrease (—)
Minor coins.....	\$463.5	\$484.6	\$21.2
Subsidiary silver coins.....	1,317.4	1,382.5	65.0
Silver dollars.....	488.7	488.4	— .2
Total.....	2,269.5	2,355.5	86.0

Gold

No additions or withdrawals of gold have been made at the Fort Knox Gold Bullion Depository in a number of years, the amount in storage totaling 356.7 million fine ounces valued at \$12.5 billion. A net increase of 16 million fine ounces valued at \$558.6 million occurred during fiscal 1957 at the Philadelphia, Denver, and San Francisco Mints, and the New York Assay Office. Total holdings of the five institutions at the beginning and close of the year, and total receipts and issues, are shown in the following table.

Gold holdings and transactions (excluding intermint transfers)	Fine ounces	Value
	In millions	
Holdings on June 30, 1956.....	622.8	\$21,799.1
Total receipts during fiscal year 1957.....	22.2	777.7
Total issues during fiscal year 1957.....	6.3	219.2
Holdings on June 30, 1957.....	638.8	22,357.7
Net increase.....	16.0	558.6

Silver

The following statement summarizes silver bullion transactions at the three mints and the New York Assay Office and West Point Silver Depository during the fiscal year 1957.

Silver bullion holdings and transactions (excluding intermint transfers)	Fine ounces (in millions)
Holdings on June 30, 1956.....	1,693.5
Receipts during fiscal year 1957:	
Newly mined domestic silver, act of July 31, 1946 ¹	6.6
Lend-lease silver from foreign governments:	
Australia.....	11.8
Fiji.....	.2
India.....	3.3
Netherlands.....	10.1
United Kingdom.....	69.7
Total lend-leased silver.....	95.0
Recoinage bullion from uncurrent United States silver coins.....	1.6
Other miscellaneous silver.....	.3
Total receipts.....	103.5
Issues during fiscal year 1957:	
Manufactured into United States subsidiary silver coins.....	48.0

Other miscellaneous issues.....	.1
Total issues.....	55.6
Holdings on June 30, 1957.....	1,741.8
Net increase in silver bullion.....	47.9

¹ 31 U. S. C. 316d.

Revenue and monetary assets

Revenue deposited by the Bureau of the Mint into the general fund of the Treasury during the fiscal year 1957 totaled \$50.5 million, an increase of 103 percent over deposits made the previous fiscal year.

Seigniorage revenue totaling \$48.5 million, consisted of \$30.0 million on subsidiary coinage; \$16.4 million on minor coinage; and \$2.1 million on 5,300,000 ounces of silver bullion revalued from cost to monetary value as security for silver certificates. Other miscellaneous revenue amounted to \$2.0 million. Monetary assets of gold, silver, coins and other values in custody of the mint institutions totaled \$24.1 billion at the beginning of the fiscal year and \$24.7 billion at the close of the year, a net increase of \$0.6 billion.

United States gold and silver production and consumption

The estimates of United States gold and silver production and the issue of gold and silver for domestic industrial, professional, and artistic use, made annually by the Office of the Director of the Mint, are on a calendar year basis.

During the calendar year 1956 total United States gold production amounted to 1,865,200 fine ounces, of which 1,111,441 fine ounces were deposited at mint institutions. Total silver production in 1956 amounted to 38,739,400 fine ounces, of which 15,691,209 fine ounces were deposited at mint institutions.

Gold issued for industrial, professional, and artistic use in the United States during the calendar year 1956 amounted to 1,400,000 fine ounces, including 675,447 fine ounces issued by mint institutions. Silver issued for commercial use amounted to 100,000,000 fine ounces, including 4,325,221 fine ounces issued by mint institutions.

Management improvement

The modernization of the Philadelphia Mint continued to receive considerable attention during the fiscal year 1957, and the installation of new melting and rolling equipment was practically complete by the end of the year. The equipment is expected to reach full production status within a few months, and as a consequence unit manufacturing costs will be reduced considerably. A decision was reached during the year 1957 to curtail further operations at the San Francisco Mint, and to operate that office as an assay office and bullion depository only. Equipment and supplies which can be used by other Mint offices will be transferred, and those which cannot be used to good advantage will be sold. The Mint will retain only such space as needed, releasing the remainder of the building to the General Services Administration for other purposes.

In addition to activities financed by appropriations, the Bureau of the Mint had a substantial reimbursable program during the year, the major portion of which involved the manufacture and sale of proof coins to the public. Owing to the tremendous increase in the volume of orders received, continuing attention of management was directed toward increasing production to the extent possible, but the hiring of additional personnel was limited to a minimum.

Continuing attention was given throughout the year also to the incentive awards program, records management, safety, control of communication costs, and forms and reports control.

The total reduction in manpower requirements amounted to 16 employees, and total estimated savings to \$90,600.

Bureau of Narcotics ¹

The Bureau of Narcotics administers a program designed to deal with the control of international, national, and local sources of the illicit supply of drugs.

Nationally, the Bureau is charged with the investigation, detection, and prevention of violations of the Federal narcotic and marihuana laws and of the Opium Poppy Control Act of 1942, and related statutes. The scope of the Bureau's operations is enlarging gradually as additional drugs are made subject to these laws. Opium and coca leaves and their derivatives have been under national control since 1915; marihuana has been under control since 1937; isonipecaine was brought under control in 1944; and under the act of March 8, 1946 (26 U. S. C. 4731 (g)), a total of 24 synthetic narcotics have been brought under control through findings by the Secretary of the Treasury, proclaimed by the President, that the drugs possess addiction liability similar to morphine.

Internationally, opium, coca leaves, marihuana, and their more important derivatives have been under control by reason of the Opium Conventions of 1912, 1925, and 1931. In addition to these, under Article 11 of the 1931 Convention and the international Protocol of November 19, 1948, two secondary derivatives of opium and 32 synthetic drugs have been found to have addicting qualities similar to morphine or cocaine and brought under international control by a procedure similar to that provided in our national legislation. The agreement to limit the production of opium to world medical and scientific needs signed at the United Nations on June 23, 1953, after forty-four years of effort on the part of the United States to accomplish such an agreement was approved by the U. S. Senate August 20, 1954. By Senate Resolution 290 of June 14, 1956, other governments have been urged also to ratify this Protocol. When it has been ratified by a sufficient number of governments and becomes effective there should be a large reduction in the amount of opium available for the illicit traffic, particularly if production in Turkey and Iran is effectively controlled.

In the United States important and effective aid in discouraging the illicit traffic in narcotics and marihuana continued to be afforded by the act approved November 2, 1951 (21 U. S. C. 174) which provided for mandatory minimum penalties for violation of certain narcotic laws, particularly for second and third offenders. The Narcotic Control Act of 1956, approved July 18, 1956, further increased penalties and provided more effective measures of control.

The initial effects of the new law are reflected in the statistics of sentences and fines imposed upon conviction. In Federal courts the average sentence per conviction for unregistered narcotic violators was 5 years 6 months in 1957 as compared with 3 years 7 months in 1956; and for marihuana violators it was 4 years 8 months as compared with 3 years 4 months in 1956. The average fine per conviction for unregistered narcotic violators was \$199 in 1957 as against \$224 in 1956; and for marihuana violators \$317 in 1957 as compared with

¹ Further information concerning narcotic drugs is available in the separate report of the Bureau of Narcotics entitled *Traffic in Opium and Other Dangerous Drugs for the Year Ended December 31, 1956*.

\$105 in 1956. The gradual stiffening of penalties at both national and State levels is slowly but surely producing a noticeably deterrent effect on the illicit traffic in those areas where the heavier sentences are imposed.

The Narcotic Control Act of 1956 has put into effect a number of the recommendations of the President's Interdepartmental Committee on narcotics by providing more drastic penalties and promoting a greater degree of cooperation between Federal, State, and municipal narcotic law enforcement agencies through establishment in the Bureau of a statistical division to gather and exchange narcotic law enforcement information, and a narcotic training school for State and municipal officers. Both were set up during the year. A comprehensive index of addicts is being accumulated. The training school, which is staffed by 22 experts in narcotic law enforcement, has already graduated 223 State and municipal narcotic law enforcement officers, representing 98 separate law enforcement agencies from 31 States and Puerto Rico. Officers from Canada, Afghanistan, and Indonesia have also attended the school.

Other activities in management improvement consisted of a revision of the Bureau's field instruction manuals, and improved fiscal controls which further synchronize its system of allotments and budgetary procedures.

The Bureau directs its principal activities toward the suppression of the illicit traffic in narcotic drugs and marihuana and the control of the legitimate manufacture and distribution of narcotics through the customary channels of trade. It issues permits for import of the crude narcotic drugs and for export and intransit movements of narcotic drugs and preparations. It supervises the manufacture and distribution of narcotic substances within the country and has authority to issue licenses for the production of opium poppies to meet the medical needs of the country if and when such production should become in the public interest. Cooperation is given to States in local narcotic legislation and enforcement and to the Department of State in the discharge of the international obligations of the United States concerning the abuse of narcotic drugs and marihuana.

During the fiscal year 1957 the total quantity of narcotics seized amounted to 2,089 ounces as compared with 2,385 ounces in 1956. Seizures of marihuana during 1957 amounted to 1,049 pounds bulk, and 3,051 cigarettes, as compared with 873 pounds bulk and 4,329 cigarettes in 1956.

Thefts of narcotics from persons authorized to handle the drugs increased slightly in number during 1957; the quantity stolen was 1,514 ounces as compared with 1,371 ounces in 1956.

During the fiscal year there were approximately 302,000 persons registered with directors of internal revenue under the Federal narcotic and marihuana laws to engage in legitimate narcotic and marihuana activities.

The table following shows for the fiscal year the number of violations of the narcotic and marihuana laws by persons registered to engage in legitimate narcotic and marihuana activities and by persons who have not qualified by registration to engage in such activities, as reported by Federal narcotic enforcement officers.

Number of violations of the narcotic and marihuana laws reported during the fiscal year 1957 with their dispositions and penalties

¹ Federal cases are made by Federal officers working independently, while joint cases are made by Federal and State officers working in cooperation.

² Includes 1 life sentence.

In foreign countries, investigation, surveillance, and negotiation are undertaken to restrict the amount of narcotic drugs entering this country. Through cooperation with the French, Italian, Turkish, Greek, Lebanese, Colombian, and Cuban Governments several large seizures of crude, semiprocessed and finished narcotics destined for the United States were effected and three large clandestine laboratories closed. The Bureau continues on guard against the large supplies of opium and heroin which are available in Communist China.

The importation, manufacture, and distribution of opium and its derivatives are subjected to a system of quotas and allocations designed to secure their proper distribution for medical needs. Additional quantities of opium were imported during the year. Coca leaf imports were sufficient both for medicinal purposes and for the manufacture of nonnarcotic flavoring extracts.

The quantity of narcotic drugs exported in 1957 was slightly more than in 1956. The export total is not significant in comparison with the quantity used domestically. The manufacture of opium derivatives continued high, principally because of the high medical consumption of codeine and papaverine.

Office of Production and Defense Lending

The Office of Production and Defense Lending was established on December 7, 1954, by Treasury Department Order No. 181-3, under the direct supervision of an Assistant Secretary. There were assigned to this Office all the functions which had been transferred to the Secretary of the Treasury by or pursuant to the Reconstruction Finance Corporation Liquidation Act of July 30, 1953. These functions were:

1. Liquidation of the Reconstruction Finance Corporation (Section 10 of the RFC Act, and Section 102 of the RFC Liquidation Act);
2. Administration of the Federal Facilities Corporation (Section 107 (a) (1) of the RFC Liquidation Act, and Executive Order 10539);
3. Lending activities under Section 302 of the Defense Production Act (Section 107 (a) (2) RFC Liquidation Act, and Executive Order 10489); and
4. Lending activities under Section 409 of the Federal Civil Defense Act of 1950 (Section 104 of the RFC Liquidation Act).

Liquidation of Reconstruction Finance Corporation

Liquidation of the loans, securities, commitments, and other assets of the Reconstruction Finance Corporation was continued throughout the fiscal year 1957. During the year there was paid into the Treasury from the proceeds a total of \$60,000,000. Reorganization Plan No. 1 of 1957 abolished the RFC effective June 30, 1957, and transferred the Corporation's remaining assets to other Government agencies administering similar continuing functions.

Federal Facilities Corporation

Pursuant to the provisions of an act approved June 22, 1956 (50 U. S. C. 98), the tin smelter at Texas City, Tex., was sold by the Federal Facilities Corporation to a private operator in January 1957. After this sale, the principal remaining functions of the Corporation were administration of: (1) the national security clauses of the contracts under which the synthetic rubber plants had been sold, (2) one synthetic rubber facility and an outstanding lease thereon, and (3) purchase money mortgages taken in the sale of the synthetic rubber plants and the tin smelter.

Effective June 30, 1957, responsibility for the remaining functions of the Federal Facilities Corporation passed from the Secretary of the Treasury to the Administrator of General Services in accordance with the provisions of Executive Order 10720 of July 11, 1957.

Defense Lending Division

The activities of this Division were the administration of lending programs authorized by Section 302 of the Defense Production Act

(50 App. U. S. C. 2092) and Section 409 of the Federal Civil Defense Act (50 App. U. S. C. 2261). During the fiscal year 1957, no new loans were approved under either of these authorities. On June 30, 1957, direct loans and commitments outstanding under Section 302 of the Defense Production Act amounted to \$186,233,536; in addition, commitments to participate on a deferred basis in loans made by banks amounted to \$18,326,532. Direct loans for civil defense purposes amounted to \$1,207,289 on June 30, 1957; in addition, there was outstanding \$2,699,640 in commitments to participate on a deferred basis in loans made by banks.

Effective July 1, 1957, the Defense Lending Division was abolished by Treasury Department Order No. 185, and the functions of the Defense Lending Division were transferred to the Office of Defense Lending established by the same order.

Office of Defense Lending

In addition to the responsibilities under Section 302 of the Defense Production Act and Section 409 of the Federal Civil Defense Act, there were placed in the Office of Defense Lending all functions of the Secretary of the Treasury under Reorganization Plan No. 1 of 1957, principally the final liquidation of certain large RFC loans and securities which were transferred to the Secretary under the plan.

Treasury Department Order No. 185, as amended by Order No. 185-1, also abolished the Office of Production and Defense Lending effective at the close of October 31, 1957.

United States Coast Guard

The basic duties of the United States Coast Guard are prescribed in Title 14 of the United States Code. In general terms they include: Enforcement or assistance in enforcing Federal laws on the high seas and waters over which the United States has jurisdiction, in particular laws governing navigation, shipping, and other maritime operations; protection of life and property within this jurisdiction, promotion of the safety and efficiency of merchant vessels; the development, establishment, maintenance, and operation of aids to maritime navigation required to serve the needs of commerce and the armed forces; maintenance of a state of readiness to function as a specialized service in the Navy in time of war; and maintenance and training of an adequate reserve force.

A primary aim of the Coast Guard is the prevention of loss of life and property due to illegal or unsafe practices. The maintenance of maritime safety and order is not limited to the strict enforcement of laws but includes an educational program to prevent marine casualties through enlisting the cooperation and self-regulation of ship operators and boatmen.

Search and rescue operations

In its promotion of marine safety the Coast Guard relies substantially on its system of lifeboat stations, radio stations, communication centers, bases, aircraft, and floating units along the coasts, inland waterways, Alaska, Hawaii, Bermuda, Puerto Rico, and

Newfoundland. Allied in this safety work are the Coast Guard's ice breaking services in rivers, harbors, canals, and the Great Lakes; its operation of the International Ice Patrol in the North Atlantic Ocean; and its six ocean stations in the Atlantic and Pacific Oceans.

Outstanding rescue operations of the Coast Guard during the year were as follows:

Aircraft ditching.—The Pan American Clipper 10943, with 31 persons on board, ditched in the Pacific Ocean on October 16, 1956, alongside the U. S. C. G. C. *Pontchartrain* on Ocean Station *November*, halfway between Honolulu and San Francisco. Decision to ditch was made after two of the plane's four motors had failed. For a period of five hours the plane circled the ship awaiting daylight before trying to land. While the plane crew was making practice approaches, the *Pontchartrain* provided illumination and laid a string of water lights for a possible night landing. Shortly after daybreak, when all was in readiness, Clipper 10943 made a successful ditching, following a solid foam path provided by the *Pontchartrain* to mark the ditching course. Although the plane's tail section broke off, there were no serious casualties and almost immediately two liferafts were launched from the plane. Within fifteen minutes all were picked up by lifeboats from the ocean station vessel. The plane sank 20 minutes after ditching.

On May 12, 1957, the U. S. C. G. C. *Wachusett* on the same Ocean Station *November* rescued the two-man crew who had bailed out of an Air Force B57 because of fuel shortage.

Aircraft assistance.—Two Air Force F89 jet aircraft crashed on October 4, 1956, in rugged mountain terrain about four miles from Mount Olympus, Wash. In a highly coordinated effort, lasting seven days, the Coast Guard directed the search for the planes and crews. Aircraft and helicopters from the Coast Guard Air Station Port Angeles, Wash., assisted by light aircraft of the Coast Guard Auxiliary, and planes and helicopters of the Navy and Air Force, located and evacuated the four crew members, one of whom had died. Assistance was provided also by the Canadian Air Force and ground search parties of the Olympic National Park Service. Cooperation of all participating units was outstanding.

The yacht *Dragoon* was reported on March 8, 1957, to be in a sinking condition 10 miles off Great Isaac Light, British West Indies. Shortly after midnight a UF aircraft from the Coast Guard Air Station Miami arrived and dropped a liferaft alongside the yacht. Within two minutes all four yachtsmen had safely boarded the raft. The plane then vectored a Navy tanker to the raft and the four men were removed unharmed. Later, transfer was made to the cutter *Travis* for return to Port Everglades, Fla.

Cutter assistance.—The U. S. C. G. C. *Chincoteague*, manning Ocean Station *Delta* in the North Atlantic, received a distress message on October 30, 1956, that the German freighter S. S. *Helga Bolten* was taking on water and wished to abandon ship as soon as possible. Twelve hours later *Chincoteague* arrived, but because of high winds and 25-foot seas was unable to launch lifeboats. Two inflatable lifeboats were passed, therefore, by shot line to the *Helga Bolten* and the 33 crewmen aboard were removed to the cutter unharmed. *Chincoteague* then stood by the drifting vessel for seven days while

commercial tugs were making salvage attempts. All of the survivors elected to return to Norfolk, Va., on board the cutter while a tug towed the *Helga Bolt* to the Azores.

The U. S. C. G. C. *Aurora* out of Savannah, Ga., on October 15, 1956, went to the assistance of the disabled shrimp trawler *Miss Beulah* about 10 miles off the Georgia Coast. After successfully taking the vessel in tow a storm of gale proportions was encountered, breaking the tow line and necessitating removal of the two-man crew. Unable to use boats because of the mountainous seas, the *Aurora* was worked in close to the trawler's bow and both men were able to jump aboard the tossing cutter. When the storm abated the crew was returned to the trawler, which was taken back safely in tow to Savannah.

After the collision in the late evening of July 25, 1956, of the liners S. S. *Andrea Doria* and S. S. *Stockholm* about 17 miles from Nantucket Lightship, at the approach of New York harbor, merchant ships, naval vessels, and Coast Guard cutters converged on the scene and successfully removed over 1,600 survivors from the *Andrea Doria* before she sank. Ten Coast Guard cutters assisted in this spectacular rescue. Five injured persons were removed from the sinking vessel by Coast Guard and Air Force helicopters while cutters searched the area for survivors, escorted the *Stockholm* to New York, marked the position of the sunken *Andrea Doria*, destroyed floating debris, and transported rescued persons to port.

A statistical summary of search and rescue assistance during the fiscal year 1957 follows.

Rescue operations	By aircraft	By vessel ¹	By other equipment ²	Total
Vessels assisted:				
Refloated (number)	13	152	1,045	1,210
Towed (number)	33	1,837	6,702	8,572
Otherwise aided (number)	207	643	1,274	2,124
Property involved (value including cargo)				\$542,170,600
Miles towed				80,315
Aircraft assisted:				
Escorted (number)	342	2	15	359
Otherwise aided (number)	49	32	60	141
Property involved (value including cargo)				\$524,590,800
Miles escorted				41,042
Persons involved (number):				
Lives saved or rescued from peril				1,936
Medical assistance furnished				2,128
Other assistance				58,576
Menaces to navigation removed				1,538
Miscellaneous property involved (value)				\$197,728,100

¹ Vessels 56-ft. and over in length.

² Small boats and vehicular and other equipment.

Rescue and survival training programs for overseas aircraft

Safety of overwater flight through indoctrination of flight crews in emergency procedures is vigorously promoted through the Joint Air Carrier-Coast Guard rescue and survival training program. Civil and military flight crews engaged in regular overwater flight operations have been keenly interested in the program since its inception in 1951, recognizing that the procedures taught insure the best possible coordination between distressed aircraft and rescue agencies if the need to ditch should arise.

The highly successful ditching of a large commercial airliner alongside the Coast Guard vessel on Pacific Weather Station *November* in October (described in an earlier paragraph) gave dramatic evidence of the soundness of the techniques which have been developed. Both aircraft crew and vessel had participated in the program a few months before the incident.

The following tabulation shows the number of organizations and personnel participating in the program during 1957.

Coast Guard air stations	Number of organiza- tions par- ticipating	Number of personnel attending
Brooklyn.....	23	2,044
Miami.....	14	362
San Diego.....	5	347
San Francisco.....	77	2,317
Port Angeles.....	1	18

Marine inspection and allied safety measures

Promotion by the Coast Guard of safety of life and property on vessels subject to vessel inspection and navigation laws of the United States include promulgation and related enforcement of regulations. Encompassed are inspection of vessels and their equipment, construction and repair of vessels, investigation of marine casualties, manning and citizenship requirements, mustering and drilling of crews, and protection of merchant seamen. Also included are the licensing of officers and pilots, certificating of seamen, load line requirements, pilot rules, transportation of dangerous cargoes on vessels, outfitting and operation of motorboats, licensing of motorboat operators, and patrolling regattas and marine parades.

Detailed investigations were made of 2,459 of the total 3,232 marine casualties reported during fiscal 1957. Ten, considered major, were investigated by marine boards of investigation. The investigations revealed that 356 persons lost their lives in marine casualties, 211 persons lost their lives from marine hazards, and 256 persons lost their lives from miscellaneous causes such as natural deaths and suicides. Only one passenger's life was lost as a result of an accident on an inspected passenger vessel.

The most serious casualty during the year was the foundering of the Liberty Ship *Pelagia*, laden with an ore cargo, while enroute from Narvik, Norway, to Baltimore. Thirty-two crew members perished. This disaster reemphasized the necessity for establishing minimum standards for proper stowage of bulk and similar cargoes carried on general cargo vessels. As a result, the Commandant of the United States Coast Guard appointed a panel of industry representatives to sit with the Coast Guard to analyze all phases of the carriage of ore and ore concentrates, with the object of developing a specific "Code of Good Practice" for the carriage of the several types of such cargo on general cargo vessels.

The second most serious casualty was the collision involving the naval tanker *Mission San Francisco* and the *Elna II*, a Liberian mer-

chant vessel, in the Delaware River. Following the collision, the naval tanker exploded, caught fire, and sank, with the loss of ten lives.

A total of 19,807 plans were approved during the year relating to vessel construction, machinery, and equipment for the merchant marine. Included among the vessels under construction are four large passenger ships; in addition, three large passenger ships were delivered after major conversions. Tank ships continue to form a large percentage of the tonnage under construction, and their size continues to increase. Preliminary plans are now being formulated for a vessel of over 100,000 deadweight tons.

An industry committee appointed to study safety requirements for transportation of liquefied petroleum gases at low temperature submitted its final report. Tentative regulations for carrying such cargoes have now been adopted by the Coast Guard. This action clears the way for approval of specific vessels to engage in the transportation of liquefied methane.

The collision between the Swedish-American liner *Stockholm* and the Italian liner *Andrea Doria* (described in an earlier paragraph under search and rescue operations), although not investigated officially by the Coast Guard since both vessels were under foreign flags, indicated a need for reexamining the standards for watertight subdivision, stability, and ballasting of passenger vessels contained in the 1948 International Convention on the Safety of Life at Sea. In accordance with a recommendation made by the House Committee on Merchant Marine and Fisheries for establishment of a special committee to investigate this casualty, the Coast Guard is undertaking this reevaluation of standards.

The program of structural modifications to provide crack arresters on existing C-3 type vessels has proceeded during the year. In September 1956, the American Bureau of Shipping issued instructions calling for the strapping of other types of all-welded wartime built vessels and this work also is under way.

A digest of certain phases of marine inspection follows.

	Number of vessels	Gross tonnage
Vessel inspections completed	5,964	18,795,759
Dry dock examinations	4,601	17,135,444
Reinspections	2,602	-----
Special examinations by traveling inspectors of passenger, tank, and dry cargo vessels	645	-----
Miscellaneous inspections	18,064	-----
Undocumented vessels numbered under provisions of the act of June 7, 1918, as amended (46 U. S. C. 283)	419,118	-----
Violations of navigation and vessel inspection laws	10,292	-----
Factory inspections	879,059	-----
Merchant vessel plans reviewed	19,807	-----

The Merchant Marine Council held three public hearings during the year, which were supplemented by numerous Coast Guard district commanders' informal hearings and discussions with those affected, to consider proposed regulations for carrying out new legislation or modernizing requirements. The regulations included the following:

(a) Rules and regulations for small passenger vessels not over 65 feet in length, which implement the act of May 10, 1956 (46 U. S. C. 390b).

(b) Rules and regulations for tank, cargo, and miscellaneous vessels to permit a biennial instead of an annual inspection, in accordance with the act approved June 4, 1956 (46 U. S. C. 391 (a)-(c)).

(c) Special regulations for vessels engaged in offshore mineral and oil industry.

(d) Regulations describing inspection requirements for cargo gear on passenger, cargo, and miscellaneous vessels.

(e) Regulations governing the examination and demonstration of ability of lifeboatmen.

(f) Regulations governing the appointment of licensed officers of the United States Merchant Marine as commissioned and warrant officers in the United States Coast Guard.

Increased activity in offshore oil well drilling on the Outer Continental Shelf resulted in a small rise in the number of vessels inspected for certification during the fiscal year 1957. The new biennial inspection of nonpassenger carrying vessels had no effect on the number of inspections during the past fiscal year, but will materially reduce inspection for certification and increase reinspection during fiscal 1958.

That the American public is taking to the navigable waters of the United States in greater numbers is evident from the increase in the number of vessels issued certificates of award of number (in accordance with the provision of the act of June 7, 1918, as amended (46 U. S. C. 288)). The 5 percent rise during fiscal year 1957 follows the trend of recent years.

An important role of the Coast Guard during 1957 was participation in meetings promoting marine safety. Among these were the marine section of the National Safety Council's Exposition and Congress in Chicago, Ill.; the Merchant Marine Conference sponsored by the U. S. Propeller Club in New York, N. Y.; the Water Safety Conference in Augusta, Ga.; the Western Rivers Panel, the Oil Pollution Panel, and the Motorboat and Yacht Advisory Panel of the Merchant Marine Council, and the Offshore Mineral and Oil Industry Panel of the Commander, 8th Coast Guard District.

The Coast Guard cooperated with the House Merchant Marine and Fisheries Committee in its study to improve safety on navigable waters in the United States. Also, recognizing that an estimated 25 million persons will be using the navigable United States waters for recreation this year, and that the number of small boats will total approximately 5½ million, the Coast Guard published a safety pamphlet for 1957 known as *Motorboat Safety*. This publication includes safe practices recommended by the Coast Guard for the operation of small boats, the purposes of the Coast Guard Auxiliary, the proper application of approved safety equipment, articles based on casualties investigated by the Coast Guard, and other information to increase boating safety.

Merchant marine personnel.—Licensing and certifying of merchant marine personnel involved the issuance of 88,861 documents. Of this number, 19,612 were issued to persons without prior sea service and 505 were licenses issued to radio officers under the provisions of Title 46, Section 229c of the United States Code. In the interest of national defense 136 individual waivers of manning requirements for merchant vessels were issued. Shipping commissioners

supervised the execution of 11,264 sets of shipping articles in connection with the shipment and discharge of seamen.

Investigating sections of marine inspection offices in major United States ports and merchant marine details in certain foreign ports continued to operate in the administration of discipline in the merchant marine, in accordance with the provisions of Section 4450 of the Revised Statutes, as amended (46 U. S. C. 239), and the Narcotic Violation Act approved July 15, 1954 (46 U. S. C. 239 a, and b). Merchant marine details in London, Antwerp, Bremen (formerly at Bremerhaven), Naples, Piraeus, and Yokohama operated throughout the year.

Investigations of 13,950 cases involving negligence, incompetence, and misconduct were conducted during the year. Charges were preferred, and hearings on 1,271 cases were held by civilian examiners.

The decision of the 9th Circuit Court of Appeals in the case of *Parker vs. Lester* ordered that all persons rejected for duty under the security regulations prior to the decision are to be issued validated merchant mariners' documents upon their application. Since issuance of the order, 234 applications have been received. The regulations adopted pursuant to the decision have necessitated the reevaluation of all cases of the rejectees affected. There has been considerable delay in holding any necessary rehearings, however, because of the involved procedure for ascertaining availability of witnesses in conformance with the decision. However, two cases have been brought to the hearing stage. As of June 30, 1957, one hearing had been completed but the decision has not yet been announced. The other case was scheduled for hearing on August 8, 1957.

The interpretation of data provided by radar was the subject of additional questions prepared for the licensed deck officer examinations. This was in accord with the recommendations of the Bonner Committee, which investigated the collision between the S. S. *Andrea Doria* and the M. V. *Stockholm*.

Law enforcement

The port security operations (conducted under authority of Executive Order 10173, as amended by Executive Orders 10277 and 10352, implementing provisions in the Espionage Act of June 15, 1917, as amended (50 U. S. C. 191)), continued to consist of: Control of entry of merchant vessels into United States ports; supervision of loading of Class A explosives and administration of the regulations relative to dangerous and hazardous cargoes; screening of merchant seamen employed on certain categories of United States vessels and waterfront workers for admittance to waterfront facilities under certain specified conditions; and protection of selected vessels and waterfront facilities in designated port areas from the waterside, and, by spot checks, from the shoreside.

A total of 28,978 persons to be employed on board merchant vessels were checked for security risk, and 25,512 merchant mariners' documents bearing evidence of security clearance were issued to individuals. After appropriate screening of warehousemen, pilots, and other water-

front workers, 16,667 port security cards were issued. One hearing was granted upon appeal by an individual who had been found to be a poor security risk.

Security regulations of the Coast Guard have been revised to exempt from the requirements for credentials certain vessels operating on navigable waters of the Great Lakes and western rivers.

The following statistics reflect the volume of enforcement work of the Coast Guard during the year.

Vessels boarded.....	152, 091
Waterfront facilities inspected.....	64, 053
Violations of Motorboat Act reported.....	9, 193
Violations of port security regulations reported.....	767
Violations of the Oil Pollution Act reported.....	213
Violations of other laws reported.....	543
Explosives loading permits issued.....	850
Explosives loadings supervised.....	1, 304
Explosives covered by above permits.....	129, 639
Other hazardous cargoes inspected.....	6, 654
Anchorage violations.....	75

The Coast Guard also assisted the Federal agencies having primary responsibility for enforcing the Oil Pollution Act (33 U. S. C. 431-437), anchorage regulations, laws relating to internal revenue, customs, immigration, quarantine, and the conservation and protection of wildlife and the fisheries.

Cooperation with other Federal agencies

In addition, during the year the Coast Guard performed services for other Federal agencies as follows:

Alcohol Tax Unit, Treasury (aircraft days).....	80
Coast and Geodetic Survey: (aerial surveys days).....	72
Fish and Wildlife (censuses taken).....	122
Weather Bureau:	
(a) Reports furnished.....	117, 495
(b) Warnings disseminated.....	24, 655

Aids to navigation

On June 30, 1957, there were 38,532 aids to navigation maintained in the navigable waters of the United States, its Territories, and possessions, the Trust Territory of the Pacific Islands, and at overseas bases, consisting of loran stations, radarbeacon stations, light stations, lightships, lighted and unlighted buoys, and minor lights and daybeacons.

During the year, 3,653 new aids to navigation were established, mainly to mark completed river and harbor improvements; and 4,456 aids were discontinued, a decrease of 803. The decline was due, in general, to seasonal changes in the number of buoys required to be maintained in waters reflecting the various flood stages in the Mississippi River and its tributaries, and to a critical review of all aids to navigation maintained by the Coast Guard in order to discontinue unessential aids. The world-wide loran system as of June 30, 1957, comprised 59 stations, of which 49 were operated by the Coast Guard. No new stations were placed in service during the fiscal year 1957, but plans for additional stations are mentioned in a later paragraph on shore establishments.

A summary follows of Coast Guard aids to navigation at the close of each of the last two fiscal years.

Type	Total number June 30—	
	1956	1957
Loran transmitters.....	49	49
Radiobeacons.....	190	192
Radarbeacons.....	7	7
Fog signals (except sound buoys).....	584	582
Lights (including lightships).....	10,304	10,360
Daybeacons.....	5,280	5,604
Buoys, lighted (including sound).....	3,273	3,286
Buoys, unlighted sound.....	363	373
Buoys, unlighted metal.....	13,138	13,434
Buoys, Mississippi River type.....	5,292	3,818
Buoys, spar.....	855	827
Total.....	39,335	38,532

Ocean stations

Throughout the fiscal year 1957 the Coast Guard maintained four ocean stations in the North Atlantic Ocean and two in the North Pacific. Ocean station vessels located at strategic points provided meteorological services for aid and marine commerce; communications for transocean traffic; air navigation facilities in the ocean areas regularly traversed by aircraft of the United States and other cooperating governments; and the search and rescue facilities mentioned in foregoing paragraphs. During the year Coast Guard vessels transmitted over 62,808 weather reports, rendered assistance in 152 cases and cruised approximately 477,576 miles in this program.

International Ice Patrol

The International Ice Observation and Ice Patrol Service in the North Atlantic Ocean completed its calendar 1956 season by conducting a postseason oceanographic cruise during July 1956 and by conducting aerial ice reconnaissance until September 1956.

Aerial ice reconnaissance begun during January 1957 shortly disclosed that the 1957 ice season was starting early and icebergs were moving to threaten shipping lanes. A surface vessel patrol of the most dangerous ice was begun by the C. G. C. *Acushnet* early in March 1957. Intermittent surface vessel patrols, aerial reconnaissance by four PB1G aircraft, and oceanographic work by the C. G. C. *Evergreen* were carried out to provide the protection to shipping required by the unusually severe ice year. Operations for the calendar 1957 ice season were still in progress on June 30, 1957.

Bering Sea Patrol

The Bering Sea Patrol was carried out by the C. G. C. *Winona* during July, August, and September 1956. This patrol carries out certain law enforcement; renders aid to distressed persons, vessels, and aircraft; assists other Federal agencies and the Territorial Government of Alaska in law enforcement; provides logistic service to outlying Coast Guard units; performs aids to navigation duties; performs marine inspection; cooperates with other Government agencies; furnishes medical and dental assistance to persons in remote places in the

areas contiguous to the Bering Sea and the Arctic Ocean; and collects hydrographic, oceanographic, and meteorological data.

During this patrol the *Winona* cruised 10,374 miles, carried 33 passengers on missions in the public interest, and supplied medical treatment to 335 persons and dental treatment to 606.

Facilities, equipment, construction, and development

Floating units.—Large ships in active commission at the end of the year consisted of 182 cutters and buoy tenders of various types, 81 patrol boats, 33 lightships, 39 harbor tugs, and 11 buoy boats. During the year they cruised 2,795,729 miles as compared with 2,842,702 miles the previous year. Included in the 182 cutters are two special units, the C. G. C. *Courier* and the C. G. C. *Eagle*. The *Courier*, a 339-foot vessel equipped with radio broadcasting facilities, is manned and operated by the Coast Guard for the United States Information Agency. The *Eagle*, a 295-foot bark, is used exclusively for training purposes. One new 95-foot patrol boat was completed and commissioned at the Coast Guard Yard.

Shore establishments.—Shore establishments at the end of fiscal year 1957 included:

12	District offices	46	Marine inspection offices
2	Area offices	6	Merchant marine details located in foreign ports
4	Inspection offices	11	Examiner offices
26	Bases	30	Group offices
20	Depots	1	Shipyard
2	Supply centers	297	Manned light stations
9	Supply depots	57	Light attendant stations
3	Section offices	1	Fog signal station
1	Receiving center	3	Radiobeacon stations
1	Training station	1	Electronic engineering station
1	Academy	49	Recruiting stations
9	Air stations	5	Ship training detachments
11	Air detachments	10	Electronic repair shops
1	Aircraft repair and supply base	1	Field testing and development unit
15	Radio stations	9	Moorings
141	Lifeboat stations		
49	Loran transmitting stations		

Captain of the Port offices, supplemented by port security units, continued to be maintained in major shipping centers.

Additional to the 7 loran sites selected during the fiscal year 1956 were 11 sites selected in 1957. Although acquisition of some of the sites has been delayed because of difficulties in negotiations with the various countries concerned, construction has begun of two and completion of the 18 stations is planned for 1958. As part of a Department of Defense program, three Loran-C stations have been established by the Coast Guard to be operated experimentally for approximately two years. In August 1956 a Rescue Coordination Center (RCC) was established at the Coast Guard Air Detachment, Bermuda.

Additional personnel have been authorized, and equipment provided in certain Coast Guard districts for 15 mobile boarding (boating

safety) teams. The teams will patrol various inland waters under Federal jurisdiction.

A long-range program toward consolidating groups, and improving organizational structure concerning subunits has begun. A reorganization within the Ninth Coast Guard District reduced the number of groups from 21 to 11. Similar reorganizations are to be made in other districts.

Under provisions of the Capehart housing program, plans for construction of housing for families of Coast Guard personnel have been completed, but lack of funds thus far has prevented further action. A study of existing family housing has been conducted also for determining the requirements for bringing these facilities up to standards in proposed legislation under consideration by the present Congress.

Aviation and aircraft.—On February 26, 1957, the Secretary of the Treasury and the Commandant of the Coast Guard transmitted to Congress their joint "Report on the Requirements of Coast Guard Aviation." This report, based on a study by a special board of senior Coast Guard officers presents a plan for meeting the rapidly increasing demands upon Coast Guard aviation. The main features of the plan, to be carried out over the next six fiscal years, include replacement of overage planes with modern aircraft; reduction in the number of types of aircraft operated from the present 14 to 6; and an increase in the total aircraft fleet from the present authorized level of 128 to a level of 195. The increase in numbers of aircraft would be made up largely of medium and light helicopters. In addition, the plan contemplates augmenting some existing Coast Guard aviation facilities, and establishing certain additional facilities in order to accommodate the total proposed aviation program.

A financial plan for accomplishing these changes was also submitted to Congress. The total estimated cost of approximately \$100 million is to be funded over a period of six fiscal years, with the initial installment of \$12.9 million included in the budget for fiscal 1958. It is emphasized throughout the report that the plan is merely a blueprint for accomplishing certain objectives during the next six years, and that therefore all aspects of the plan will be subject to continued review in the light of changing circumstances.

Fixed and rotary wing aircraft operated by the Coast Guard were maintained between 128 and 125 during the year. This includes those undergoing overhaul and modification. Four new aircraft were acquired for replacement of overage aircraft. Two fixed wing and one rotary wing aircraft were lost through crashes; one fixed wing aircraft was replaced by a new aircraft, the other was replaced by an aircraft obtained from the Navy on loan. No immediate replacement could be provided for the crashed helicopter.

Coast Guard aircraft were used primarily for search and rescue operations, and in support were deployed at nine air stations and twelve air detachments. Aircraft were also used in carrying out the following activities:

- International Ice Patrol
- Logistic support of isolated Coast Guard units
- Flood and disaster relief and assistance

Port security and law enforcement
Ship-based operations for ice reconnaissance
Cooperation with Coast and Geodetic Survey in aerial photography
Cooperation with Internal Revenue Service in location of illicit distilleries

Fish and wildlife surveys and patrols
Cooperation with airline and military agencies in training in search and rescue overwater emergency procedures
Operational flight training of pilots and crews.

Communications.—The program to determine and establish new standards for radiobeacon frequency usage continues with particular attention to the Long Island Sound area. Primary plans have been completed for installations of VHF-FM 150 mc/s communication equipment for port security operations in the Norfolk-Newport News area. A survey of the San Francisco Bay area is now being made. A communication improvement program aboard miscellaneous class buoy tenders is under way, and a reduction in the amount of equipment and replacement of selected equipment are being carried out. A gradual improvement in rapid telephone circuits for search and rescue also is being made.

Engineering developments

Continuing research and development in the various engineering fields has led to improvements in the equipment and facilities used by the Coast Guard in the conduct of its many and varied functions. Some recent projects are summarized as follows:

A 25-man liferaft, which should be effective in saving life and property at sea, is being developed and tested. A new subminiature gyrocompass, more rugged, lighter, smaller, and less expensive than present equipment, is being evaluated for use on small vessels. The launching of lifeboats from cutters at sea will become faster and safer as a result of completed tests of two new winch designs.

Two new designs for buoys were completed, one for use on rivers and the other a large lighted buoy, which will provide better service at lower cost. Other design improvements on lighted buoys will bring about further reductions in the high cost of servicing. The design of the aids to navigation system for the Saint Lawrence Seaway, employing the most modern, efficient apparatus available, is approximately 50 percent complete.

In the area of electronics engineering, a pilot installation of a microwave radio link across the entrance of Delaware Bay was undertaken, and the installation of FM communications equipment for port security operations in major harbor areas was begun. Development has progressed toward improved antennas and better frequency control for loran transmitters, and a new, longer range loran system of much higher accuracy has been built in one area for evaluation and Navy use. A special radar has been developed which will permit accurate location and tracking of icebergs by aircraft in periods of low visibility.

The joint effort of the Coast Guard, Navy, Maritime Administration, and the American Bureau of Shipping to improve the hull structures of merchant ships has produced a better understanding of the

reasons for plate failure, and how to detect and deal with flaws. The planning for fundamental studies of the loads encountered by a ship's hull in a seaway is also under way.

Coast Guard Reserve

The purpose of the Coast Guard Reserve is to provide trained units and qualified persons available for active duty in time of war or national emergency and at such other times as the national security requires. In the administration of the reserve program, the Coast Guard conforms in general with policies outlined in Department of Defense directives implementing the various laws relative to the reserve components, thus carrying out the intent of Congress as expressed in Section 251 of the Armed Forces Reserve Act of 1952, as amended (10 U. S. C. 101, 276), that the administration of all reserve components be as uniform as practicable.

Personnel

On June 30, 1957, the military personnel strength of the regular Coast Guard on active duty was 29,940, consisting of 2,763 commissioned officers, 539 chief warrant officers, 370 warrant officers, 367 cadets, and 25,901 enlisted men. The civilian force consisted of 2,186 salaried personnel, 2,186 wage board employees, and 433 lamplighters, exclusive of vacancies. The total strength of the Coast Guard Reserve as of June 30, 1957, was 3,815 officers and 22,996 enlisted personnel.

On June 1, 1957, 61 members of the Class of 1957 were graduated from the Coast Guard Academy with Bachelor of Science degrees. Of these, 56 were commissioned as ensigns in the U. S. Coast Guard and 5 were commissioned as ensigns in the U. S. Coast Guard Reserve. One long cadet practice cruise for all members of the three classes of the Academy again was scheduled this year. The Coast Guard cutters *Eagle*, *Absecon*, and *Yakutat* are participating in the current cruise which will include visits to Bergen, Norway, London, England, and LaCoruna, Spain.

During fiscal 1957 losses of regular commissioned officers totaled 149 through retirements, resignations, and deaths. In addition, 85 reserve officers were released from active duty following completion of their obligated service. Losses through resignations were below normal for Academy graduates because of the increase in the obligation for active service from 3 to 4 years beginning with the class graduating in 1954. These losses were replaced by the 61 Academy graduates, Class of 1957, 227 graduates of the Officer Candidate School, and 1 appointment of a former merchant marine officer. The net gain of 55 was just sufficient to meet the increased commitments at the beginning of the fiscal year 1958.

Action taken under the provisions of the act of August 9, 1955 (14 U. S. C. 247, 248), for the retirement or retention of captains and flag officers, resulted in the retirement of one rear admiral and seven captains. One rear admiral was retired under other provision.

The integration of reservists in fiscal 1957 consisted of the permanent appointment in the regular service of 1 lieutenant commander, 2 lieutenants, and 4 lieutenants (junior grade). One had been a reserve officer and six had been temporary service officers.

Throughout the year enlisted reservists without previous active duty were called up for service under the provisions of Section 4 (c) (2) of the Universal Military Training and Service Act as amended (50 App. U. S. C. 451-473), and Section 261 of the Armed Forces Reserve Act of 1952, as amended (50 U. S. C. 1012). It is estimated that on June 30, 1957, there will be 1,700 reservists on active duty.

There were 269 voluntary retirements of enlisted men during the year. The minimum service reached was 20 years. Of the total, 103 were retired for statutory reasons, that is for age, 30 years' service, and physical disability.

The 1957 competitive examination for appointment to the Coast Guard Academy was held on February 25 and 26, 1957, in approximately 100 examining centers within the United States and overseas. There were 2,207 applicants to participate in the examination, more than 30 percent above last year's. A total of 1,702 young men were authorized to participate in the competitive examination and an eligibility list of 385 was established. A class of 256 reported to the Academy on July 1 and 2, 1957.

With the exception of the program for the procurement of licensed merchant marine officers pursuant to 14 U. S. C. 225 (5), there was no change in officer procurement programs conducted during the year. More appropriate age and experience qualifications, examination requirements, and a provision for appointment in commissioned warrant grade as well as commissioned grade for qualified licensed personnel resulted in 51 applicants filing for the 1957 examination. Of the 32 who reported for examination, 25 were nominated for commissioning in the Coast Guard, 2 as lieutenant commanders, 15 as lieutenants, 3 as lieutenants (junior grade), and 5 as commissioned warrants. This represents a 325 percent increase in applications and 300 percent increase in licensed personnel examined.

Under the stimulus of a greatly increased need for reserve officers for assignment to reserve training units, the direct commissioning of the Coast Guard Reserve was accelerated. A total of 120 applications were received of which 105 were found professionally qualified, and 93 were recommended for appointment by selection boards. This represented an increase of 158 percent in appointments over those in 1956.

The largest procurement program conducted during the fiscal year again was that of officer candidates. College graduates with civilian status and enlisted personnel with certain educational and active service qualifications were designated as officer candidates, and were assigned to the Academy for four months' indoctrination in order to qualify as general duty officers. During the year 303 candidates were appointed to commissioned grade and assigned to active duty with the Coast Guard. Of this group, 191 received commissions as ensigns in the Reserve and 112 enlisted personnel were appointed ensigns for temporary service. Of the reserve ensigns, 73 were obligated to serve only 6 months active duty; the remaining 230 ensigns replaced reserve officers released from active duty and regular officers who resigned or retired.

The Coast Guard had 32 recruiting stations, 18 substations, and 5 mobile recruiting units in operation on July 1, 1956. These units

were manned by 220 recruiters (with a vehicle allowance of 30). To support increased regular recruitment requirements and the expanded reserve recruitment program the recruiting effort was intensified during the year. At the end of the year there were in operation 52 recruiting stations, 14 substations, and 5 mobile recruiting units manned by 299 recruiters (with a vehicle allowance of 79). The recruitment program attracted 19,257 applications for enlistment in the regular Coast Guard during fiscal 1957. Of the applicants, 5,333 qualified and enlisted; 5,564 were mentally disqualified; 1,800 were physically disqualified; 3,100 were rejected for moral and other reasons; and 3,460 failed to complete their applications.

Personnel enlisting in the regular Coast Guard are assigned to the receiving centers at Cape May, N. J., or Alameda, Calif., for 12 weeks of recruit training. During the year, 3,021 completed training at Cape May and 1,068 at Alameda. The total represented an increase of 1,222 over the number trained in 1956.

In the Coast Guard Reserve, of the total strength of 3,815 officers and 22,996 enlisted men, 1,392 officers and 7,186 enlisted men were in training units on June 30, 1957. Organized reserve training units in commission numbered 125, a 25 percent increase during the year. An extensive program of active duty was carried out, with approximately 6,225 receiving training.

Of the 7,596 applicants for enlistment in the Reserve considered during the year, 3,620 qualified and enlisted; 681 were disqualified mentally; 398 were disqualified physically; 719 were rejected for moral and other reasons; and 2,178 failed to complete their applications. The six months' active duty program instituted in June 1956 was intensified and accounted for approximately 42 percent of enlistments in fiscal 1957. Of the total enlistments, 1,524 chose this program, exceeding the planned quota of 1,000. An additional reserve enlistment program was established in June 1957. This provides for immediate active duty of two years for qualified applicants enlisting between the ages of 17 and 26 years. Previous enlistees awaiting call-up are included in the program's authorized quota of 200 per month.

A total of 368 enlisted men completed six months' reserve training at the Cape May Receiving Center in 1957 under provisions of the Reserve Forces Act of 1955 (50 U. S. C. 928 (f)). In addition, personnel from organized reserve training units were assigned to the receiving centers at Cape May and Alameda for two weeks' summer training; 867 completed training at Cape May and 251 at Alameda.

Postgraduate training of selected officers was continued in 1957. This consisted of specialized courses in naval architecture, electronics engineering, nuclear research, command communications, financial administration, and law.

Flight training to meet the needs of the Coast Guard remained at the same numerical level as in fiscal 1956. During fiscal 1957, 43 officers entered flight training, 41 completed their training, and 42 were in training at the end of the year. Short courses were provided in operation and maintenance of new aircraft and equipment, and 25 aviators completed an eight-weeks course for qualification as helicopter pilots.

Short refresher courses, made available by the Navy and Army, were continued to educate further the crews of Coast Guard vessels on the manner of maintaining the state of readiness necessary for mobilization. Other short courses were arranged in finance, communications, and other technical fields. A total of 102 officers completed such training during the year, and 130 officers completed indoctrination or refresher courses at the Coast Guard Training Station, Groton, Conn., and at the Academy in preparation for assignment to loran transmitting stations, or to aids to navigation billets, and merchant marine safety billets.

The petty officer training program consists of training nonrated men in basic petty officer schools of the Coast Guard and Navy and rated men in advanced schools of the Coast Guard, Navy, other services, and civilian institutions. During the year, 1,559 enlisted men graduated from basic petty officer schools and 710 from advanced schools. The total of 2,269 was an increase of 23 over the number in fiscal 1956. Of those graduating in the year under review, 1,545 were from Coast Guard schools, and 724 from Navy and other schools.

During the year, 13,302 enrolled and 4,796 completed Coast Guard Institute courses. During the same period, 2,429 enrolled and 403 completed courses offered by the United States Armed Forces Institute. Naval correspondence courses were completed by 267.

More than 50 visitors from foreign countries were extended the use of training and operational facilities of the Coast Guard. Approximately half of the visitors came to this country under the sponsorship of the International Cooperation Administration for training in aids to navigation, loran, merchant marine safety, vessel inspection, port security, and law enforcement. The visitors came from Chile, Iceland, Indonesia, Italy, Japan, Korea, Philippine Islands, Portugal, Taiwan, and Thailand. The remainder came from Brazil, Chile, Colombia, Costa Rica, Greece, India, Indonesia, Spain, and Thailand, under the auspices of the Civil Aeronautics Authority, to observe Coast Guard rescue coordinator centers in operation.

Public Health Service support.—On June 30, 1957, the following Public Health personnel were assigned to duty with the Coast Guard: 46 dental officers, 32 medical officers, 10 nurses, 1 scientist officer, 1 sanitary engineering officer, and 1 pharmacist officer. Four full-time medical officers were assigned at the Alameda Base for duty on ocean weather station vessels manning station *Victor* in the Pacific Ocean. Full-time coverage by medical officers was provided during the year for ocean weather stations *Bravo* and *Charlie* in the Atlantic Ocean. Full-time medical and dental officers were assigned to the vessel engaged in the Bering Sea Patrol, and full-time medical officers were assigned to other special cruise vessels, including operation Deep Freeze II.

Military justice.—There were 913 court-martial case records received during the year, an increase of 177 over those in 1956. Although general courts-martial declined from 17 to 16, special courts-martial increased from 166 to 227 and summary courts from 553 to 670. The 16 general courts-martial included 10 cases reviewed by the Coast Guard Board of Review pursuant to the requirements of Article 66 (b), Uniform Code of Military Justice, four cases acted upon by the

General Counsel of the Treasury Department under the provisions of Article 69 of the Code, and two acquittals. Appellate review was completed in the field in 111 of the 227 special courts-martial; action by the General Counsel gave finality to the proceedings in 70 additional cases, and the remaining 46 required review by the Board of Review.

Petitions to the United States Court of Military Appeals for grants of review of Board of Review cases were presented in 10 Coast Guard cases. The court granted two and denied three; two were withdrawn, and three were awaiting determination as of June 30, 1957.

Board of Review, Discharges and Dismissals.—The function of the Board of Review, Discharges and Dismissals is to review discharges and dismissals of former members of the Coast Guard in conformance with the provisions of 33 C. F. R. 51. During the fiscal year the Board reviewed 61 cases with the following results: 22 Discharges under Honorable Conditions were reviewed, with 7 changed to Honorable Discharge; 22 Undesirable Discharges were reviewed with 1 changed to Honorable Discharge, and 5 changed to Discharge under Honorable Conditions. Reviews of 14 Bad Conduct Discharges, 1 Dishonorable Discharge, and 2 Ordinary Discharges (for undesirability) brought no changes in the original decisions.

Personnel safety program.—During fiscal 1957, there were 1,198 accidents reported. Of the 37 fatalities, only 6 occurred between November 30, 1956, and May 1, 1957. The Coast Guard had an exposure of approximately 10,578,933 military man-days and 9,892,136 civilian man-hours with 900 disabling injuries. There were 10,834,865 vehicle miles reported. Both the number of reported accidents and disabling injuries show slight reductions from previous years. The 1956 *calendar year* accident frequency rate was 9.14 per 100,000 man-days for military personnel and 7.00 per 1,000,000 man-hours for civilian.

Fiscal and supply management

Some of the more important administrative improvements in the Coast Guard during the past year were as follows:

A method was adopted to use mechanical equipment for simultaneous preparation of military payrolls, posting to pay records, and writing checks. A significant reduction will be realized in the man-hours required to perform these tasks.

From experience gained in trial installations, a simplified system of funding work orders at industrial bases and depots was extended to all Coast Guard districts, with the following significant improvements:

(a) Management is provided a more direct means of associating total industrial costs with job estimates.

(b) Budgetary planning and payment for all costs have been made the responsibility of the officer who authorized the work to be performed.

(c) Improvement in cost classification and techniques have simplified cost proration so that more useful and meaningful reports can be provided to management.

In accordance with a recommendation of the Hoover Commission and the General Accounting Office, Coast Guard units in all but two

districts within the continental limits of the United States now obtain general stores materials directly from the Navy. Negotiations are under way to obtain similar support in the two remaining districts (Boston and New Orleans). Coast Guard stocks of general stores material in the integrated districts were transferred to the Navy (with reimbursement to the Coast Guard supply fund), thereby reducing Coast Guard inventories. Outside the continental limits of the United States a similar agreement has been made and carried out in the Honolulu District.

In addition to integrating inventories, as just outlined, the Coast Guard has moved its supply facilities to Navy property in Seattle, Wash. and Great Lakes, Ill., thereby releasing space rented by the General Services Administration in Seattle and in Cleveland, Ohio. Discussions are being held with the Navy for the purpose of moving the Coast Guard Supply Depot, New Orleans, to the Naval Station, Algiers, La. This would permit relinquishment of the Coast Guard building in New Orleans.

Negotiations are in progress to obtain Air Force supply and service support for Coast Guard units outside the continental limits of the United States, which will materially improve supply support for isolated Coast Guard units.

Coast Guard inventories were reduced by \$2,288,993 in the 9 months ending March 31, 1957. Excess materials, amounting to \$747,286, were disposed of in the 9 months commencing July 1, 1956, and approximately \$1,500,000 more was awaiting disposal on March 31, 1957.

Public Law 1014, approved August 7, 1956, which amended Section 650, Title 14 of the United States Code, authorized the Coast Guard to increase the existing capital of its supply fund by the value of usable materials transferred to it from Coast Guard inventories carried in other accounts. More than \$500,000 worth of such material was transferred on the basis of this authority through June 30, 1957. Additional transfers will be made as rapidly as analyses of items, quantities, and usage data are completed.

Coast Guard Auxiliary

The primary purpose of this voluntary, nonmilitary organization is the promotion of safety in the maintenance, operation, and navigation of small boats. Functioning in over 400 communities the Auxiliary conducts public instruction courses in basic seamanship and safe boat-handling. During the fiscal year these courses given gratuitously had an enrollment of 33,826. Another phase of the Auxiliary is the courtesy motorboat examination wherein the qualified Auxiliary instructors check the vessels of fellow boatmen. If the examined boat satisfies all requirements of the law and additional safety standards of the Coast Guard Auxiliary, a coveted "decal" is awarded to the boat owner. Inspections of 38,997 motorboats were conducted during the fiscal year. The Auxiliary also patrolled 353 regattas and answered 2,040 calls for assistance. On June 30, 1957, the organization had 13,740 members and 7,946 facilities.

Funds available, obligations, and balances

The following table shows the amount of funds available for the Coast Guard during the fiscal year 1957, and the amounts of obligations and unobligated balances.

	Funds available	Net total obligations	Unobligated balances
Appropriated funds:			
Operating expenses.....	\$164,850,000	\$164,777,462	\$72,538
Reserve training.....	7,000,000	6,877,875	122,125
Retired pay.....	24,925,000	24,811,757	113,243
Acquisition, construction, and improvements.....	¹ 9,457,726	3,154,484	6,303,242
Total appropriated funds.....	206,232,726	199,621,578	6,611,148
Reimbursements:			
Operating expenses.....	23,570,967	23,570,967	-----
Reserve training.....	57,416	57,416	-----
Acquisition, construction, and improvements.....	¹ 7,919,085	1,098,332	6,820,753
Total reimbursements.....	31,547,468	24,726,715	6,820,753
Trust fund, United States Coast Guard gift fund.....	¹ 11,018	468	10,550
Grand total.....	237,791,212	224,348,761	13,442,451

¹ Funds available include unobligated balances brought forward from prior year appropriations as follows:

Acquisition, construction, and improvements:

Appropriated funds.....	\$2,057,726
Reimbursements.....	2,444,985
United States Coast Guard gift fund.....	4,050

United States Savings Bonds Division

The United States Savings Bonds Division serves as a Government nucleus to promote the sale and retention of United States savings bonds. With the aid and direction of this staff, thousands of public-spirited men and women act as a volunteer sales corps or as volunteer issuing agents.

In the 23 years of their continuous sale, savings bonds have proved a vital instrument in promoting thrift and nationwide saving by the public. Through the payroll savings or bond-a-month plans, millions of Americans have become savers for the first time in their lives. They have found these "save-as-you-earn" plans an ideal way of systematically building up financial reserves to meet emergencies and specific goals such as financing college educations for their children, buying homes, or supplementing retirement income. Moreover, the thrift habit learned from the savings bonds program has been reflected in increased savings in many forms.

Savings bonds promotion continues to be an important part of the Government's effort to encourage the additional savings in all forms needed to finance our growing economy soundly and provide even greater future financial security for the people and Nation. Savings bonds investments also contribute to economic stability by helping to put the public debt on a sounder basis through keeping it widely distributed among real savers.

Series E savings bonds, the most popular Government security, marked their sixteenth anniversary in 1957. On June 30, 1957, E bonds outstanding, together with their current-income companion, H

bonds (issued since June 1, 1952), had a cash value of \$41½ billion. That was the alltime record. It means that 15 percent of the public debt is now held in E and H bonds, and that this investment represents almost two-thirds of individuals' total holdings of the debt. More than 40 million persons hold these two series of savings bonds.

During the year the Savings Bonds Division continued to concentrate promotional efforts on the sale of E and H bonds, and gross purchases totaled \$4.6 billion. A new peacetime record was attained in the number of bonds sold, but the dollar volume of sales slowed down under the impact of higher interest rates available on alternative forms of savings and was 12.3 percent less than in 1956. The dollar decline was reflected particularly in fewer purchases of bonds of large denomination (\$500 and over). The combined purchases of \$25 and \$50 bonds, however, most of them by payroll savers, continued to rise and reached the highest amount in any year since wartime 1946.

Although savings bonds are not sold primarily for their yield, but rather because they are completely safe investments, easily convertible into cash when funds are needed, and convenient to purchase, nevertheless buyers must feel that they are getting a fair rate of interest. Therefore, in February the Treasury asked authority from Congress to increase from 3 to 3¼ percent the overall yield on E and H bonds held to maturity. Legislation granting this authority was enacted on April 20, 1957. The day the bill was signed, the Treasury announced that all E and H bonds purchased on or after February 1, 1957, will yield 3¼ percent per annum, compounded semiannually, when held to maturity. Investment yields in the early years of holding were also substantially improved. With the change in interest return, the previous calendar year limit of \$20,000 (face amount) on purchases of each series by individuals was lowered to \$10,000.

Throughout fiscal 1957, the retention rate on E bonds after their original maturity continued at approximately 65 percent of original maturity value. From May 1951, when the first E bonds started maturing, through June 1957, approximately \$23 billion in E bonds came due. Less than \$9 billion of that amount was turned in for cash; the balance, over \$14 billion, is being retained for a longer period under the automatic extension option, and has earned \$1.2 billion in additional interest. During the extension period, up to ten additional years, E bonds issued from May 1942 through April 1957 earn interest at the rate of approximately 3 percent per annum, compounded semiannually. E bonds issued in the year prior to May 1942 yield only slightly less.

Total redemptions of unmatured and matured E and H bonds during fiscal 1957 amounted to \$5.2 billion, 9.4 percent above those in 1956. Of the total amount, \$2.0 billion represented retirements of matured E bonds.

The Division's experience discloses the payroll savings plan as the most effective method of channeling regular systematic savings into E bonds. A survey by the Survey Research Center, University of Michigan, during fiscal 1957 for the Savings Bonds Division found the plan to be the most important single savings method for setting aside liquid savings out of current income. The ever-growing volume of \$25 and \$50 bond purchases indicates there are more payroll savers now than at any time since World War II. More than 8 million per-

sons employed in industry and Government were signed up on the payroll savings plan at the close of fiscal 1957. They work in more than 42,000 separate businesses which operate payroll savings plans for the benefit of their employees. These firms handle the bookkeeping and manage the plans as a public service without charge.

Of importance equal to that of the volunteer sales corps and the 16 years of fine public service by the voluntary issuing agents is the generous free advertising donated by the Nation's advertisers as well as all publicity and advertising media. Currently, the value of the advertising contributed amounts to more than \$50 million a year. As a result of all of this volunteer support, the promotional cost of the program to the Government is only slightly over \$1 for every, \$1,000 of E and H bonds sold.

The United States Savings Bonds Division is headed by a National Director and is organized into four principal branches: Sales, Planning, Advertising and Promotion, and Administration. The heads of these branches, together with the National Director, comprise the Division's Management Committee, whose main objective is the improvement of services of the Division.

Further strengthening of the decentralized regional organizations was continued during the year. Better manpower utilization was achieved, with more economical and effective work schedules, through realignment of area responsibility boundaries within State organizations, and also, in many instances, relocation of the area manager's post of duty.

The procedural guides developed for headquarters and field staffs have resulted in better controls. Without curtailing the meeting of requirements, economies have been made by consolidation of certain types of printed material and more selective distribution methods which have reduced the volume of promotional material and circular mailings. A great deal of progress was made also in further standardizing methods, reports, and forms.

Training courses for personnel throughout the year were directed not only to more effective sales techniques, but also to methods that would result in economies and increase assistance to volunteers.

United States Secret Service

The major functions of the United States Secret Service are protection of the person of the President of the United States and members of his immediate family, of the President-elect, and of the Vice President at his request; the detection and arrest of persons committing any offenses against the laws of the United States relating to obligations and securities of the United States and of foreign governments; and the detection and arrest of persons violating certain laws relating to the Federal Deposit Insurance Corporation, Federal land banks, joint-stock land banks, and national farm loan associations. These and other duties of the Secret Service are defined in Section 3056 in Title 18 of the United States Code.

Management improvement

On May 1, 1957, the headquarters office of the Secret Service was reorganized for more effective allocation of duties, clarification of responsibilities, and reduction of the details requiring the personal attention of the Chief. Four divisions were established: namely, Investigations, Security, Inspection and Internal Audit, and Administration. Improvements made during the fiscal year provided for stronger administrative controls and for more effective use of personnel, space, and equipment. Noteworthy progress was made in further developing and strengthening the Secret Service internal audit program. A study of accountability procedures for contraband property was completed and a new system, designed especially to strengthen controls, was developed for use commencing July 1, 1957. The laboratory maintained by the Counterfeit Section was combined with the laboratory in the Protective Research Section.

Protective and security activities

Unusual protective activities by Secret Service agents during the year included:

Protection of the President of the United States:

In July 1956, at the meeting of Presidents of the American Republics in Panama;

In March 1957, on his visit to Bermuda to confer with the Prime Minister of Great Britain.

Protection of the Vice President of the United States:

On an official trip around the world in July 1956, with stops in Hawaii, Wake Island, Guam, Philippines, South Viet Nam, Formosa, Thailand, Pakistan, Turkey, Mallorca Island, and Bermuda;

On his trip to Europe in December 1956, for the purpose of surveying conditions growing out of the Hungarian revolt, with stops in Austria, Germany, and Iceland; and

On official visits to Morocco, Ghana, Liberia, Uganda, Ethiopia, the Sudan, Libya, Italy, and Tunisia, in February and March, 1957.

Enforcement activities

During the year 1957, Secret Service agents captured 12 plants for the manufacture of counterfeit paper money and \$1,548,167 in counterfeit notes. Of that total, \$101,765 was passed on storekeepers and cashiers. The balance of \$1,446,402 was captured before it could be put into circulation. The representative value of counterfeit coins seized was \$5,832.25, of which \$5,530.21 had been circulated.

There were 101 new counterfeit note issues and variations detected during the year and 319 persons were arrested for violating the counterfeit laws as compared with 166 persons in the previous year.

The surreptitious use of equipment for counterfeiting purposes by employees of legitimate printing firms became more widespread during the year. Five of these cases culminated in arrests in Los Angeles

and San Francisco, Calif.; Salt Lake City, Utah; Clay, Ky.; Chicago, Ill.; and Miami, Fla. A summary of some of these cases follows.

Two men were arrested in Gary, Ind., in October 1956 for passing and possessing counterfeit \$10 and \$20 notes. One admitted the manufacture of the \$10 notes in a shop in San Francisco where he was employed as a foreman, printing the notes at night. They also had set up a plant in a trailer in Clay, Ky., and this plant was seized. At the same time the owner of the trailer, who was implicated, was arrested. Notes had been passed in six States.

In Chicago 15 persons were arrested during the month of June for possessing and passing counterfeit \$5 notes. The manufacturers also arrested were employed at a legitimate printing plant where the notes were printed after regular working hours.

Over a period of several months of investigation, 35 persons were arrested in Michigan, 6 in Kentucky, and 2 in Tennessee for the manufacture, sale, possession, and passing of counterfeit \$10 notes. Approximately \$90,000 worth of these notes was printed in a camouflaged room in a Detroit service station. Of this amount, \$5,930 reached circulation. The plant had been dismantled, but the press was located and seized. Part of the counterfeit money was recovered on a Texas farm where it had been buried.

In March the manufacturers of a new counterfeit \$20 note were arrested in Minneapolis. Both defendants were printers and admitted making the notes at night on a press in a printing plant in Salt Lake City where they had been employed for a week. More than \$600,000 in counterfeit notes was seized in their motel room and automobile. Also seized in the automobile was a 30-30 rifle, a .45 automatic, and a .22 caliber pistol.

The first case in many years of attempted counterfeiting of Government bonds was uncovered through a routine police arrest for drunkenness in Pasadena, Tex. Police found 195 new counterfeit \$100 notes in the arrested man's automobile. The man subsequently admitted manufacturing the notes, as well as counterfeit travelers' checks drawn on the Bank of America, and checks drawn on commercial firms. His plant was in St. Louis, Mo., and when seized it contained negatives for \$1,000 and \$5,000 Treasury coupon bonds, prints of portions of Treasury bonds, and plates for simulating distinctive currency paper.

In June the Chief of the Secret Service called a meeting at Heidelberg, Germany, attended by military authorities and French police officials to discuss the widespread traffic in counterfeit \$10, \$20, and \$100 notes in Europe. Plans were formulated for a concerted investigation to capture the counterfeiters. Through undercover investigation and surveillance two sources of notes were revealed. Arrests were made and the counterfeiting plants seized. Paper sufficient to produce \$4,500,000 in counterfeit notes was among the material seized.

The following table summarizes seizures of counterfeit money during the fiscal years 1956 and 1957.

Counterfeit money seized fiscal years 1956 and 1957

	1956	1957	Increase, or decrease (—)	Percentage increase, or decrease (—)
Counterfeit and altered notes:				
After circulation	\$67, 635. 50	\$101, 765. 00	\$34, 129. 50	50. 5
Before circulation	444, 124. 50	1, 446, 402. 00	1, 002, 277. 50	225. 7
Total	511, 760. 00	1, 548, 167. 00	1, 036, 407. 00	202. 5
Counterfeit coins seized:				
After circulation	5, 405. 84	5, 530. 21	124. 37	2. 3
Before circulation	920. 32	302. 04	—618. 28	—67. 2
Total	6, 326. 16	5, 832. 25	—493. 91	—7. 8
Grand total	518, 086. 16	1, 553, 999. 25	1, 035, 913. 09	200. 0

Forgery and fraudulent negotiation of Government checks continues to be a major criminal enforcement problem. During the fiscal year 1957 the Secret Service received 24,852 forged Government checks for investigation and agents completed investigations of 26,531, representing \$2,370,506. There had been 11,713 forged checks on hand at the beginning of the year, and at its close there was a backlog of 10,034 awaiting investigation. There were 2,762 arrests for forgery of Government checks.

In one case the manager of a business college in Arkansas sought to keep up its income by retaining on the rolls the names of veterans who had left the college. He filed false monthly certificates of attendance with the Veterans' Administration and up to the time of his arrest had received and forged 18 veterans' checks amounting to almost \$2,000.

Two forgers who were arrested in New York City in October admitted forging and cashing some 60 checks. They had received the checks from a mail carrier who had removed the checks from mail he was delivering. To make it appear to be the work of check thieves, the carrier picked out checks intended for addresses at which mail boxes had been broken open or he himself broke the boxes on the way to work. Subsequently, the mail carrier also was arrested.

Forgers continued to steal and cash United States savings bonds. Agents completed investigation of 3,594 forged bonds representing \$483,261 and arrested 68 persons for bond forgery during the year. There had been 2,401 cases awaiting investigation at the beginning of the year, and 3,382 forged bonds subsequently were received for investigation.

The following table shows the number of criminal and noncriminal cases completed during the fiscal years 1956 and 1957.

Number of investigations of criminal and noncriminal activities, fiscal years 1956 and 1957

Cases closed	1956	1957	Increase, or decrease (—)	Percentage increase, or decrease (—)
Criminal cases:

Grand total.....	39,264	34,596	-4,668	-11.9

Secret Service agents arrested 123 persons for crimes other than counterfeiting or forgery, making a total of 3,272 offenders arrested. There were 2,915 convicted, representing 98.4 percent convictions in all cases prosecuted, some of which were pending from the previous year. Prison sentences during the year totaled 2,795 years and additional sentences of 3,191 years were suspended or probated. Fines in criminal cases totaled \$44,993.

Cases of all types received for investigation, including counterfeiting and forgery cases, aggregated 32,809 and 14,779 had been pending at the beginning of the year. Although 34,596 were closed during the year, as of June 30, 1957, there were 12,992 cases pending and 1,003 defendants awaiting prosecution.

The following table is a statistical summary of Secret Service arrests and dispositions for the fiscal years 1956 and 1957.

Number of arrests and cases disposed of, fiscal years 1956 and 1957

	1956	1957	Increase, or decrease (—)	Percentage increase, or decrease (—)

Public Debt Operations

Offerings and Allotments of Treasury Certificates of Indebtedness and Treasury Notes

EXHIBIT 1.—Treasury certificates of indebtedness

Two Treasury circulars containing representative certificate offerings during the fiscal year 1957 are reproduced in this exhibit. The first circular is a cash offering of the tax anticipation series and the second is an exchange offering of the regular series of certificates. Circulars pertaining to the other offerings are similar in form and therefore are not reproduced in this report. However, the essential details for each issue are summarized in the first table following the circulars and the final allotments of new certificates issued for cash or in exchange for maturing securities are shown in the second table.

DEPARTMENT CIRCULAR NO. 980. PUBLIC DEBT

TREASURY DEPARTMENT,
Washington, August 6, 1956.

I. OFFERING OF CERTIFICATES

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions from the people of the United States for tax anticipation certificates of indebtedness of the United States, designated $2\frac{3}{4}$ percent Treasury certificates of indebtedness of Series B-1957. The amount of the offering is \$3,000,000,000, or thereabouts. The books will be open only on August 6 for the receipt of subscriptions.

II. DESCRIPTION OF CERTIFICATES

1. The certificates will be dated August 15, 1956, and will bear interest from that date at the rate of $2\frac{3}{4}$ percent per annum, payable with the principal at maturity on March 22, 1957. They will not be subject to call for redemption prior to maturity.

2. The income derived from the certificates is subject to all taxes imposed under the Internal Revenue Code of 1954. The certificates are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The certificates will be acceptable to secure deposits of public moneys. They will be accepted at par plus accrued interest to maturity in payment of income and profits taxes due on March 15, 1957.

4. Bearer certificates will be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. The certificates will not be issued in registered form.

5. The certificates will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States certificates.

III. SUBSCRIPTION AND ALLOTMENT

1. Subscriptions will be received at the Federal Reserve Banks and branches and at the Office of the Treasurer of the United States, Washington. Commercial banks, which for this purpose are defined as banks accepting demand deposits, may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies. Others than commercial banks will not be permitted to enter subscriptions except for their own account. Subscriptions from commercial banks for their own account will be received without deposit, but will be restricted in each case to an amount not exceeding the combined capital, surplus, and undivided profits of the sub-

scribing bank. Subscriptions from all others must be accompanied by payment of 3 percent of the amount of certificates applied for, not subject to withdrawal until after allotment. Following allotment, any portion of the 3 percent payment in excess of 3 percent of the amount of certificates allotted may be released upon the request of the subscribers.

2. Commercial banks in submitting subscriptions will be required to certify that they have no beneficial interest in any of the subscriptions they enter for the account of their customers, and that their customers have no beneficial interest in the banks' subscriptions for their own account.

3. The Secretary of the Treasury reserves the right to reject or reduce any subscription, and to allot less than the amount of certificates applied for; and any action he may take in these respects shall be final. Allotment notices will be sent out promptly upon allotment.

IV. PAYMENT

1. Payment at par and accrued interest, if any, for certificates allotted hereunder must be made or completed on or before August 15, 1956, or on later allotment. In every case where payment is not so completed, the payment with application up to 3 percent of the amount of certificates allotted shall, upon declaration made by the Secretary of the Treasury in his discretion, be forfeited to the United States. Any qualified depository will be permitted to make payment by credit for not more than 80 percent of the amount of certificates allotted to it for itself and its customers (up to the amount for which it shall be qualified in excess of existing deposits) when so notified by the Federal Reserve Bank of its district.

V. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts, to issue allotment notices, to receive payment for certificates allotted, to make delivery of certificates on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive certificates.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

G. M. HUMPHREY,
Secretary of the Treasury.

DEPARTMENT CIRCULAR NO. 983. PUBLIC DEBT

TREASURY DEPARTMENT,
Washington, February 4, 1957.

I. OFFERING OF CERTIFICATES

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions from the people of the United States for certificates of indebtedness of the United States, designated 3½ percent Treasury certificates of indebtedness of Series A-1958, in exchange for 2½ percent Treasury certificates of indebtedness of Series A-1957, maturing February 15, 1957, 2½ percent Treasury notes of Series A-1957, maturing March 15, 1957, or 1½ percent Treasury notes of Series EA-1957, maturing April 1, 1957. Exchanges will be made par for par in the case of the certificates maturing February 15, and at par with an adjustment of interest as of February 15 in the case of the notes maturing March 15 and April 1. The amount of the offering under this circular will be limited to the amount of maturing certificates and notes tendered in exchange and accepted. The books will be open only on February 4 through February 5 for the receipt of subscriptions for this issue.

2. In addition to the offering under this circular, holders of the maturing certificates and holders of the notes maturing March 15 are also offered the privilege of exchanging all or any part of such securities for 3½ percent Treasury notes of Series A-1960, which offering is set forth in Department Circular No. 984, issued simultaneously with this circular.

II. DESCRIPTION OF CERTIFICATES

1. The certificates will be dated February 15, 1957, and will bear interest from that date at the rate of 3½ percent per annum, payable on a semiannual basis on August 15, 1957, and February 14, 1958. They will mature February 14, 1958, and will not be subject to call for redemption prior to maturity.
2. The income derived from the certificates is subject to all taxes imposed under the Internal Revenue Code of 1954. The certificates are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.
3. The certificates will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.
4. Bearer certificates with interest coupons attached will be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$1,000,000, \$100,000,000, and \$500,000,000. The certificates will not be issued in registered form.
5. The certificates will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States certificates.

III. SUBSCRIPTION AND ALLOTMENT

1. Subscriptions will be received at the Federal Reserve Banks and branches and at the Office of the Treasurer of the United States, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.
2. The Secretary of the Treasury reserves the right to reject or reduce any subscription, and to allot less than the amount of certificates applied for; and any action he may take in these respects shall be final. Allotment notices will be sent out promptly upon allotment.

IV. PAYMENT

1. Payment at par for certificates allotted hereunder must be made on or before February 15, 1957, or on later allotment, and may be made only in Treasury certificates of indebtedness of Series A-1957, maturing February 15, 1957, Treasury notes of Series A-1957, maturing March 15, 1957, or Treasury notes of Series EA-1957, maturing April 1, 1957, which will be accepted at par, and should accompany the subscription. The full amount of interest due on the maturing certificates surrendered will be paid following acceptance of the certificates. Coupons dated March 15, 1957, must be *attached* to the notes of Series A-1957 when surrendered, and accrued interest from September 15, 1956, to February 15, 1957 (\$12.15124 per \$1,000) will be paid to subscribers following acceptance of the notes. Coupons dated April 1, 1957, must be *attached* to the notes of Series EA-1957 when surrendered, and accrued interest from October 1, 1956, to February 15, 1957 (\$5.6456 per \$1,000) will be paid to subscribers following acceptance of the notes.

V. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts, to issue allotment notices, to receive payment for certificates allotted, to make delivery of certificates on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive certificates.
2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

G. M. HUMPHREY,
Secretary of the Treasury.

¹ See Department Circular No. 980, sections III and IV, in this exhibit, for provisions to them and their customers by credit in Treasury tax and loan accounts. Accrued interest from Feb. 15 to Mar. 28, 1957 (\$83,822.51 per \$1,000), for certificates allotted was paid by the subscribers.

² See Department Circular No. 982, section IV, in this exhibit, for provisions for payment of interest.

³ Commercial banks were permitted to subscribe for their own account for an amount not exceeding the combined capital, surplus, and undivided profits of the subscribing bank. Qualified depositaries were permitted to make payment for certificates allotted to them and their customers by credit in Treasury tax and loan accounts. Accrued interest from Nov. 15, 1956, to May 1, 1957 (\$7,496.55 per \$1,000), was paid to subscribers.

¹ Subscriptions for \$100,000 or less were allotted in full and subscriptions in excess of \$100,000 were allotted 20 percent but not less than \$100,000.

² Series D-1957 Treasury 3½ percent certificates were also offered in exchange for this maturity.

³ Series C-1957 Treasury 3¼ percent certificates were also offered in exchange for this maturity.

⁴ Series A-1960 Treasury 3½ percent notes were also offered in exchange for this maturity; see exhibit 2.

⁵ Subscriptions for \$100,000 or less were allotted in full and subscriptions in excess of \$100,000 were allotted 31 percent, but not less than \$100,000.

⁶ Series A-1962 Treasury 3½ percent notes were also offered in exchange for this maturity; see exhibit 2.

EXHIBIT 2.—Treasury notes

Two Treasury circulars, one containing a cash and the other an exchange note offering during the fiscal year 1957, are reproduced in this exhibit. Circulars pertaining to the other note offerings during 1957 are similar in form to the exchange offering circular and therefore are not reproduced in this report. However, the essential details for each issue are summarized in the first table following the circulars and the final allotments of the new notes issued for cash or in exchange for maturing securities are shown in the second table.

DEPARTMENT CIRCULAR NO. 986. PUBLIC DEBT

TREASURY DEPARTMENT,
Washington, March 18, 1957.

I. OFFERING OF NOTES

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at par and accrued interest, from the people of the United States for notes of the United States, designated 3½ percent Treasury notes of Series A-1960. The amount of the offering under this circular is \$750,000,000, or thereabouts. In addition to the amount offered for public subscription, up to \$100,000,000 of these notes may be allotted to Government investment accounts. The books will be open only on March 18 for the receipt of subscriptions for this issue.

II. DESCRIPTION OF NOTES

1. The notes now offered will be an addition to and will form a part of the 3½ percent Treasury notes of Series A-1960 issued pursuant to Department Circular No. 984, dated February 4, 1957, will be freely interchangeable therewith, are identical in all respects therewith, and are described in the following quotation from Department Circular No. 984:

"1. The notes will be dated February 15, 1957, and will bear interest from that date at the rate of 3½ percent per annum, payable on a semiannual basis on November 15, 1957, and thereafter on May 15 and November 15 in each year until the principal amount becomes payable. They will mature May 15, 1960, and will not be subject to call for redemption prior to maturity.

"2. The income derived from the notes is subject to all taxes imposed under the Internal Revenue Code of 1954. The notes are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State or any of the possessions of the United States, or by any local taxing authority.

"3. The notes will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

"4. Bearer notes with interest coupons attached will be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$1,000,000, \$100,000,000, and \$500,000,000. The notes will not be issued in registered form.

"5. The notes will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States notes."

III. SUBSCRIPTION AND ALLOTMENT

1. Subscriptions will be received at the Federal Reserve Banks and branches and at the Office of the Treasurer of the United States, Washington. Commercial banks, which for this purpose are defined as banks accepting demand deposits, may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies. Others than commercial banks will not be permitted to enter subscriptions except for their own account. Subscriptions from commercial banks for their own account will be received without deposit, but will be restricted in each case to an amount not exceeding the combined capital, surplus, and undivided profits of the subscribing bank. Subscriptions from all others must be accompanied by payment of 3 percent of the amount of notes applied for, not subject to withdrawal until after allotment. Following allotment, any portion of the 3 percent payment in excess of 3 percent of the amount of notes allotted may be released upon the request of the subscribers.

2. Commercial banks in submitting subscriptions will be required to certify that they have no beneficial interest in any of the subscriptions they enter for the account of their customers, and that their customers have no beneficial interest in the banks' subscriptions for their own account.

3. The Secretary of the Treasury reserves the right to reject or reduce any subscription, and to allot less than the amount of notes applied for; and any action he may take in these respects shall be final. Allotment notices will be sent out promptly upon payment.

IV. PAYMENT

1. Payment at par and accrued interest from February 15, 1957, to March 28, 1957 (\$3.96409 per \$1,000), for notes allotted hereunder must be made or completed on or before March 28, 1957, or on later allotment. In every case where payment is not so completed, the payment with application up to 3 percent of the amount of notes allotted shall, upon declaration made by the Secretary of the Treasury in his discretion, be forfeited to the United States. Any qualified depository will be permitted to make payment by credit for notes allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits when so notified by the Federal Reserve Bank of its district.

V. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts, to issue allotment notices, to receive payment for notes allotted, to make delivery of notes on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive notes.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

G. M. HUMPHREY,
Secretary of the Treasury.

DEPARTMENT CIRCULAR NO. 989. PUBLIC DEBT

TREASURY DEPARTMENT,
Washington, May 6, 1957.

I. OFFERING OF NOTES

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions from the people of the United States for notes of the United States, designated 3½ percent Treasury notes of Series A-1962, in exchange for 1½ percent Treasury notes of Series B-1957, maturing May 15, 1957. Exchanges will be made at par with an adjustment of interest as of May 1, 1957. The amount of the offering under this circular will be limited to the amount of maturing notes of this series tendered in exchange and accepted. The books will be open only on May 6 through May 8 for the receipt of subscriptions for this issue.

2. In addition to the offering under this circular, holders of the maturing notes are offered the privilege of exchanging all or any part of such notes for 3½ percent Treasury certificates of indebtedness of Series B-1958, which offering is set forth in Department Circular No. 988, issued simultaneously with this circular.

II. DESCRIPTION OF NOTES

1. The notes will be dated May 1, 1957, and will bear interest from that date at the rate of 3½ percent per annum, payable on a semiannual basis on August 15, 1957, and thereafter on February 15 and August 15 in each year until the principal amount becomes payable. They will mature February 15, 1962, and will not be subject to call for redemption prior to maturity.

2. The income derived from the notes is subject to all taxes imposed under the Internal Revenue Code of 1954. The notes are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The notes will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer notes with interest coupons attached will be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$1,000,000, \$100,000,000, and \$500,000,000. The notes will not be issued in registered form.

5. The notes will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States notes.

III. SUBSCRIPTION AND ALLOTMENT

1. Subscriptions will be received at the Federal Reserve Banks and branches and at the Office of the Treasurer of the United States, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject or reduce any subscription, and to allot less than the amount of notes applied for; and any action he may take in these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

IV. PAYMENT

1. Payment at par for notes allotted hereunder must be made on or before May 15, 1957, or on later allotment, and may be made only in Treasury notes of Series B-1957, maturing May 15, 1957, which will be accepted at par, and should accompany the subscription. Coupons dated May 15, 1957, must be attached to the notes when surrendered, and accrued interest from November 15, 1956, to May 1, 1957 (\$7.49655 per \$1,000), will be paid to subscribers following acceptance of the notes.

V. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts, to issue allotment notices, to receive payment for notes allotted, to make delivery of notes on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive notes.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

G. M. HUMPHREY,
Secretary of the Treasury.

Summary of information pertaining to Treasury notes issued during the fiscal year 1957

Treasury Bills

EXHIBIT 3.—Treasury bills

During the fiscal year 1957 there were 52 weekly issues of Treasury bills, two special issues of 91-day bills, and four issues of the tax anticipation series. Three press releases inviting tenders and three releases announcing the acceptance of tenders are reproduced in this exhibit. The press releases of October 8 and 11, 1956, are similar in form to the other press releases of bills issued for cash only and the releases of October 18 and 23, 1956, are representative of the weekly series of Treasury bills. The tax anticipation series is represented by the releases of December 10 and 13, 1956. The essential details regarding each issue of Treasury bills during the fiscal year 1957 are summarized in the table following the press releases.

PRESS RELEASE OF OCTOBER 8, 1956

The Treasury Department, by this public notice, invites tenders for \$1,600,000,000, or thereabouts, of 91-day Treasury bills, to be issued on a discount basis under competitive and noncompetitive bidding as hereinafter provided. The bills of this series will be dated October 17, 1956, and will mature January 16, 1957, when the face amount will be payable without interest. They will be issued in bearer form only, and in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$500,000, and \$1,000,000 (maturity value).

Tenders will be received at Federal Reserve Banks and branches up to the closing hour, two o'clock p. m., eastern daylight saving time, Wednesday, October 10, 1956. Tenders will not be received at the Treasury Department, Washington. Each tender must be for an even multiple of \$1,000, and in the case of competitive tenders the price offered must be expressed on the basis of 100, with not more than three decimals, e. g., 99.925. Fractions may not be used. It is urged that tenders be made on the printed forms and forwarded in the special envelopes which will be supplied by Federal Reserve Banks or branches on application therefor.

Others than banking institutions will not be permitted to submit tenders except for their own account. Tenders will be received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of Treasury bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Immediately after the closing hour, tenders will be opened at the Federal Reserve Banks and branches, following which public announcement will be made by the Treasury Department of the amount and price range of accepted bids. Those submitting tenders will be advised of the acceptance or rejection thereof. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders, in whole or in part, and his action in any such respect shall be final. Subject to these reservations, noncompetitive tenders for \$200,000 or less without stated price from any one bidder will be accepted in full at the average price (in three decimals) of accepted competitive bids. Payment of accepted tenders at the prices offered must be made or completed at the Federal Reserve Bank in cash or other immediately available funds on October 17, 1956, provided, however, any qualified depository will be permitted to make payment by credit in its Treasury tax and loan account for Treasury bills allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits when so notified by the Federal Reserve Bank of its district.

The income derived from Treasury bills, whether interest or gain from the sale or other disposition of the bills, does not have any exemption, as such, and loss from the sale or other disposition of Treasury bills does not have any special treatment, as such, under the Internal Revenue Code of 1954. The bills are subject to estate, inheritance, gift, or other excise taxes, whether Federal or

State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. For purposes of taxation the amount of discount at which Treasury bills are originally sold by the United States is considered to be interest. Under Sections 454 (b) and 1221 (5) of the Internal Revenue Code of 1954 the amount of discount at which bills issued hereunder are sold is not considered to accrue until such bills are sold, redeemed, or otherwise disposed of, and such bills are excluded from consideration as capital assets. Accordingly, the owner of Treasury bills (other than life insurance companies) issued hereunder need include in his income tax return only the difference between the price paid for such bills, whether on original issue or on subsequent purchase, and the amount actually received either upon sale or redemption at maturity during the taxable year for which the return is made, as ordinary gain or loss.

Treasury Department Circular No. 418, Revised, and this notice, prescribe the terms of the Treasury bills and govern the conditions of their issue. Copies of the circular may be obtained from any Federal Reserve Bank or branch.

PRESS RELEASE OF OCTOBER 11, 1956

The Treasury Department announced last evening that the tenders for \$1,600,000,000, or thereabouts, of 91-day Treasury bills to be dated October 17, 1956, and to mature January 16, 1957, which were offered on October 8, were opened at the Federal Reserve Banks on October 10.

The details of this issue are as follows:

Total applied for.....	\$4, 759, 044, 000
Total accepted (includes \$421,914,000 entered on a non-competitive basis and accepted in full at the average price shown below).....	1, 600, 768, 000

Total.....	4, 759, 044, 000	1, 600, 768, 000

PRESS RELEASE OF OCTOBER 18, 1956

The Treasury Department, by this public notice, invites tenders for \$1,600,-000,000, or thereabouts, of 91-day Treasury bills, for cash and in exchange for Treasury bills maturing October 25, 1956, in the amount of \$1,599,816,000, to be issued on a discount basis under competitive and noncompetitive bidding as hereinafter provided. The bills of this series will be dated October 25, 1956, and will mature January 24, 1957, when the face amount will be payable without interest. They will be issued in bearer form only, and in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$500,000, and \$1,000,000 (maturity value).

Tenders will be received at Federal Reserve Banks and branches up to the closing hour, two o'clock p. m., eastern daylight saving time, Monday, October 22, 1956. Tenders will not be received at the Treasury Department, Washington. Each tender must be for an even multiple of \$1,000, and in the case of competitive tenders the price offered must be expressed on the basis of 100, with not more than three decimals, e. g., 99.925. Fractions may not be used. It is urged that tenders be made on the printed forms and forwarded in the special envelopes which will be supplied by Federal Reserve Banks or branches on application therefor.

Others than banking institutions will not be permitted to submit tenders except for their own account. Tenders will be received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of Treasury bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Immediately after the closing hour, tenders will be opened at the Federal Reserve Banks and branches, following which public announcement will be made by the Treasury Department of the amount and price range of accepted bids. Those submitting tenders will be advised of the acceptance or rejection thereof. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, and his action in any such respect shall be final. Subject to these reservations, noncompetitive tenders for \$200,000 or less without stated price from any one bidder will be accepted in full at the average price (in three decimals) of accepted competitive bids. Settlement for accepted tenders in accordance with the bids must be made or completed at the Federal Reserve Bank on October 25, 1956, in cash or other immediately available funds or in a like face amount of Treasury bills maturing October 25, 1956. Cash and exchange tenders will receive equal treatment. Cash adjustments will be made for differences between the par value of maturing bills accepted in exchange and the issue price of the new bills.

The income derived from Treasury bills, whether interest or gain from the sale or other disposition of the bills, does not have any exemption, as such, and loss from the sale or other disposition of Treasury bills does not have any special treatment, as such, under the Internal Revenue Code of 1954. The bills are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. For purposes of taxation the amount of discount at which Treasury bills are originally sold by the United States is considered to be interest. Under Sections 454 (b) and 1221 (5) of the Internal Revenue Code of 1954 the amount of discount at which bills issued hereunder are sold is not considered to accrue until such bills are sold, redeemed, or otherwise disposed of, and such bills are excluded from consideration as capital assets. Accordingly, the owner of Treasury bills (other than life insurance companies) issued hereunder need include in his income tax return only the difference between the price paid for such bills, whether on original issue or on subsequent purchase, and the amount actually received either upon sale or redemption at maturity during the taxable year for which the return is made, as ordinary gain or loss.

Treasury Department Circular No. 418, Revised, and this notice, prescribe the terms of the Treasury bills and govern the conditions of their issue. Copies of the circular may be obtained from any Federal Reserve Bank or branch.

PRESS RELEASE OF OCTOBER 23, 1956

The Treasury Department announced last evening that the tenders for \$1,600,000,000, or thereabouts, of 91-day Treasury bills to be dated October 25, 1956, and to mature January 24, 1957, which were offered on October 18, were opened at the Federal Reserve Banks on October 22.

The details of this issue are as follows:

PRESS RELEASE OF DECEMBER 10, 1956

The Treasury Department, by this public notice, invites tenders for \$1,000,000,000, or thereabouts, of 95-day Treasury bills, to be issued on a discount basis under competitive and noncompetitive bidding as hereinafter provided. The bills of this series will be designated tax anticipation series, they will be dated December 17, 1956, and they will mature March 22, 1957. They will be accepted at face value in payment of income and profits taxes due on March 15, 1957, and to the extent they are not presented for this purpose the face amount of these bills will be payable without interest at maturity. Taxpayers desiring to apply these bills in payment of March 15, 1957, income and profits taxes have the privilege of surrendering them to any Federal Reserve Bank or branch or to the Office of the Treasurer of the United States, Washington, not more than fifteen days before March 15, 1957, and receiving receipts therefor showing the face amount of the bills so surrendered. These receipts may be submitted in lieu of the bills on or before March 15, 1957, to the District Director of Internal Revenue for the district in which such taxes are payable. The bills will be issued in bearer form only, and in denominations of \$1,000, \$5,000, \$10,000, \$100,000, \$500,000, and \$1,000,000 (maturity value).

Tenders will be received at Federal Reserve Banks and branches up to the closing hour, one-thirty o'clock p. m., eastern standard time, Wednesday, December 12, 1956. Tenders will not be received at the Treasury Department, Washington. Each tender must be for an even multiple of \$1,000, and in the case of competitive tenders the price offered must be expressed on the basis of 100, with not more than three decimals, e. g., 99.925. Fractions may not be used. It is urged that tenders be made on the printed forms and forwarded in the special envelopes which will be supplied by Federal Reserve Banks or branches on application therefor.

Others than banking institutions will not be permitted to submit tenders except for their own account. Tenders will be received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of Treasury bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Immediately after the closing hour, tenders will be opened at the Federal Reserve Banks and branches, following which public announcement will be made by the Treasury Department of the amount and price range of accepted bids. Those submitting tenders will be advised of the acceptance or rejection thereof. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders, in whole or in part, and his action in any such respect shall be final. Subject to these reservations, noncompetitive tenders for \$200,000 or less without stated price from any one bidder will be accepted in full at the average price (in three decimals) of accepted competitive bids. Payment of accepted tenders at the prices offered must be made or completed at the Federal Reserve Bank in cash or other immediately available funds on December 17, 1956, provided, however, any qualified depository will be permitted to make payment by credit in its Treasury tax and loan account for Treasury bills allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits when so notified by the Federal Reserve Bank of its district.

The income derived from Treasury bills, whether interest or gain from the sale or other disposition of the bills, does not have any exemption, as such, and loss from the sale or other disposition of Treasury bills does not have any special treatment, as such, under the Internal Revenue Code of 1954. The bills are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. For purposes of taxation the amount of discount at which Treasury bills are originally sold by the United States is considered to be interest. Under Sections 454 (b) and 1221 (5) of the Internal Revenue Code of 1954 the amount of discount at which bills issued hereunder are sold is not considered to accrue until such bills are sold, redeemed, or otherwise disposed of, and such bills are excluded from consideration as capital assets. Accordingly, the owner of Treasury bills (other than life insurance companies) issued hereunder need include in his income tax return only the difference between the price paid for such bills, whether on original issue or on subsequent purchase, and the amount actually received either upon sale or redemption at maturity during the taxable year for which the return is made, as ordinary gain or loss.

Treasury Department Circular No. 418, Revised, and this notice, prescribe the terms of the Treasury bills and govern the conditions of their issue. Copies of the circular may be obtained from any Federal Reserve Bank or branch.

PRESS RELEASE OF DECEMBER 13, 1956

The Treasury Department announced last evening that the tenders for \$1,000,000,000, or thereabouts, of tax anticipation series 95-day Treasury bills to be dated December 17, 1956, and to mature March 22, 1957, which were offered on December 10, were opened at the Federal Reserve Banks on December 12.

The details of this issue are as follows:

Total applied for	\$3, 780, 088, 000
Total accepted (includes \$351,874,000 entered on a non-competitive basis and accepted in full at the average price shown below)	1, 000, 086, 000
Range of accepted competitive bids (excepting one tender of \$300,000):	
High, equivalent rate of discount approximately 2.456% per annum	99. 352
Low, equivalent rate of discount approximately 2.641% per annum	99. 303
Average, equivalent rate of discount approximately 2.585% per annum	99. 318
(3 percent of the amount bid for at the low price was accepted.)

¹ The usual timing with respect to issues of Treasury bills is: Press release inviting tenders, 7 days before date of issue; closing date on which tenders are accepted, 3 days before date of issue; and press release announcing acceptance of tenders, 2 days before date of issue. Figures are final and differ in many instances from those shown in press releases announcing details of a particular issue.

² Noncompetitive tenders from any bidder for \$200,000 or less, without stated price, were accepted in full at the average price for accepted competitive bids, except that for the tax anticipation series dated May 27, the amount was \$300,000.

³ Free at which basis.

⁴ Bank discount basis.

⁵ Except \$125,000 at 99.485 and \$150,000 at 99.423.

⁶ Except \$75,000 at 99.457 and \$400,000 at 99.455.

⁷ Except \$250,000 at 99.475 and \$300,000 at 99.469.

⁸ Except \$400,000 at 99.444, \$50,000 at 99.431, and \$1,000,000 at 99.425.

⁹ Except \$100,000 at 99.510, \$75,000 at 99.450, \$200,000 at 99.403, \$200,000 at 99.400, \$100,000 at 99.388, \$150,000 at 99.383, \$300,000 at 99.380, and \$300,000 at 99.375.

¹⁰ Except \$100,000 at 99.360, \$100,000 at 99.343, \$1,100,000 at 99.342, \$110,000 at 99.340, \$200,000 at 99.323, and \$200,000 at 99.312.

¹¹ Except \$150,000 at 99.375 and \$200,000 at 99.318.

¹² Except \$500,000 at 99.390.

¹³ Except \$1,000,000 at 99.342.

¹⁴ Except \$190,000 at 99.323, \$200,000 at 99.304, and \$300,000 at 99.280.

¹⁵ Except \$110,000 at 99.326, \$150,000 at 99.287, \$200,000 at 99.280, \$200,000 at 99.270, \$150,000 at 99.267, \$200,000 at 99.265, and \$100,000 at 99.261.

¹⁶ Special issue for cash.

¹⁷ Except \$800,000 at 99.655 and \$300,000 at 99.407.

¹⁸ Except \$500,000 at 99.343 and \$25,000 at 99.290.

¹⁹ Except \$520,000 at 99.304, \$1,000 at 99.300, \$200,000 at 99.293, and \$100,000 at 99.291.

²⁰ Except \$400,000 at 99.305.

²¹ Except \$1,000,000 at 99.335, \$25,000 at 99.285, and \$800,000 at 99.280.

²² Except \$150,000 at 99.325.

²³ Except \$15,000 at 99.241.

²⁴ Except \$100,000 at 99.300, \$200,000 at 99.216, and \$200,000 at 99.215.

²⁵ Except \$100,000 at 99.214.

²⁶ Except \$550,000 at 99.241, \$150,000 at 99.235, \$10,000 at 99.225, \$300,000 at 99.220, \$100,000 at 99.213, and \$75,000 at 99.210.

²⁷ Except \$100,000 at 99.346 and \$200,000 at 99.211.

²⁸ Except \$1,000,000 at 99.216 and \$800,000 at 99.196.

²⁹ Except \$200,000 at 99.242, \$200,000 at 99.241, \$200,000 at 99.237, and \$180,000 at 99.230.

³⁰ Except \$300,000 at 99.231.

³¹ Except \$100,000 at 99.300 and \$200,000 at 99.241.

³² Except \$100,000 at 99.216, \$600,000 at 99.201, \$300,000 at 99.200, and \$200,000 at 99.166.

³³ Except \$200,000 at 99.191, \$25,000 at 99.180, \$750,000 at 99.177, \$100,000 at 99.174, and \$100,000 at 99.170.

³⁴ Except \$300,000 at 99.025.

³⁵ Except \$100,000 at 99.031, \$500,000 at 99.020, and \$800,000 at 99.008.

³⁷ Except \$200,000 at 99.229.

United States Savings Bonds

EXHIBIT 4.—Third amendment, January 4, 1957, to Department Circular No. 750, Revised, regulations governing payments by banks and other financial institutions in connection with the redemption of United States savings bonds

TREASURY DEPARTMENT,
Washington, January 4, 1957.

Section 321.5 of Treasury Department Circular No. 750, Revised, dated June 30, 1945, as amended (31 C. F. R. 321), is hereby further amended to read as follows:

Sec. 321.5. *Reimbursement of agents' costs.*—(a) Each paying agent shall be entitled to receive reimbursement for its service for all bonds paid hereunder and accounted for by it in each calendar quarter, according to the following scale:

15 cents each for the first 1,000 bonds
10 cents each for all over 1,000 bonds

Each Federal Reserve Bank is authorized to establish a definite and regular closing time for determining those paid bonds to be considered as accounted for in a calendar quarter. Such closing time may be based upon a time that the paid bonds are forwarded to, or received by, the Federal Reserve Bank and shall be uniformly applied throughout the district of such Bank. The scale of rates shall be applicable separately to the agent and to each of its branches utilized in making payments under this circular, if the bonds paid by each are separately scheduled and accounted for. The payment of such amount as the agent is entitled to receive will be made by the Treasury Department.

(b) Paying agents shall not make any charge whatever to owners of savings bonds in connection with payments hereunder.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

EXHIBIT 5.—Second amendment, March 7, 1957, to Department Circular No. 906, terminating the sale of Series J and Series K savings bonds

TREASURY DEPARTMENT,
Washington, March 7, 1957.

The sale of United States savings bonds, Series J and Series K, offered under Treasury Department Circular No. 906, dated April 29, 1952 (31 CFR 333), is hereby terminated effective at the close of business April 30, 1957.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

EXHIBIT 6.—Fourth revision, April 22, 1957, of Department Circular No. 653, increasing the interest rate and redemption values of Series E savings bonds

TREASURY DEPARTMENT,
Washington, April 22, 1957.

Department Circular No. 653, Third revision, dated April 29, 1952, as amended (31 CFR 316), is hereby revised to read as follows:

Sec. 316.1. *Offering of bonds.*—The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended (31 U. S. C. 757c), offers for sale to the people of the United States, United States savings bonds of Series E which hereinafter are generally referred to as bonds of Series E. These bonds will be substantially a continuation of the bonds of Series E heretofore available, except as otherwise indicated herein. This offering of bonds will continue until terminated by the Secretary of the Treasury.

Sec. 316.2. *Term.*—A bond of Series E will be dated as of the first day of the month in which payment of the issue price is received by an agent authorized to issue the bonds. This date is the issue date and the bond will mature and be payable at face value 8 years and 11 months from such issue date. The issue date is the basis for determining the redemption periods or the maturity date of the bond, and should not be confused with the date appearing in the issuing agent's stamp, which indicates the actual date the bond is inscribed. The bonds may not be

called for redemption by the Secretary of the Treasury prior to maturity, but any bond may be redeemed prior to maturity, at any time after two months from the issue date, at the owner's option, at fixed redemption values.

Sec. 316.3. *Interest.*—Bonds of Series E will be issued on a discount basis at 75 percent of their maturity value. No interest as such will be paid on the bonds, but they will increase in redemption value at the end of each half-year period from the issue date, as shown in table A at the end of this circular. The investment yield will be approximately 3.25 percent per annum compounded semiannually, if the bonds are held to maturity, but the yield will be less if the owner exercises his option to redeem a bond prior to maturity.

Sec. 316.4. *Applicability to bonds bearing issue dates of February 1 through April 1, 1957, as well as subsequent issue dates.*—The term of maturity and the yield provided for in sections 316.2 and 316.3 shall apply to all bonds of Series E bearing issue dates of February 1 through April 1, 1957, as well as to those bearing subsequent issue dates.

Sec. 316.5. *Bonds purchased before new stock is available.*—Until bonds have been printed and supplied to issuing agents bonds of Series E in the form on sale prior to February 1, 1957, will be issued for purchases made under this circular. **BONDS OF SERIES E PURCHASED IN THE INTERVAL UNTIL THE NEW STOCKS ARE AVAILABLE WILL CARRY THE NEW INTEREST RATE AND REDEMPTION VALUES AND ALL OTHER PRIVILEGES AS FULLY AS IF EXPRESSLY SET FORTH IN THE TEXT OF THE BONDS THEMSELVES.** The owners, if they desire to do so, may exchange such bonds at any Federal Reserve Bank or branch or at the Treasury Department, Washington 25, D. C., for bonds in the new form (with the same registration and issue dates), when the latter become available but they need not do so because all paying agents will redeem ALL bonds of Series E bearing issue dates on and after February 1, 1957, in accordance with the schedule of redemption values set forth in table A at the end of this circular.

Sec. 316.6. *Description.*—Bonds of Series E will be issued only in registered form. See section 316.7 for information concerning registration. They will be issued in denominations of \$25, \$50, \$100, \$200, \$500, \$1,000, and \$10,000; and \$100,000 which is provided for trustees of employees' savings plans. Each bond will bear the facsimile signature of the Secretary of the Treasury, and will bear an imprint of the Seal of the Treasury Department. At the time of issue, the issuing agent will inscribe on the face of each bond the name and address of the owner and the name of the coowner or beneficiary, if any; will enter the issue date of the bond; and will imprint the agent's dating stamp (to show the date the bond is actually inscribed). A bond of Series E shall be valid only if an authorized issuing agent receives payment therefor, duly inscribes, dates, and stamps the bond, and delivers it to the purchaser or his agent.

Sec. 316.7. *Registration.*—(a) *General.*—Generally, only residents of the United States, its Territories, and possessions, the Commonwealth of Puerto Rico, the Canal Zone and citizens of the United States temporarily residing abroad are eligible to invest in bonds of Series E. The bonds may be registered in the names of natural persons in their own right in the three conventional forms of registration, single ownership, coownership and beneficiary forms, heretofore available. The bonds may also be registered in the names and titles of the legal representatives of natural persons (guardians, custodians, conservators, etc.) and of the trustees of the limited classes of trusts described in paragraphs (b) and (c). Full information regarding eligibility to invest in savings bonds and authorized forms of registration and rights thereunder will be found in the regulations currently in force governing United States savings bonds.¹

(b) *Trustees of personal trust estates.*—Bonds of Series E may be registered in the name and title of the trustee or trustees of a personal trust estate. The term "personal trust estate" as used herein is defined to mean, and is limited to, trust estates established by individuals, that is, natural persons in their own right, for the benefit of themselves or other such individuals, and common trusts comprised in whole or in part of such trust estates.

(c) *Trustees of employees' savings plans.*—

1. *Definition of plan and conditions of eligibility.*—Bonds of Series E may be registered in the name and title of the trustee or trustees of an employees' savings plan or any similar trust for the accumulation of employees' savings established by the employer for the exclusive and irrevocable benefit of his employees

¹ Department Circular No. 530

or their beneficiaries which affords employees the means of making regular savings from their wages through payroll deductions, provides for employer contributions to be added to such savings, and provides in effect that:

(i) The entire assets thereof must be credited to the individual accounts of participating employees and assets credited to the account of an employee may be distributed only to him or his beneficiary, except as otherwise provided herein.

(ii) Bonds of Series E may be purchased only with assets credited to the accounts of participating employees and only if the amount taken from any account at any time for that purpose is equal to the purchase price of a bond or bonds in an authorized denomination or denominations, and shares therein are credited to the accounts of the individuals from which the purchase price thereof was derived, in amounts corresponding with their shares. For example, if \$37.50 credited to the account of John Jones is commingled with funds credited to the accounts of other employees to make a total of \$7,500, with which a bond of Series E in the denomination of \$10,000 (maturity value) is purchased in June 1957 and registered in the name and title of the trustee or trustees, the plan must provide, in effect, that John Jones' account shall be credited to show that he is the owner of a bond of Series E in the denomination of \$50 (maturity value) bearing issue date of June 1, 1957.

(iii) Each participating employee shall have an irrevocable right at any time to demand and receive from the trustee or trustees all assets credited to his account or the value thereof, if he so prefers, without regard to any condition other than the loss or suspension of the privilege of participating further in the plan, except that a plan will not be deemed to be inconsistent herewith, if it limits or modifies the exercise of any such right by providing that the employer's contribution does not vest absolutely until the employee shall have made contributions under the plan in each of not more than sixty calendar months succeeding the month for which the employer's contribution is made.

(iv) Upon the death of an employee, his beneficiary shall have the absolute and unconditional right to demand and receive from the trustee or trustees all the assets credited to the account of the employee, or the value thereof, if he so prefers.

(v) When settlement is made with an employee or his beneficiary with respect to any bond of Series E registered in the name and title of the trustee or trustees in which the employee has a share (see (ii) hereof), the bond must be submitted for redemption or reissue to the extent of such share; if an employee, or his beneficiary, is to receive distribution in kind, bonds bearing the same issue dates as those credited to the employee's account will be reissued in the name of the distributee to the extent to which he is entitled, in authorized denominations, in any authorized form of registration, upon the request and certification of the trustee or trustees in accordance with the provisions of the regulations governing United States savings bonds.

2. *Definitions of terms used in this section and related provisions.*—(i) The term "savings plan" includes any regulations issued under the plan with regard to bonds of Series E; a copy of the plan and any such regulations, together with a copy of the trust agreement certified by a trustee to be true copies, must be submitted to the Federal Reserve Bank of the district in order to establish the eligibility of the trustee or trustees to purchase such bonds under this section.

(ii) The term "assets" means all funds, including the employees' contributions and the employer's contributions and assets purchased therewith as well as accretions thereto, such as dividends on stock, the increment in value on bonds and all other income; but, notwithstanding any other provision of this section, the right to demand and receive "all assets" credited to the account of an employee shall not be construed to require the distribution of assets in kind when it would not be possible or practicable to make such distribution; for example, bonds of Series E may not be reissued in unauthorized denominations, and fractional shares of stock are not readily distributable in kind.

(iii) The term "beneficiary" means the person or persons, if any, designated by the employee in accordance with the terms of the plan to receive the benefits of the trust upon his death or the estate of the employee, and the term "distributee" means the employee or his beneficiary.

Sec. 316.8. *Limitation on holdings.*—The limits on the amount of bonds of Series E originally issued during any one calendar year that may be held by any one person at any one time (which will be computed in accordance with the regulations currently in force governing United States savings bonds) are:

(a) *General limitation.*—\$10,000 (maturity value) for the calendar year 1957² and each calendar year thereafter.

(b) *Special limitation applicable to the employees' savings plans described in section 316.7 (c).*—\$2,000 (maturity value) multiplied by the highest number of participants in an employees' savings plan at any time during the year in which the bonds are issued.

Sec. 316.9. *Nontransferability.*—Bonds of Series E may not be used as collateral for a loan or as security for the performance of an obligation, or transferred inter vivos by voluntary sale or gift, discounted or disposed of in any manner other than as provided in the regulations governing United States savings bonds. Except as provided in said regulations, the Treasury Department will recognize only the inscribed owner, during his lifetime, and thereafter his estate or heirs.

Sec. 316.10. *Issue prices of bonds.*—The issue prices of the various denominations of bonds of Series E follow:

Denomination (maturity value).....	\$25.00	\$50.00	\$100.00	\$200.00	\$500.00	\$1,000.00	\$10,000.00 ¹	\$100,000
Issue (purchase) price.....	18.75	37.50	75.00	150.00	375.00	750.00	7,500.00	75,000

¹ The \$100,000 denomination is available for purchase only by trustees of employees' savings plans described in section 316.7 (c).

Sec. 316.11. *Purchase of bonds.*—Bonds of Series E may be purchased, while this offer is in effect, as follows:

(a) *Over-the-counter for cash.*—(1) For individuals (natural persons) only (i) at such incorporated banks, trust companies, and other agencies as have been duly qualified as issuing agents, and (ii) at selected United States post offices; and (2) for individuals (natural persons) or trustees of employees' savings plans and trustees of personal trust estates at Federal Reserve Banks and branches and at the Treasury Department, Washington 25, D. C.

(b) *On mail order.*—By mail upon application to the Treasurer of the United States, Washington 25, D. C., or to any Federal Reserve Bank or branch, accompanied by a remittance to cover the issue price. Any form of exchange, including personal checks, will be accepted, subject to collection. Checks, or other forms of exchange, should be drawn to the order of the Federal Reserve Bank or Treasurer of the United States, as the case may be. Checks payable by endorsement are not acceptable. Any depository qualified pursuant to the provisions of Treasury Department Circular No. 92, Revised (31 CFR 203) will be permitted to make payment by credit for bonds applied for on behalf of its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal Reserve Bank of its district.

(c) *Savings stamps.*—Savings stamps, in authorized denominations may be purchased at any post office where bonds of Series E are on sale and at such other agencies as may be designated from time to time. These stamps may be used to accumulate credits for the purchase of bonds of Series E. Albums, for affixing the stamps, will be available without charge, and such albums will be receivable, in the amount of the affixed stamps, on the purchase price of the bonds.

Sec. 316.12. *Delivery of bonds.*—Issuing agents are authorized to deliver bonds of Series E by mail at the risk and expense of the United States, at the address given by the purchaser, but only within the United States, its Territories and possessions, and the Canal Zone.³ No mail deliveries elsewhere will be made. If purchased by citizens of the United States temporarily residing abroad, the bonds will be delivered at such address in the United States as the purchaser directs.

Sec. 316.13. *Retention of bonds of Series E at further interest after maturity.*—

(a) *Series E bonds bearing issue dates of May 1, 1941, through January 1, 1957.*—Owners of bonds of Series E bearing the issue dates specified in paragraphs (1)–(3) have the option of retaining their matured bonds for a 10-year period after maturity (hereinafter referred to as the “extension period”) and of earning interest upon the maturity values thereof as follows:

(1) *Series E bonds bearing issue dates of May 1, 1941, through April 1, 1942.*—Such bonds earn interest after maturity for each half-year period at the

² Effective May 1. Accordingly, investors who purchase \$20,000 (maturity value) of bonds of Series E-1957 bearing issue dates of January 1 through April 1 will not be entitled to purchase additional bonds of that series during 1957. Investors who have purchased less than \$10,000 (maturity value) of bonds of Series E prior to May 1 will be entitled only to purchase enough to bring their total for 1957 to \$10,000 (maturity value).

³ During any war emergency the Treasury may suspend deliveries to be made at its risk and expense from or to the continental United States, its Territories, and possessions, and the Canal Zone, or between any of such places.

rate of $2\frac{1}{2}$ percent per annum simple interest, if redeemed before the first $7\frac{1}{2}$ years of the extension period, and at a higher rate thereafter so that the aggregate return for the extension period will be approximately 2.90 percent per annum compounded semiannually, in accordance with the schedule of redemption values in table D at the end of this circular.

(2) *Series E bonds bearing issue dates of May 1, 1942, through April 1, 1952.*—Such bonds will earn interest after maturity at the rate of approximately 3 percent per annum compounded semiannually for each half-year period of the extension period and are redeemable in accordance with the schedule of redemption values in table C at the end of this circular.

(3) *Series E bonds bearing issue dates of May 1, 1952, through January 1, 1957.*—Such bonds will earn interest after maturity at the rate of approximately 3 percent per annum compounded semiannually for each half-year period of the extension period and will be redeemable in accordance with the schedule of redemption values in table B at the end of this circular.

Interest under the above provisions accrues at the end of the first half-year period following maturity and at the end of each successive half-year period thereafter. If the bonds are redeemed before the end of the first half-year period following maturity, the owner is entitled to payment only at the face value thereof.

The option provided in this section is as binding on the United States as if expressly set forth in the text of the bonds. No action is required of owners desiring to take advantage thereof. Merely by continuing to hold their bonds after maturity they will earn further interest in accordance with the schedule of redemption values set forth in the pertinent tables referred to above. The term "owners" as used in this section includes registered owners, coowners, surviving beneficiaries, next of kin, and legatees of deceased owners, and persons who have acquired bonds pursuant to judicial proceedings against the owners, except that judgment creditors, trustees in bankruptcy, and receivers of insolvents' estates will have the right only to payment in accordance with the regulations governing United States savings bonds.

(b) *Series E bonds bearing issue dates after January 1, 1957.*—The terms of a retention privilege, if any, for owners of bonds of Series E bearing issue dates after January 1, 1957, will not be determined until later.⁴

Sec. 316.14. *Taxation.*—(a) *General.*—For the purpose of determining taxes and tax exemptions, the increment in value represented by the difference between the price paid for bonds of Series E (which are issued on a discount basis), and the redemption value received therefor shall be considered as interest. Such interest is subject to all taxes imposed under the Internal Revenue Code of 1954. The bonds are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

(b) *Federal income tax as applied to matured bonds of Series E.*—A taxpayer who has been reporting the increase in redemption value of his Series E bonds, for Federal income tax purposes, each year as it accrues, must continue to do so if he retains the bonds under section 316.13, unless in accordance with income tax regulations the taxpayer obtains permission from the Commissioner of Internal Revenue to change to a different method of reporting income from such obligations. A taxpayer who has not been reporting the increase in redemption value of such bonds currently for tax purposes may in any year prior to final maturity, and subject to the provisions of Section 454 of the Internal Revenue Code of 1954 and of the regulations prescribed thereunder, elect for such year and subsequent years to report such income annually. Holders of bonds of Series E who have not reported the increase in redemption value currently are required to include such amount in gross income for the taxable year of actual redemption or for the taxable year of final maturity, whichever is earlier. If further information concerning Federal taxes is desired, inquiry should be addressed to the District Director of Internal Revenue of the taxpayer's district or to the Internal Revenue Service, Washington 25, D. C.

Sec. 316.15. *Lost, stolen, or destroyed bonds.*—If a bond of Series E is lost, stolen, or destroyed, a substitute may be issued or payment may be obtained

⁴ However, under the previous revision (Third revision, dated April 29, 1952) of this circular owners of Series E bonds bearing issue dates of February 1 through April 1, 1957, have the same option as owners of the bonds described in section 316.13 (a) (3) and the redemption values set forth in table B under the heading "Extended maturity period" apply to such bonds. Since their original maturity is shortened to 8 years and 11 months under section 316.4 of this revision, they will reach extended maturity in 18 years and 11 months after issue date.

upon identification of the bond and proof of its loss, theft, or destruction. The owner should keep a description of his bonds by series, denomination, serial number, and name of coowner or beneficiary, if any, apart from the bonds, and in case of loss, theft, or destruction should immediately notify the Bureau of the Public Debt, Division of Loans and Currency Branch, 536 South Clark Street, Chicago 5, Illinois, briefly stating the facts and describing the bonds. Full instructions for obtaining substitute bonds or payment will then be given.

Sec. 316.16. *Payment or redemption (in general).*—A bond of Series E may be redeemed at the option of the owner at any time after two months from the issue date at the appropriate redemption value as shown in tables A, B, C, and D at the end of this circular, which apply to bonds bearing various issue dates back to May 1, 1941. The redemption values of bonds in the denomination of \$100,000⁵ (which was authorized as of January 1, 1954) are not shown in those tables. However, the redemption values of bonds in that denomination will be equal to the total redemption values of ten \$10,000 bonds bearing the same issue dates; accordingly, depending upon the issue date of bonds in the denomination of \$100,000, refer to table A or table B. A bond of Series E in a denomination higher than \$25 (maturity value) may be redeemed in part but only in the amount of an authorized denomination or multiple thereof. Payment of a bond of Series E will be made upon presentation and surrender of the bond by the owner to authorized paying agencies as follows:

(a) *Federal Reserve Banks and branches and Treasurer of the United States.*—Owners of bonds of Series E may obtain payment upon presentation of the bonds to a Federal Reserve Bank or branch or to the Treasurer of the United States, Washington 25, D. C., with the requests for payment on the bonds duly executed and certified in accordance with the provisions of the regulations governing savings bonds.

(b) *Incorporated banks, trust companies, and other financial institutions.*—An individual (natural person) whose name is inscribed on the face of a bond of Series E either as owner or coowner in his own right may also present such bond (unless marked "DUPLICATE") to any incorporated bank or trust company or other financial institution which is qualified as a paying agent under the provisions of Department Circular No. 750 or any revision of or amendment thereto (31 CFR 321). If such bond is in order for payment by the paying agent, the owner or coowner, upon establishing his identity to the satisfaction of the paying agent and upon signing the request for payment and adding his home or business address, may receive immediate payment of the current redemption value.

Sec. 316.17. *Payment or redemption in the case of disability or death.*—In case of the disability of the registered owner, or the death of the registered owner not survived by a coowner or a designated beneficiary, instructions should be obtained from a Federal Reserve Bank or branch, or the Bureau of the Public Debt, Division of Loans and Currency Branch, 536 South Clark Street, Chicago 5, Illinois, before the request for payment is executed.

Sec. 316.18. *General provisions.*—(a) *Regulations.*—All bonds of Series E issued pursuant to this circular shall be subject to the regulations prescribed from time to time by the Secretary of the Treasury to govern United States savings bonds. Such regulations may require, among other things, reasonable notice in case of presentation of bonds of Series E for redemption prior to maturity. The present regulations are set forth in Treasury Department Circular No. 530, current revision, copies of which may be obtained on application to the Treasury Department or to any Federal Reserve Bank or branch.

(b) *Reservation as to issue of bonds.*—The Secretary of the Treasury reserves the right to reject any application for bonds of Series E, in whole or in part, and to refuse to issue or permit to be issued hereunder any such bonds in any case or any class or classes of cases if he deems such action to be in the public interest, and his action in any such respect shall be final.

⁵ The \$100,000 denomination is available for purchase only by trustees of employees' savings plans described in section 316.7 (c).

(c) *Previous circulars—Preservation of existing rights.*—The provisions of previous Treasury Department circulars not in conformity herewith are hereby modified and amended accordingly: *Provided*, however, that nothing contained in this circular shall limit or be construed to limit or restrict any existing rights which owners of bonds of Series E have acquired under the circulars previously in force.

(d) *Fiscal agents.*—Federal Reserve Banks and branches, as fiscal agents of the United States, are authorized to perform such services as may be requested of them by the Secretary of the Treasury in connection with the issue, delivery, redemption, and payment of bonds of Series E.

(e) *Reservation as to terms of circular.*—The Secretary of the Treasury may at any time or from time to time supplement or amend the terms of this circular, or of any amendment or supplements thereto.

G. M. HUMPHREY,
Secretary of the Treasury.

TABLE A.—UNITED STATES SAVINGS BONDS—SERIES E

TABLE OF REDEMPTION VALUES AND INVESTMENT YIELDS FOR BONDS BEARING ISSUE DATES BEGINNING
FEBRUARY 1, 1957¹

Table showing: (1) How bonds of Series E bearing issue dates beginning February 1, 1957, by denominations, increase in redemption value during successive half-year periods following issue; (2) the approximate investment yield on the purchase price from issue date to the beginning of each half-year period; and (3) the approximate investment yield on the current redemption value from the beginning of each half-year period to maturity. Yields are expressed in terms of rate percent per annum, compounded semiannually.

Maturity value— Issue price—	\$25.00 18.75	\$50.00 37.50	\$100.00 75.00	\$200.00 150.00	\$500.00 375.00	\$1,000.00 750.00	\$10,000.00 7,500.00	Approximate investment yield	
Period after issue date	(1) Redemption values during each half-year period ² (Values increase on first day of period shown)							(2) On purchase price from issue date to beginning of each half-year period	(3) On current redemption value from beginning of each half-year period ² to maturity

EXHIBIT 7.—Revision, April 22, 1957, of Department Circular No. 905, increasing the interest rate and redemption values of Series H savings bonds

TREASURY DEPARTMENT,
Washington, April 22, 1957.

Department Circular No. 905, dated May 21, 1952, as amended (31 CFR 332), is hereby revised to read as follows:

Sec. 332.1. *Offering of bonds.*—The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended (31 U. S. C. 757c), offers for sale to the people of the United States, United States savings bonds of Series H (hereinafter referred to as bonds of Series H). These bonds will be substantially a continuation of the bonds of Series H heretofore available, except as otherwise indicated herein. This offering of bonds will continue until terminated by the Secretary of the Treasury.

Sec. 332.2. *Description.*—Bonds of Series H will be issued only in registered form. See section 332.8 for information concerning registration. They will be issued at par in denominations of \$500, \$1,000, \$5,000, and \$10,000. Each bond will bear the facsimile signature of the Secretary of the Treasury, and will bear an imprint of the Seal of the Treasury Department. At the time of issue, the issuing agent will inscribe on the face of each bond the name and address of the owner and the name of the coowner or beneficiary, if any; will enter the issue date of the bond; and will imprint the agent's dating stamp (to show the date the bond is actually inscribed). A bond of Series H shall be valid only if an authorized issuing agent receives payment therefor, duly inscribes, dates, and stamps the bond, and delivers it to the purchaser or his agent.

Sec. 332.3. *Term.*—A bond of Series H will be dated as of the first day of the month in which payment of the issue price is received by an agent authorized to issue the bonds. This date is the issue date and the bond will mature 10 years from such issue date. The issue date should not be confused with the date appearing in the issuing agent's stamp, which indicates the date the bond is actually inscribed. The bonds may not be called for redemption by the Secretary of the Treasury prior to maturity, but any bond of Series H may be redeemed at PAR prior to maturity, after 6 months from the issue date, at the owner's option, but only upon one calendar month's notice as provided in section 332.14.

Sec. 332.4. *Interest.*—Bonds of Series H will be issued at par, and will bear interest from the issue date payable semiannually by check drawn to the order of the registered owner or coowners, beginning six months from issue date. Interest payments will be based on a graduated scale of amounts (as shown in table A at the end of this circular) which have been fixed to afford an investment yield of approximately 3.25 percent per annum compounded semiannually, if the bonds are held to maturity; if the owner exercises his option to redeem a bond prior to maturity, the yield will be less. Interest will cease at maturity, or in case of redemption before maturity, at the end of the interest period next preceding the date of redemption, except that, if the date of redemption falls on an interest payment date, interest will cease on that date.

Sec. 332.5. *Applicability to bonds bearing issue dates of February 1 through April 1, 1957, as well as subsequent issue dates.*—The term of maturity and the yield provided for in sections 332.3 and 332.4 shall apply to all bonds of Series H bearing issue dates of February 1 through April 1, 1957 (as well as to those bearing subsequent issue dates). Final interest on such bonds will not be payable until held 10 years from the issue date, instead of the end of 9 years and 8 months.¹

Sec. 332.6. *Bonds purchased before new stock is available.*—Until bonds have been printed and are ready for issue bonds of Series H in the form on sale prior to February 1, 1957, will be issued for purchases made under this circular. BONDS OF SERIES H PURCHASED IN THE INTERVAL UNTIL THE NEW STOCKS ARE AVAILABLE WILL CARRY THE NEW INTEREST RATE AND THE TERM OF MATURITY PROVIDED FOR IN SECTION 332.3 AND ALL OTHER PRIVILEGES AS FULLY AS IF EXPRESSLY SET

¹ Table B at the end of this circular shows the schedule of checks, the interim investment yields and the yield to maturity of bonds of Series H bearing issue dates beginning June 1, 1952 (when they were first offered for sale), through January 1, 1957.

FORTH IN THE TEXT OF THE BONDS THEMSELVES. The owners, if they desire to do so, may exchange such bonds at any Federal Reserve Bank or branch or at the Treasury Department, Washington 25, D. C., for bonds in the new form (with the same registration and issue dates), when the latter become available; but they need not do so because the Treasury Department will, as a matter of course, issue interest checks for ALL bonds of Series H bearing issue dates on and after February 1, 1957, in the appropriate amounts as set forth in table A at the end of this circular.

Sec. 332.7. *Taxation.*—The income derived from bonds of Series H is subject to all taxes imposed under the Internal Revenue Code of 1954. The bonds are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

Sec. 332.8. *Registration.*—Generally, only residents of the United States, its Territories and possessions, the Commonwealth of Puerto Rico, the Canal Zone, and citizens of the United States temporarily residing abroad are eligible to invest in bonds of Series H. The bonds may be registered in the names of natural persons in their own right in the three conventional forms of registration, single ownership, coownership, and beneficiary forms, heretofore available. The bonds may also be registered in the names and titles of the legal representatives of natural persons (guardians, custodians, conservators, etc.) and of trustees of personal trust estates. The term "personal trust estates" as used herein is defined to mean, and is limited to, trust estates established by individuals, that is, natural persons in their own right, for the benefit of themselves or other such individuals, and common trusts comprised in whole or in part of such trust estates. Full information regarding eligibility to invest in savings bonds and authorized forms of registration and rights thereunder will be found in the regulations currently in force governing United States savings bonds.²

Sec. 332.9. *Limitation on holdings.*—The amount of bonds of Series H originally issued during any one calendar year that may be held by any one person at any one time shall not exceed \$10,000 (maturity value) for the calendar year 1957,³ and each calendar year thereafter, which will be computed in accordance with the regulations currently in force governing United States savings bonds.

Sec. 332.10. *Nontransferability.*—Bonds of Series H may not be used as collateral for a loan or as security for the performance of an obligation, or transferred inter vivos by voluntary sale or gift, discounted or disposed of in any manner other than as provided in the regulations governing United States savings bonds. Except as provided in said regulations, the Treasury Department will recognize only the inscribed owner, during his lifetime, and thereafter his estate or heirs.

Sec. 332.11. *Purchase of bonds.*—(a) *Agencies.*—Bonds of Series H may be purchased only at Federal Reserve Banks and branches, and at the Treasury Department, Washington 25, D. C. Customers of commercial banks and trust companies may be able to arrange for the purchase of such bonds through such institutions, but only the Federal Reserve Banks and branches and the Treasury Department are authorized to act as official agencies, and the date of receipt of application and payment at an official agency will govern the dating of the bonds issued.

(b) *Issue prices.*—The issue prices of bonds of Series H of the various denominations will be the par amount thereof as follows: \$500, \$1,000, \$5,000, and \$10,000.

(c) *Application.*—In applying for bonds under this circular, care should be taken to furnish: (1) instructions for registration of the bonds to be issued, which must be in one of the authorized forms (see Sec. 332.8); (2) the post office address of the owner; (3) the address for delivery of the bonds; and (4) the address for mailing interest checks. The application should be forwarded to a Federal Reserve Bank or branch, or to the Treasurer of the United States, Washington 25,

² Department Circular No. 530.

³ Effective May 1. Accordingly, investors who purchase \$20,000 (maturity value) of bonds of Series H-1957 bearing issue dates of January 1 through April 1 will not be entitled to purchase additional bonds of that series during 1957. Investors who have purchased less than \$10,000 (maturity value) of bonds of Series H prior to May 1 will be entitled only to purchase enough to bring their total for 1957 to \$10,000 (maturity value).

D. C., accompanied by a remittance to cover the purchase price as shown in paragraph (b) hereof. Any form of exchange, including personal checks, will be accepted, subject to collection. Checks or other forms of exchange should be drawn to the order of the Federal Reserve Bank or the Treasurer of the United States, as the case may be. Checks payable by endorsement are not acceptable. Any depository qualified pursuant to the provisions of Treasury Department Circular No. 92, Revised (31 CFR 203) will be permitted to make payment by credit for bonds applied for on behalf of its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal Reserve Bank of its district.

Sec. 332.12. *Delivery of bonds.*—Authorized issuing agencies will deliver bonds of Series H either in person, or by mail at the risk and expense of the United States, at the address given by the purchaser, but only within the United States, its Territories and possessions and the Canal Zone.⁴ No mail deliveries elsewhere will be made. If purchased by citizens of the United States temporarily residing abroad, the bonds will be delivered at such address in the United States as the purchaser directs.

Sec. 332.13. *Lost, stolen, or destroyed bonds.*—If a bond of Series H is lost, stolen, or destroyed, a substitute may be issued or payment may be obtained upon identification of the bond and proof of its loss, theft, or destruction. The owner should keep a description of his bonds by series, denomination, serial number and name of coowner or beneficiary, if any, apart from the bonds, and in case of loss, theft, or destruction should immediately notify the Bureau of the Public Debt, Division of Loans and Currency Branch, 536 South Clark Street, Chicago 5, Illinois, briefly stating the facts and describing the bonds. Full instructions for obtaining substitute bonds or payment will then be given.

Sec. 332.14. *Payment or redemption.*—(a) *General.*—A bond of Series H will be redeemed AT PAR, in whole or in part (in the amount of an authorized denomination or multiple thereof), at the option of the owner, at any time after 6 months from the issue date, but only on the first day of a calendar month and upon one calendar month's notice in writing of desire to redeem by the owner. The request for payment of the bond must be executed and certified in accordance with the provisions of the applicable regulations. The presentation of the bond (with the request for payment duly executed) will be accepted as notice. Payment will be made when due following presentation of the bond to (1) a Federal Reserve Bank or branch, (2) the Bureau of the Public Debt, Division of Loans and Currency Branch, 536 South Clark Street, Chicago 5, Illinois, or (3) the Treasurer of the United States, Washington 25, D. C. Formal notice to be effective, must be timely received by one of the above agencies and the bond must be presented to the same agency not less than 20 days before the redemption date fixed by the notice.

(b) *Disability or death.*—In case of the disability of the registered owner, or the death of the registered owner not survived by a coowner or a designated beneficiary, instructions should be obtained from a Federal Reserve Bank or branch, or the Bureau of the Public Debt, Division of Loans and Currency Branch, 536 South Clark Street, Chicago 5, Illinois, before the request for payment is executed.

Sec. 332.15. *General provisions.*—(a) *Regulations.*—All bonds of Series H issued pursuant to this circular shall be subject to the regulations prescribed from time to time by the Secretary of the Treasury to govern United States savings bonds. The present regulations are set forth in Treasury Department Circular No. 530, current revision, copies of which may be obtained on application to the Treasury Department or to any Federal Reserve Bank or branch.

(b) *Reservation as to issue of bonds.*—The Secretary of the Treasury reserves the right to reject any application for bonds of Series H, in whole or in part, and to refuse to issue or permit to be issued hereunder any such bonds in any case or any class or classes of cases if he deems such action to be in the public interest, and his action in any such respect shall be final.

⁴ During any war emergency the Treasury may suspend deliveries to be made at its risk and expense from or to the continental United States and its Territories and possessions and the Canal Zone, or between any of such places.

(c) *Previous circulars—Preservation of existing rights.*—The provisions of previous Treasury Department circulars not in conformity herewith are hereby modified and amended accordingly: *Provided*, however, that nothing contained in this circular shall limit or be construed to limit or restrict any existing rights which owners of bonds of Series H have acquired under the circular previously in force.

(d) *Fiscal agents.*—Federal Reserve Banks and branches, as fiscal agents of the United States, are authorized to perform such services as may be requested of them by the Secretary of the Treasury in connection with the issue, delivery, redemption, and payment of savings bonds of Series H.

(e) *Reservation as to terms of circular.*—The Secretary of the Treasury may at any time or from time to time supplement or amend the terms of this circular, or of any amendments or supplements thereto.

G. M. HUMPHREY,
Secretary of the Treasury.

TABLE A.—UNITED STATES SAVINGS BONDS—SERIES II

TABLE OF CHECKS ISSUED AND INVESTMENT YIELDS FOR BONDS BEARING ISSUE DATES BEGINNING FEBRUARY 1, 1957

Table showing: (1) Amount of interest checks paid on United States savings bonds of Series H bearing issue dates beginning February 1, 1957, by denominations, on each interest payment date following issue; (2) the approximate investment yield on the face value from issue date to each interest payment date; and (3) the approximate investment yield on the face value from each interest payment date to maturity. ¹ At all times, except that bond is not redeemable during first 6 months.

² Approximate investment yield for entire period from issuance to maturity is 3.00 percent per annum.

EXHIBIT 8.—Press release, May 2, 1957, announcing the future issuance in punch-card form of Series E savings bonds

The Treasury Department, beginning next October 1, will issue Series E savings bonds in punch-card form, at an annual saving of \$500,000 a year in printing costs.

The punch-card bonds will closely resemble the present paper-type bonds and will have the same printed matter on both sides as now. But while the present paper-type bonds are 7¼ by 4¼ inches in size, the punch-card bonds will be 7½ by 3¼ inches.

Present stocks of the paper-type E bond forms will be used until stocks are depleted, probably by the end of September, or for reissues of paper-type bonds.

General approval was expressed by bond buyers, volunteer bond salesmen, financial institutions, and others consulted by the Treasury when the money-saving change to card-type bonds was proposed several months ago.

The punch-card bonds will make possible the use of electronic data processing machines for certain savings bonds procedures in the Bureau of the Public Debt, and installation of such machines is now being arranged for. Some business firms and others issuing bonds under the payroll savings plan will also be able to realize economies in handling the new bonds.

Guaranteed Obligations Calls

EXHIBIT 9.—Calls for partial redemption, before maturity, of insurance fund debentures

During the fiscal year 1957, there were six calls for partial redemption, before maturity, of insurance fund debentures, one dated September 20, 1956, and the others dated March 18, 1957. The notices of call were published in the Federal

Registers of September 28, 1956, and March 29, 1957. The notice covering the second call of the $2\frac{1}{2}\%$, 2% , $2\frac{3}{4}\%$, $2\frac{1}{4}\%$, and 3 percent Series AA mutual mortgage insurance fund debentures is shown in this exhibit. Since the other notices of call are similar to this exhibit, they have been omitted but the essential details are summarized in the table following the notice of call.

NOTICE OF CALL. FEDERAL REGISTER OF SEPTEMBER 28, 1956

To Holders of $2\frac{1}{2}\%$, 2% , $2\frac{3}{4}\%$, $2\frac{1}{4}\%$, and 3 Percent Mutual Mortgage Insurance Fund Debentures, Series AA:

NOTICE OF CALL FOR PARTIAL REDEMPTION, BEFORE MATURITY, OF $2\frac{1}{2}\%$, 2% , $2\frac{3}{4}\%$, $2\frac{1}{4}\%$ AND 3 PERCENT MUTUAL MORTGAGE INSURANCE FUND DEBENTURES, SERIES AA (SECOND CALL)

Pursuant to the authority conferred by the National Housing Act (48 Stat. 1246; U. S. C., Title 12, Sec. 1701 et seq.) as amended, public notice is hereby given that $2\frac{1}{2}\%$, 2% , $2\frac{3}{4}\%$, $2\frac{1}{4}\%$ and 3 percent mutual mortgage insurance fund debentures, Series AA, of the denominations and serial numbers designated below, are hereby called for redemption, at par and accrued interest, on January 1, 1957, on which date interest on such debentures shall cease:

$2\frac{1}{2}\%$, 2% , $2\frac{3}{4}\%$, $2\frac{1}{4}\%$, and 3 percent mutual mortgage insurance fund debentures, series AA:

<i>Denomination</i>	<i>Inclusive serial numbers</i>
\$50-----	63 to 269
100-----	238 to 893
500-----	78 to 273
1,000-----	171 to 627
5,000-----	105 to 110
	112 to 345
10,000-----	70 to 117

The debentures first issued as determined by the issue dates thereof were selected for redemption by the Commissioner, Federal Housing Administration, with the approval of the Secretary of the Treasury.

No transfers or denominational exchanges in debentures covered by the foregoing call will be made on the books maintained by the Treasury Department on or after October 1, 1956. This does not affect the right of the holder of a debenture to sell and assign the debenture on or after October 1, 1956, and provision will be made for the payment of final interest due on January 1, 1957, with the principal thereof to the actual owner, as shown by the assignments thereon.

The Commissioner of the Federal Housing Administration hereby offers to purchase any debentures included in this call at any time from October 1, 1956, to December 31, 1956, inclusive, at par and accrued interest, to date of purchase.

Instructions for the presentation and surrender of debentures for redemption on or after January 1, 1957, or for purchase prior to that date will be given by the Secretary of the Treasury.

APPROVED: September 24, 1956

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

NORMAN P. MASON,
Federal Housing Commissioner.

Final interest will be paid with principal at the rate of \$12.50 per \$1,000 for the $2\frac{1}{2}\%$; \$13.13 per \$1,000 for the 2% ; \$13.75 per \$1,000 for the $2\frac{3}{4}\%$; \$14.38 per \$1,000 for the $2\frac{1}{4}\%$; and \$15.00 per \$1,000 for the 3% debentures redeemed on January 1, 1957.

Final interest will be paid with principal at the rate of \$0.067935 per day for each \$1,000 for the $2\frac{1}{2}\%$; \$0.071332 per day for each \$1,000 for the 2% ; \$0.074728 per day for each \$1,000 for the $2\frac{3}{4}\%$; \$0.078125 per day for each \$1,000 for the $2\frac{1}{4}\%$; and \$0.081522 per day for each \$1,000 for the 3% debentures from July 1, 1956, to date of purchase on those purchased between October 1 and December 31, 1956.

Legislation

EXHIBIT 10.—An act temporarily increasing the public debt limit

[Public Law 678, 84th Cong., 2d Sess., H. R. 11740]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, during the period beginning on July 1, 1956, and ending on June 30, 1957, the public debt limit set forth in the first sentence of section 21 of the Second Liberty Bond Act, as amended, shall be temporarily increased by \$3,000,000,000.

Approved July 9, 1956.

EXHIBIT 11.—An act increasing the maximum interest rate on United States savings bonds

[Public Law 85-17, 85th Cong., H. R. 5520]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the proviso in the second sentence of section 22 (b) (1) of the Second Liberty Bond Act, as amended (31 U. S. C., sec. 757c (b) (1)), is amended to read as follows: "*Provided*, That the interest rate on, and the issue price of, savings bonds and savings certificates and the terms upon which they may be redeemed shall be such as to afford an investment yield not in excess of 3.26 per centum per annum, compounded semiannually".

SEC. 2. The authority granted by the amendment made by the first section of this Act may be exercised with respect to United States savings bonds and United States Treasury savings certificates bearing issue dates of February 1, 1957, or thereafter. For purposes of section 22 (b) (2) of the Second Liberty Bond Act, as amended, such authority may be exercised with respect to those series E savings bonds maturing on or after February 1, 1957, which are retained after maturity, but only with respect to the investment yield after maturity.

Approved April 20, 1957.

Taxation Developments

EXHIBIT 12.—Statement by Secretary of the Treasury Humphrey, March 19, 1957, before the Senate Finance Committee on H. R. 4090 to provide a one-year extension of the existing corporate normal tax rate and of certain excise tax rates

I appreciate this opportunity to appear before you in support of H. R. 4090, which was passed by the House of Representatives on March 14, 1957. This legislation would extend for one year the existing excise rates on liquor, tobacco, and automobiles, and the tax rate on corporate income. If this legislation were not adopted, the tax rates would drop on April 1.

The full year effect of the one-year rate extensions would be slightly more than \$3 billion; \$2.2 billion of this comes from the corporation income tax; \$231 million from various alcohol taxes; \$185 million from the tax on cigarettes; and \$436 million from the tax on automobiles and automobile parts and accessories.

Of the total of more than \$3 billion we estimate that \$186 million will be collected in the current fiscal year; \$2,166 million in the fiscal year 1958; and virtually all of the rest in the fiscal year 1959.

The President made his recommendation for these rate extensions in his budget message in the following terms:

"It is my firm belief that tax rates are still too high and that we should look forward to further tax reductions as soon as they can be accomplished within a sound budget policy. Reductions in tax rates would give relief to taxpayers and would also release funds for the activity and investment necessary for sustained economic growth through private initiative. However, the reduction of tax rates must give way under present circumstances to the cost of meeting our urgent national responsibilities.

"For the present therefore I ask for continuation for another year of the existing excise tax rates on tobacco, liquor, and automobiles, which, under present law, would be reduced next April 1. I must also recommend that the present corporate tax rates be continued for another year. It would be neither fair nor

appropriate to allow excise and corporate tax reductions to be made at a time when a general tax reduction cannot be undertaken."

The estimated surplus for the fiscal year 1958 is considerably less than the revenue which will be received during that year from the legislation which is now before you. Therefore, if these rates are not extended we would have a substantial deficit in 1958. After 2 years of balanced budgets as a result of the combined hard work of the Congress and the administration, it would be inexcusable to slip back into deficit financing for next year.

We must have the revenue that a continuation of existing tax rates would provide.

As I have said many times, the present tax rates are too high for long continued retention and would in the long run seriously hamper our vigorous economic growth. The most important and effective tax change that can possibly be made to promote steady economic development is a reduction in all rates for all taxpayers when our fiscal situation permits.

To make this general reduction possible for all taxpayers we must avoid new special relief provisions for particular groups of taxpayers which will dissipate our revenues.

Such relief provisions would not only still further complicate a law that is already too complicated, but they also, in the aggregate, might involve so much revenue loss as to postpone indefinitely the time when it will be possible to have such general relief for all taxpayers.

I have been asked about two bills which would modify the corporate tax structure to give lower taxes to corporations with smaller incomes. Before commenting on the two bills, I would like to present a few figures which show the present vitality of new enterprises in our private enterprise system.

The following facts stand out:

(1) At the end of 1955, the last full year for which figures are available, the total business population stood at an alltime high of 4,252,000 firms. The net increase during 1955 was 63,000 firms. This was the largest increase in any year since 1948, when the surge of new business formations that followed World War II came to a close. During the first half of 1956 there was a further growth in the business population. The Small Business Administration estimates that the total number in operation was between 4,275,000 and 4,300,000 firms on June 30, 1956.

(2) In 1956 the record number of 140,775 new corporations were formed. This exceeded the previous record of 139,651 estimated in 1955. There has been an increase in the number of new corporations in every year beginning with 1952.

(3) Though the number of business failures increased in 1956 over 1955, the rate of business failures is still far below the prewar level and in fact it is far below the average rate for the entire period since 1900.

Specifically stated in the last report of the Small Business Administration, December 31, 1956:

"In 1956 the number of business failures per 10,000 firms was 48. In 1954 and 1955 there were 42 business failures per 10,000 operating businesses; in 1949, 34 per 10,000; and in 1952, 29 per 10,000.

"In the prewar period of 1939, however, the failure rate was 70 per 10,000 firms, and in 1940, 63 per 10,000. For the whole period, 1900-1956, the rate was 70 per 10,000 firms."

The increase in the number of failures should be appraised in perspective as related to the earlier record. On that basis the present vitality of business concerns is good.

Amendment 2-27-57-B would reduce the existing normal tax on corporation income from 30 percent to 22 percent and increase the surtax on corporation income over \$25,000 from 22 percent to 31 percent. This is the Fullbright proposal.

The total tax rate on income above \$25,000 would thus be increased from 52 percent to 53 percent.

About 85 percent of small-business firms are proprietorships and partnerships and are not taxed as corporations. Thus amendment 2-27-57-B provides tax relief for only the 15 percent of small-business concerns which are organized as corporations.

Special tax relief of the sort contemplated by S. 150 therefore directly discriminates against the overwhelming majority of small businesses which are not

conducted as corporations, and most importantly, discriminates against individual taxpayers generally.

In view of the very high rates now in effect, it would be unfortunate to increase the relative tax burden on such a large group of taxpayers as would be done by S. 150, especially for the benefit of such a comparatively small favored few.

S. 352, which is Mr. Sparkman's proposal, would make the corporate tax generally progressive, starting at 5 percent on the first \$5,000 of income and rising by 5 and 10 percent steps to 55 percent on income over \$100,000.

There is no justification for a progressive corporate tax. The analogy with the progressive individual income tax is not correct.

Smaller and medium sized corporations may be, and in fact often are, owned by a few individuals each of whom has a sizable individual income, while the larger corporations are most likely to be owned by a great many individuals, large numbers of whom have quite modest incomes.

The most recent figures on the ownership of companies listed on the New York Stock Exchange show that two-thirds of the eight-million-six-hundred-and-thirty-odd shareowners of listed securities have incomes of less than \$7,500 a year. Almost 38 percent of all share owners have incomes of less than \$5,000 a year.

The effect of a progressive corporate tax thus in many respects would be altogether unfair in that it would indirectly impose a disproportionately large tax burden on the small investors who buy stock in large companies.

Moreover, a progressive corporate tax would actually work against the small business itself which is seeking tax relief to permit its growth and expansion. Under a progressive tax system the moment a company does in fact grow larger it will have to pay a higher rate of tax. Thus the progressive tax scheme actually has a built-in mechanism to retard the continued growth of a successful small business.

The present two levels in the corporate tax (this is referring to the Fulbright proposal) are justified if at all only because the smaller companies are especially dependent on retained earnings until they prove themselves to have become sufficiently successful to induce more investors to put their funds into their securities.

But it would be a great mistake to go from the present two levels to a generally progressive corporate tax and thereby reduce investment incentive at the very time when increasingly successful proven operations make the need for expansion and more capital investment continually more important.

Even if the proposed graduated rates (these are the graduated rates in the Sparkman proposal) could be so balanced that there would be no net loss of revenue from the proposed tax changes, the Treasury would still oppose the proposal because any action to change the spread between tax rates on different sizes of corporate income has such a far-reaching implication. This committee should certainly not initiate any such sweeping changes in our tax system until their full effects can be determined by the most extensive public hearings and after full consideration from every standpoint.

Certainly small business would be helped if its taxes were lower, just as every other group in America would be better off with lower taxes. But we must hold to the line and we must now avoid giving preferential tax treatment, group by group, to any special group and so discriminate against all other groups and delay that happy day when general tax relief can again be given to every taxpayer in America.

EXHIBIT 13.—Letter of Secretary of the Treasury Humphrey, April 16, 1957, to the Chairman of the House Ways and Means Committee reaffirming the Treasury's position with respect to revision of the taxation of cooperatives

DEAR MR. CHAIRMAN: This is in reply to your letter of March 15, 1957, which referred to my letter to you of July 26, 1955. In that letter I described the problem which had arisen, because court decisions had made ineffective the 1951 legislation regarding the treatment of cooperatives. We have no thought of double taxation. Our position as stated in our letter to you of July 26, 1955, remains unchanged.

Since sending you that letter, the court decisions have continued to go against us, with some additional points raised in the opinions. We have also been increasingly impressed with the very considerable differences of opinion among various groups as to the precise way in which the objective of 1951 could best be realized.

We assume that your committee will expect to hold public hearings on the subject to assure a full and systematic presentation of all of these views. We look forward to the testimony in such hearings as a basis for developing specific recommendations. The benefit of the material which can only be secured through comprehensive and extensive public hearings is highly desirable for the preparation of useful statutory language.

I and my associates will be glad to work with your committee and its staff in this area.

Yours very truly,

G. M. HUMPHREY,
Secretary of the Treasury.

EXHIBIT 14.—Statement of Secretary of the Treasury Humphrey, May 7, 1957, before the Senate Finance Committee on S. 1795 to limit emergency amortization strictly to defense items

I am very glad to appear before the Senate Finance Committee in response to your invitation to testify on your bill, S. 1795. I strongly support the general purpose of this proposed legislation to limit emergency amortization to strictly defense items.

In July 1955, I first expressed publicly before this very committee my growing concern about the emergency amortization program before a subcommittee of the House Committee on Government Operations. I stated that while emergency amortization may have served a useful purpose during the Korean emergency, it was an artificial stimulus of a dangerous type.

From November 1950 to March 20, 1957, almost 22,000 certificates were issued under the 5-year amortization program. The total cost of these projects was almost \$39 billion. Almost \$23 billion, or about 60 percent, was made eligible for the 5-year writeoff.

Some degree of defense mobilization on a substantial scale may be essential for years to come. But expansion of our major productive facilities should be an integral part of our long-range, natural economic growth. Our basic defense capacity, except for a few very special items, cannot be separated from the broad base of our productive capacity.

Artificial stimulants may well become artificial controls. Because rapid amortization is not applied universally, it could create a competitive imbalance in the sound, vigorous growth of our free economy. It is not the American way.

The revenue lag from certificates issued through 1956 probably exceeds \$5 billion during these early years which will be recovered in the years after 1960. But the interest cost to the Government, over the entire period of lag in tax collections, will be roughly \$3 billion.

The effects of a broadly applied amortization program go far beyond the effects on Government revenue. First, there is the stimulating effect which can temporarily add to inflation, with the possibility of a lag later. Then when rapid writeoffs are permitted for facilities which will be largely used to supply eventual regular civilian demand, there inevitably will be dislocations and unfair advantages between whole industries—and individual companies within an industry.

Much of the total has been of this type. For example, over 14 percent of the total amortizable cost of facilities through December 28, 1955, was granted to utilities and sanitary services; over 16 percent more went to railroads; and about 20 percent went to primary metal industries. Other whole industries had none.

There are many industries where some percentage of production would be required in the event of war; but where without war our increased population and productivity will require their continued expansion. These are in sharp contrast to limited-purpose defense facilities such as shell loading or specialized aircraft or armament plants.

Five-year amortization may be an alternative to direct Government construction and ownership of limited-purpose facilities since private capital is not likely to go into them. But this is far different than giving rapid writeoff to selected industries for general-purpose plants or equipment in an expanding economy.

There is no fair or logical end to such a program. The margin of excess capacity in such industries at any time will regularly be absorbed by growing civilian demand and have to be regularly reestablished in later years. There would be continuing costs and revenue lags and the creation of new competitive problems.

We are not unaware both of the desirability as well as of the financial problems involved in modernizing and replacing old capital equipment. Nothing is more important than obtaining the capital to increase our productivity and make new and better jobs.

Our high productivity of labor is possible only because of tremendous capital investment—over \$10,000 per man in general manufacturing, and over \$50,000 in several industries.

Getting funds for the construction of new plants or facilities is a continuing serious problem. High tax rates make it harder to save from current income. They also lessen the incentive and discourage the productive and perhaps risky use of savings.

It is essential to reduce tax rates as rapidly as can be done soundly. But tax reduction for favored groups only postpones the day when general tax reduction can be enjoyed by all the people.

The program, cut back by the executive branch of the Government, now applies only and strictly to limited direct-defense items. I have consistently advocated this and feel sure that the present limitations should be continued.

S. 1795 is in line with this administration's policy in granting emergency amortization certificates. Subject to some possible changes in language consistent with its objectives to be worked out by the technicians, I am glad to support this legislation.

EXHIBIT 15.—Report of the Treasury Department, May 13, 1957, on S. 1795 to amend Section 168 of the Internal Revenue Code of 1954 to limit emergency amortization strictly to defense items

MY DEAR MR. CHAIRMAN: This is in reply to your request for a report on your bill, S. 1795. This would impose a strict statutory limitation on the use of 5-year amortization certificates. Future certifications would be confined to facilities to produce new defense items or components of new defense items or to provide research, development, or experimental services during the emergency periods for Department of Defense or the Atomic Energy Commission, as a part of the national defense program. Such a limitation is, in principle, consistent with the limitations imposed under present administrative policy.

The Treasury Department favors a statutory limitation which would restrict amortization certificates to strict defense purposes. Widespread use of amortization certificates is very costly in terms of revenue during the period when they are effective. Their availability and use in other than strict defense applications will result in dislocation and unfair advantages both as between whole industries and as between individual companies within an industry.

The use of 5-year amortization for some part of the cost of general purpose plants or equipment to stimulate earlier construction of capacity is neither fair nor logical. The margin of excess capacity, deemed to be needed for defense purposes at any one time, will regularly be absorbed by civilian demands in a growing economy and would have to be regularly reestablished in later years. There would be continuing revenue lags and continuing creation of new competitive problems.

Subject to possible technical changes consistent with the bill's objectives, the Treasury Department strongly supports the general purpose of S. 1795 to limit emergency amortization to strictly defense items.

The Director, Bureau of the Budget, has advised the Treasury Department that there is no objection to the presentation of this report.

Sincerely yours,

G. M. HUMPHREY,
Secretary of the Treasury.

EXHIBIT 16.—Letter of the President, July 15, 1957, to the Chairman of the House Ways and Means Committee regarding tax relief for small business

DEAR MR. CHAIRMAN: This is in further reply to your letter regarding small business. As you will recall, the Cabinet Committee on Small Business made fourteen recommendations, including suggested changes in the tax laws, the latter conditioned on the budgetary outlook. It was suggested, subject to the existence of appropriate budgetary conditions:

(1) That the taxes imposed on business corporations be modified by reducing the tax rate from 30 percent to 20 percent on incomes up to \$25,000.

(2) That businesses be given the right to utilize, for purchases of used property not exceeding \$50,000 in any one year, the formulas of accelerated depreciation that were made available to purchasers of new property by the Internal Revenue Code of 1954.

(3) That corporations with, say, ten or fewer stockholders be given the option of being taxed as if they were partnerships.

(4) That the taxpayer be given the option of paying the estate tax over a period of up to ten years in cases where the estate consists largely of investments in closely held business concerns.

It now appears that the excess of income over disbursements in the fiscal year 1958 will be so small that no action should be taken by the Congress at this time which will involve any substantial tax reduction for anyone. In the economic conditions that prevail currently and can be expected during the next fiscal year, all the income which the present tax laws provide should be reserved in order to maintain the balance between income and outgo as now estimated and to make modest reductions in our national debt.

Therefore, it would be ill-advised to consider the first recommendation noted above, because of the substantial revenue loss that it would entail. Also, in the absence of a general tax reduction, which the budgetary situation does not permit at this time, a tax reduction of this character would discriminate against all the many small businesses which are conducted in the form of partnerships or individual proprietorships.

The Congress should, however, in connection with its study of cases of unusual hardship or unfairness in the operation of tax laws, appropriately consider some of the other suggestions, which involve no more than a minimum loss of revenue.

On that basis, I commend for your committee's consideration the second, third, and fourth recommendations in the committee's report as noted above, and one additional change in the law to permit an original investor in small business the right to deduct from his income, up to some maximum amount prescribed by Congress, a loss, if any, realized on a stock investment in such business. At the present time the deduction of such losses from income is subject to the general limitation on net capital losses of \$1,000. Each of these proposals could be helpful in the financing, operation, or continued independent existence of small businesses.

In your letter you asked for my views concerning the Fulbright proposal for reducing the normal tax on corporations from 30 percent to 22 percent and increasing the surtax on corporate incomes over \$25,000 from 22 percent to 31 percent. This proposal would increase the tax rate on the portion of the income in excess of \$25,000 to 53 percent. Since about 85 percent of the small business firms are proprietorships and partnerships, it is not fair to give tax relief to small business concerns which are organized as corporations at the expense of other taxpayers.

I earnestly look forward to reductions in tax rates for all taxpayers as soon as that becomes possible. Until that time, selective relief of the sort contemplated by the Fulbright proposal—and indeed by the first recommendation of the Cabinet Committee—would discriminate against the overwhelming majority of small businesses which are not conducted as corporations at a time when we must stand against any tax revision for anyone which might jeopardize our small budget surplus. Furthermore, in view of the very high rates now in effect, it would be unwise to increase the taxes on any group of taxpayers in order to provide a tax reduction for another group, as would be done by this proposal. For these reasons, I am opposed to the Fulbright Resolution.

I know you are also interested in the status of the several Cabinet Committee recommendations relating to matters other than taxes. As I mentioned above, the committee gave me fourteen recommendations for governmental action, only four of which dealt with taxes. Of the remaining ten recommendations, some have been carried out by the executive branch; others must await congressional action before the executive branch can act upon them. The following is a current status report on these ten.

In its Recommendation No. 5, the Cabinet Committee proposed: "That the President arrange for a comprehensive review of procurement policies and procedures of all departments and agencies, including the legislation pertaining thereto, with a view to facilitating and extending the participation of small businesses in work on Government contracts."

On September 26, 1956, I directed the Administrator of the General Services Administration to plan and conduct such a review, in cooperation with other major procurement agencies. The First Summary Report of the Task Force set up by the Administrator of the General Services Administration under this directive was issued on March 1, 1957. Several important improvements in procurement procedures have already been accomplished as a result of the Task Force efforts, and a comprehensive proposal for amendments to the procurement laws has been developed by the Task Force and is currently being reviewed by the cognizant executive agencies. The purpose of the amendments being reviewed would be to bring about greater uniformity and simplification of Government procurement procedures, and to improve the opportunities of small businesses to participate in Government work.

In its Recommendation No. 6, the Cabinet Committee proposed: "That the President direct departments and agencies engaged in extensive procurement to adopt procedures which would insure that a need for advance or progress payments by a bidder will not be treated as a handicap in awarding a contract, and which would facilitate and accelerate the making of such progress payments as may be requested by small suppliers under Government contracts."

In my letter of August 18, 1956, I directed the procurement agencies to implement Recommendation No. 6. In order to ensure uniformity among the various agencies the General Services Administration on December 31, 1956, laid down a Government-wide regulation prescribing policy and procedures in consonance with Recommendation No. 6. Federal agencies are taking steps to comply with this.

In its Recommendation No. 7, the Cabinet Committee proposed: "That the Renegotiation Board clarify the fact that, although a contractor who subcontracts work may not reasonably expect to be allowed as large a profit thereon as if he had done the work himself, the practice of subcontracting, especially the extent to which subcontracts are placed with small businesses, is encouraged by giving it favorable consideration in determining allowable profits."

On September 24, 1956, the Renegotiation Board amended its regulations to give effect to this recommendation.

In its Recommendation No. 8, the Cabinet Committee proposed: "That the life of the Small Business Administration, which is now scheduled to expire in mid-1957, be extended at the earliest opportunity."

Administration bills (S. 1789 and H. R. 6645), would remove the time limit on the life of the Small Business Administration, thus giving it permanent status.

In its Recommendation No. 9, the Cabinet Committee proposed: "That the maximum amount of an issue of corporate securities which the Securities and Exchange Commission may exempt from registration be increased from \$300,000 to \$500,000."

I have recommended this change. Legislation (S. 810 and S. 843) is now before the Congress to carry out this recommendation.

In its Recommendation No. 10, the Cabinet Committee proposed: "That the President call a conference on technical research, development, and distribution, for the benefit of small business."

I have directed the Secretary of Commerce and the Administrator of the Small Business Administration to make plans for this conference.

These plans have been announced and a Conference on Technical and Distribution Research for the Benefit of Small Business will be held in Washington September 24-26.

In its Recommendation No. 11, the Cabinet Committee proposed: "That legislation be enacted to enable closer Federal scrutiny of mergers."

Legislation to accomplish this objective is before the Congress, and the Attorney General has outlined administration views in testimony before the House Judiciary Committee.

In its Recommendation No. 12, the Cabinet Committee proposed: "That procedural changes be made in the antitrust laws to facilitate their enforcement."

I have recommended three procedural changes in this area: first, that cease and desist orders of the Federal Trade Commission under the Clayton Act be final when issued, unless appealed to the Courts; second, that the Attorney General be given the power, where civil procedures are contemplated, to issue a civil investigative demand, thus making possible the production of documents before a complaint is filed, and without the need of grand jury proceedings; third, that the Federal Trade Commission, in merger cases where it believes a violation of the law is likely, be authorized to seek a restraining injunction before filing a formal complaint.

In its Recommendation No. 13, the Cabinet Committee proposed: "That wage reporting by employers for purposes of social security records and income tax withholding be simplified."

Legislation (H. R. 8309) to give effect to this recommendation has been submitted to the Congress.

In its Recommendation No. 14, the Cabinet Committee proposed: "That the Office of Statistical Standards of the Bureau of the Budget undertake a comprehensive review of the reports and statistics required of small businesses."

The Bureau of the Budget has under way a study designed to determine whether the reports and statistics which small business must now maintain for, or supply to, the Government are unduly burdensome and, where necessary, to suggest remedial measures.

Pending the achievement of budgetary conditions that will permit a general program of tax reduction, these proposals for changes in our tax laws would appreciably improve the ability of small businesses to get started and, once started, to grow. Along with the administrative actions taken in other areas, and with favorable attention by the Congress to administration proposals for measures to benefit small business not yet enacted, they would provide a balanced program of constructive aid at a minimum loss of tax revenues. Such aid is keenly needed by small business, the economic position of which is vitally important to the soundness and vigor of our system of free competitive enterprise.

With kind regard

Sincerely,

DWIGHT D. EISENHOWER.

International Financial and Monetary Developments

EXHIBIT 17.—Remarks by Secretary of the Treasury Anderson, August 19, 1957, before the First Plenary Session of the Economic Conference of the Organization of American States, Buenos Aires, Argentina

It is an honor to participate in this Conference with so many of the ministers who deal with the financial and economic questions which continually arise in the conduct of Government affairs in our American Republics. It is a particularly happy occasion to come here as one of my first official acts as Secretary of the Treasury.

As a Texan, who has lived most of his life close to Latin America, I have always had a deep and warm personal interest in its people, its culture, its traditions, and its progress. One of my earliest employments was to teach Spanish in a town near the place where I grew up. While I must confess a neglect of the language in the intervening years, it is a fault I hope to correct. It is my earnest hope that my present duties will give me new opportunities to visit the other American Republics and to experience more direct and personal contacts with this great region, and to continue and enrich the friendships which I have established here with the delegates of these American Republics.

This Conference follows in logical succession from the Conference at Quitandinha in 1954. I was deeply impressed by the enthusiasm with which my predecessor, Secretary Humphrey, viewed the Quitandinha meeting. He was convinced at that meeting that there was unanimity among the delegates as to the great and inspiring objectives which we seek in this hemisphere.

These objectives are clear and can be defined simply: We want our people all around the Americas to live better, we want them to pursue more healthful lives, we want their lives filled with hope, enriched with progress, and inspired toward the improvement of standards of well being. Above all we seek these goals while preserving the freedom of our peoples.

It was most encouraging to me that in his eloquent address inaugurating this Conference, President Aramburu strongly reaffirmed the validity of these views. As practical men with responsibility for helping to shape our nations' economic policies, we shall try to see our tasks as they really are, and not as we might wish them to be. They are many, they are difficult, and they are continuing. They are not to be dealt with by words alone, nor can they be laid to rest once and for all by some dramatic pronouncement at this or any other conference. Patience, persistence, and goodwill are the qualities of mind and heart which we must bring to our tasks.

I have talked at length with President Eisenhower about these matters. He shares the conviction that direct personal contacts and intimate exchanges between those of us who carry public responsibilities are the surest guarantee that our efforts will be successful and our objectives transformed into practical and satisfactory realities.

You will all recall the unprecedented meeting of the chiefs of state of the American Republics which took place in Panama in July 1956, and the Inter-American Committee of Presidential Representatives which developed from it to consider ways of strengthening the Organization of American States in fields of cooperative effort which directly affect the welfare of the individual. As a result of the committee's deliberations, a series of recommendations was drawn up and submitted to the various chiefs of state. President Eisenhower on May 26 publicly expressed his hope that many of the recommendations would be put into effect as promptly as possible.

We should not regard the meeting in Quitandinha, the Conference in Panama, or this Conference as ends in themselves. Rather, each Conference evidences greater strides forward to our common objectives. What is really important is the fact that we continue to demonstrate that 21 nations collectively, forming one of the world's most important communities, have come to the same conviction that the welfare and progress of each member is related to the welfare and progress of each other member. Our approach has been, and will continue to be, that of good partners.

How then shall the ministers of finance or economy of our governments go about the task of increasing the effectiveness of their cooperative efforts? It would be presumptuous for me, one of the newest members of the group, to claim extensive personal familiarity with the details of the questions which we shall discuss. The delegation of the United States will express its views on the matters of our agenda, and I earnestly hope you will find them forward looking and constructive.

Before we came here, my Government reviewed and considered carefully the views that were expressed by the delegations in 1954 and weighed them in the light of the progress we have made in the interval of nearly three years since that meeting. We welcome this opportunity, indeed, we feel it a responsibility, to express to you the fundamental approach which we bring to the questions before us. This Conference represents another important step in the continuing evolution of a long history of economic cooperation and business partnership. We are dealing with fundamental and long range questions on which we can take stock and fruitfully exchange thoughts and points of view. But we recognize that in the economic field the march of day-to-day events and the cumulative effect of specific decisions in business and in government play the major role.

A country achieves material progress by developing its human and material resources. There is no other way to do it. The question that faces this conference, therefore, is how can our countries most effectively develop their resources? At inter-American meetings of this kind, when we consider economic development we sometimes tend to talk as though Latin America were one great homogeneous area. In fact, the economic development of Latin America is the sum total of the economic development of each of the individual countries in the area.

When we examine the economic characteristics of the Latin American countries one by one we find a natural diversity. Some countries have limited natural resources. Others are among the most favoured nations in the world in this respect. Some countries are almost entirely producers of raw materials. Others produce not only raw materials but also a wide variety of manufactured goods. But amidst this diversity let there be this unity: However we develop our econo-

mies, however we use our resources or make our goods, or provide opportunities for work, let us above all else guard freedom in all its aspects, for freedom is indivisible.

There are certain profound convictions with which I come to our meeting. They are convictions which I have held throughout a lifetime. The first conviction is this: No difference exists between us as to the objectives we seek. They are objectives that can be defined only in terms of human well-being and progress. We all agree that man does not exist to enhance the importance and power of the State, as the Communists would have us believe. The State exists for man to respect his dignity as a child of God, to preserve his rights as an individual, and to provide opportunities which will enable him to develop, freely and fully, in all the ways that enrich human life and exalt its spiritual meaning and dignity. And this is what we mean when we speak of promoting commerce, industry, agriculture, and development of all of our resources. We promote them because they make for the better employment of our citizens, better homes for our families, better education for our children, greater satisfaction of our aspirations, in short, a better America for all of us.

History has demonstrated the vital role of the competitive enterprise system in the economic life of our hemisphere. Its promise for the future is even greater. Just as truth flourishes best in the climate of political freedom, so in the economic field the system of competitive enterprise promises to yield most in the satisfaction of man's material needs. This system produces most of what people want most.

I hope that at this Conference we can contribute to the growth and strengthening of this system. It is wholesome that we should explore the various ideas presented to us. No one knows better than a minister of finance or economy how difficult it is to choose between alternative measures. No one knows better than we that the fields of economy and finance are not exact sciences. Let us, therefore, approach our discussions with the hope that from a sincere and thoughtful exchange of views will come ways of doing things which are perhaps better than those which any of us alone might have brought to this Conference.

This leads me to a second conviction which I hold strongly and which has been substantiated in actual experience. This is that there is no question incapable of resolution if we, as reasonable men of good will, and as the representatives of our respective peoples, bring to bear on it the best and united effort of all of our people.

President Eisenhower has characterized the Organization of American States and its predecessors as "the most successfully sustained adventure in international community living the world has ever known." In this hemisphere we have had the courage to approach openly many problems for which solutions had not been found in international society. Some of these problems have found their first solution in the Americas. On other problems we have made the greatest progress toward an eventual solution that has yet been achieved. Why is this true? I believe that it is because we do not let differences of opinion divide us or breed distrust among us. When we encounter a new problem or engage in a new field of discussion we seek a road we can all follow and which will ultimately bring us to our common objective.

This method of approach has been a salient part of our cooperative effort during the past 50 years and against the background of history has been little short of remarkable. For example, we developed in the Americas a hemispheric approach to security which was sealed in the Rio Treaty of 1947. We unanimously agreed that an attack on any one State would be considered an attack on all. This concept of collective security has served as a pattern for the strengthening of the entire free world. Our purpose is peace, both with the rest of the world and among ourselves. The repeatedly successful application of the Rio Treaty to settle disputes between American States and the outstanding services of the Inter-American Peace Committee for peaceful settlement have established beyond doubt the desire and ability of the countries of the Americas to live peacefully together.

This fact has great economic significance. The assurances now provided by our common defense system offer us a dramatic opportunity to give greater emphasis to those economic activities that can better the lot of our peoples.

Military expenditures, by their very nature, act as a brake on rising living standards, and for that reason they should be held to a level that will provide an adequate posture of defense. All of us in the Americas look forward to the day when a changed world situation will permit a substantial reduction of our large

military expenditures. In the meantime, however, we must all do everything we can to control reasonably our expenditures in this area. All of us, I am confident, will continue to scrutinize our military budgets in an effort to accomplish savings that would make resources available in each of our economies for the kind of constructive development that advances economic well-being.

My third great conviction is that the progress and welfare of every American State is directly related to the progress and welfare of each. None of us can ever be indifferent to the problems and the suffering of another. Each of us has a personal and strong interest in the welfare of each of our partners. Often in the economic fields our problems are particularly subtle and stubborn. Our best interests as members of this great American community clearly lie in pursuing a policy of cooperation.

A basic aspect of this policy of cooperation is a firm determination on the part of my country to preserve a climate that will lead to the maintenance of a growing prosperity in the United States, which continues to represent the largest, most stable, and expanding market for the increasing production of the hemisphere. To seek to avoid any return to the depressed conditions of an earlier decade with the costly shrinkage it meant in our own economy and with the harmful reduction of your markets is a fixed point in the policy of my Government and of our whole people.

A further aspect of this policy of cooperation relates to the important areas of trade and investment. Needless to say, each of us occasionally is compelled to take action on the basis of important domestic considerations. Such departures from the general policy should be held to an inescapable minimum and should be justified by rigorous standards of necessity. In that way we can maintain our basic course with respect to international economic cooperation and maintain as well the integrity of those occasional departures from it which legitimate national considerations require.

What are the results of our cooperative efforts during the past four years? Today, the people of the American States are contributing more to the economic progress and well-being of the world than at any previous time in our history. The output of goods and services is rising continuously at the rate of about three percent a year in the United States and at even higher rates in other American republics. The average annual increase in the real gross national product for Latin America, as a whole, is estimated by the Economic Commission for Latin America at 4.3 percent for the four years 1953 through 1956. In several countries the rate of growth has been even higher.

Rarely, if ever, in history have we witnessed such a sustained and vigorous level of prosperity as we have been enjoying recently in the free world. Indeed in this decade we find we have a striking contrast to the world of 20 years ago. Then trade had shrunk, prices were depressed, and economic activity was feeble and discouraging. Today there is an increasing concern of an opposite character. In country after country, the pressure of monetary demand is so great that inflation is either an unpleasant reality or a constant threat.

In my country we are well aware of this fact. We are exerting our best efforts to keep our prosperity healthy, and to avoid the adverse effects of inflation fever. Many of you have experienced the effects of this economic illness, and as finance ministers know all too well what it brings. You know how it not only complicates the task of the finance minister, but enters as a disturbing factor into all the operations of business and the affairs of everyday life. You know how it can lead a whole people into competitive efforts to seek protection of their assets rather than employing them for the benefit of the community. You know how difficult it is for domestic and foreign capital to play an effective role in productive investment when there is continual worry and preoccupation with the dangers of a depreciating currency. You are familiar with the exchange difficulties and the constant tendency to excessive imports which inflation brings in its train. You know how exports may be discouraged when price relationships become distorted.

The United States applauds the efforts that are being made in many of the other American Republics to deal with this menace and to achieve greater financial stability and realistic and freer rates of exchange. We are happy that the International Monetary Fund has supported well conceived programs for combatting inflation in a number of these countries. The Treasury Department and other agencies of my Government have also supported these efforts. We recognize that foreign trade and foreign investments are only one limited aspect of this broad program of economic development. Inter-American transactions are themselves a segment of the broader fabric of economic relations in the free world.

Let me speak briefly, however, of the trade and investment transactions between my own country and the other American Republics. Through these transactions dollars become available to be effectively used by our sister Republics. The flow of these dollars is generated first, by our imports from the rest of the American States; second, by our investments; and third, by our loans for economic development. In each of these categories we have in recent years reached the highest levels yet recorded.

When we met at Quitandinha in 1954, imports into the United States from Latin America had reached the impressive annual rate of \$3.5 billion. In 1956, they reached the record level of \$3.8 billion. About 30 percent of our total imports of goods from foreign countries are shipped from Latin America.

The increase of United States and other foreign private investment in Latin America has been most impressive. The flow of private investment from the United States, as shown by our balance of payments, has greatly increased in the past five years. During the first 2¼ years following our meeting at Quitandinha, the figure amounts to about \$1.4 billion, or more than three times the corresponding rate during a comparable period preceding the meeting at Quitandinha. This is largely due to very sharp expansion in direct investments, particularly in 1956. In that year direct investments exceeded \$600 million, and total private investment amounted to more than \$800 million.

I should like to refer to some aspects of the role of private enterprise and private capital in the development of the American Republics.

It is reasonable that the governments and people of Latin America should expect our United States investors to whom they extend a hospitable welcome, to be constructive members of the communities in which they operate. It is our earnest desire that they shall be. These same investors, we believe, are substantially determined that they shall be a factor toward progress in human welfare.

In the field of foreign investment we think there is a danger that undue attention may be given to the very partial figures which appear in balance-of-payments statements. From these figures it might be inferred that the investment of foreign capital brings no advantage, on balance, to the international accounts of the country receiving such investment. We believe such a conclusion would be incorrect for several reasons.

First, the balance-of-payments data do not show the complete picture. They do not show, for example, the total amount of new investment which has taken place on behalf of private investors. The Department of Commerce of my Government made a special study of the operations of a large group of United States enterprises operating in Latin America. The study covered the year 1955 and included companies holding nearly \$6 billion of assets in Latin America. These companies represent about 85 percent of all United States operations in Latin America. The study showed that whereas the net capital these companies received from the United States amounted to \$129 million, their total investment expenditures were about four times that amount, or \$570 million. The difference between these two figures was financed out of retained earnings, depreciation, and other sources of funds.

The study showed further that the operations of these companies resulted in direct foreign exchange income to Latin America of \$2.3 billion, or \$1 billion more than the total exchange required by these companies for their operations and remittances. This \$1 billion remained in Latin American countries for other exchange purposes.

In connection with their total sales of nearly \$5 billion, wages and salaries were paid by these companies to 600,000 employees. Moreover, approximately \$1 billion was paid to Latin American Governments in various forms of taxation. The revenue derived from this source became available for the financing of highways, ports, and other activities which the Governments have undertaken.

This special study, has, we believe, helped to correct one misconception about the effect of foreign investment upon the financial position of recipient countries; it does not, however, tell the whole story. The advantages of foreign investment do not end with their final effect upon the balance of payments position. A chief value of the investment, whether it be domestic or foreign, lies in its capacity to increase the total national production of the country in which it was made. This comes through increased productivity.

We believe in my country that technical improvements and managerial knowledge which lead to increased productivity may be even more important to rising standards of living than growth in the stock of capital. The shortage of managerial skills and technical knowledge may be more real and more pressing than any

shortage of capital. Private investment carries with it the most highly developed technical and managerial skill. It brings to bear on the development process this essential and dynamic influence to which we attribute so much of our own growth.

The managerial experience and knowledge of techniques and skills required for the successful development of resources is a prerequisite to the most effective use of increased capital funds. The technical knowledge and managerial skills acquired by citizens of Latin America, both on-the-job in plants and enterprises financed by foreign capital as well as through the quite remarkable number of visits to the United States sponsored by both private enterprise and our technical cooperation programs, represent for this hemisphere an ever expanding fund of what might be called managerial wealth—an asset of incalculable value.

As we all realize, the movement of private capital cannot be forced. Private investment flows only where the situation is attractive. Investment opportunities throughout the free world are so numerous that all who seek investment capital must compete for it. Even in the most highly developed countries there is a shortage of savings for investment. Nevertheless, as the figures demonstrate the Latin American Republics have been successfully competing and obtaining a sharply expanded flow of new capital funds. In this they have been more fortunate than many other areas which have not been able to devote their resources so fully to peaceful and constructive purposes.

The process of private capital investment can of course be facilitated. As you know, my Government believes that toward this end, governments should remove tax obstacles that lie in the way of capital formation and private investment. This can be done both through unilateral measures, which would remove unsound tax policies and administrative practices, and through international tax agreements.

We have been engaged in the negotiation of broad tax agreements with a number of countries. In addition to establishing rules in these agreements by which to assure fair tax treatment, we have sought to give recognition to so-called tax-sparing laws which seek to encourage the inflow of capital by granting tax reduction for limited periods of time. The executive departments of our Government are trying to devise a formula by which a credit would be allowed under our laws for the taxes given up by a country seeking to attract capital, in the same way as a credit is given for taxes actually collected by that country.

Tax agreements are, of course, a matter for negotiation between the executive branches of two governments. Like all treaties, they must, in the United States as in many other countries, obtain the approval of the legislative branches of government before they can become effective. We now have several prospective treaties in varying stages of the procedure. One, which includes a credit for tax sparing, is now under review by the legislative bodies of the signatory countries.

We realize that much is to be done toward economic development in Latin America. In addition to private capital, credits from public institutions are important sources of capital. Many hundreds of millions of dollars, both private and public, will be involved. We feel a sense of responsibility and will participate in this development. The extent of our effort will be determined by careful planning, by the ability of countries to absorb capital, and by the assurance of realistic benefits to the economy and the people of the republics involved.

Here my country acts directly through the Export-Import Bank. You will recall the policy of the Export-Import Bank, first announced at the Caracas Conference, and reaffirmed at the Quitandinha Conference. Our Government indicated that our country would be prepared to encourage the financing of all sound economic development projects, including loans in the private sector, in the best interest of the countries involved, and for which private capital was not available. This policy has, I believe, produced impressive results.

In the three-year period ending June 30, 1957, the Bank has authorized credits of some \$840 million to Latin America. It is significant that more than 40 percent of the Bank's total authorizations in all countries during the last ten years have been made in the Latin American Republics. Since the Quitandinha Conference, the Bank has extended in Latin America almost 2½ times as much in development loans as it had extended in the similar period before that Conference.

During the last fiscal year, indeed, the Export-Import Bank concentrated even more of its development lending in Latin America. Leaving aside its loans for the purchase of agricultural commodities and livestock, and the special loan to the United Kingdom which was made on a secured basis, the Bank's total of development loans throughout the world was \$482 million during the year. Of

this amount no less than \$354 million, or 73 percent of the total, was extended in Latin America.

As more and more sound economic projects are developed, the participation of the Export-Import Bank will be intensified so as to meet expanding needs. The International Bank for Reconstruction and Development is also an important source of development loans, and the International Finance Corporation is becoming an additional significant source.

As far as we can see ahead, we believe that the adequacy of capital to meet the needs of sound development is not a question of additional institutions but the fuller utilization of those in being so as to keep pace with the expanding needs of constructive projects as they develop.

We are, as well, providing important credits to our Latin American neighbors, through the so-called Public Law 480 agreements, under which our Government sells quantities of our agricultural reserves to foreign governments for local currencies. Under these agreements, substantial portions of the sales proceeds are lent to the purchasing governments as additional sources of economic development capital. Thus far the amounts allocated for loans, or actually lent, to Latin American countries through this arrangement total about \$250 million.

In addition to the expansion of the technical cooperation program in Latin America, which was announced by the United States delegation at the Quitandinha Conference in 1954, the United States through the International Cooperation Administration continued its program of emergency economic assistance to Latin America to help resolve problems which were beyond the resources of the individual countries. During the last year, a special regional fund authorized by the Congress of the United States was the source of grants amounting to \$2 million to the Organization of American States for malaria eradication and for improved research facilities at the Inter-American Institute of Agricultural Sciences in Costa Rica. This fund was also the source of loans totaling nearly \$13 million to seven countries for projects in the fields of education, health and sanitation, and land settlement.

All of these are encouraging developments. They are further evidence of a wholesome trend in inter-American cooperation. But let us always remember that economic development in a large and complex area cannot be reduced to easy simplicity. More important than any other factor will be the individual efforts of each people and their dedication to a program of work and savings, and the orderly management of their own government and economic affairs.

Heartening as the flow of foreign capital into Latin America may be, we are all fully aware that such capital can, at the best, make only a partial contribution to the total investment requirements of an expanding economy. The accumulation of domestic savings and the application of those savings in productive activity are essential to sound economic progress. We must not lose sight of this important fact. We should study with great care the general conditions which are necessary to encourage domestic private savings and to insure that these are used productively in the domestic economy.

You and I, as ministers bearing the principal responsibility for our governments in this field, can find real encouragement in the current rate of development in our countries, but we must ask ourselves, are we justified in complacency and satisfaction? We are not. The energetic and farsighted peoples of all of our Republics demand that we find effective ways to bring to more and more millions of people throughout the hemisphere those standards of living which are attainable if we make the best use of our human and natural resources and our capital.

It is to consider ways of meeting this challenge that we are here. It will never be simple to put together our natural resources, labor, and capital so as to produce the requirements of a rapidly growing population and, at the same time, raise per capita standards. It will always be a challenging task. It requires unrelenting effort to improve technology. It requires improvement in organization and skills. It will depend upon the people and the leaders of each of our countries and their willingness to work, and save, and encourage efficiency.

The delegation from my country will approach this challenge with sincerity. We shall not underestimate the problems of the future. None of us wishes to encourage unreasonable or impractical expectations. But I hope that we all share the conviction that when the time comes for us to return to our respective countries it will be with the knowledge that each of us has made a contribution to the discharge of our historic responsibility to make of these lands a better home for all of our citizens and for our children, and a better heritage for other generations of Americans.

EXHIBIT 18.—Statement by Secretary of the Treasury Humphrey, March 15, 1957, before the Senate Banking and Currency Committee on the amendment to the Anglo-American Financial Agreement of 1945

President Eisenhower sent to the Congress on March 6 a message transmitting an amendment to the Anglo-American Financial Agreement of 1945. The President stated in his message:

"The amendment to the agreement is a common sense solution which attempts to carry out the spirit of the agreement in a way that is practical and fair to both parties.

"I recommend that the Congress enact legislation approving the action of the Secretary of the Treasury in signing the amendatory agreement on behalf of the United States."

I am here today to support the President's recommendation.

This amendment to the agreement was signed for the United States by me as Secretary of the Treasury, and for the United Kingdom by Sir Harold Caccia, the British Ambassador. It becomes effective after it has been approved by the Congress of the United States and appropriate parliamentary action has been taken.

For some time prior to 1956 the United Kingdom had informally indicated a desire that consultations take place to clarify the provisions of the Financial Agreement relating to the waiver, that is, the forgiveness, of interest. Consultations are provided for in Section 12 of the agreement.

Last December the Government of the United Kingdom, acting on its understanding of the provisions of the 1945 agreement, informed the Government of the United States that the United Kingdom claimed a waiver of the interest portion (\$81.6 million) of the December 31, 1956, payment, and set that amount aside pending consultations. There followed discussions and consideration by representatives of the United Kingdom and the United States looking to appropriate modifications of the language of the 1945 agreement, the modifications being designed to carry out the spirit of the original document.

The Anglo-American Financial Agreement was signed on December 6, 1945, and was approved by the Congress after full debate on July 15, 1946. The agreement authorized a 50-year loan to the United Kingdom of \$3¾ billion at 2 percent interest. Repayment was to be made in equal annual installments of about \$119,336,250 covering both principal and interest, beginning December 31, 1951. A settlement of lend-lease and surplus property obligations in the amount of approximately \$650 million on the same terms was also made on December 6, 1945, with annual installments of about \$19 million. The total annual installment of principal and interest is \$138.4 million. Under these arrangements the United Kingdom has paid \$348.4 million in principal and \$424.6 million in interest, representing payment in full of installments due in 1951-55, and the principal installment for 1956.

It has been evident for several years that the applicability of the waiver clauses is not now clear, because of changes in conditions since the time when the agreement was signed. On the other hand, the spirit of the agreement, that the United Kingdom should have some relief when its international exchange situation so warrants, is perfectly plain.

The proposal before you would replace the waiver provisions with a simple and clearly expressed authorization for the United Kingdom to postpone up to seven installments of principal and interest under the Financial Agreement and the related settlements. The first of any such deferred installments would be paid in the year 2001 and the others annually thereafter, in order. In addition, the December 31, 1956, interest installment would not be forgiven but would be deferred until after the other payments under the agreement have been completed. Interest would be paid annually on each deferred installment. In short, the provision for forgiveness of interest in certain circumstances would be replaced by an arrangement under which the United States would be entitled to receive ultimate payment in full of both interest and principal of the loan.

The provisions in the agreement dealing with the waiver of interest which would be replaced under this proposal are Sections 5 and 6(iii). Section 5 provides that the United Kingdom may obtain a waiver of interest when its foreign exchange income is not sufficient to meet its prewar level of imports, adjusted to current prices. Section 6(iii) specifies, however, that waiver will not be permitted in any

year unless "releases or payments" of sterling balances accumulated before the date of the agreement are reduced proportionately. In other words, in 1956, when interest was about 60 percent of the amount due us, the amount which could be paid on the remaining 1946 sterling balances due from the United Kingdom to foreign countries would have had to be cut down by 60 percent.

These provisions have not proved workable. Section 10 of the agreement noted the United Kingdom's intention to make certain arrangements with her sterling creditors with regard to the balances then outstanding. Part of the balances were to be made fully available at once and another part were to be "adjusted" or written off as a contribution by the creditors to the settlement of wartime indebtedness. A third portion of the balances was to be released by installments over a period of years beginning in 1951, the first year in which payments were to begin on our loan. Sterling balances thus scheduled would be a clearly identifiable debt and releases or payments thereon would also be identifiable. Despite vigorous efforts by the United Kingdom, a settlement of this kind did not prove feasible.

At the time the agreement came into effect on July 15, 1946, the sterling holdings of foreign countries covered by Section 6 (iii) amounted to approximately \$12 billion. They were held by many countries throughout the world. For most of these countries their sterling holdings represented their principal, if not their only, significant international assets.

The holders of these balances had felt wartime shortages of international commodities for a number of years, and looked upon these holdings of sterling as a reserve to be used to meet their heavy postwar requirements of goods and services. Consequently they were not generally willing to write them off or to freeze them in a funding arrangement which would limit annual "releases or payments" to a fixed amount.

Under these circumstances there is no practical method to determine what if any parts of "releases or payments" made in any year are applicable to the wartime balances as provided in Section 6 (iii).

The balances existing in 1946 have become confused with postwar accruals through the constant flow of foreign exchange transactions. The present sterling balances constitute essential working balances and reserves of many countries. Any significant curtailment of the availability of these balances could cause serious financial problems for the countries holding them. It is also true that the dollar value of these balances was sharply reduced by the devaluation of sterling in 1949, whereas the value of the repayments due us was not affected at all.

The provision on the prewar level of imports is also hard to apply. It expressly depends in part upon a calculation which would involve the annual "releases or payments" from the sterling balances which, as I have just indicated, are not now possible of determination. Furthermore it is subject to a number of complex statistical questions, such as the difficulty of adequately measuring price changes in a very large basket of commodities over twenty years marked by war and inflation.

The British have always emphasized, and we concur, that the spirit of the 1945 agreement was to provide relief to their currency by easing their debt servicing problem when the pound was under strain. They have repeatedly suggested that with changed conditions the complicated waiver provisions prevented any mutual understanding as to when and under what circumstances this relief would be effective. For five years, they have nevertheless made the payments in full, without claiming what they believed to be their right to a waiver.

In 1956 the United Kingdom faced a serious lack of confidence in sterling. They met this by short-term borrowing. At the same time they claimed the waiver under the agreement. We consulted with them with a view to working out arrangements to replace the waiver with a limited number of postponements. The British have agreed to give up any right to claim cancellation of interest. Although they firmly believe that they are entitled to cancellation, and that this right would be advantageous to them in the future, they have recognized the problems involved in attempting to make an objective determination under the provisions of the 1945 agreement. It is also clear that it is not practicable from any point of view to handle the sterling balances of foreign countries in the way that was anticipated.

Both parties are agreed that the desirable course is to make effective the simple postponement provisions which I have outlined. The Canadian Government has

reached the same conclusions with regard to its loan to the United Kingdom made in 1946 under terms similar to those in our agreement. If the British availed themselves of the right to postpone, they would do so simultaneously under the American and Canadian agreements.

The proposed amendment is a fair and businesslike arrangement. It comes as close to the spirit of the original agreement as is possible under the present circumstances. I urge that it be approved by your committee.

EXHIBIT 19.—Agreement between the Governments of the United States and the United Kingdom, March 6, 1957, to amend the Anglo-American Financial Agreement of 1945

Subject to the provisions of paragraph 3 hereof, it is hereby agreed between the Government of the United States and the Government of the United Kingdom of Great Britain and Northern Ireland as follows with regard to the Financial Agreement executed by them on December 6, 1945:

1. Section 5 is amended to read:

5. *Deferment of annual installments.*—(i) In any calendar year after December 31, 1956, in which the Government of the United Kingdom advises the Government of the United States that it finds that a deferment is necessary in view of the present and prospective conditions of international exchange and the level of its gold and foreign exchange reserves, the Government of the United Kingdom may defer the payment of the annual installment for that year of principal repayment and interest specified under Section 4. Not more than seven (7) annual installments may be so deferred. The first of any such deferred installments shall be paid on December 31, 2001, and the others shall be paid annually thereafter, in order.

(ii) In addition, the installment of interest in respect of the year 1956 is hereby deferred, in lieu of any right of waiver hitherto existing. This installment shall be paid on December 31 of the year following that in which the last of all other installments, including installments deferred under the preceding paragraph, is due.

(iii) Deferred installments shall bear interest at the rate of 2 percent per annum, payable annually on December 31 of each year following that in which deferment occurs.

(iv) Payment of deferred installments may be accelerated, in whole or in part, at the option of the Government of the United Kingdom.

2. Section 6 is amended to read:

6. *Relation of this line of credit to other obligations.*—The Government of the United Kingdom undertakes not to defer an installment under Section 5 of this Agreement in any year, unless it also defers the installment due in that year under the Financial Agreement between the Government of Canada and the Government of the United Kingdom, dated March 6, 1946.

3. This Agreement shall become effective when the Government of the United States has notified the Government of the United Kingdom that the Agreement has been approved by the Congress and the Government of the United Kingdom has notified the Government of the United States that the appropriate Parliamentary action has been taken.

Signed in duplicate this 6th day of March, 1957.

For the Government of the United States of America:

G. M. HUMPHREY,
*Secretary of the Treasury of the
United States of America.*

For the Government of the United Kingdom of Great Britain and Northern Ireland:

HAROLD CACCIA,
*Her Majesty's Ambassador Extraordinary
and Plenipotentiary at Washington.*

EXHIBIT 20.—Letter from Mr. G. F. Thorold, Economic Minister of the British Embassy, April 8, 1957, to the Secretary of the Treasury stating that appropriate Parliamentary action had been taken on the agreement amending the Anglo-American Agreement of 1945

BRITISH EMBASSY,
Washington, April 8, 1957.

MY DEAR MR. SECRETARY: In conformity with paragraph 3 of the Agreement of March 6th, 1957, amending the Financial Agreement of December 6th, 1945, I am instructed by my Government to inform you that the appropriate Parliamentary action has been taken in the United Kingdom.

Yours sincerely,

G. F. THOROLD.

EXHIBIT 21.—Letter from Secretary of the Treasury Humphrey, April 25, 1957, to the British Ambassador stating that Congress had approved the agreement amending the Anglo-American Financial Agreement of 1945

TREASURY DEPARTMENT,
Washington, April 25, 1957.

MY DEAR MR. AMBASSADOR: The Agreement of March 6, 1957, amending the Anglo-American Financial Agreement of December 6, 1945, has been approved by the Congress.

Pursuant to paragraph three of the amendatory Agreement and in view of your letter of April 8, 1957, notifying this Government that the appropriate Parliamentary action has been taken in the United Kingdom, the amendatory Agreement becomes effective upon your receipt of this notice.

Sincerely yours,

GEORGE M. HUMPHREY,
Secretary of the Treasury.

EXHIBIT 22.—Statement by Secretary of the Treasury Anderson as Governor for the United States, September 23, 1957, at the twelfth annual meeting of the International Bank for Reconstruction and Development and the International Monetary Fund

First I should like to associate myself with the welcome that our country has expressed through President Eisenhower and to extend my own welcome to my fellow governors and members of their delegations. This is the first time that I have represented the United States on the Board of Governors, and I anticipate an interesting and rewarding week of association with them.

This has been a very active year for both the Bank and the Fund, and my Government is gratified that these institutions have continued to serve the free world so well. It is a pleasure to have Mr. Jacobsson sitting with us as Managing Director of the Fund, after his long and distinguished career in economics and finance. Our Government is also pleased to welcome to membership four new members who are sitting with us for the first time—Ghana, Ireland, Saudi Arabia, and the Sudan. At this meeting we shall also participate in reviewing the first annual report of the International Finance Corporation, which has now made initial investments which bode well for the future of this new institution.

I approach this international part of my duties as Secretary of the Treasury with enthusiasm. Much of my business experience has been in the international field, and my association with the Department of Defense of the United States gave me a vivid awareness of the great range of problems which concern all of us.

During the year which we are reviewing, the Bank is to be congratulated on its steady and continuing efforts to help develop projects and to provide useful technical advice to its members. When we look back over the Bank's record, it is most interesting to realize that the loans of the Bank are now helping members in projects to add to their power-generating capacity throughout the world more

electricity than was available in the whole of Latin America at the time that the Bank began its development financing. Yet loans for electric power comprise only about one-third of the 2½ billion dollars that the Bank has loaned for development. Transportation has received nearly as much, and industry and agriculture have been accorded loans which together represent one-third of the total.

As the operation of the Bank continues to expand, its continuing success in raising capital on the capital markets of the world is gratifying. In the last year about half of the funds raised by the Bank through new borrowings was provided by investors outside of the United States. In a very real sense the Bank is becoming more and more international as it draws upon the savings of many countries. This is most desirable.

Also during the year important releases of capital have been made by countries in the Western Hemisphere, the Far East, Africa, and Europe. Although about \$600 million of the capital originally subscribed by members has not been yet made available for Bank lending, my Government is glad to see that the Bank has crossed the billion-dollar mark in recording subscriptions of capital which are either partly or fully available for lending operations.

The Bank's operations have taken place against a background of truly vigorous economic growth. Capital investment in general has gone forward at an even greater pace than the unusually high level of the previous year. In a number of countries a very high proportion of total output continues to be invested, as compared with earlier decades. World trade has grown very sharply during the past year. Production has expanded in industry, agriculture, and mining. Postwar gains in production and trade have not only permitted the servicing of existing foreign loans, but have enabled countries in need of development to expand their external borrowings very markedly in the past ten years.

The technical assistance which it has been providing to the member nations is a most important aspect of its activities. The Bank has given increasing help through its advisers on the technical aspects of development work, and the difficult stage of converting general ideas into bankable and well-engineered projects. It has also continued to recruit and train advisers on economic and financial policies, railway and port administration, banking legislation, and other subjects. The Economic Development Institute is also proceeding with gathering momentum.

We can all take pride in the effectiveness with which the Fund has effectively demonstrated during the past year its usefulness as a revolving source of short-term assistance to smooth out temporary disturbances in the world payments situation. During this most active fiscal year of its existence, the Fund acted decisively and expended or committed a very large amount of its resources. We can only speculate as to the position in which we might now find ourselves if the Fund had not been in existence, and had not been able to act as it did. We believe, however, that the active and vigorous course the Fund pursued has been an important factor in maintaining the momentum of world trade and prosperity during the past year. Through the breathing space and the reassurance in the short-run provided by the Fund, the opportunity has been given to effect the necessary longer-term adjustments, without a relapse into throttling restrictions on international financial and trading transactions. The Fund will need to reconstitute its resources, through repayment of the recent drawings, in convertible currencies, as it did in the years before 1956. In this way its revolving character will be maintained, and it can meet new situations if and when they arise again.

At the same time the Fund has continued its steadfast efforts to promote stronger financial structures and improve exchange systems, through its technical advice and consultations and its financial participation in stabilization programs. Increasingly the Fund provides advice to its members on various aspects of financial problems such as central banking, money markets, and public finance, as well as the complexities of exchange policies *per se*. In all of its consultations with members, and in the technical advice it gives to members, the Fund emphasizes the essential character of financial stability. It is a good and proper thing that the policies of our two institutions in the use of their resources are keyed to the progress which members make in arriving at economic and financial stability, both in their economies and in their external transactions.

Although we can look back upon the previous year, and take a great deal of satisfaction in the expansion of production, world trade and world investment, we cannot ignore problems and difficulties which remain before us. One matter of continuing concern to us is the effect of inflationary pressures upon our econo-

mies. Most of us are heads or senior officials of treasuries and central banks and our institutions bear a heavy share of responsibility for the strength of the currencies of our countries, the solvency of our governments, and the soundness of our financial systems.

Inflationary pressures, as President Eisenhower stated and as the chairman reiterated, are, as of now, world-wide. Nearly everywhere costs and prices are rising and demands for capital press heavily on the supply of savings. We are all agreed that these inflationary pressures must be resisted. Of necessity, many difficult and troublesome decisions must be made if we are successfully to encourage enduring values. In the United States, though the rate of inflation has been less than in many countries, we are exerting our continued efforts to deal with the situation. Our cooperative action as members of the Bank and Fund can mutually reinforce our individual efforts in the continuing vigil we must keep to attain economic growth along with, and based on, sound money.

For this reason this morning, I want to emphasize the interdependence of all of us upon the success of each of us in maintaining prosperity based on money of enduring value and all that this means in better, fuller lives for our people. Every governor at this meeting is concerned with maintaining a sound currency for his country's economy. There is no other successful basis for durable, lasting, economic growth in any country.

The costs of inflation are heavy and the benefits of stability are great. Inflation destroys existing savings and discourages new savings. Money markets become unstable; many businessmen, large and small, find it difficult to borrow; real estate becomes the favorite investment; and income distribution becomes more uneven and more inequitable. Such economic growth as occurs is frequently poorly balanced so that resources are wasted in half-completed or otherwise inoperative projects.

In the United States, our progress in achieving the objectives of a sound currency and an expanding economy has given us both satisfaction and concern. In this country, as in most of yours, we have had great prosperity during the past year. Our prosperity, however, has been accompanied by some rising prices. These price advances indicate, among other things, that we have been trying to invest more than we have actually saved out of our earnings.

Even though we feel that we are gaining in the battle of inflation in the United States, we cannot relax our efforts for one moment. As new ideas appear, we must consider them soberly. As new facts appear, we must analyze them carefully. We must take every precaution to assure that we are doing everything that is humanly possible to keep inflation down and to keep America growing and strong.

We believe that economic growth can march hand in hand with soundness in monetary values. In my view, this must be the objective of our separate national efforts to meet the problems that will constantly confront us.

A basic goal of the nations represented in these meetings is the development of mutually beneficial trade among the free nations of the world. This expansion of trade is not to be had merely for the asking. It can be based only on competitive conditions of price and supply.

We believe that one of the most important things that the United States can do to further world trade is to maintain the American economy at a high level with production expanding, and at the same time avoiding inflation. Our expanding production will require larger imports which will be beneficial to the economies of other countries, which, in turn, can buy our exports.

None of us thinks of trade as an end in itself. Trade is important both for economic reasons and mutual understanding. The ultimate objective is to improve the lives of people and their standards of living. And this is why we must all follow policies directed toward maintaining our own stability and our own prosperity, which will be beneficial in the long run for all the free peoples of the world.

The year that has passed since our last annual meeting has been marked by a sharp expansion in world trade. The expansion in world trade has not been evenly distributed throughout the trading countries, partly because of the differing intensity of inflationary pressures among the various countries. As a result, substantial deficits in payments positions have developed in some areas, while others have recorded significant increases in their international reserves.

The credit facilities of the Fund have been called upon to enable some members to gain time to adjust their international accounts. It is noteworthy that these adjustments continue for the most part to be pursued by broad measures of

fiscal, monetary, and economic policies that are designed to strengthen the fundamental position of the currency and the economy, rather than through measures which restrict world trade and isolate a country's economy. This, we are convinced, is the right course.

We are living in a world subject to many changes in the currents of international payments. Recent developments in our own international accounts represent a decided change from the position which prevailed during the six months October 1956 through March 1957.

Considerable attention has been drawn to the fact that during that six-month period the transactions of the United States with the rest of the world resulted in losses of about one-half billion dollars in the gold and dollar position of the rest of the world.

Let us remember that in the six years beginning with 1950, and through the first three quarters of 1956, United States international transactions had been marked by continuous gains of gold and dollar assets by the rest of the world, amounting in all to nearly \$13 billion. Preliminary figures for the second quarter of 1957 show a sharp change from the first quarter results, and a return to the earlier situation in which the world was gaining dollars. Our exports of goods and services continued to exceed our imports by about the same margin as in the first quarter. There was, however, a very large increase in private United States capital investment abroad. The result of this record movement of private United States capital and the rest of our international transactions in this quarter was that the rest of the world gained from us almost \$200 million in gold and dollar assets.

As the President stated, we are all fully aware and recognize the importance of a helping hand, particularly to underdeveloped countries, although I am sure that we all agree that in normal circumstances the well-being of any nation depends primarily on a sound domestic economy. If this economy is to grow at a steady rate, it must provide the conditions in which capital can be invested to finance the construction of plant and equipment, power and tools, and all the thousands of other things which make for production and jobs, and the advancing productivity out of which compensation can be paid without inflation. Both domestic accumulation of capital and foreign investment can be encouraged by sound fiscal policies which give the investor assurance that his capital will be preserved and that it can earn income for him.

In the making of our economic decisions, each of our countries in the long run should strive for the maximum expansion of its productive capacity through the investment of its own savings. As conditions become more attractive, private investment would be expected to provide international financing with less dependence on the budgets of any of the countries of the free world. The burdens of our respective taxpayers and the consequent restraints upon each of our budgetary outlays constantly remind us that there do exist limitations upon our several abilities to meet government expenditures in the domestic and the international fields.

It is well for us to remember that credit can be generated by various means which could impose undesirable consequences, but true capital must be saved by the hard process of sound planning and careful expenditures.

All these things go hand in hand. The well-being of the peoples of the world is dependent upon the development of sound economies in the individual countries. In this effort, the nations of the world are interdependent, for the accumulation of capital, the flow of investment, and the expansion of trade are matters of common concern.

Furthermore, the attainment of the maximum results and benefits requires the concerted efforts of the governments of the various countries and these institutions which are meeting here today. As we have seen, at the base of it all must be a pursuit in each of our nations of those monetary and fiscal policies which will result in healthy, stable, and growing economies. Only then can we secure for our peoples more and more of the better things of life.

EXHIBIT 23.—Statement by Under Secretary of the Treasury Burgess as Temporary Alternate Governor for the United States, September 24, 1957, at the twelfth annual meeting of the International Monetary Fund

Let me join with others in expressing great satisfaction with the report of the Fund which we have before us, with its completeness and the quality of its analysis of the problems with which we are faced.

Let me particularly express our appreciation for the brilliant address given this morning by Per Jacobsson at the conclusion of his first year with the Fund. I think we all will carry home with us a new understanding of the problems we have faced and a new faith in our power to solve them.

I was particularly impressed by his analysis of the European situation, and, for my country, let me also express very great satisfaction at the very firm statement that has been made by the representative of the United Kingdom and the correspondingly very helpful statement by the representative of the Republic of Germany.

This has been, as has been said, a very active year for the Monetary Fund, as the report and the address of the Managing Director have amply set forth. The Fund's actual transactions have reached an alltime high, and it has also increased the amount of its standby arrangements to a record level. If there were any doubts before, certainly now the Fund has amply demonstrated its great value to the member countries. It has shown its capacity to support confidence in currencies at crucial moments, and to meet difficult situations swiftly, effectively, and quietly.

That the Fund could meet the challenge of the events of the past twelve months is not an accident. It is due to three main facts. The first is that the Fund established a body of principles to guide it and the members both in the devising of policies and in the use of its resources. The second is that the Fund patiently acquired experience during the quieter years of its existence. The third is that through analysis and through consultation with members, the Fund has assisted members in devising sound policies and programs of action.

First, a word about consultations. The Fund's consultations with its members during the past year have carried missions to many countries. On the occasion of these visits, either as part of the annual consultations or as the result of special requests, the Fund has had an opportunity for frank discussions with the responsible officials of the member countries. It has given sound advice, which in a great many cases has been followed with good results.

A number of countries have undertaken general programs of financial stabilization or exchange reform with the Fund's advice. Others have taken less conspicuous, but nonetheless significant, steps to improve their international position by domestic measures or by simplification of exchange structures. Standby arrangements with the Fund have given several of these countries effective support.

The Fund report ably summarizes the financial situation of the member countries. It notes the general increase in gold and dollar reserves on the part of members, and also shows that this accretion of monetary reserves has not been uniform, and that some countries have lost reserves. The Fund report notes that in 1956, other countries gained \$545 million in gold and official dollar assets in transactions with the United States, compared with over a billion in the preceding year. I should like to point out, however, that, by making the comparison in terms of official holdings, the report does not include the dollar holdings of foreign private banks, businesses, and individuals. These private holdings, in the form of bank balances or short-term investments, are available for purchasing goods and services from the United States. As exchange restrictions are relaxed, presumably a larger share of dollar holdings will appear in private accounts. This factor should be given its proper weight in surveying changes in the world balance-of-payments picture, particularly as they relate to dollar reserves.

If private holdings are included, total foreign holdings of gold and liquid dollar assets increased in 1956 by about \$1 billion. In addition, foreign direct and portfolio investment in the United States increased by over a half-billion dollars, without taking into account unrecorded capital movements that form a part of the sizable residual item in our international accounts. Since the overall figures reflect reduced holdings of about \$600 million by international institutions, it would appear that foreign countries actually increased their total gold and dollar assets in 1956 by more than \$2 billion.

Now just a word about the world economic situation. Increased production and high levels of employment of resources in labor and materials are the principal means of improving living conditions throughout the world, a fundamental purpose of the free nations as well as of the International Monetary Fund. But, as we all have discovered, prosperity brings difficult problems, as do periods of industrial stagnation. The most challenging present task is to reconcile the benefits of prosperity through high levels of production and employment with monetary and price stability, without which many of these benefits will be dissipated.

through a shrinking value of money. Inflation, as has been said many times in these meetings, destroys confidence in the future value of currencies, which is the essential basis of all savings. Even now, savings have lagged behind the demand for capital. That every country should strive to push economic development as rapidly as practicable is fully understandable, but what is needed is a steady economic growth based upon noninflationary finance.

The United States is resolved to preserve its economy on a sound basis. This is not for us alone, but for the rest of the world, which needs to know that this country will continue operating at a high level and with financial stability. It is our judgment that there is no contradiction between these two objectives. We have tried to deal with our inflationary trend by those well-known devices of a budgetary surplus, or a small one, and a tightening of credit rates and interest rates, in response to the increasing demand for borrowed capital.

The United States is resolved to check inflationary pressures existing in its economy. We are equally committed to the preservation of our international gold bullion standard. The dollar has traditionally been firmly linked to gold, and it is our policy to keep it firmly linked to gold at \$35 an ounce.

Now, a word as to the use of the Fund. In the past year there have been balance-of-payments deficits on the part of some of our members related in part to the underlying inflationary trends which have been discussed so well in the Fund report, and in part to unusual events. At this juncture, the use of the Fund's resources provided an important support to the reserves of these countries which were in difficulty.

As noted by the Managing Director, the Fund's capacity to meet the requirements of this past year depended in part on repurchases of drawings of previous years. The Fund has been a revolving fund, and its future vitality depends on its continuing to have that character. The Fund and its members may properly take pride in the record of Fund repurchases. By 1956, most of the drawings which had been outstanding from previous years had been reversed. The results showed that the Fund's resources were revolving.

Vital to the Fund's success has been the establishment of agreed policies regarding currency purchases and repurchases. The so-called gold tranche is freely available, and the Fund has been liberal in extending to members the use of the first credit tranche, if they are taking reasonable steps to deal with imbalance. But the Fund has rightly insisted that larger drawings require substantial justification in the form of decisive programs of action. The Fund's resources are thus available to assist countries to take those measures which are necessary to bring about an effective equilibrium in their international accounts, particularly countries undertaking comprehensive programs of financial and exchange reform.

We look back with satisfaction at the development of the Fund over the past few years. We are sure that the Fund will continue to make an effective and important contribution to international economic cooperation.

May I add a personal word. This is the fifth meeting that I have sat here when the Fund report was being discussed. This is the last in which I shall sit here representing the Treasury, for I am going in a few days to Europe to be the representative of my country on NATO and the European Economic Organizations.

Let me say that I have appreciated enormously the meeting with this group of people representing this wide range of countries, and with the cooperative point of view which I am sure means a great deal in the future of monetary and economic affairs in the world.

I believe that one can go to a new type of economic cooperation greatly strengthened by the experience of the Fund and the Bank, which has demonstrated, as I believe never before, the effectiveness of international cooperation.

EXHIBIT 24.—Statement by Under Secretary Designate Baird, September 27, 1957, at the first annual meeting of the International Finance Corporation

On behalf of the United States Government I should like to say that my Government has noted the progress of the International Finance Corporation with great interest and encouragement. We believe the Corporation is to be congratulated on having made such a diversified and hopeful start in its investments.

Now that the practical experience has begun to point the way, we hope that in the coming year a much larger number of projects will be found suitable for financing by the Corporation and will be brought to fruition.

Your address, this morning, Mr. President, offered an unusually clear and impressive statement of what may be expected from private enterprise in the development of our member countries. I am sure if the principles which you outlined are appreciated and followed, we can look forward to a sound and continuing growth in the standards of living of the peoples of the free world.

EXHIBIT 25.—Press release, July 31, 1956, announcing the temporary placing under licensing procedure of the assets in this country belonging to the Suez Canal Company and the Egyptian Government

The Treasury announced today that it had temporarily placed under licensing procedure the assets in this country of the Suez Canal Company and Egyptian Government pending determination of the ownership of these assets and clarification of the existing situation. All transactions with respect to such assets will be subject to Treasury license. This action does not in any way affect private Egyptian funds.

EXHIBIT 26.—Press release, August 3, 1956, announcing the issuance of a General License under the Egyptian Assets Control Regulations

The Treasury announced today that it had issued the following General License under the Egyptian Assets Control Regulations:

"Section 510.502. *License authorizing current transactions.* Except for transactions with respect to any funds or other property which, as of the effective date of the Regulations, were blocked thereby, all transactions subject to Section 510.201 (the original order) are licensed, provided that any payment by or on behalf of any ship owner or ship operator subject to the jurisdiction of the United States made in Egypt or to the Government of Egypt or any instrumentality thereof with respect to charges in connection with the transit of the Suez Canal is licensed only if accompanied by a statement that the payment is made 'under protest and without prejudice to all rights of recovery or otherwise.' "

EXHIBIT 27.—Press release, December 15, 1956, on the signing of an exchange agreement between the United States and Bolivia

Under Secretary of the Treasury W. Randolph Burgess, the Bolivian Ambassador, Señor Don Victor Andrade, and the President of the Central Bank of Bolivia, Dr. Franklin Antezana Paz, have signed an exchange agreement designed to support a comprehensive Bolivian program for abolishing trade and exchange controls and attaining increased economic stability.

The Bolivian Government proposes to introduce a free exchange market in which the value of its currency unit, the boliviano, will be determined by basic supply and demand forces; it proposes to discontinue all foreign exchange and import controls. The Bolivian authorities will operate a stabilization fund to minimize exchange rate fluctuations arising from temporary or erratic influences, but not to resist fundamental changes dictated by market forces.

The Bolivian Government has announced supporting domestic measures including increased taxes, strict control of bank credit, and reduction of expenditures by the government and governmental agencies.

In connection with these economic reforms, the Bolivian authorities have entered into a standby arrangement with the International Monetary Fund. Further important support for the Bolivian stabilization effort will be provided by the International Cooperation Administration which has arranged to allocate a specific portion of United States aid to Bolivia for direct support of the Bolivian stabilization effort.

The Treasury Exchange Agreement supplements these arrangements. It provides that the Bolivian authorities may request the United States Exchange Stabilization Fund to purchase bolivianos up to an amount equivalent to \$7.5 million, should the occasion for such purchase arise. Bolivia would subsequently repurchase for dollars any bolivianos so acquired by the Treasury.

EXHIBIT 28.—Press release, February 15, 1957, on the signing of an extension of the Stabilization Agreement between the United States and Peru

Under Secretary of the Treasury W. Randolph Burgess and Ambassador Fernando Berekemeyer of Peru today signed an agreement extending for a period of one year the Stabilization Agreement between the United States and Peru.

The agreement extends until February 17, 1958, existing arrangements under which the United States Exchange Stabilization Fund undertakes to purchase Peruvian soles up to an amount equivalent to \$12.5 million should occasion for such a purchase arise. The agreement is designed to assist Peru in maintaining external trade and payments substantially free from governmental restrictions and avoiding unnecessary fluctuations in the rate of exchange.

The International Monetary Fund has also announced extension of its standby arrangement with Peru under which that institution agrees to make available up to \$12.5 million for the same purpose. The two agreements therefore provide a total of \$25 million in standby resources for Peru.

EXHIBIT 29.—Press release, April 1, 1957, on the signing of an extension of an exchange agreement between the United States and Chile

Under Secretary of the Treasury W. Randolph Burgess and Ambassador Mariano Puga of Chile today signed an agreement extending for a period of one year the exchange agreement between the United States and Chile originally instituted a year ago.

The agreement is designed to assist Chile in its continuing efforts to achieve economic stability and freedom for trade and exchange transactions. Under the agreement, the United States Exchange Stabilization Fund undertakes to purchase Chilean pesos up to an amount equivalent to \$10 million, should the occasion for such purchase arise.

The International Monetary Fund has announced renewal of its standby arrangement with Chile in the amount of \$35 million and the Treasury is informed that certain New York banks have renewed credit lines amounting to \$30 million, thus continuing total standby facilities of \$75 million for Chile.

Addresses and Statements on General Fiscal and Other Policies**EXHIBIT 30.—Statement by Secretary Anderson, July 29, 1957, on assuming duties as Secretary of the Treasury**

I take on the duties of Secretary of the Treasury with humility, for I am aware not only of the great honor of the office and the tremendous responsibility involved, but of the challenge I face in succeeding such an able and outstanding man as George Humphrey.

The most I can do is pledge that I will do my utmost to serve as Secretary of the Treasury in the continued best interest of all the people. It would be conjectural for me to try to say precisely what I will or will not do, or exactly how I will try to meet situations which may arise. This will depend on what will best contribute to the general welfare of our country and our economy in light of circumstances prevailing at any given time.

The continued health of our economy is of vital importance not only to the individual well-being of our people, but to our continued security in the world. We must do everything which will help maintain that economic well-being.

I am particularly pleased to have the continued assistance of such a fine and able team at the Treasury. Their experience and dedication will be of enormous value as I join the team to work collectively with my associates for the best interests of our country.

EXHIBIT 31.—Remarks by Secretary of the Treasury Humphrey, October 8, 1956, before the Economic Club of Detroit, Detroit, Mich.

I want to talk to you for a few minutes today about something that almost everybody seems to be talking about—tight money.

We can't have high prosperity, abundant jobs at high pay, high confidence, high spending, and wide general expansion with cheap, unlimited money and a stable cost of living all at the same time.

Our problems today are the problems of great prosperity. They are nonetheless real and difficult and must be courageously faced if we want to keep true prosperity in America—prosperity that will continue and stretch forward into the future.

Let me tell you why. And let's start, as Al Smith used to say, by taking a look at the record.

Let's go back to 1939, before the last world war, and come down to today. In the period of about six years, from 1939 through the end of 1945, the year the war ended, the value of the dollar in goods that it would buy was reduced from 100 cents to 76 cents, a reduction of 24 cents or about one quarter. During that period interest rates, by deliberate design of the administration then in power were artificially held at low levels.

During the next seven years, from the end of 1945 through 1952, covering the postwar period and prior to the advent of this administration, and when we were supposed to be returning to a peacetime economy, the value of the dollar in goods that it would buy was further reduced from 76 to 52 cents or another 24 cents, a reduction this time of about one third. And, during most of that period, by deliberate design of the administration then in power, interest rates were still being held to a low level.

And all that time the cost of living was steadily increasing until there was a total increase during those 13 years of the previous administration of almost 100 percent in the cost of living while the dollar was cut nearly in half.

Since the election of this administration from 1952 right up to the present day, almost four years, the value of the dollar in goods that it would buy has been reduced from 52.1 to 50.9 or about 1.2 cents. Interest rates have been allowed to fluctuate naturally, both up and down, in response to the extent of demand.

The record is all too clear. The evidence of the actual facts is too convincing. While we had arbitrarily cheap and plentiful money the cost of living doubled—the value of the dollar was cut in half. Whereas with money advancing or declining more freely in response to the pressure of demand, we have enjoyed a perfectly remarkable stabilization in the cost of living and as sound a dollar as can ever be had.

There is plenty of talk nowadays of a new record high in the cost of living but again lets look at the record. From 1939 through 1952, under the deliberately inflationary policies of the previous administration, there were 30—yes 30—separate times when new record highs in the cost of living were set and the cost of things for living rose from \$1.00 to \$1.92. The cost of those same things today is at a record high at \$1.96½. But the real point is that of the total increase of 96½ cents over the whole period 92 cents came during the 13 years under the inflationary policies of the previous administration as compared with only 4½ cents in nearly four years under the stabilizing policies of the administration now in power.

A new record high now, yes, but built up by 92 cents under deliberate inflation in 13 years and held down to only 4½ cents by a reversal of policy to stabilization during the 4 years just past.

No more effective demonstration of the difference between the two policies in their effect upon the lives of the American people could possibly be made.

Now is there any reason why we should not learn from that hard experience? Is not this demonstrated fact of the past a reliable guide for the future to show us the pitfalls to avoid and point the course that we should follow if this great prosperity, if these great good jobs, good pay and good times are to endure and further sweeping increases in the cost of living are to be held down?

I can give you no lecture on abstract economics, but I can call your attention to a few common sense basic facts.

Our problem is the problem of prosperity; to continue to live successfully and permanently with prosperity, in peace and freedom.

It may be even tougher than the problems of adversity, for when you are in trouble the whole idea is to get it over with—to make a change. What we have now, we want to keep. We want good times to continue. We want to have exactly the same problem next year, the year after, and as far ahead as we can see.

The problem of learning to live with prosperity, at peace, and in the freedom which we Americans regard as our birthright, is not alone the problem of government.

It is equally your problem—the problem of every American. We cannot place upon the Government the exclusive concern with the difficulties—we might call

them the happy difficulties—that arise when you try to make prosperity last in a time of peace and in a free society.

It might be called the problem of “too much all at once.” But there is a simpler and older name for it: the problem of supply and demand. We are prosperous, and that means we are working very close to the limits of our manpower and our materials. We are at peace, so there is no place for wartime controls or powers to ration work and materials. We are free and we want to stay free, so we do not want to dictate wages, prices, or rents. We do not want to arbitrarily allocate materials and labor by Government order or decree.

But just because we are prosperous—in peace and in freedom—because the public in general has great confidence in the future, we all want to buy and expand. The public wants to earn more and spend more, all at the same time. The demand for money is unlimited, but the supplies of the things money buys—goods, materials, and the labor, skill, and services of people—are limited. We have neither the necessity of war nor the desire of dictatorial government to ration those things. That being so, we must keep the supply of money from growing beyond the supply of people and materials. That is the only way to avoid rapidly rising prices and inflation while maintaining prosperity in company with both peace and freedom.

In years gone by the Government, deliberately encouraging inflation, arbitrarily held the price of money down.

The cost of living doubled. Our debt went up by a large amount, partly because the prices of the things the Government was then buying went up so much in price. And all that extra debt we still have with us to pay with hard work and the sweat of our brows for the errors of the past.

Today a very high percentage of all the people of the United States are employed, and the goods of the United States are being largely absorbed. Materials in most cases are in full demand and in some cases there are even shortages. Except for a very few scattered soft spots, the situation by and large is one of great prosperity straining the Nation's resources.

When as now, widespread confidence in the future is so high that we seek to go further and faster than that, what happens? We start drawing either manpower or scarce materials away from each other. That is going on today. If you don't think it is, do what I did the other day. Take the Sunday editions of half a dozen major city newspapers across the country—including Detroit. Throw away all of the pages except those pages which have to do with advertising by various concerns to hire people, and in these half dozen papers those pages will be several inches thick. Pretty nearly everybody in business is advertising in some paper to employ some man for some company other than the one he is now working for.

The same thing is going on with many materials.

There has to be some governor, some restriction, in this situation, otherwise the price of materials and goods keeps going on up without producing any more goods, and we all just pay more for the same.

If this big demand for money is used to expand sales and plant and capacity and activity when expansion only means hiring more people and trying to get more goods than there are, then the price of goods and services will rise with no corresponding increase in either goods or productivity.

But, if the price of money rises it will tend to keep the demands for expansion in line with the supply of our resources.

And, it is easier to contract the price of money when it has served its purpose than it is to contract the price of goods and services. You don't contract what you pay for services, goods, and materials without some very serious hardships resulting. But you can contract the price of money without hurting people. That is why it is the best economic governor. It protects jobs, prices, and wages as it works.

We don't want to go the “easy” money road, the old familiar road to inflation. We don't want to go up only to come down. We want to let natural corrections and restraints operate freely. The Government is not putting up the price of money. It is the accumulated demands of people and business that is doing it.

As more and more people want to expand and use more money to do so, the demand for money increases and the price rises. Now if the Federal Reserve Board neither arbitrarily increases the supply nor arbitrarily holds down the price, interest rates naturally rise. As they rise, and money costs more, some people refrain from so much expansion and the demand for money decreases. As supply again catches up with demand, the price again begins to decline and the pressure on the cost of living is reduced without an excessive advance hurting all the people.

There are other sources of pressure that must also be taken into account. The Government of the United States collects and spends so much money that it has a tremendous effect on the economy.

In this administration we have reduced our expenditures about eight billion dollars. At the same time we cut taxes by nearly the same amount as the money we saved. In cutting taxes we gave back to the public to spend for themselves as they thought best the money we saved in Government spending. This helped to make jobs in private industry for those whose livelihood had formerly depended on Government spending. They helped to produce more goods for all the people to buy, whereas when those Government employees were working for the Government they didn't produce any goods that the rest of the people could purchase.

Today we are spending in the neighborhood of forty billion dollars for military goods and services. That forty billion dollars is money that goes out in wages and for goods that turn into wages. It makes that much spending power in the country. Yet there isn't anybody involved in that whole forty billion dollars who makes goods that a consumer can buy. Consumers don't buy tanks or bombers.

Defense spending is necessary, and we will continue to spend on defense every penny and every billion we need to spend to provide the Nation with security. But the economic significance is that the Government in its own fiscal policy is putting a great pressure on the market for goods by putting that much money into this spending stream and not putting added goods out for the people to buy.

That brings us to the next point, the Government's policy with respect to debt and savings. When interest rates are kept down arbitrarily, not only is the incentive to save money reduced, but the fear of inflation helps to create a lack of capital—a lack from which the whole world is suffering.

We are short in this country and in the whole world of capital—that means savings.

We have been through a period of years when there was little incentive to save. In the first place, the interest rate was held down so low that there was very little return. There was no natural incentive. In the second place, as the value of the dollar declined and as inflationary pressures took hold, people were afraid to save a dollar because it was constantly declining in value. As I have shown, six years later it was worth only seventy-six cents and in 13 years it went down to only fifty-two cents. So the lack of incentive resulting from low interest and the fear of inflation first took away the reason to save and, as it went on, it actually kept people from saving. On top of all this some of our public leaders then scoffed at saving as outmoded and old fashioned and urged spending and more spending, regardless of increasing debt or adequate income.

Saving money and thereby creating capital is no mystery. It simply means that some one must deny himself the pleasure or desire to spend some part of his pay check rather than save it. Part of his income he must properly spend but part can be laid away for the future if (1) there is sufficient incentive to do so because of a fair return in interest or dividend, and (2) if he feels safe in the continuing value of his savings. Most all Americans are saving something today through purchase of insurance, payments for pensions, the purchase of Government bonds or in a savings account or in the many other ways to do so. As interest rates rise all those savers benefit. But if inflation sets in and the dollar declines they all are robbed of part of their savings. Inflation is the great thief. The young, the old, the sick, the small saver, all those least able to protect themselves, are the helpless prey of wicked inflation. It must be held in check.

We must also create more incentive for more saving, to have more capital available for expansion. We must have it because we in our growing country have a million new people every year looking for new jobs. Unless someone can invest from ten to twenty thousand dollars a piece for them, they cannot get a job in which they can earn the kind of wages now being paid in America—wages 12 percent or more above those paid in 1952. Such wages can only be paid on the basis of high productivity, the kind of productivity that comes only from skilled workers using highly productive machines and power. Those machines and that power cost money. We can only have the plants, the machinery, the power, the transportation, and all the rest that goes to make up our modern industrial and farm life by saving and investing. Inflation kills the goose that lays that golden egg.

Without savings and investments you cannot get high productivity. Without high productivity you cannot have high wages. Without high wages you cannot have the standard of living we all want. Inflation stops the whole process. That is something we all need to understand. The best known way to help control it is a flexible price for money, because a flexible price for money is a governor that

operates to hold down the cost of living and make prosperity last, in peace and in freedom.

There can be some differences of opinion as to timing and the degree with which this process of using the price of money as our economic regulator takes place. But the process is a sound, right step in the direction of sound money; a sound economy; and continuing to have the people of this country working at more and better jobs at higher pay and with ever higher standards of living for all the people.

Now, I am not here this noon to make a partisan speech. But this all leads me to some vital conclusions about true prosperity. There are two roads we can travel.

The past performance, the platform and the campaign speeches of the opposition party show clearly what they propose. They show one road.

They propose cutting taxes regardless of the amount of the Government's income. At the same time they propose new Government spending programs costing many additional billions of dollars. This is the policy of deliberate inflation and must result in a return to a budget unbalanced by several billion dollars with all of the inflationary pressures that would create.

They profess concern about inflation. At the same time they attack all the things which are our best defense against inflation.

They present a glaring contradiction. They cannot be for the principle of sound money and all that it means to continuing prosperity while they are against the things which make sound money possible.

The record of their past and their promises for the future are filled with concessions to the easy way which will destroy continuing prosperity.

The program of the Eisenhower Administration is exactly opposite. I am proud to put that record before you. It shows the other road.

The evidence of our present high prosperity is abundant wherever we turn.

We have record high employment—more than 66 million people working at good jobs.

We have record high wages.

We have production of goods and services exceeding all previous records.

And we have this high prosperity—in peace—with but little change in the cost of living during the past four years. The money of our people during this administration has stayed sound, because our Government has been doing the things we said we would do in fiscal and monetary policy to stimulate confidence and incentive; to keep money sound.

And what of our present promises? We propose to continue those things which have worked so well in the recent past.

We propose to continue to spend only so much as is required for security and necessary services to the public.

We propose to keep our budget in balance.

We propose to cut taxes—not out of borrowed money which is inflationary and only a means of passing our debts on to our children—but whenever our budget surplus permits, when we can look ahead and see a Government surplus of income over spending large enough to pay for a tax cut which can be spread fairly among all our people.

The record shows that the policies we have followed for nearly four years have been successful. We propose to continue them for the good of every American—to have true prosperity with peace and with freedom.

EXHIBIT 32.—Statement by Secretary of the Treasury Humphrey, January 16, 1957, in support of the President's Budget Message for the fiscal year 1958

In support of the President's Budget Message for the fiscal year 1958, which has just been presented to the Congress, there are several recommendations which I want particularly to emphasize.

The President has often said that the basic fiscal problem confronting this Government is how to meet the necessary costs of an adequate defense and other governmental activities and, at the same time, furnish the incentive necessary to a thriving, growing, and reasonably stable economy. Failure in either direction could well mean the gradual loss of our freedom and of our way of life.

During the past few years the greatest strides in history have been taken in the development of modern lethal weapons which can literally destroy great cities and whole areas of population. The methods are completely new. They are

extremely costly. They are shared to some degree by two great powers with wholly different ideologies.

In this state of affairs, we must remain both militarily and economically strong. To do so, the extremely high cost of the new weapons demands that we be highly selective and quick to abandon the expense of obsolete methods and equipment.

No one can say exactly how much we can continue to spend for defense and all other governmental services without seriously weakening our economy. While military manpower and equipment protect our lives and our land, they make virtually no addition to the permanent wealth of the Nation—to new plants and machinery, new mines, new farms, new homes, or to new jobs for peacetime living.

The billions of dollars spent annually by the Government for military equipment and manpower go into the spending stream but are not matched by an increase in the production of peacetime goods, so that heavy pressure is put on the price of goods which all the people must buy. This imbalance makes it more difficult to keep the cost of living within bounds. Monetary measures alone may not be sufficient for this task unless the Federal Government makes reductions in its manpower and in its purchases which will help to increase the production of additional peacetime goods and so help to hold down prices. Moreover, the funds so released will then be available to build up the capital needed to help create the new jobs, to build the new schools, and the countless other improvements required in this growing country of ours.

Our reduction in Government expenditures three years ago made possible the greatest tax cut in history, and stimulated the surge of national confidence which has created the prosperity of the past two years, the greatest we have ever known.

These reductions in Government spending also helped to give greater stability to the cost of living than we have ever had in a period of such prosperity. The cost of living has recently moved up somewhat in spite of monetary measures to restrain it. Governmental expenditures and the number of Government employees are now increasing. This trend should promptly be stopped.

This administration has a record of gratifying achievements in economical and efficient management of the Federal Government. The civilian working force of the Government has been reduced by over 234,000 persons during the past four years; the accounting and management procedures of Government have been vastly improved; over 400 Federal enterprises competing with business have been abolished; surplus real estate worth \$366,000,000 has been sold and turned back to local tax rolls. These are but a few specific illustrations of our progress. We all must work together to widen and enlarge these accomplishments.

Long hours of painstaking and conscientious work have gone into the preparation of the budget for the fiscal year 1958. All Departments of Government should be commended for the efforts they have made.

The President in his state of the Union message has just said:

"Through the next 4 years, I shall continue to insist that the executive departments and agencies of Government search out additional ways to save money and manpower. I urge that the Congress be equally watchful in this matter."

To accomplish these essential objectives we should now all go to work, not simply to keep within the limits of this budget, but to make actual and substantial reductions through improved efficiency of our operations during the period of the next 18 months which this budget covers. To make this possible, every department of Government must with vigor and determination modernize and streamline their services. The management of every service must be conducted with the possibilities of economy always in mind.

The President has said that the Federal Government alone cannot successfully combat inflation without the earnest cooperation of all individuals and groups of our citizens. As emphasized in the State of the Union Message, business leaders and labor leaders, through their wage and price policies, must make their full, constructive contribution. All other groups must also contribute to the common effort.

First: We must seek the full cooperation of the public generally in limiting its demands upon the Federal Government for only essential Federal functions, especially at this time when the economy is operating at such a high level. Requests should be avoided for services or assistance which properly can be supplied by States or local communities or by the citizens themselves.

Second: We must request the support of the Congress to restrict the appropriation of public money to amounts within those recommended in the Budget which may be required to carry out the necessary Federal functions.

Third: We must require every department and agency of the Government to take vigorous measures, without harm to either security or service to the public, to see that actual expenditures are kept well within the present budgeted figures between now and the end of the next fiscal year and, as the President has said, "search out additional ways to save money and manpower."

Fourth: We must plan for the 1959 budget, giving urgent attention to making further reductions both in Government employment and in expenditures where these savings will not lessen our security or the quality of the necessary services rendered to the public.

If this program is adopted and resolutely followed, we can, a year hence, give consideration not only to some further payment on the public debt but also to further tax reductions. This, of course, must be conditioned upon continuation of our present prosperity. Just when and how a tax reduction should be made can be determined only when it is known how well these conditions have been fulfilled. In any event, any such tax cuts must provide relief so that every individual taxpayer may have some benefit. In the meantime, and until this is accomplished, we must continue to oppose any revision of the tax laws which results in any substantial loss of Government income.

This program will provide more effective control of our spending. It will become a desirable restraint on inflationary pressures through release to the private economy of added manpower and money which, in turn, can open the way to lower taxes, with a sharper spur to incentive and greater opportunity, and production, and more and better jobs.

This is a program of genuine promise. I believe we must push it vigorously and at once.

EXHIBIT 33.—Extracts of remarks by Secretary of the Treasury Humphrey, April 18, 1957, before the National Industrial Conference Board, New York, N. Y.

The President's letter of this morning puts into proper perspective the problems about the budget which have been the subject of discussion since the budget was sent to the Congress in January.

At that time the President requested a further painstaking review of the budget by the Bureau of the Budget and by all the departments and agencies of Government. This has now been prepared and discloses the feasibility of postponing certain appropriation requests which can be made without serious damage to the program.

The President, however, stated that actual spending in the coming fiscal year cannot be cut by multibillion dollar amounts without danger to the national safety or interest, or the modification of some of the existing programs now authorized or required by law.

I urge every citizen to earnestly consider and support the President's direct and simple analysis of the principles involved in our budget problems.

The President's position not only guards the Nation against ill-considered or dangerous slashing of the budget, but it also points the way to well-considered steps toward holding future Federal spending down. Controlling the upward march of total Government spending is of greatest importance to us all.

There is nothing new about this approach or the principles that guide it. They are the same principles that have guided this administration for the past four years. We have been constantly vigilant to continually make every effort to live within our means and to get a dollar's worth for every dollar that we spend.

We have continually striven to avoid waste and extravagance and to adequately balance the necessary costs of our national safety with the equally necessary maintenance of a strong and vigorous economy. We have sought to stabilize the costs of living and foster more and better jobs, to protect the Government's, as well as the people's, high income.

It is perseverance in this continuing effort that has brought us now to the prospect of three balanced budgets in succession for the first time in 25 years. But we have also been ever mindful of our position of leadership in the world and the obligations we must necessarily bear in that regard to protect our national security.

The everlasting search for possible reductions and the drive to make them real will necessarily continue in the future as it has in the past. With the help of the Congress, and the public, and the persisting efforts of the administration, progress

toward a proper balancing of our fiscal affairs and full performance of our national obligations will continue.

The proven principles set forth in the President's letter will serve both our national security and the people's best interest. They deserve the full support of every American.

EXHIBIT 34.—Statement by Secretary of the Treasury Humphrey, June 14, 1957, before the Subcommittee on Fiscal Policy of the Joint Economic Committee

I appreciate this opportunity to appear before you on the subject of current budgetary and fiscal policy developments, a subject on which you have already heard from numerous witnesses.

Before responding to questions I want to repeat my conviction that although present tax rates are too high and the present heavy tax burden will, in the long run, seriously hamper necessary economic growth, no general tax reduction should be considered at the present time. The most effective tax cut that can be made to promote healthy economic development is a reduction which will bring benefit to all taxpayers—when our fiscal situation permits. By this, I mean when we can see ahead a sufficient surplus of income over outgo to pay for such a tax reduction. We should and will keep working vigorously for the day in the not too distant future when we can see such a surplus. Such a surplus does not exist at the present time.

In this connection we must keep a close watch of our budget position and make certain that Government spending is conducted as efficiently as is humanly possible. There is nothing new in this goal. We must continue to follow the principles that have guided this administration for the past four years. We must make every effort to live within our means and to get a dollar's worth for every dollar that we spend.

In watching our budget we must constantly guard against ill-considered, or dangerous, or so-called meat-axe slashing of the budget.

As the President said in his April 18 letter to the Speaker of the House of Representatives, actual spending in the coming fiscal year cannot be cut by multi-billion dollar amounts without danger to the national safety or interest or the modification of some of the existing programs heretofore authorized by the Congress. It is not the size of any particular budget which is our paramount concern. It is control of the upward march of total Government spending which is of greatest importance to all of us on a long-run basis.

The biggest budget problem, as I see it, is one of seeking out long-term savings. The problem of how much and for what we should spend in the fiscal year 1959, which will not end until two years from now, is already upon us. What we must continue to do vigilantly is to keep up not only the everlasting search for possible reductions but the drive to make them real. We must do this while being ever mindful of our position of leadership in the world and the obligations which we must necessarily bear in that regard to protect our national security.

We must balance the necessary costs of our national responsibilities with the equally necessary maintenance of a strong and vigorous economy.

The administration's fiscal record is a good one. The budget in effect when we took office in 1953 produced a \$9.4 billion deficit, and the budget proposed by the prior administration for fiscal year 1954 called for a \$9.9 billion deficit. Our administration, with the help of the Congress, cut spending, reducing the projected deficit for 1954 by two-thirds, or to a final minus figure of \$3.1 billion.

But for the largest tax cut in history (a \$7.4 billion cut in 1954) the budget would have been balanced in 1955. A balanced budget was delayed for one year because it was then apparent that the savings we then had in prospect would be sufficient before the end of the next year not only to cover the amount of the tax cut but to give us a balanced budget at the same time.

By fiscal 1956 we had eliminated deficits and had a balanced budget with a surplus of \$1.6 billion. We will have a surplus in the fiscal year ending this month and the budget proposed for fiscal 1958 also is balanced. This means that we have in prospect a balanced budget for three consecutive years for the first time in more than 25 years.

Federal spending was reduced from the rate of \$74.3 billion in the inherited budget of 1953 to \$67.8 billion in 1954 and \$64.6 billion in 1955. Spending moved up to \$66.5 billion in 1956, to an estimated \$68.9 billion in the January budget

for the present fiscal year, and to a proposed \$71.8 billion for 1958. Even with the recent increases the budget for the current fiscal year is \$5.4 billion below the budget we inherited in 1953 and is 16 percent of our gross national product as compared with 21 percent taken by Federal spending in 1953.

If we are successful in properly controlling the size and spending of Government, we can look forward to a continuing period of high prosperity for our country. A major ingredient in this high prosperity is the confidence of the American people—confidence in themselves, in each other and, of fundamental importance, confidence in their Government.

The greatest hope for major reductions in Government spending lies in a better world situation. Some day the nations of the world must arrive at some better and insured form of understanding which will make it possible to reduce the large amounts of money and energy and resources now going into making things for killing. I confidently believe that such a better day will come.

The relationship between monetary and credit restraint and our present high prosperity is worthy of brief comment.

One thing that can destroy not only our present prosperity but even jeopardize our way of life is runaway inflation.

The record of this administration in helping control inflation has been good. The value of the dollar, which dropped from 100 to 52 cents between 1939 and January 1953, has changed only $2\frac{1}{2}$ cents in the past four and one-half years, compared with a total drop of almost 48 cents in the thirteen years prior to this administration.

The credit policy of the Federal Reserve System is an important factor in sustaining the purchasing power of the dollar in this time of very high use of and demand for both labor and materials. The alternative of easy money would mean that there would be more dollars bidding for the available supply of labor and materials. This could only result in sharp increases in the cost of goods. The dollar would buy less.

Mounting increases in the cost of living would bring cruel hardship to millions of our citizens least able to protect themselves. There would be less saving which is the source of investment in plants and equipment which make the ever-increasing jobs that we must have for our growing population. Without increased savings—without the confidence that money saved would retain its value—we would have fewer of these new jobs. Over a period of time, growing unemployment would result.

It is essential that the inflationary pressures arising from the high prosperity that we have enjoyed for the past many months be controlled to the greatest possible extent. Restraints on credit involving some increases in the cost of money and the maintenance of taxes at the present levels, at least until such time as we have a substantial excess of income over expenditures, are important factors which will assist in restraining a substantial increase in the cost of living.

Thank you for the opportunity to present these observations to your committee.

EXHIBIT 35.—Statement by Secretary of the Treasury Humphrey, June 18, 1957, before the Senate Finance Committee Hearings on the Financial Condition of the United States

I am very glad indeed to have this opportunity to be here to appear before this committee just before I leave the Government service, to try to be as helpful as I can in discussing with you the serious problems that you have outlined all of which I recognize and which I believe, as you have suggested, are subjects of the most serious import to our country, and deserve the most serious thought and consideration of this committee.

Broadly speaking, your study relates to the financial condition of the United States. In order to assist you in this inquiry, it seems appropriate that I provide a statement as to the problems we have faced, the goals we have set, and the record of our accomplishments in the past 4 years.

This is a record of a prospering America with new high levels of employment, rising income, and increasing purchasing power. It is

a record of more and better jobs, more homes, more cars, more leisure, and more recreation. It is a record of unequalled prosperity with both the blessings and the problems of such a period.

Last year an average of 65 million of our people were gainfully employed, an increase of 3,700,000 in only 4 years. During the same 4 years, unemployment has averaged only 3.8 percent of the civilian labor force compared to 4.1 percent during 1949 through 1952, and 15 percent from 1937 until the beginning of World War II.

The present low level of unemployment has been achieved although the civilian labor force has increased from 63 million in 1952 to 68 million today. For the first 5 months of this year, unemployment has averaged about 3.7 percent.

The record of the past 4 years is also a record of rising levels of living, widely shared. During this period, average annual family income, after Federal income taxes, has increased from less than \$4,600 to an estimated \$5,200, an increase of about 12 percent, even after eliminating the effect of price changes.

In 1956, the average family purchased 12 percent more goods and services, in real terms, than in 1952.

Almost 5 million families have moved into new homes since 1952. Almost 30 million families own their own homes today, an increase of 13 percent in only 4 years.

The number of homes with electric refrigerators has increased from 38 million to 45½ million, accounting for 96 percent of all wired homes. In only 4 years, the number of homes with food freezers has increased from 5 million to 8½ million; the number with clothes dryers (either electric or gas) from 1½ million to 5½ million, and the number with television sets from 21 million to 38½ million. The number of families owning automobiles has increased from 31 million to 37 million.

This growing prosperity has extended to nearly all segments of our society except the farmer. The postwar adjustment in farm income has only recently been reversed, with a small increase last year for the first time in several years.

Farm income per worker last year was \$1,862, up \$151 from 1955. Farm prices have been rising moderately in the last few months, and on May 15, were up 3 points above the level of a year earlier.

The objective of this administration is to enable our farm families soon to share more fully in the record prosperity which characterizes the rest of the economy.

The record of the past 4 years is one of great enhancement in personal financial security. The number of life-insurance policies increased from 219 million 4 years ago to an estimated 265 million in 1956, an increase of 21 percent, and the number of persons covered by hospital insurance increased from 91 million to 112 million, or 23 percent.

Time deposits in banks and share accounts in savings and loan associations increased from \$79 billion to about \$112 billion, or 41 percent, and the estimated number of shareholders in American industry increased from 6½ million to more than 8½ million people.

The record of the past 4 years is also one of increased leisure. There has been a 19 percent increase in the amount of time Americans took for their vacations—85 percent with pay.

About 55 million of our people visited national park areas last year, an increase of 30 percent in the last 4 years, and approximately 60 million are anticipated for this year.

Now, this great increase in the income, the living standard, the recreation, and security of our people has been achieved at a time when there has been a substantial contraction in defense expenditures.

Our free economy has again demonstrated its ability to absorb the reductions in Government expenditures not by contracting, but by expanding employment and the living standards of our people.

The record of the past 4 years has been one of unequalled investment. The Nation has devoted a vast amount of its resources to improving and enlarging its productive capacity.

Businesses have spent an alltime high of \$152 billion on new plant and equipment, compared with \$123 billion in the preceding 4 years. This record volume of capital outlays has provided a dramatic answer to those who would contend that our economy would run down without the artificial stimulus of chronic deficit spending and the backlog of private demands deferred by the war.

Outlays to make better provision for needed public facilities have also been at very high levels in recent years. Total public construction in 1956 was \$13.4 billion, 23 percent above 1952 levels, and educational construction outlays during this same period increased 56 percent, from \$1.6 billion in 1952 to \$2.5 billion in 1956.

The increased confidence of our people and of our business concerns, that they will be free to determine their own course—free from unnecessary regulation or harassment—greater confidence in the stability of our Government and the wider distribution of purchasing power, have encouraged our consumers, our homeowners, our business concerns, and our communities, to plan for the future, and to buy the automobile, or the home, to build the factory or the schoolhouse, that a brighter future justifies.

Thus the record of the past 4 prosperous years has been characterized by the many blessings of widely shared prosperity—but it has also been beset by one of the problems of prosperity.

The tremendous outlays to expand our public and private facilities have required financing, and this has inevitably given rise to a heavy demand for borrowings. With growing confidence on the part of lenders as well as borrowers, there has been a rapid increase in the volume of both long- and short-term credit.

Almost all of this increase has come from savings and not from an increase of money supply in the banks. Nevertheless, there has been, and is, the ever-present threat of rising prices.

The monetary policies of the Federal Reserve and the fiscal policies of this administration have been designed to encourage the growth of the supply of goods (as the foregoing figures indicate), but not to encourage excessive credit expansion.

The cost of living has risen an average of only six-tenths of 1 percent per year for the past 4 years, as compared with an average increase at the rate of about 7 percent per year for the preceding 13 years.

In short, the rise in prices during this administration has been at only one-tenth the average annual rate of the preceding 13 years. Even this rise is more than I like to see, but it is a record of far better price stability than in many years.

Nevertheless, prices have been rising a little faster for the past 12 months, and the threat of renewed inflation, which had been so severe from 1946 to 1952, is perhaps our most serious domestic economic problem.

The greater increase in demand for credit than in the supply thereof has inevitably brought about higher interest rates.

The record of the past 4 years is one of sensitive and flexible adjustments to the release of controls, and to the return to free markets, an accommodation of the post-Korea curtailment in military spending, and of a free market's emphasis first on housing, then automobiles, and now on new plant construction with continuous improvement in the total economy.

It is a record of encouraging savings and investment in increased productive capacity, of encouraging an adequate volume of credit, but of not encouraging that excess of credit which, in a period of high employment, could only penalize our people by bidding up prices without increasing production.

It is essentially a record of flexible and quickly adjusting fiscal and monetary policy designed to continue the sound improvement in levels of living, widely shared, which is the wonder and ambition of all the rest of the world.

It is a most significant record, important to us all, because the monetary activities of the Federal Reserve System and the fiscal activities of the Treasury affect the wages, the standard of living, and the savings—indeed the entire financial well-being—of each one of our citizens.

It is above all a record of the renewal of widespread confidence of the people in the preservation of their individual freedom of choice, in their jobs, in their right to the enjoyment of the fruits of their own initiative and endeavor, and in the security of their savings. It is a record of renewed confidence in the security of our country.

Feeling as I do that there should be the widest possible public interest in this subject, and feeling such a deep pride in what this administration has done and is doing, I welcome this opportunity to speak to your committee and, through you, to the more than 171 million Americans whom the Congress represents.

Let me review the major policies of, and the fiscal actions taken by, this administration since we took office in January 1953.

In discussing fiscal, monetary, and credit policies, as I am doing today, I do not want to give the impression that they alone can prevent inflation and assure economic growth. They are, however, a subject of the present inquiry and I shall concentrate my attention on them.

Certainly if they are not sound, there is little chance for sound money and sound long-term economic growth.

As a preface to our present policies, let us review the situation as it existed when we came into office. We came in in 1953.

The direction in which we had been going was as follows:

You will recall the tremendous changes that had occurred in the period before 1953. In 10 of the 13 fiscal years from 1939 through 1952, the Government operated at a deficit, as it had in the preceding 9 years.

Largely as a result of World War II, the Federal debt increased in only 13 years from \$47.5 billion at the end of 1939, to \$267.5 billion at the end of 1952. Those are figures that to me are simply astounding. It is attributable to a war period, but a debt going from \$47.5 billion to \$267.5 billion, in only 13 years.

The interest charge on this indebtedness had grown from an annual rate of \$1¼ billion per year in December of 1939, to \$6¼ billion in December of 1952, an average increase in interest cost of almost \$400 million per year.

In 13 years, annual Federal taxes had increased from a little less than \$5 billion in 1939, to almost \$65 billion in 1952. This amounted to an increase in the average tax burden of each American citizen from \$36 in 1939, to \$413 in 1952.

The conditions which we faced when we took office in 1953:

When this administration came to office in January of 1953, we faced: 1. A Federal debt equal to 89 percent of our annual national income.

2. Budget expenditures of \$74.3 billion for fiscal 1953, and proposed budget expenditures, a prepared and then existing budget, of \$77.9 billion for 1954.

3. A budget deficit of \$9.4 billion for 1953, and a planned deficit of \$9.9 billion, almost \$10 billion, for 1954.

4. A continuing spiral of inflation which had reduced the purchasing power of the dollar from 100 cents in 1939 to 77 cents by 1945, and down to 52 cents by 1952.

In appraising these conditions and the course to pursue, we were influenced by a recognition of the overpowering importance of preventing other devastating postwar inflation which, prior to 1953, the Government was attempting to control by inadequate means.

Now, what were our goals?

Within less than a month of his taking office in 1953, President Eisenhower, in his state of the Union message, called attention to the "inescapable need for economic health and strength," and he stated:

Our immediate task is to chart a fiscal and economic policy that can—

First, reduce the planned deficits and then balance the budget, which means, among other things, reducing Federal expenditures to the safe minimum;

Second, meet the huge costs of our defense;

Third, properly handle the burden of our inheritance of debt and obligations;

Fourth, check the menace of inflation;

Fifth, work toward the earliest possible reduction of the tax burden;

Sixth, make constructive plans to encourage the initiative of our citizens.

Let us review these goals and our efforts, our difficulties, and our accomplishments to date, in following them.

The first objective was to reduce the planned deficits and then balance the budget.

To what extent have we accomplished this goal?

1. We first reduced and then entirely eliminated planned deficits.

The budget in effect when we took office in 1953 produced a \$9.4 billion deficit, and the budget proposed for the fiscal year 1954 called for a \$9.9 billion deficit. Our administration immediately went to work, with the help of the Congress, to reduce the planned deficit for

fiscal 1954, and indeed the final deficit (\$3.1 billion) was only one-third of that anticipated by the prior administration.

Without the largest tax cut in our Nation's history, the budget would have been balanced in 1955. However, in view of the transition resulting from the reduction in military spending, and anticipated further reductions in spending which in fact materialized concurrently with our action, we were able to pass some of the savings from our reduced expenditures back to the people, even though this meant another year's delay in achieving a balanced budget. Fiscal 1955 was, however, the last year of deficits.

2. We have balanced the budget.

By fiscal 1956, we had entirely eliminated deficits, balanced the budget, and completed the year with a surplus of \$1.6 billion.

The 1957 budget will result in another surplus, and the budget proposed by the President for 1958 provides for a third successive surplus for the first time in 25 years.

3. We have reduced Federal expenditures.

Federal expenditures were reduced from \$74.3 billion in the inherited budget of 1953, to \$67.8 billion in 1954, and down to \$64.6 billion in 1955. As a result of additional programs authorized by the Congress, substantial pay increases, and the need for increasingly expensive military equipment, expenditures increased slightly in the past year to \$66.5 billion, with further increases anticipated to \$68.9 billion for 1957 and \$71.8 billion for 1958.

The 1957 budget is nearly \$5.5 billion below the budget we inherited in 1953, and is but 16 percent of our current gross national product now as compared to 21 percent in 1953.

The second objective was to meet the huge costs of our defense.

Major national security expenditures have been reduced from \$50.4 billion in 1953, to \$46.9 billion in 1954, to an estimated \$41.0 billion in 1957, with a proposed \$43.3 billion in 1958.

This reduction has been achieved despite the fact that, though not at war, we are still engaged in a titanic contest which requires not only the expense of preparedness, but extremely expensive research and development.

Such research is necessary to assure preparedness for tomorrow, and the days beyond, in the terrible race for primacy in the most complete transition from old to new weapons in the history of the world.

While our fantastically costly weapons of tomorrow are still in the expensive research and development stage, we must continue to maintain our maximum strength in the weapons of today. This means that during the transition period we must support increased costs of two systems of defense.

We have met these huge costs with a balanced budget and with a reduced tax burden. We have provided the necessary large amounts of expensive and revolutionarily new equipment needed for our national safety, greatly expanded our productive facilities, and at the same time enabled far more capital and labor to be directed toward building more cars, more houses, more of all of the good things our people need and want.

Our third objective was to properly handle the burden of our inheritance of debt and obligations.

As you have invited the Under Secretary, Mr. Burgess, to meet with you, I have asked him to report to you in detail on our handling of the debt.

In preface to his remarks, I might say that the management of \$275 billion of debt is not a simple assignment under any circumstances. The Federal Reserve's proper withdrawal from the pegging of the Government bond market, which withdrawal was the most effective single action taken in the battle against inflation, has made it more difficult to manage debt operations than it was when a fixed rate was assured.

Had such a policy continued, however, the resulting inflation would eventually have produced even greater complications for debt management than we have experienced under a system whereby interest rates are determined by the forces of the market.

In January 1953, when this administration took office, the average rate on all Government interest-bearing issues outstanding was 2.35 percent. The total net computed interest cost at an annual rate at that time was \$6.2 billion.

Four years later the average rate on all Government issues outstanding was 2.67 percent, or an increase of about three-tenths of 1 percent. The total net annual computed interest cost, as of December 31, 1956, was \$7.3 billion, of which \$0.9 billion is due to increased interest rates, and \$0.2 billion is due to an increase in the debt incurred to pay obligations inherited from previous commitments.

This increase in interest rates results from the free market influences of supply and demand in a period of unparalleled prosperity. It is a continuation of a rise that has been going on for the past 10 years under the growing pressure of borrowing demands.

In this little table the computed interest rate is shown:

<i>Computed interest rate on the public debt</i>		
December—		<i>Percent</i>
1946-----		2.06
1952-----		2.35
1956-----		2.67
May 1957-----		2.75

So that the rate has increased over the 10-year period from 2.06 to 2.75, or a little less than three-fourths of 1 percent.

For the entire period from December 1946 through May 1957, there was an increase of sixty-nine one-hundredths of 1 percent in the computed interest rate on the public debt. Of that increase, twenty-nine one-hundredths occurred prior to this administration, and forty one-hundredths occurred during this administration, right up to now.

During the past 4 years there has been no increase in public debt interest cost in relation to national income. The interest cost was 2.1 percent of national income in December 1952, and was exactly the same percentage in December 1956, for the increase in interest cost has only kept pace with the increase in national income.

Furthermore, the \$1 billion increase in interest paid reflects increased earnings received by the investors who own the securities.

Now, who are those investors?

Of the \$7 billion of interest paid on the public debt during calendar year 1956, \$1.4 billion represented the payment of interest to social-security funds and other Government investment accounts.

About \$0.6 billion of public debt interest was received by the Federal Reserve Banks, and 90 percent of that comes back to the Treasury as surplus earnings.

Commercial banks received approximately \$1.4 billion of such interest last year. About \$0.6 billion went to other financial institutions, mostly insurance companies and savings banks; about \$0.5 billion to corporations, about \$0.4 billion to State and local governments, and about \$0.4 billion to nonprofit institutions, foreign accounts, and so forth.

The remainder, of about \$1.8 billion, the largest single segment of the interest on the public debt, went to individuals, either in the form of cash payments or accumulated interest to the 40 million holders of savings bonds. Millions of Americans are benefiting from these higher interest rates.

I am asking Mr. Burgess to review other phases of our debt management program.

The fourth objective, check the menace of inflation.

1. The problem

At the risk of oversimplification, let me condense the story of inflation to about a dozen lines.

Almost all of our employable labor force is employed—and at higher wages than they have ever received before. Our people are buying virtually all that they are producing, but they want to buy more, both more consumer goods and more productive facilities.

Being confident of the future, they desire to borrow to buy more. The lenders are lending more than ever before, but still not as much as the public would like.

However, with most resources fully utilized, additional bank credit would not put any more people to work—it would merely provide additional demand in excess of the supply of both labor and goods. Such a demand in excess of supply would cause a rise in prices if it were fed by excessive bank credit expansion.

A rise in prices hurts every housewife, everyone on a pension, every person with a fixed or lagging income, every saver. It robs labor of much of its gain in wages. This rise in prices has been a principal cause of the farmers' difficulties, because while income per farm remained fairly static during the last 10 years, the farmer has had to pay higher prices. As a consequence, he has been particularly hurt by the inflation which, to a lesser extent, injures every single one of us.

There are two ways to check this rise in prices: (a) increase the supply of goods, and (b) slow the expansion in the number of dollars bidding for the goods.

We have utilized both methods. The administration in many ways has encouraged an increase in productive facilities which is the only way to increase the supply of goods. The Federal Reserve and the administration have taken action to restrain a too rapid growth in the number of borrowed dollars available to bid up the price of the limited supply of goods and services.

2. *The respective roles of the Federal Reserve and the Treasury*

Now, what are the respective roles of the Federal Reserve and the Treasury?

I would like to take a moment to identify the respective roles played, on the one hand by the Treasury, which influences fiscal policy, through its recommendations on tax and budget policy as well as its management of the public debt, and on the other hand by the Federal Reserve, which is responsible for monetary policy, through its influence on the cost and availability of money and credit.

A mere statement of the respective functions demonstrates the major role of the Federal Reserve in the effort to stop inflation. The Federal Reserve has the authority and the tools to take monetary and credit action. We do not.

The Treasury cannot determine the level of interest rates, but must pay the rates determined by market forces. The Federal Reserve can influence the levels of market rates, although there are definite limits to its power to maintain any fixed level of rates, as is shown by history.

I do not point this out to shift any responsibility from the Treasury. On the contrary, we approve wholeheartedly the course which the Federal Reserve has followed, and have admiration for the courage and decisiveness with which the Board has acted.

(a) *Through 1952*

As you will recall, throughout the decade prior to 1951, the Federal Reserve followed a policy of supporting the market for United States Government securities at or above par. This was done to enable the Government to sell, at a low interest cost, the great volume of securities which was necessary to finance World War II.

It accomplished that purpose, but it created cruel inflationary conditions which required the sale of more bonds and increased debt to pay the resulting higher costs of the war.

In artificially holding interest rates at low levels, the Federal Reserve made credit cheap, not only for the Government, but for all borrowers. By maintaining a market which enabled the banks to liquidate their Government bonds at any time at par or better, it encouraged a continuance of the war-born expansion of excessive bank credit.

This cheap and plentiful credit was an important cause of the war-time inflation which, despite wartime restrictions of direct controls and rationing, robbed the dollar of 23 cents of its purchasing power between 1939 and 1945.

Then follows a table which shows that the dollar was at 100 cents in 1939, and was 77 cents in 1945.

Calendar year average	Consumer price index (1947-49=100)	Purchasing power of dollar (1939=100)
1939.....	59.4	100.0
1940.....	59.9	99.2
1941.....	62.9	94.4
1942.....	69.7	85.2
1943.....	74.0	80.3
1944.....	75.2	79.0
1945.....	76.9	77.2

At the end of World War II there was an acute shortage of goods. There was, however, a pent-up demand, a demand made effective by both a large amount of liquid assets accumulated during the war and a rapid increase in private credit.

The war-born policy of the Federal Reserve, mistakenly continued into peacetime under Treasury insistence, enabled the supply of credit to rise too rapidly, with the result that this credit-backed demand for goods exceeded the supply of goods.

While interest rates were held at artificially low levels, prices continued their serious rise, at an average annual rate of over 7 percent from 1945 to 1951, and in those 6 years the dollar lost another 23½ cents of its purchasing power.

Then follows, another table, following out the rest of the preceding table, showing the period after the war.

Calendar year average	Consumer price index (1947-49=100)	Purchasing power of dollar (1939=100)
1945.....	76.9	77.2
1946.....	83.4	71.2
1947.....	95.5	62.2
1948.....	102.8	57.8
1949.....	101.8	58.3
1950.....	102.8	57.8
1951.....	111.0	53.5

The dollar at 77 cents in 1945 depreciated to only 53.5 cents in 1951.

It was becoming clear to increasing numbers of observers that the unwise credit stimulus provided by the Federal Reserve should be withdrawn. Such a withdrawal could be achieved only by paying the lesser penalty of an increase in the interest rates to be paid.

It was clear that if the Federal Reserve ceased purchasing Government securities at par, natural market forces, reflecting increasing demand for credit, would result in the higher interest rates which the Federal Reserve purchase policy had so far postponed.

During this postwar period the Federal Reserve made several modest moves toward freer short-term markets but was held back by the Treasury. After a most thorough review of the relative advantages and disadvantages of such a change, the Subcommittee on Monetary, Credit and Fiscal Policies, known as the Douglas subcommittee, concluded in 1950 that, and I quote from the Douglas committee report:

As a long-run matter, we favor interest rates as low as they can be without inducing inflation, for low interest rates stimulate capital investment. But we believe that the advantages of avoiding inflation are so great and that a restrictive monetary policy can contribute so much to this end that the freedom of the Federal Reserve to restrict credit and raise interest rates for general stabilization purposes should be restored even if the cost should prove to be a significant increase in service charges on the Federal debt and a greater inconvenience to the Treasury in its sale of securities for new financing and refunding purposes.

Partly as a result of that review and report, the administration then in office and the Federal Reserve, by an agreement referred to as the "accord," changed the prior policy, and the Federal Reserve began to withdraw its support of the market for Government bonds in March of 1951.

While this was a step in the right direction, it was not a complete step. On a number of occasions during 1951 and 1952, the Treasury still relied on Federal Reserve purchases to keep new issues from sinking in the market.

Let me pause in this chronology to remind you of the facts about that change in policy.

It was put into effect by an independent agency, the Federal Reserve.

It was urged by many of the best informed Members of Congress.

It occurred during the preceding administration—21 months before this administration took office.

This new policy of the Federal Reserve was not so much anti-inflationary as it was a tempering of what formerly had been positively inflationary action. The Federal Reserve began to reduce the amount of credit it had been artificially creating. It freed natural market forces.

As an incidental result of the reduction in the volume of artificial credit generated by the Federal Reserve, the supply of credit grew somewhat more slowly than the demand for credit. As a consequence, interest rates began to rise, and the market prices of bonds went down.

Though the full force of this change in the Federal Reserve policy was not immediately effective, almost a quarter of the increase in the computed interest rate on the public debt (from 2.22 percent at the time of the Federal Reserve-Treasury accord in 1951, to 2.75 percent in May 1957) almost a quarter of that occurred in the 21 months prior to the time this administration took office.

As a result, banks and insurance companies, which had such large blocks of Government securities, were more hesitant to sell them at a 3- or 4-point loss in order to make a loan. This caused them to make fewer loans than they would have made had the earlier policy been continued.

Although by the accord of March 1951, the administration then in office had reluctantly agreed to the right of the Federal Reserve to take such monetary action, that administration itself continued to rely on direct controls on wages, prices, and rents.

In addition, after the short-lived budget surplus of 1951, increasing Government spending, and renewed deficits in 1952, largely as a result of the Korean conflict, encouraged a further depreciation in the dollar to 52.3 cents.

And then follows a table.

Calendar year average	Consumer price index (1947-49=100)	Purchasing power of dollar (1939=100)
1951.....	111.0	53.5
1952.....	113.5	52.3

Inflation had been appreciably slowed, but if inflation was to be effectively checked, the Federal Reserve's new policy had to be supported more vigorously and supplemented with parallel fiscal policies.

(b) Since 1952

In 1952, General Eisenhower campaigned for the Presidency in part on the ground that further inflation must be prevented, and advocated, and I quote:

A Federal Reserve System exercising its functions in the money and credit system without pressure for political purposes from the Treasury or the White House.

i. We have conducted our affairs so as not to interfere with the Federal Reserve's monetary policies.

We have lived up to that promise that the President made. To do so, however, has subjected the Treasury to certain burdens, just as it has other borrowers. Not to do so would have created much more serious burdens for all of us.

Although new financing was less expensive and easier in 1954, it has again become more costly. With a very high percentage of bank and insurance company assets now in loans, these institutions are not clamoring for long-term—or even intermediate-term—Government securities.

We must, therefore, at present, sell mostly shorter-term securities, which are attractive because of their high liquidity. I do not say this to complain, but to acknowledge an obvious fact.

We will meet these difficulties and solve them as we have in the past, continuing our flexible policy, postponing debt extension when we must, achieving it whenever we can.

There is a strong demand for short maturities. Our bill auctions each week are always well oversubscribed. The Treasury faces no crisis. Our securities are the most highly regarded in the world.

But in a free market, we must compete for funds. That means the factors of supply and demand determine the rates we must pay. Rates may decline or they may go higher. I would be disappointed to see them go higher, but if that is the price we must pay to prevent growth of excessive credit and consequent inflation, it will well justify the price.

This administration, in addition to supporting the Federal Reserve's independence, has utilized its debt management and fiscal functions to help check inflation.

ii. Planned deficits have been eliminated.

Federal deficits necessitate increased Federal borrowing. More Federal borrowing, to the extent it comes from the banks, means the creation of additional bank credit. This tends to create more spendable dollars than there are goods to buy.

As your chairman, Senator Byrd, so clearly pointed out in his remarks to the Senate on August 13, 1954:

Deficit spending is perhaps the greatest single factor in the cheapening of the value of the money.

In ending deficits, we have eliminated this very inflationary pressure.

iii. The debt is being reduced.

We reduced the public debt in fiscal 1956 as a result of our budget surplus of \$1.6 billion. Another budget surplus is being applied to the

debt this year, and we expect to do it again in 1958. Reduction of the public debt is one of the best ways to fight inflation.

iv. Government expenditures have been reduced.

Government expenditures are inflationary, particularly when the economy is at a high level of output and employment. Taxes divert to Government spending some funds which, in the hands of the taxpayer, would have gone into savings.

Furthermore, some Government expenditures go into payrolls to produce goods and services (especially military equipment and military services) which neither contribute to the Nation's capital account nor become available for private consumption.

Yet this additional purchasing power competes for the existing supply of both goods and services.

By reducing Government expenditures, we have released more workers and materials directly to private industry where they could add further to the supply of goods and services needed to meet our heavy demands for plant and equipment, and greatly increase the supply of homes, cars, television sets, and other consumer products necessary for our rising standard of living. Reduced Government expenditures have been an anti-inflationary influence.

v. We have reduced the floating debt.

The amount of marketable public debt maturing within a year, plus demand obligations (other than E and H savings bonds) in the hands of the public—securities which in many ways are close to cash—has been reduced by \$25 billion from the high point in 1953.

vi. We have also shifted some of the debt away from the banks.

Since increases in bank loans represent additional spendable money, they tend to be more inflationary than loans that grow out of a transfer of existing savings. As a consequence, one of the Treasury's long-range debt management objectives has been to reduce bank holdings of Government securities to a reasonable minimum.

To this end we have, in the past 4 years, reduced the amount of Government securities held by the banks by \$4 billion. This has been achieved in part by paying off some securities and in part by designing the terms of new issues, such as tax anticipation bills and certificates, to be particularly attractive to nonbank investors.

vii. We have stimulated increased savings.

Greater confidence in the future, higher rates of interest, and increasing confidence in the stability of the dollar, have all encouraged our people to save more, both in dollars and in relation to disposable income.

As one means of encouraging savings and combating inflation, we have emphasized the continued sale of series E and H savings bonds. The amount of these small-saver bonds outstanding has increased from \$35.3 billion to \$41.4 billion during the past 4 years.

Moving thus on all of these fronts, by ending deficits, by reducing the debt, by reducing expenditures, by keeping down the bank-held debt, by reducing the floating debt, and by selling more E and H savings bonds, as well as by working closely with the Federal Reserve, we have accomplished a tempering of inflationary pressures during these years, with a decline in the purchasing power of the dollar of only eight-tenths of a cent in 4 years.

And then follows a table which shows that up to the end of the year 1956, the dollar went down from 51.9 to 51.1.

Calendar year average	Consumers' price index (1947-49=100)	Purchasing power of dollar (1939=100)
1953.....	114.4	51.9
1954.....	114.8	51.7
1955.....	114.5	51.9
1956.....	116.2	51.1

The past 4 years have been characterized by greater price stability than any other 4-year period since 1939. But inflation is not stopped. It is only slowed down.

Indeed, there has been a disturbing renewal of pressures in the last 12 months, during which the dollar has lost almost 2 cents in purchasing power.

And then follows a table which shows that in April of 1956, the dollar was 51.7, and in April of 1957, April just last past, was 49.8, down almost 2 cents.

Month	Consumers' price index (1947-49=100)	Purchasing power of dollar (1939=100)
1956—April.....	114.9	51.7
July.....	117.0	50.8
October.....	117.7	50.5
1957—January.....	118.2	50.3
February.....	118.7	50.0
March.....	118.9	50.0
April.....	119.3	49.8

This most recent decline in purchasing power is disturbing. It reinforces our conviction that we must continue the vigorous pursuit of our present policies. We should certainly not abandon them.

3. *The necessity for flexibility*

While over the past 4 years it has been necessary to follow generally anti-inflationary fiscal and monetary policies, we have had changes in the economy which have required us to moderate them on occasion, and we may encounter other circumstances which may require some relaxation at some times in the future.

We approve the philosophy expressed in the Douglas subcommittee report that—

Timely flexibility toward easy credit at some times and credit restriction at other times is an essential characteristic of a monetary policy that will promote economic stability rather than instability.

Our administration had been in office only a few months when the coincidence of the full effect of the Federal Reserve's new policy, and the curtailment of defense spending, temporarily changed the problem.

We were, at that time, more concerned with preventing a decline in employment and production than with a rise in prices. Taxes

were reduced, and the administration relaxed downpayment and maturity terms on FHA- and VA-guaranteed housing loans.

At the same time, Federal Reserve policy also eased, making funds more readily available. The decline was stopped and a sound economic expansion got underway with renewed public confidence in the courage of the administration and the flexibility of its policies.

By 1955, economic activity was again vigorous and the problem was one of inflationary pressures—which have continued—and easy bank credit expansion was no longer encouraged.

What are the available alternatives?

4. The available alternatives

In view of the breadth of the subject of your inquiry, it is appropriate that we consider what might have been some available alternatives to general monetary and credit policy.

Some of these alternatives are:

- (a) Direct controls prohibiting or limiting certain types of credit.
- (b) Compulsory saving.
- (c) Physical controls on prices and wages, plus, perhaps, rationing and allocation of materials and labor.
- (d) Higher taxes and large governmental surpluses to be applied on the bank-held debt.
- (e) Greater individual savings and voluntary effort at restraint.
- (f) A reversion to the pre-1951 policy of Federal Reserve purchase of Government securities at or above par—and consequent encouragement of severe inflation.

The use of any of the first three alternatives in peacetime would have been inequitable, impractical, and inconsistent with our traditions of freedom.

The fourth alternative would have required the imposition of additional taxes on top of our present heavy load, and would not have been acceptable.

The fifth, which the President emphasized in his state of the Union message just a few months ago—namely, voluntary efforts—can help immeasurably, but can be achieved only if other policies are effective.

Thus, as a practical matter, the real choice is between the anti-inflationary course which we have pursued, and a new round of inflation.

Those who, in a period such as this, urge an abandonment of our anti-inflationary policies, those who urge either deficit financing or a policy of artificially creating more spendable dollars are, whether unwittingly or by intention, inflationists.

No matter what their motives, their proposals for further credit expansion are proposals to further reduce the purchasing power of the dollar, to rob every housewife, every farmer, every pensioner, every wage earner, and every family with savings. Their arguments must be understood to urge just that.

There can be no doubt as to the wisdom of our choice in utilizing the tools of monetary and credit policy. As to the extent to which we used these tools, I can only say that I gain confidence from the fact that we are criticized with equal vigor by those who feel that credit

has been restricted too severely, and those who feel it has not been restricted severely enough.

Despite some recent tendency for prices to rise again, the administration can take considerable pride in what has been achieved to date in respect to this, the President's fourth goal.

Now, the fifth goal was to work toward the earliest possible reduction of the tax burden.

The Eisenhower administration and the Congress, working together, have already made possible the greatest single tax cut in history.

In 1954, in order that the people might benefit from the substantial reduction in Government expenditures, we brought about a tax cut that has provided them with annual savings of about \$7.5 billion.

As the President pointed out in his letter of April 18, 1957, to the Speaker of the House, this tax cut has already saved our people almost \$25 billion in taxes.

More than 60 percent of that reduction went to individuals. Every taxpayer benefited.

That was a creditable accomplishment by the Congress and the administration. Tax receipts are now at an alltime high as a result of our current prosperity; but, even so, Federal taxes account for a slightly smaller proportion of our national income than they did in 1953.

We intend to go further at the earliest justifiable opportunity, for the tax burden is still far too heavy. However, the possibility of a reduction in taxes depends upon the degree of success of the administration and the Congress in keeping the budget position sound.

The sixth goal, to make constructive plans to encourage the initiative of our citizens.

A primary goal of this administration is a free and prosperous America. To encourage the initiative, energy, and savings of our people, which are the only means to prosperity, our most important steps were our anti-inflationary actions which have increased public confidence in the security and stability of our economy.

In addition, we have taken other helpful action:

1. We relieved the public of the burden of controls.

When this administration took office in 1953, the country was still handicapped with controls over prices and wages, and the use of certain materials. We promptly terminated these controls.

2. We have reduced Government activities which compete with private business.

During the past 4 years, some 500 Federal enterprises competing with business have been abolished. We have disposed of the Government-owned synthetic rubber producing facilities and the Government-owned tin smelter to private enterprise; and the Reconstruction Finance Corporation is now in the process of liquidation. Surplus real estate, worth \$366 million, has been sold and turned back to local tax rolls.

3. We have created a more favorable climate for enterprise.

- (a) We have moved vigorously to prevent monopolies.

The number of antitrust prosecutions has been materially increased and the number of convictions, guilty pleas, and consent decrees obtained in the past 4 years has been more than 40 percent higher than in the preceding 4 years.

The number of prosecutions under Section 7 of the Clayton Act, as amended in 1950, has increased from only 1 in the 2 years, 1951 and 1952, to 29 during this administration.

(b) We have encouraged small business.

Upon the success of small business firms to prosper and grow depends much of our production and our survival as a free competitive society. This administration has sought in many ways to aid smaller firms and to relieve them of burdensome taxes and requirements.

In the past 4 years, small business has benefited materially from tax law changes, the expiration of the excess profits tax law, the reduction in personal income tax rates in 1954, and the extensive revision of the Internal Revenue Code. Even more important to the smaller firms is the general prosperity of the past 4 years.

To aid small firms which are unable to obtain adequate credit from normal sources, President Eisenhower signed the Small Business Administration Act on July 30, 1953. That act created the Small Business Administration, and authorized a revolving fund of \$275 million to provide needed loans to small business concerns.

Subsequently, the administration supported increases in the SBA funds to \$375 million in 1956, and to \$455 million in 1957. The administration now has a bill pending to increase this to \$600 million, and to make the SBA a permanent organization.

Each year the SBA has made a larger number of loans, with over \$125 million made in the last 10 months, and currently is making loans to about 60 percent of the applicants whose files have been reviewed.

(c) We have encouraged trade with other countries.

This administration has effected measures which have aided the increase in our total foreign trade in 1956 by 22 percent (exports 25 percent) over 1952.

In addition, the Treasury, with the cooperation of your committee, has put into effect a number of customs simplification acts which have reduced the complexities attendant on the movement of goods into the United States. We have also provided greater certainty in our administration of the tariff laws.

(d) We have encouraged initiative and activity.

Throughout the past 4 years this administration has continuously attempted to encourage rather than discourage enterprise. As a result, our productivity and living standards have been rising steadily.

During the past 4 years, 500,000 new business corporations were formed in the United States. Of course, not all succeeded. A free economy is not a riskless economy. During that period, 44,000 enterprises, noncorporate as well as corporate, failed, but that is lower in relation to the number of new corporations formed than during the preceding 4 years—34,000 failures and 355,000 new incorporations.

(e) We have encouraged savings.

The importance of savings as the anti-inflationary source of financing is so great that I would like to make these points:

i. There are many people who benefit from higher interest just as there are many who find it an additional cost.

You and I hear complaints today about the increased cost of money. We know it is nowhere as important as the increased cost of labor, but

we also know that higher labor cost is a 2-sided coin, it is a 2-way street. Someone pays more—but someone receives more.

Now, the same is true of interest.

Although many of us owe money in one form or another, it is equally true that many of us have savings in one form or another. As a result, we have a stake in protecting our principal against deterioration in the value of the dollar.

We have a further stake in a higher interest return on our money. We are owners of millions of share accounts in savings and loan associations, time deposits in banks, and mutual life-insurance policies.

Many of us belong to a pension system, and our benefit payments tend to increase as interest earnings rise.

Some critics allege that higher interest rates benefit only the bankers. That is nonsense. Earnings of insured commercial banks as a return on average capital accounts in 1956 were 7.82 percent.

This is lower than the average for the prior 3 years, or for the years 1948–52. Such-bank earnings have averaged 8.29 percent for the past 4 years. This is less than the average of 8.62 percent for the entire 8 years of the prior administration.

Bank earnings for 1956, of 7.82 percent, are substantially less than the average earnings of all manufacturing companies which averaged 12.3 percent. In 1952, bank earnings of 8.1 percent compared with manufacturing earnings of 10.3 percent.

Bankers are brokers of money. When they receive more, they pay more. Our people have approximately 90 million savings accounts in banks and savings and loan associations. As you know, during the past few years most banks and savings and loan associations have increased the rates they pay to the saver.

The amount of return paid or accrued for savers in the savings and loan associations (members of the Federal Home Loan Bank System) increased from less than \$500 million in 1952, to an estimated billion dollars in 1956, a little more than double.

The amount of interest so accrued for savers in mutual savings banks rose from \$500 million to almost \$800 million in 1956. Interest paid or accrued to depositors in commercial banks increased from about \$450 million in 1952, to about \$800 million in 1956.

In the past 4 years, interest rates on all these types of savings have been moving upward and, in a modest way, we have followed with our recent increase in the interest rates on newly purchased savings bonds.

ii. Increased interest stimulates savings.

The higher interest rates paid in the past few years have encouraged greater savings. During the 4 years of the Eisenhower administration, our people saved more, both in terms of dollars (\$75 billion of personal savings compared to \$56½ billion in the preceding 4 years), and in relation to disposable income, 7.1 percent as compared to 6.4 percent.

iii. Increased savings are a major means of assuring continued high employment and prosperity.

Increased capital investment—more tools, more factories, more equipment—is necessary to provide the jobs with the high wage levels which are paid in this country today. It is the principal means by which we can raise our living standards.

To the extent such increases in capital investment are provided by excessive bank credit expansion, they are inflationary. To the extent they are financed out of savings, they are not.

With the great increase in capital investment in tools, it is essential to encourage savings in order that as little of this investment as possible be financed in such a way as to stimulate another round of inflation.

In the past 4 years, we have moved to an unparalleled prosperity. More people are living better than ever before. It is this prosperity, in turn, which creates heavy demands for money and requires some anti-inflationary restraint.

We have made great progress toward the sixth goal established by the President, to make constructive plans to encourage the initiative of our citizens.

Current monetary and fiscal policies have been beneficial to the economy.

This administration has successfully encouraged saving, enterprise, and production. This is a demonstrable and desirable accomplishment. With such means as it has had at its disposal, the administration has attempted to arrest inflation and has been largely successful.

I note, however, that there have been some complaints that the monetary and fiscal policies have been too severe and have affected certain segments of the economy unfairly.

A. Has the administration's anti-inflationary program been injurious?

Let me review again what the administration has done to fight inflation.

We have reduced the Government debt.

We have reduced Government expenditures.

We have balanced the budget.

We have reduced the floating debt.

We have moved some of the debt out of the hands of the banks and put more of it into the hands of individual citizens.

The reduction in Government expenditures has perhaps injured those corporations which might have received orders had the Government spent more money. The entire course of action, having been anti-inflationary, may have injured those few who might have benefited, at the expense of the rest of our citizens, from runaway inflation.

But, except for these few, the good of the overwhelming majority of our people was best served by the course we have followed.

We have also endorsed the independence of the Federal Reserve and conducted our affairs in such a way as to avoid interference with its anti-inflationary monetary policy.

B. Has the Federal Reserve's anti-inflationary program been injurious?

1. By restricting the growth of credit?

The Federal Reserve's program is one of allowing the natural market forces to operate, while adjusting credit availability to meet the needs of normal seasonal activities and sustainable economic growth.

The Federal Reserve has ceased its earlier policy of creating additional bank credit, except to the extent needed to meet the basic requirements of a healthy economy. *The Federal Reserve has not reduced the volume of available credit.*

Some current discussions of Federal Reserve policy proceed on the mistaken assumption that the Federal Reserve has reduced the amount of credit below an amount previously available.

Nothing could be further from the truth. Credit, the aggregate of new savings and new bank credit, has expanded substantially in the past 4 years, and at a rate fully equal to the need, to sustain a very high use of both services and materials.

There is more credit outstanding today than ever before—\$146½ billion more than in 1952.

I am going to read that again: There is more credit outstanding today than ever before—\$146½ billion more than in 1952.

Then follows a table which outlines where that extension of credit has taken place, and I would just refer to the last column to illustrate.

Uses and sources of credit

[In billions of dollars]

	Amount outstanding		
	Dec. 31, 1952	Dec. 31, 1956	Change
Uses of credit:			
Individual:			
Mortgage.....	82.4	131.5	+49.1
Consumer.....	27.4	41.9	+14.5
Other.....	25.7	34.1	+8.4
Total.....	135.5	207.5	+72.0
Corporate.....	202.9	249.3	+46.4
State and local government.....	31.2	50.0	+18.8
Total (other than Federal).....	369.6	506.8	+137.2
Federal Government.....	267.4	276.7	+9.3
Total.....	637.0	783.5	+146.5

Mortgage credit has gone up \$49 billion, consumer credit \$14 billion. This is over a period of 4 years we are now talking about, over the period of 1952 to 1956, through December of 1956. Mortgage credit has gone up \$49 billion; consumer credit \$14 billion; and "Other," \$8½ billion, or a total of \$72 billion.

Corporate has gone up \$46.4 billion; State and local governments nearly \$19 billion, for a total of \$137 billion.

Now then, the Federal Government has gone up during that same period \$9.3 billion, making a total, if you add it all up, of \$146.5 billion which occurred during the 4-year period.

As important as the fact of the increase in credit, is the source of this increase.

Now, the sources of the increase, Mr. Chairman, again a table, of which I will read only the last figures:

Nonbank credit over the 4 years which came about through savings during that period, nearly \$136 billion; bank credit, less than \$11 billion—for a total of \$146.5 billion.

Uses and sources of credit

[In billions of dollars]

	Amount outstanding		
	Dec. 31, 1952	Dec. 31, 1956	Change
Sources of credit:			
Nonbank credit (savings)	508.0	643.8	+135.8
Bank credit (money supply)	129.0	139.7	+10.7
Total.....	637.0	783.5	+146.5

In 1956 alone, total debt, other than Federal Government, increased \$37.5 billion. Of this increase, \$17.5 billion was individual debt \$15.5 billion corporate and \$4.5 billion State and local government debt.

The increase in total credit in the past 4 years has been greater than in either of the 2 preceding 4-year periods. But a most important fact to note is that 93 percent of this increase has come from savings and only 7 percent from an expansion in the money supply.

Then follows another table which shows where this has come from, and it shows that \$136 billion came from nonbank credit; and about, a little less than \$11 billion from extension of bank credit, for the total of \$146 billion of extended credit, increased credit.

Uses and sources of credit

	Increases in 4-year period		
	December 1944-48	December 1948-52	December 1952-56
	In billions of dollars		
Uses of credit:			
Individual:			
Mortgage.....	19.4	32.0	49.1
Consumer.....	9.3	13.0	14.5
Other.....	3.7	7.4	8.4
Total.....	32.4	52.4	72.0
Corporate.....	29.6	63.2	46.4
State and local government.....	2.7	11.5	18.8
Total (other than Federal).....	64.7	127.1	137.2
Federal Government.....	20.8	14.5	9.3
Total.....	85.5	141.6	146.5
Sources of credit:			
Nonbank credit (savings).....	64.3	124.2	135.8
Bank credit (money supply).....	21.2	17.4	10.7
Total.....	85.5	141.6	146.5
	Percent		
Percent of increase accounted for by:			
New savings.....	75	88	93
Expansion in money supply.....	25	12	7
Total.....	100	100	100

Of the \$146.5 billion increase, \$135.8 billion has come from existing funds of nonbank investors, which amount may be called "savings," and only \$10.7 billion from bank credit expansion, or increased money supply, new and additional spendable dollars.

The total increase has been adequate for our most healthy economic expansion in many years. The growth in the money supply, at the rate of only 2 percent per year, has prevented any objectionable bank credit inflation.

The secret of success in providing adequate funds for proper expansion without inflation is to encourage savings as the principal source. That we have done.

The foregoing table points out three most important facts:

(i) Total loans have increased substantially in the past 4 years—indeed more than in either of the 2 preceding 4-year periods.

(ii) This increase has been primarily in private credit—credit to buy homes, cars, consumer goods—rather than tanks or guns.

(iii) This increase has come much more from savings and less from bank credit expansion than in prior years—hence it has been much less inflationary.

The Federal Reserve policy of not encouraging more rapid bank credit expansion has been based on the premise that further expansion of bank credit would merely have enabled more would-be buyers to bid up the price of the limited supply of goods and services.

This policy has been necessary and in the best interests of the great majority of our people. But despite the substantial credit expansion that has taken place since there has been less new credit created than the demand therefor there has been some disappointment, and in some cases real hardship.

It is said that the unavailability of unlimited credit has been particularly burdensome on the housing industry, on small business, and on State and municipal projects. As these areas are very important to all of us, perhaps we should briefly review them.

Let's look at housing.

It is charged that we have impeded the flow of credit to housing. During the past 25 years, far from restricting credit to housing the Government has greatly increased the volume of credit available to this industry, over what it would be in a normal free market, by stepping in and guaranteeing the payment of millions of homeowners' mortgages.

This has helped to provide many Americans with homes which they otherwise could not afford. On the whole, this has been a good program, but we must recognize that it has introduced certain artificialities into the free market for the purpose of diverting credit from other uses into home mortgages, credit that wouldn't be available to housing without these Government guaranties.

That was true under the prior administration; it is true under this administration.

Has this administration restricted the terms on new housing loans? We have not—we have relaxed them. We have lowered the minimum downpayment on FHA loans, and we have permitted 30-year loans in place of the former 25-year maximum. We have materially liberalized FHA mortgage terms on existing homes.

In addition, FNMA special-assistance programs have been innovated since 1952 to provide mortgage support for relocation, redevelopment, and rehabilitation housing under Sections 220 and 221 of the National Housing Act, for housing for the elderly, and for Capehart military housing.

Also, the voluntary home mortgage credit program, started in 1954, has helped obtain home financing for veterans and others in small and remote communities, and for minority group members.

Has the administration restricted the availability of mortgage funds by curtailing the FNMA secondary market operations? Again, let's look at the record.

Purchases of mortgages by FNMA in the secondary mortgage market, during the last 12 months, have totaled nearly a billion dollars, an amount surpassed only in the calendar year 1950.

Furthermore, in 1950, all of those funds were provided by the Treasury; under the sounder participating program as Congress has now revised it, the funds largely come from private sources.

According to preliminary figures, in May of this year there were 96,000 private nonfarm housing starts. This is a second consecutive monthly increase on a seasonally adjusted basis, and brings the annual rate of new housing starts in May up to 990,000.

While this is somewhat below the annual rate of 1,146,000 starts in May a year ago, and even further below the 1,398,000 rate in May 1955, it is still a substantial volume of housing.

There are undoubtedly many contributing causes to this decline. For the past few years, home construction has been running ahead of new family formation, with a consequent reduction in the backlog of young families needing a home.

Building costs have risen substantially in the past 10 years. The price of land has also risen, as have State and local taxes, which are an element of cost. As the aggregate of these costs result in substantial increases in the price of a home, the number of potential purchasers is reduced.

This cost increase has been accentuated by the host of new labor-saving appliances and luxury equipment which our people feel are now necessary in a home. There has been actual overbuilding in some localities and a diminishing supply of desirable building sites in others.

All of these factors have had an adverse effect on new home construction, but the unavailability of unlimited mortgage credit is also a major factor, and it falls most heavily on those who heretofore have been able to obtain mortgage credit only through Government assistance.

The number of new homes financed through conventional mortgages (based entirely on the credit of the borrower and the amount of his equity) has not declined. Indeed the number of such housing starts so financed in the first 5 months of this year (269,400) was slightly higher than the number so financed in the first 5 months of last year.

It is the Government-guaranteed mortgages which are finding the less receptive market. The number so financed in the first 5 months of this year (114,200) was 42 percent less than the number financed in the first 5 months last year. This decline is due to the lower interest rate which such guaranteed loans bear.

The increase in the maximum rate on FHA loans from 4½ percent to 5 percent has given such financing renewed strength, but the lack of congressional authorization of an increase in the rate on VA-guaranteed mortgages has made it increasingly difficult for a veteran to obtain such a loan.

The significance of rate limitations is indicated by the most recent figures. Housing starts financed by conventional mortgages increased from 63,900 in April to 69,000 in May, which compares with 64,500 in May 1956.

Housing starts under the FHA program increased from 12,100 in April, to 15,000 in May, as compared with 19,700 in May 1956.

Housing starts under VA inspection declined from 13,500 in April, to 12,000 in May, compared with 26,600 in May 1956.

Thus it appears that there is only a relatively limited supply of mortgage credit available for the small downpayment, extended terms, and 4½ percent interest rate on VA guaranteed loans.

There is a substantial volume of mortgage money available for FHA insured mortgages at the 5 percent rate, although there is some insistence on higher downpayments than the minimum permitted under FHA terms. There appears to be sufficient mortgage credit available to finance those borrowers who can make an adequate downpayment and pay the going rate of interest.

This is the result of a free money market. It undoubtedly has caused many young families to postpone the purchase of a new home. Their disappointment, and that of the builder, is understandable.

Yet how much better off would they have been if a more than adequate supply of credit had brought about increased prices, not only of their home but of all of the other articles which they desire?

Let's look at small business.

I am sure that there have been some small business firms which have been unable to obtain all of the credit that they would have liked at the rates they would like to pay. I believe this has been true in every year through history, and it has been true for each of the past 4 years, but this does not mean that there has been any reduction in the dollars of credit extended small business in the past 4 years. Quite the contrary. Both the number and amount of loans made to small business have been increasing substantially.

In this connection, we must remember that the great majority of our banks are themselves quite small, and the size of the loans they can make is limited by law. Of the 13,101 insured commercial banks in the United States, 10,853 have deposits of less than \$10 million each and, in general, cannot make loans above \$100,000.

That is almost 11,000, out of the 13,000 that are small banks.

Total loans of banks in this category increased by almost \$2.1 billion during the past 4 years, an increase of 19 percent. Virtually all of their loans are to farmers, homeowners, consumers, and small business firms.

Another 1,802 banks generally can make loans up to \$500,000, but most of their loans would actually be in amounts of less than \$100,000. Total loans of banks in this category increased by \$4.4 billion during the past 4 years, an increase of 44 percent.

The remaining 446 banks do indeed represent almost two-thirds of the Nation's deposits, and are of great importance to the economy.

They are the primary source of bank credit to larger business firms, but even they make many loans to small business.

A survey made of a representative group of 78 such large banks indicated that in the year from September 1, 1955, to August 31, 1956, their small business loans, for amounts of under \$100,000, had increased by \$228 million, or 14 percent; and that the number of such loans had increased by 5 percent.

Within this group there was more of an increase, both in numbers and dollar amount, in the loans under \$50,000 than in those between \$50,000 and \$100,000.

While it is true that total business loans of banks increased somewhat more rapidly than those loans for amounts under \$100,000, this is a pattern which would be expected in such a period of rapid economic expansion, for the cyclical heavy goods industries naturally tend to require a larger volume of credit in such a period.

At all times the established, successful firm is more able to obtain necessary credit than is the new, unproven or unsuccessful company, and this is particularly true of a period of credit stringency. Not all firms have obtained all of the credit they have wanted. Yet, in the aggregate, they have obtained more than ever before.

In addition to the increased amount of bank credit received by small business during the past 4 years, there has also been a sizable volume of book credit extended by larger firms to smaller firms—distributors, merchants, and suppliers.

I do not mean to minimize the disappointment, inconvenience, and in many cases real hardship, that some businesses have experienced because of their inability to obtain as much credit as they would have liked.

Indeed, this is a matter of deep interest to the administration which, as you know, has supported the creation of the Small Business Administration, the enactment of improved tax laws, and the granting of exemptions from certain Securities and Exchange Commission regulations.

In addition, we have made vigorous efforts to see that more defense work is subcontracted to smaller firms.

I understand that you intend to invite Mr. Muller, Assistant Secretary of Commerce, to testify before you, and I believe he will discuss the matter of small business financing at somewhat greater length. I do, however, want to make the point that there has been a large volume of credit available to, and used by, small business in the past 4 years.

Let's look at States and municipalities.

In the past 4 years, a quarter of a million new schoolrooms have been built for our youngsters. Total public construction in 1956 was 23 percent above 1952 levels, and educational construction was up 56 percent.

During 1956 alone, new borrowing by States and municipalities totaled \$5.4 billion; and during the last 9 months for which figures are now available, more elementary and secondary school bonds were sold than in any 9-month period in our history.

State and municipal financing has increased by \$18.8 billion in the past 4 years. This is more than it has ever increased in any other

4-year period, and compares with only \$11.5 billion during the period 1948-52.

These figures do not demonstrate any extraordinary burden on State and municipal financing from lack of available credit. Undoubtedly, local governments have been unable to obtain all of the funds they would have wished, but they have built more and they have financed more than in any other 4-year period.

The Federal Reserve's monetary policy for the past 4 years has been, and is, one of discouraging the growth of credit at quite as rapid a rate as would-be borrowers desire. As a consequence, some individuals, some home purchasers, some small businesses, and some municipalities, and other categories of our citizens, have felt some pinch as a result of limited credit. But in the past 4 years, small loans to business have increased substantially.

In the past 4 years, \$57.5 billion has been spent for housing—as much as had been spent in the preceding 6 years.

In the past 4 years, \$16.7 billion has been spent for new highway construction—more than had been spent in the preceding 11 years.

In the past 4 years, \$8.8 billion has been spent for school construction—more than had been spent in the preceding 20 years.

This is not the record of extreme credit stringency. Any freer credit would have further inflated prices.

Let's look at the rise in interest rates.

The Federal Reserve's abandonment of its pegging of prices in the bond market has prevented an unlimited growth in credit. It was intended to, and did, slow the rate of growth of bank credit.

It also has resulted in some increase in interest rates. It is alleged by some that this increase in interest rates has brought about a severe increase in the burden of taxes and in the prices we pay for manufactured goods, or utility services; that it has materially increased farmers' costs, or the price of a home.

Now, are these charges true?

Higher interest, although the result of a lesser supply of credit than the demand therefor, a condition which prevents far greater inflationary increases in other costs, is itself an element of general costs and in some cases may be reflected in higher prices.

However, interest payments are such a small fraction of the total cost of business operations, that a rise in the rate does not represent much of an increase in total cost.

What is the interest burden on the taxpayer?

Total budget expenditures for fiscal 1957 are estimated at \$68.9 billion. Of this, \$7.2 billion, or 10.4 percent, represents interest expenditures. The per capita cost of all expenditures of the Federal Government for this fiscal year is \$406; for interest alone, the per capita cost is \$42.40.

In 1952, interest on the public debt was \$37.57 per capita. Thus the increase in interest on the public debt during the past 4 years amounts to less than \$5 per person.

Now, what is the effect on the price of manufactured goods?

In 1946, gross sales of all manufacturers amounted to \$132 billion. Manufacturers had net interest expense in that year of about \$154 million, equal to one-eighth of 1 percent of total sales.

In 1952, interest expense had increased to about one-fourth of 1

percent; and on the basis of limited information now available, it appears that the 1956 ratio will be about one-third of 1 percent. Thus, interest costs are only one-third of 1 percent of the average sales price of manufactured goods.

Of the cost of an article selling for \$100, about 33 cents represents interest, with no more than 10 cents of that representing an increase since 1952.

Furthermore, the increase in this minor item of interest costs reflects an increase in the amount of debt as well as an increase in interest rates.

The relative unimportance of interest as a part of total costs is reflected in the fact that during the same 10-year period, prices of goods that consumers buy rose 27½ percent, or \$27.50 on a \$100 item (due to labor and other costs), compared to the 20-cent increase due to higher interest.

In other words, \$27.50 for other items as compared to 20 cents for interest.

The far greater significance of the increase in labor and other costs is reflected quite clearly in the price of consumers' services which have risen 43½ percent during the same 10 years.

It is apparent from these figures that even with increased interest rates and increased indebtedness, the burden of interest costs on manufacturers in reference to their total costs is very slight. The effect of higher interest on the sales price of goods is hardly significant.

This is even more apparent when we compare the increased costs of the last year. Prices of goods bought by consumers (which reflect material, labor, interest, and profit) have risen 1.3 percent. The price of consumers' services (which reflect primarily labor costs) has gone up 2.3 percent.

How does it affect public utility rates?

It has been suggested that higher interest rates lead to substantial increases in public utility rates. This sounds plausible because public utilities rely heavily on bonded indebtedness.

However, the latest figures available indicate that the net interest expense of public utilities is still less than 4 percent of gross revenue—the same proportion as in 1952. Even for electric utilities, where average interest cost on long-term debt now exceeds 5 percent of gross revenue, the relative cost of interest has risen very slowly.

The estimated average of 5.2 percent for both 1955 and 1956 compares with 4.8 percent in 1952 and 5.0 percent for 1946. In other words, 5.2 in the last 2 years; 5.0 percent in 1946.

Now, farmers' costs:

Difficult as the farmer's position has been, it is not the result of interest rates. The Department of Agriculture estimates that only about 5 percent of farmers' costs are for interest.

Interest rates on farm loans outstanding in insured commercial banks on June 30, 1956, averaged 6.1 percent. This was four-tenths of a percentage point higher than the average rate reported in a similar survey made in 1947; less than one-half of 1 percent difference since 1947.

Thus this four-tenths of 1 percent increase in rate would be less than one-half of 1 percent of his total costs or 5 cents on a sale of \$10 worth of farm products.

Now, the cost of a home.

The effect of higher interest rates in relation to the decline in private nonfarm housing starts from 465,000 units in the first 5 months of last year to 384,000 for the same period this year, has been grossly exaggerated.

Housing is perhaps the most dramatic example of the effect of rising costs. Hourly wage rates in building construction have risen 21 percent in the past 4 years. In the manufacture of some products, the increased cost due to hourly labor rates has been offset by greater efficiency. Through use of additional capital goods—tools—the productivity per man-hour has been increased enough so that the total cost has been kept fairly stable. This is true of most of our home appliances.

However, in those fields in which mechanization is not practicable or in which restrictive practices or legal requirements have prohibited maximum efficiency, the cost of the finished product has risen in close relation to the increase in hourly labor rates. There is no better example of this than housing.

Many home purchasers consider only the size of the required monthly payment—not the number thereof or the elements that make it up. To them, interest is of no significance. To the more sophisticated purchaser who inquires as to the component elements in his mortgage payments, increased interest rates are small in relation to increased labor and material costs.

This is apparent if we compare the cost and financing charges of the same house in the spring of 1946, the spring of 1953, and the spring of 1957. Let us take as an example a house that cost \$10,000 to build in the spring of 1946, and compute the required monthly payments on the basis of 15 percent down and the balance over a period of 20 years.

	Spring of—		
	1946	1953	1957
Estimated cost of house.....	\$10,000	\$17,300	\$19,000
Interest rate (FHA).....percent..	4	4½	5
Monthly payment (for 20 years).....	\$51.51	\$91.06	\$106.58
Increase in cost of house since 1946.....		\$7,300	\$9,000
Increase in monthly payment since 1946:			
Due to interest rate.....			\$8.71
Due to other costs.....			\$46.36

NOTE.—Housing costs are based on data compiled by Roy Wenzlick & Co.

The preceding table shows that the \$10,000 house in the spring of 1946 cost \$19,000 in the spring of 1957; and of the amount of increase in monthly payments, \$55.07, \$46.36 was due to other costs and \$8.71 was for interest.

The monthly payment has more than doubled in 11 years. Of this increase of \$55.07, \$46.36 reflects higher labor and material cost, and \$8.71 is due to higher interest rates.

During the past 4 years in which our policies have resisted inflation, the sales price of that house has gone up much less—about \$400 per year as compared to about \$1,000 per year from 1946 to 1953. And I want to repeat that the increase in the cost of that house, from

\$10,000 to \$19,000, has gone up much less in the 4 years since we have had these restrictive practices than it did in the 4 years when we had the easy money.

In other words, it went up \$400 in these years as against \$1,000 in the easy-money years, and the interest went up only \$8 a month.

Which has been the major factor in discouraging construction? The \$9,000 increase in building cost (\$46.36 per month), or the 1-percent increase in the cost of interest (\$8.71 per month)?

While interest is an element in the cost of mortgaged homes, the increase in interest rates has not been the major factor in delaying home construction. Mortgage interest rates were higher in 1955 than in any prior recent year; yet new nonfarm housing starts were the second highest in history, at more than 1,300,000.

Almost 5 million new dwelling units have been built in the past 4 years. Less than 3½ million new households have been formed in that period, so that 1½ million units have gone to satisfy prior shortages and to cover houses abandoned or razed to make way for new construction. The proportion of married couples without their own household has declined 21 percent since 1952.

A strong desire continues to exist for better housing, but it is hindered from becoming an effective demand by today's inflated prices. To attempt to force an acceleration in home construction today by making more credit available for housing would add further to the already increased building costs.

This would not only be inflationary, it would encourage uneconomic practices and curtail the new construction that we might otherwise expect in years to come.

The foregoing review of the effects of this administration's fiscal policies indicates that the supply of credit has not been reduced. The supply of credit has merely been prevented from expanding as rapidly as the demand therefor.

This slowing of the rate of growth of credit has inconvenienced those who have found credit unavailable, and imposed a higher charge on those who have borrowed. These results are hardly welcomed for their own sake, but they are the price we have to pay for the price stability that we have achieved in the past 4 years.

This has been a far greater stability in prices and in the purchasing power of the dollar than we have enjoyed for two decades. Faced with this choice between the inconvenience of limited credit and the robbery of renewed inflation, our people would certainly choose the course which we have pursued for the past 4 years.

In conclusion, I have attempted to review for you the conditions existing when the Eisenhower administration took office, the goals that the President set for us, and our progress toward those goals.

We have not achieved perfection by a long way. We have been unable to fully accomplish some of our debt-management objectives. We have perhaps checked, but not entirely stopped, inflationary pressures.

In the process, some of our citizens, some of our municipalities, and some of our businesses have been unable to obtain all of the credit they would have liked.

We have had a large measure of success in encouraging the initiative

of our citizens, but not every business has prospered as much as it might, nor every citizen had all of the comforts he would enjoy.

I acknowledge imperfections in our accomplishments, but I entertain no doubt as to the propriety of our goals or the wisdom of our policies. To aid you in your consideration of the alternative courses, and to help you measure their promises against the actual results of the past 4 years, let me remind you of some of our achievements.

When we took office in 1953, the Federal debt was equal to 89 percent of our national income—in December 1956, it was 79 percent, as compared with 89.

For the fiscal year 1953, budget expenditures were \$74.3 billion; and, for the year 1957, they are estimated at \$68.9 billion, and \$71.8 billion for 1958.

For the fiscal year 1953, the budget resulted in a deficit of \$9.4 billion—for 1957, it will result in a surplus.

From 1939 through 1952, the cost of living increased an average of 7 percent a year—for the past 4 years, the average increase has been only six-tenths of 1 percent.

In the past 4 years, civilian employment has risen 6 percent, average weekly earnings of production workers in manufacturing have risen 18 percent and, after allowance for the 2.4-percent increase in consumer prices which occurred between 1952 and 1956, the gain in workers' earnings, after taxes, amounted to about \$10 per week, or more than 15 percent in real purchasing power gained during the period.

Personal income of individuals has risen every year, from \$272 billion in 1952 to \$325 billion in 1956, a gain of 20 percent, and an estimated \$340 billion for 1957.

Labor income has not only risen in dollars; it has increased from 67.2 percent of national income in 1952 to 69.8 percent in 1956, while corporate profits declined from 12.7 percent of national income to 11.9 percent.

Striking achievements have been made in housing. The 5 million dwelling units that were constructed exceeded the number built in any previous 4-year period, and substantially enlarged the housing stock available to the American people.

There were improvements in the size, design, and equipment of new homes, and sizable outlays for repairs and alterations added to the comfort and convenience of existing homes. A growing proportion of our homes were owner occupied—60 percent in 1956, as compared with 55 percent in 1950.

This is a gratifying record of the improvement in the level of living that can be achieved only through a vigorous, competitive, free-market economic system which offers both individual freedom of choice and the stimulation of initiative through personal incentive.

In particular, it shows the capacity of such a system to bring about confidence and daring in enterprise and widespread participation in the benefits of economic expansion. This is in sharp contrast to the artificial restrictions, interferences, and controls of a paternalistic bureaucracy.

The past 4 years have demonstrated the ability of the Nation's private economy to expand, to provide an increasing number of better jobs at better pay, and to raise levels of living.

These 4 years have tested the capacity of our economy to adjust to large changes in the pattern of demand and the effectiveness of public policies designed to promote growth of individual freedom and stability in the economy.

Because the problems are continually changing in a dynamic economy, policies aimed at promoting stable growth must be flexible. This fact was well illustrated in the past 4 years of the Eisenhower administration. Our problems have shifted from those of a controlled, wartime economy to those of a rapidly widening prosperity. We have been able to encourage this prosperity.

Through the flexibility of monetary and fiscal policies, the Government has been able to adjust to the rapid changes in our economy. We have moved forward toward our goals and demonstrated the great capacity of a free economy to correct imbalance and to maintain growth with a high degree of stability.

We have accommodated the reduction in wartime Government spending, accompanied by recordbreaking tax reduction, and offset a threatened decline in employment and business activity in 1953-54.

We have encouraged an expansion of enterprise to new high levels, and, through expenditure and debt reductions as well as debt management, we have slowed the growth of inflationary credit.

We have encouraged a rapidly rising economy which has brought more wealth, more purchasing power, more comfort, more jobs, more homes, more luxuries, more leisure, more education, and more security to our people than they have ever enjoyed before.

Gentlemen, I take great pride in making this report.

EXHIBIT 36.—Remarks by Under Secretary of the Treasury Burgess, October 23, 1956, at the 82d Annual Convention of the American Bankers Association, Los Angeles, Calif.

On behalf of the Treasury, let me acknowledge the great service which the country's banks have rendered to the Government during the past year in handling our funds, in helping to sell our security issues, and in many other ways.

We rely particularly on your voluntary efforts for the sale of savings bonds. About 40 million Americans now own more than \$41 billion of Series E and H savings bonds, a new alltime high mark. In spite of the increased competition of other investments at higher rates, sales of these bonds this year will exceed \$5 billion. Sales of small denomination bonds are ahead of last year.

Our partnership in the sale of savings bonds dramatizes the joint responsibility of Government and the banks for the preservation of the value of the United States dollar. In selling these bonds to millions of people, we incur an obligation to see that the dollars in which they are finally paid preserve their buying power.

In recent months, this issue has attracted much public attention. The Government is being criticized for allowing, in nearly four years, a 2½ percent increase in the cost of living. The same critics are, at the same time, attacking the steps taken by the Government to preserve the value of the dollar and keep prices stable. Under the previous administration, which did not take effective steps to preserve the value of the dollar, the cost of living rose 92 percent and the value of the 1939 dollar was cut to 52 cents. About half of this loss was after the conclusion of World War II.

Thus, there has been inflation, and the threat continues. This threat is not solely a domestic issue. It is a world-wide problem. Everywhere recognition grows of the wicked damage which inflation does to the young and the old, the pensioner, the saver, the salaried and professional worker—and to sound economic growth.

One reason for the inflation danger is that we are now enjoying a great peacetime prosperity—the first real peacetime prosperity in this generation. Month by

month, we are making new records in the country's national product and national income. Our dollar wages and, more important, our real wages are at new high levels.

With confidence in the future, American business is making unprecedented investments in factories, machinery, public utilities, etc. Local and State governments are building roads and schools. In addition, we are building new homes at a rate of better than a million a year.

Because of our great prosperity, the demand for money is greater than the amount we are saving. And this in spite of very large savings. Individuals are saving about 7 percent of their income, and business is saving and using for plant development about half of its net income.

But all the money we are saving, as individuals and business, is not enough to pay for all the things we Americans would like to have and to do. That is fundamentally the reason why we are short of money and interest rates have risen.

Because of these huge demands, money for investment is being drawn from the banks as well as from savings. Bank loans to business have risen by leaps and bounds to alltime highs, with the seasonal peak still ahead. More people are borrowing more money than ever before, but they want still more.

In such a situation, everybody who wants money simply can't have as much as he wants. If the Government tried to provide it through the Federal Reserve System, that would be straight inflation.

If we are to keep our prosperity and continue evenly our dynamic growth without inflation and without "boom and bust," we must, as a Nation, follow policies directed toward two objectives: First, to restrain or postpone some of the less essential uses of money, and, second, to encourage more saving.

These policies are a joint responsibility of the Government, of business and banking. We are all in the same boat. We don't want "boom and bust;" we do want to continue our fine prosperity.

Here is what the Government is doing:

(1) We have brought the Federal budget into balance and started to reduce the public debt. You can't have stable money if Government deficit spending is feeding the fires of inflation.

(2) We have reduced taxes, leaving more money in the hands of the taxpayers.

(3) We have assured to the Federal Reserve System its freedom to exercise independent judgment in its monetary policies. The System, in turn, has allowed the relation between the supply and the demand for funds to express itself in interest rates.

Protected by these policies, we have had remarkable price stability. Confidence is high and savings are growing. These fundamental steps take time to work, but we think they are working.

But the banks of the country also have a responsibility for preserving the value of the American dollar. They are at the crucial point of impact with the individual borrower. For national policy only becomes truly effective when the bank officer sits down with the borrower and discusses specific loan problems.

With the present demand for money running beyond the accumulation of savings, the banks have to be selective in their loans.

Fortunately, in this country, the Government does not try to dictate to the banks just what kinds of loans they can make or not make. That rests in the judgment of the individual banker. The banker thus assumes stewardship in administering the national policy. The critical question in banking today is how the banks carry out this stewardship. Do they freeze up at some point and make no more loans? Do they, as I have heard suggested in some cases, say to the borrower, "Bill, I would like to take care of you, but we are fresh out of money because of Federal Reserve policy?"

Or does the banker screen his loans with care, trying to see that every sound and essential requirement for credit is met but that more speculative and less desirable requests are postponed or reduced? And does he explain the real reasons for restraint in lending in the interest of the borrower?

I believe the evidence is conclusive that the banks of the country have generally been following wise policies. The recent survey of the American Bankers Association of 78 representative banks shows that loans to small business are 14 percent higher than a year ago. This and other evidence from many localities indicates that the essential needs of sound borrowers are being met—but with proper discrimination.

The action which you, as bankers, and we, in Government, take at this time has a weighty impact on human welfare of tomorrow. What all of us do today

will determine whether the pattern of our economy shall be that of "boom and bust" or whether we shall continue our high prosperity and dynamic growth without serious interruption.

The way you deal with your customers at this critical time will affect the public reputation of banking more than any advertising campaign.

Our joint ability to recognize and explain Federal Reserve policies will influence public opinion of the Reserve System and of sound money policies. If we should lay all the blame for loan rejections on the Federal Reserve System, we might undermine its independence and invite political reprisals. Most of us here today value highly the contribution of the Federal Reserve System to sound money, and we must not take it for granted.

Without question, we have today—all of us working together—a great opportunity. The country is enjoying remarkable prosperity and vigorous growth. With wisdom, understanding, cooperation, and courage that prosperity and growth can be carried far into the future.

EXHIBIT 37.—Remarks by Under Secretary of the Treasury Burgess, February 5, 1957, before the Citizens Committee for the Hoover Report in conjunction with their Third National Reorganization Conference, Washington, D. C.

Financial stability is one of the great foundations of the unparalleled prosperity and growth of our country. We have grown because of the enterprise of our citizens, and that enterprise is founded on confidence, confidence that people can build for the future for themselves, their children, and their grandchildren.

The three great foundations of confidence are security from outside attack, justice, and financial stability. Not the least of these is financial stability. For financial instability is the thief and the robber that takes away by inflation the fruit of labor, just as surely as the enemy or the unjust sovereign. Those who believe this place financial stability at the very head of the list of economic and social virtues.

The methods of achieving financial stability are not secret or novel. They are exactly those which Alexander Hamilton, with the support of George Washington, established in this country by almost superhuman wisdom and effort. They are threefold: a balanced budget, an honored and properly managed debt, and a banking mechanism dedicated to serve the people's welfare. Today, as then, these three simple principles are the basis for financial stability.

These principles have always been recognized objectives of Government in the United States, and our record in achieving them has been better than that of almost any other country. Therein lies perhaps the greatest secret of our growth and prosperity.

We have proved the value of these principles, not only in their observance but negatively also in their neglect. For at times when we have departed from them, we have suffered inflation and deflation, boom and bust. Foreign experience is equally convincing.

For a number of years we faltered seriously in following these principles, and between 1939 and 1952 our currency lost about half of its buying power. The burden fell on all groups of our people but most unfairly on some who have deserved the best from their country—the thrifty, the salaried and professional people, the pensioner, and, from time to time, the farmer.

In the past four years we have returned toward the more rigorous practices of these three great principles. Between the fiscal year 1953 and the fiscal year 1955 expenditures of the Federal Government were cut by \$10 billion, from \$74 billion to \$64 billion. This, together with rising revenue, financed a tax cut of \$7.4 billion and brought us a balanced budget for two years, with a third in prospect.

With respect to monetary policy, the Federal Reserve System regained its freedom to exercise its powers solely for the public welfare rather than to support the prices of Government bonds. The exercise of those powers helped to check an inflationary movement early in 1953, helped to cushion a decline in 1954, and has held back inflationary trends in the past 18 months.

In the management of the debt, we have regained freedom of action, and debt management has supplemented, instead of crippling, the policies of the Federal Reserve System. A smaller proportion of the debt is held by the banks and a larger proportion is in the hands of the people.

As a result of these changes, the purchasing power of the dollar, as measured by the cost of living, was stabilized within a narrow margin.

Today, under the pressures of huge defense needs and great prosperity—guns and butter—these principles are in danger again. This is the kind of battle never finally won. The administration has been able to present to the Congress a balanced budget for this and the next fiscal year, but by a narrow margin and at a rising level. This balance is threatened by a wave of spending proposals coming before the Congress.

The sound banking and monetary policies of the Federal Reserve System are under attack from many quarters.

The cost of living index, which reflects the buying power of money, is moving up again.

The President and the Secretary of the Treasury have stated and reemphasized the determination of this administration to do its utmost to maintain financial stability.

In the Treasury, which has a very special responsibility in this area, we are working at this problem every day in a great variety and complexity of ways.

Achieving sound money is no great overall process; it is an hour-by-hour, uphill climb.

Pressures for increased spending come from many sources. The safety, in fact, the very existence of this Nation requires a strong and ever stronger defense establishment. The objective of most Government departments is to achieve some specific service for our rapidly growing country. Most senators and congressmen are subject to pressures for increasing Government benefits for the people they represent. Thus, the pressure for spending is enormous. There are only a few people whose daily business it is to make all of these desires and pressures conform to the pattern of sound finance. That is why we need every day the help of citizens like you, who are willing to go to bat, not for what you want for yourselves but for the public good.

One of the great virtues of the Citizens Committee for the Hoover Report is that you are not content with reaffirming and emphasizing general principles, though you do that. You have also performed a great service in studying just how these principles are carried out in detail.

The battle is not won by great, broad, sweeping decisions. It is won by detailed action on thousands of specific problems. The process is: "precept upon precept, line upon line, here a little and there a little."

EXHIBIT 38.—Statement by Under Secretary of the Treasury Burgess, March 4, 1957, before the Subcommittee on Housing of the House Committee on Banking and Currency

I am glad to come before your committee to discuss with you the important problem of assuring an adequate flow of funds for housing.

The Treasury is interested in measures to permit the construction of vitally needed housing throughout our Nation. The Treasury is also interested in helping to insure that Federal Government financial policy is always in tune with the achievement of sound economic growth within the framework of a relatively stable price level. As building costs advance, the purchaser of housing receives less for his money.

The volume of total construction is continuing at a very high level despite some decline in housing starts. Total new construction expenditures (including industry, stores, schools, roads, etc., as well as home building) were estimated by the Department of Commerce at an annual rate of \$44.8 billion in January 1957. This is the highest in history with the exception of May and June 1956. A recent joint statement by the Departments of Commerce and Labor concluded that outlays for new construction are expected to total \$46.4 billion in 1957, about 5 percent above the record volume of \$44.1 billion in 1956.

This heavy volume of construction has been accompanied by increasing prices. The composite index of construction costs, as prepared by the Department of Commerce, stood at 132.8 in December 1956, an increase of 5 percent over December 1955, and 8½ percent over December 1954.

It has been suggested that more funds would be available for housing if part of the assets of the national service life insurance fund could be invested in guaranteed mortgages. The Treasury is opposed to such a plan. The funds held for this account are not in idle cash but are currently fully invested in special issues of Government obligations. To raise the cash necessary for the purchase of mortgages would require the Treasury to redeem the obligations now held by the fund. This would involve an equivalent amount of borrowing in the market by the Treasury, thus adding to the pressure on available funds for private investment. This borrowing would have to be done from many of the same financial institutions and other investors who provide money for mortgages. All this suggestion would do is to increase funds available for mortgages on the one hand and take funds away with the other. There is no "magic well" of untapped available credit.

The other major objection which the Treasury has to this proposal is that investment in mortgages would violate the established principles which have heretofore governed the investment of Federal trust funds—that they should be in United States Government securities, the world's best investment. With this as a precedent, pressure would be built up for similar relaxation of the investment policies of other Government trust funds, such as the unemployment trust fund, Federal old-age and survivors insurance trust fund, Federal employees retirement funds, and the railroad retirement account.

EXHIBIT 39.—Statement by Under Secretary of the Treasury Burgess, April 3, 1957, before the Senate Finance Committee

I am glad to be with you today in support of H. R. 5520, which would raise the ceiling on the interest which the Treasury can pay on savings bonds.

The savings bonds program has played an important role in our national life ever since it was first introduced in 1935. There are now more than \$41 billion of Series E and H savings bonds outstanding in the hands of about 40 million investors. This program has been a principal means of achieving a wide distribution of the public debt in the hands of individuals.

There are approximately 8 million people now buying bonds through payroll savings plans alone. The program is encouraging thrift at a time when the Nation requires additional savings to balance spending and avoid inflation.

Savings bonds have many unique qualities. They are free from market fluctuations. They are protected against loss. They are easy to purchase and easy to redeem.

For the vigorous continuation of the program it is also essential that the buyer of savings bonds feels that he is getting a fair interest return on his savings. With increases in interest rates on other types of savings during recent years, a modest upward adjustment in the rate of interest on new E and H bonds is indicated. That is the purpose of the present legislation. It is simply to give the millions of small buyers of savings bonds the benefit of the interest rates the large buyers of bonds are already receiving.

The legislation which the Treasury requested from the House of Representatives in February would have given the Treasury the same discretion with regard to interest rates on savings bonds that is permitted on other types of Treasury bonds. That maximum permissible rate is 4¼ percent. H. R. 5520, which has just been passed, fixes the savings bond ceiling at 3½ percent. While the greater flexibility suggested by the Treasury is preferable, H. R. 5520 would enable the Treasury to put into effect its plans to increase from 3 percent to 3¾ percent the yield to maturity on all E and H bonds sold beginning February 1, 1957, and

would provide some additional flexibility to meet possible future changes in conditions. We are therefore prepared, in the interest of prompt action, to accept H. R. 5520, as passed by the House of Representatives.

The E bonds which the Treasury has been offering sell for 75 percent of their face value and the bonds yield 3 percent when held to their maturity of 9 years and 8 months. If this bill is passed, the Treasury proposes to leave the issue price and face value of the new E bonds unchanged. The increase in the interest return from 3 percent to $3\frac{3}{4}$ percent would be accomplished by shortening the term of the bond from 9 years and 8 months to 8 years and 11 months.

We also propose to increase the redemption values of new bonds to provide a substantially higher yield to owners who find it necessary to cash their bonds early. The return on the new bond when held for 3 years, for example, would be 3 percent compared with $2\frac{3}{4}$ percent at present.

The Treasury also plans to offer, effective February 1, 1957, a revised 10-year Series H savings bond, paying interest each 6 months by check, with yields generally comparable to the new E bond.

EXHIBIT 40.—Statement by Under Secretary of the Treasury Burgess, July 29, 1957, before the Senate Finance Committee Hearings on the Financial Condition of the United States

I am very glad to appear before your committee today to discuss the problems of the management of our public debt in more detail than was included in Secretary Humphrey's presentation, and this, I realize, is a very technical subject. We will try to make it as clear as we can with the use of charts and slides. But we appreciate greatly the chance to tell the committee our story.

Let me review first some of the more important changes in the debt in recent years, with particular emphasis on the period of $4\frac{1}{2}$ years since we have been at the Treasury.

1. Trends in the size of the debt: The history of our national debt is, of course, a direct reflection of wars and depressions and changing financial policies over the years. In the first of several charts which illustrate some of our problems is a comparison of the debt over the past 40 years, and we have large copies of these charts so that you can see them. The audience has copies of the text before them, so they are not completely shut off from seeing these.

The public debt just before World War I was only \$1 billion, but by the end of that war the Treasury was faced with the management of a then unprecedented debt of \$26 billion. There was \$10 billion of debt reduction out of budget surpluses during the prosperity of the twenties, but then came the depression and the debt trebled—from \$16 billion to \$47 $\frac{1}{2}$ billion. That was just before World War II.

During World War II, the debt rose to new heights and reached a peak of \$280 billion in February 1946. Part of that debt, however, represented a large amount of borrowing during the Victory loan in December 1945, which, as it turned out, was not needed because of a more rapid reduction in war spending than had been anticipated. Therefore, about \$20 billion of that excess cash was used to pay down debt in the remainder of that year—the year 1946. The figure of \$259 $\frac{1}{2}$ billion in December 1946 is a more representative figure of the public debt at the end of the war, so we have shown that on the chart.

CHART A

THE PUBLIC DEBT

**Excluding Victory Loan proceeds used to repay debt in 1946.*

Office of the Secretary of the Treasury

3-1204-12

Post-World War II debt reduction out of budget surpluses in 1947 and 1948 was about \$8 billion. Then with Korea, and an expanded defense program, there was further deficit financing and the debt grew to \$267½ billion in December 1952.

Inherited deficits, which could only gradually be eliminated, brought the debt to an all-time seasonal peak of \$281 billion, in round figures, by the end of 1955. This past December the debt was back down to \$277 billion, reflecting budget surpluses and a better balanced seasonal pattern of corporation tax payments.

Our debt of \$270½ billion on June 30, 1957, the seasonal low point, was \$2 billion below a year ago. Of course, to get the figure you have to deduct the surplus, and you have to make allowance for a little change in the cash balance.

While this debt reduction is not large, the important point is that, despite huge defense expenditures, the upward sweep of the debt has been checked and reversed—not by much, but by a little.

2. The burden of the Federal debt relative to our strength: As our economy grows steadily and confidently, so does our ability to carry a given amount of public debt without too great a strain on the economy. Thus the sound economic growth of our Nation in recent years has made the Federal debt somewhat less burdensome. That is shown on chart B.

CHART B

RELATIVE SIZE OF THE PUBLIC DEBT

Office of the Secretary of the Treasury

6-1207-9

The left-hand side of chart B shows the relative size of the Federal debt on a per capita basis. By December 1946, it had risen to a high point of \$1,832 for every man, woman, and child in America.

By December 1956, it had shrunk by about \$200 per capita, by reason of the growth of the population. By June 30, 1957, the per capita debt was down further—to \$1,581.

When the Federal debt is related to national income—on the right-hand side of chart B—the reduction in burden is much greater. Ten years ago the \$259½ billion public debt was one-third larger than our national income of about \$190 billion.

National income has now grown to more than \$350 billion, so that our \$277 billion national debt in December 1956 was equal to only 79 percent of national income. As of June 30, 1957, the ratio had fallen further—to 75 percent.

Unfortunately, however, a part of this reduced ratio of debt to income—particularly prior to the Federal Reserve-Treasury accord in 1951—was a reflection of the inflation of the earlier postwar years which brought about a significant decline in the purchasing power of the dollar.

In spite of inflation, however, a large share of the reduction represents the growing productivity of our Nation in real terms—the increased ability to produce more houses, industrial plants, highways,

schools, cars, TV sets, and so forth. With greater price stability during the past 4 years, up to a few months ago, increased productivity has accounted for almost all of the reductions since 1952.

In this way we are gradually growing up to the debt, so that even though the dollar amount of debt is not declining as much as we might wish, the debt still becomes somewhat less burdensome.

I am not arguing for doing nothing. I think we ought to be actually reducing the debt; but even though we do not, the situation, from the economics of the country, is becoming a little better in spite of us.

Another way of looking at the public debt is in terms of its interest burden.

The left-hand side of chart C shows the computed interest charge on the debt, which has been rising during the past decade, partly because of the increased size of the debt and partly because of the increased interest rates associated with the strong demand for money in our record prosperity.

By December 1956, the interest charge on the debt had risen to \$7.3 billion a year, an increase of \$1.1 billion in 4 years as against an increase of \$0.9 billion in the preceding 6 years.

That is, this is not something, this increase in the interest rate, that just started. It has been going on ever since the war.

CHART C

INTEREST BURDEN OF THE PUBLIC DEBT[†]

[†]Excluding guaranteed securities. *Less than \$50 million. **Less than .05%.

It should be remembered that these total interest costs are not a proper measure of the net cost of interest to the people of the country or the net drain on the Federal budget.

The money used to pay the interest is collected from many people in taxes, and the money is paid out again partly to the same people and partly to others. I think it is fair to say that about as many people benefit directly or indirectly from these interest payments as are hurt by them.

As to the budget, the Federal Treasury gets back promptly in taxes a substantial slice of the interest it pays out. Also, much of the interest goes to Government trust accounts—or to the Federal Reserve System, which returns 90 percent of its net earnings to the Government.

The upper right-hand side of chart C shows that the computed interest rate on the public debt has risen by about three-tenths of 1 percent in the 4 years ending December 1956, after increasing about three-tenths of 1 percent from 1946 through 1952. The rate as of June 1957 was 2.7 percent; and even after the current refunding operation is completed, the rate will be 2.8 percent.

Looking back, we note that the current average interest charge on the debt is not much higher than it was in 1916, just prior to our entry into World War I; it is well below the average rates in the twenties; and it is very close to what it was in 1939 at the outbreak of World War II, despite the fact that the earlier rates were partially tax-exempt.

It makes quite a bit of difference now. It did not make so much difference then, because the tax rate was low.

Of course, during World War II, interest rates were held at artificially low levels, and that carried over into the postwar era. The current rates are high only in comparison with the abnormally low rates during periods of depression, war, and ratepegging. In terms of history, these are not very high interest rates.

Relating these interest rates to national income we find that now, as in 1952, they represent only 2.1 percent of national income as against a high point of 2.8 percent of national income in 1946. That is, national income has increased so that, even though the dollars have increased, it is smaller in percentage of income.

We should, of course, continue vigorously our policy of seeking to reduce the debt. That is the American way. We have done it before; we are doing it right now. Debt reduction helps to combat inflation; it releases funds for other uses; it strengthens our national readiness for any contingency.

3. The Federal debt and other debt: Another way to look at the Federal debt is in its relation to other kinds of debt in the United States. Chart D shows the total public and private debt on a gross basis over a span of years.

CHART D

PUBLIC AND PRIVATE DEBT*

The chart starts in 1939, just before the war, when the total public and private debt of the Nation was \$207½ billion. In financing the war overall debt was increased tremendously, with almost all of the change in the Federal sector as the Federal debt rose from \$47½ billion to \$259½ billion.

During the war, when civilian activities were kept under wraps, private debt increased very little. Financial as well as physical resources were diverted to the war effort. State and local government debt actually decreased because maturities were paid off and new projects were limited. The corporation and individual debt increased only slightly during those 7 years.

The change during the past decade is shown by the bars in the middle and on the right side of chart D. The Federal debt has increased \$17½ billion since 1946. In terms of percentage of the total debt structure, however, it has declined from 58 percent of the total to 35 percent, but it still exceeds the prewar percentage of 23 percent by a substantial margin.

The total debt at the end of 1956 was \$783½ billion, which is up about 75 percent over the past decade. During that same period

our national income has nearly doubled, again partly by inflation and partly by real growth. Thus, our total debt today, of all sorts, is a smaller percentage of our national income than it was 10 years ago.

State and local government debt increased as the States and localities went ahead with new highways, schools, hospitals, public buildings, and utility services on an unprecedented scale—programs which had been held back during the war. The total State and local debt is now about \$50 billion.

That has been increasing at the rate of \$5 billion a year for the past 3 years, which is a rate never before equaled, and I think before you gentlemen get through your inquiry, it would be very interesting to analyze that debt a little bit.

The corporate debt also has increased by leaps and bounds as corporations have undertaken postwar expansion and modernization programs. These figures include bank loans and accounts payable as well as new corporate bonds and notes.

The pressure on the security markets of these huge demands for money is the major source of present problems in Treasury financing.

The individual debt more than tripled during the last 10 years, from \$60½ billion to \$207½ billion, mostly in the form of increased home mortgages and consumer debt.

As Secretary Humphrey has already mentioned to you, the total of all debt has increased \$146½ billion during the past 4 years, with all but \$10½ billion of the increase accounted for by nonbank sources rather than by increases in the money supply.

It thus rests very largely on a sound base of savings rather than on any excessive bank credit expansion, but it has been heavier than the present flow of savings could take care of without straining the capital markets. Many buyers of bonds and mortgages have been getting part of their funds by selling Government securities.

Of the record of the past 2 years, it might well be said that almost everybody except the Federal Government has been increasing his debt. Nevertheless, the Federal debt is still the largest single sector of debt, and has a great impact on the country.

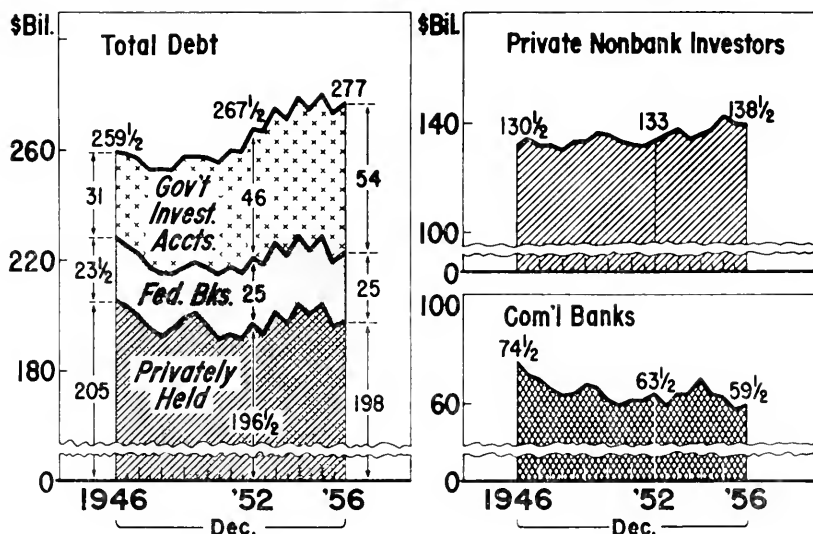

The effect of the huge public debt on the country's economic growth and stability depends a great deal on how the debt is distributed among the citizens and financial institutions and the types and maturities of the securities which make it up. So I ask your indulgence in presenting the facts on these points.

4. Who holds the debt? Chart E presents the picture on the ownership of the public debt from 1946 to date.

During the 4 years, looking at the left-hand side of the chart, during the 4 years ending in December 1956, the debt has risen—as shown earlier—by \$9½ billion, 3 deficits and 2 surpluses.

CHART E

PUBLIC DEBT OWNERSHIP TRENDS

About \$8 billion of that is accounted for by an increase in the ownership of Government securities by Government investment accounts, shown by the top part of the chart—largely representing savings by or for individuals in the form of social security, veterans' life insurance, retirement reserves, and so forth.

With Federal Reserve bank holdings of Governments—which is the next strip down in the chart—showing no net change during these 4 years—it went up from \$23½ billion to \$25 billion in 1952, and it is still \$25 billion, they have not changed their holdings—this left only about \$1½ billion to be absorbed privately.

As shown on the right-hand side of the chart, at the end of December 1956, commercial banks held \$59½ billion of the debt. That was \$4 billion less than in December 1952. There had been no expansion of bank credit due to an increase of holdings of Government securities.

It should also be noted that the banks had only 36 percent of their earning assets in Government securities at the end of 1956 as against 45 percent in 1952 and 65 percent 10 years ago, when we had completed the war financing.

Bank holdings were further reduced through June 1957. These reductions reflect bank sales of Governments to get funds to meet the loan demands of their customers. Financing the Treasury during this period without adding to bank holdings of United States securities has kept down one inflationary potential.

We had not had a credit expansion due to deficit financing.

The upper right-hand part of chart E, which is the private, non-bank investors, shows an increase of \$5½ billion in the holdings of Government securities by what we call private nonbank investors. All of this increase may be credited to those individuals who have added more than \$6 billion to their holdings of series E and H savings bonds during the past 4 years.

The Treasury has put great emphasis on the widespread sale of these small-saver bonds.

Pension funds—State and local as well as corporate—have also been net buyers of Government securities, and so have short-term investors, such as foreign accounts and State and local general funds.

These increases have been enough to more than offset net sale by insurance companies and savings banks as they also have responded to the tremendous demands on them for money for mortgages and capital expenditures.

5. Maturity structure of the debt: Parallel to the question of who holds the debt is that of the distribution of the debt among maturities.

The cheapest and easiest way to borrow is usually at short term, relying first on temporarily idle funds of corporations, trust funds, foreign funds, and—when necessary—on the banks, which in their turn might borrow from the Federal Reserve System.

There is indeed a large legitimate short-term market for the Treasury to tap, particularly today when lenders of money are trying to keep liquid. The present weekly rollover of \$1.6 billion to \$1.8 billion of 91-day Treasury bills meets an important market need, is not inflationary, and does not strain the market.

I say “not inflationary” because it does not increase the total amount of bank credit.

But there are a number of reasons why short-term debt becomes undesirable beyond some reasonable amount.

First, a large body of short-term debt increases the frequency as well as the volume of Treasury financing. It may constitute an irritant at times to the smooth operation of the market for short-term funds and for corporate and municipal securities.

Also, to the extent that the anticipation, the announcement, the offering, and the digestion of new Treasury issues spreads over a large part of a year, the time available for the Federal Reserve to take appropriate credit and monetary policy actions may be restricted.

A large volume of short-term debt adds to the liquidity of banks and businesses and others who hold short-term Government securities as practically a cash reserve. This strengthens the position of the holders, but by the same token makes them less responsive to changes in monetary policy. They can get cash readily by selling their short-term Government securities.

Also, if at any time in the future the Treasury is faced with a financing emergency, it will probably have to fall back on short-term borrowing.

It is important, therefore, that this source of funds not be depleted unnecessarily ahead of time. In that way any minor emergency which arises may be handled by selling short-term securities to the private market rather than having to use the Treasury's authority to borrow directly from the Federal Reserve System.

That is a question somebody has asked about, and I will pick it up later.

Of course, when short-term borrowing means increasing bank credit; namely, the volume of money, that is directly inflationary. It is for these reasons that any country in time of war makes a vigorous effort to sell as much of its securities as possible outside the banks as well as for a longer term.

To the extent war is financed out of taxes and savings, the worst pressure for inflation is checked.

5 a. War and postwar program through 1952: In the Treasury war-loan drives, which all of us had some part in, I am sure, of World War II, the typical package of securities included savings bonds and notes, a long-term $2\frac{1}{2}$ percent bond, not eligible for purchase by commercial banks, a 10-year 2-percent bond, or similar bond, and also a short-term certificate and perhaps a medium-term note.

During the war, a large volume of bonds could be sold because investors had a limited number of other uses for accumulating savings. Few new mortgages were being written, and neither business nor local government units were heavy borrowers, as we saw in the chart on public and private debt.

The postwar period brought different problems. All types of borrowers began clamoring for money. Government bonds were relatively unattractive at their low pegged interest rates, and it was clear to most lenders that rates could not be held at these levels, even though the Treasury tried.

In any event, little progress was made from 1946 to 1952 in funding the debt, though there were several issues of notes and two short bonds prior to 1953.

The refunding in 1951 and 1952 of a large block of $2\frac{1}{2}$ percent bonds into $2\frac{3}{4}$ percent nonmarketable series B investment bonds with an optional exchange into 5-year notes had actually the effect of shortening the average length of the marketable debt. It was, however, the price of getting through the accord between the Treasury and the Federal Reserve, and that was worth a very substantial price.

Excluding these issues, the average maturity of the marketable debt declined by about 40 percent in the 6 years ending in 1952, largely through the passage of time.

One is reminded of the quotation from Alice in Wonderland where the Red Queen said, "You have to run very fast to stand still," and that is true of the debt. Because every month that elapses, the maturity gets shorter if you do not do anything about it.

5 b. Program of the past $4\frac{1}{2}$ years: When the new administration came in, we set a goal of selling longer-term securities and giving the debt a wider distribution whenever the market made it possible.

We redoubled our efforts to sell series E and H savings bonds widely to the people.

We began to shut down on the sale of other debt payable on demand at the option of the holders.

We began promptly the sale of long-term bonds to the market in the spring of 1953 at the interest rates necessary to sell them. I will review that 1953 issue in more detail a little later on.

In 1954 and 1955, we made substantial progress toward our objective by selling a large volume of intermediate-term securities, together with \$2¾ billion of 3 percent 40-year bonds, the longest bonds that had ever been sold since the Panama Canal issue.

In 1956 and 1957, in the midst of the current tremendous capital boom, we have sold no new bonds and only a limited amount of intermediate-term notes.

There are a number of ways of measuring the changes in the debt structure over the years. Some of them refer only to the marketable debt, such as figures on the average length of the debt. Others—more comprehensive—take into account not only the maturity distribution of the marketable debt, but also the demand character of other portions of the debt.

All of these “yardsticks” show that we have moved forward in improving the structure of the debt during the past 4½ years, especially in comparison with the record of the earlier postwar period.

6. Average maturity of the marketable debt: One measure of the structure of the debt is the average length of time that the marketable debt has to run to maturity. The amount outstanding of each security making up the marketable debt is multiplied by the number of months it still has to run.

These amounts are then added up and divided by the amount of marketable debt outstanding to give a figure on average length of maturity.

Although the average length of the marketable debt does not reflect changes in other types of debt like savings notes and savings bonds, it is still useful as a yardstick since it encompasses nearly 60 percent of the total debt outstanding, including the most volatile areas of the debt.

The average length of the marketable debt to maturity—calculated to first call date on callable bonds—amounted to 7 years and 2 months in December 1939.

By December 1946, that average had fallen to 6 years and 3 months, that is even after selling a very large amount of bonds during the war, but of course the increase in the debt was so large that we could not quite keep up with it. That figure is after excluding, to make the comparison fair, those 2½ percent long-term bonds sold in 1944 and 1945 which were exchanged for nonmarketable investment bonds in 1951 and 1952.

By December 1952, the average had fallen further, to 3 years and 10 months, compared to 6 years and 3 months in 1946.

Although the average rose above 4 years for a while during 1954 and 1955 when Treasury debt extension was most active, at the end of 1956 it was back down to 3 years and 9 months—1 month shorter than 4 years earlier.

By June 1957, the average had fallen by 2 more months.

This record indicates a loss in average length of 3 months during a period of the past 4½ years, as against a loss of 29 months during the 6 preceding postwar years. The loss since December 1952 is even less when only publicly held securities are considered, since Federal Reserve-held securities, many of longer maturity originally, are being refunded into short-term issues under the present policy.

The average length, exclusive of Federal Reserve, was 4 years and 1 month in June 1957, as compared with 4 years and 2 months in December 1952. In other words, by running very hard, we have managed to stand still on that.

Furthermore, this measure of average maturity takes no account of nonmarketable demand debt, which has proved an awkward inheritance.

7. The "floating debt": A more accurate measure of changes in the structure of the public debt from the point of view of the job of the debt manager is a comparison between the "floating debt" on the one hand and intermediate and longer term issues on the other, basing the figures on publicly held debt.

This means excluding securities held by the Federal Reserve banks and Government investment accounts, but including in the floating debt the most volatile part of the nonmarketable debt payable on demand.

The following table shows the composition of the debt from this point of view.

That is the one you want to study. It shows in detail just what these sections of the debt are. What we call the floating debt is the section held by the public.

Structure of the public debt

[In billions of dollars]

	December 31			June 30, 1957
	1952	1953	1956	
Held by Federal Reserve banks and Government investment accounts.....	70.6	74.2	79.0	78.6
Held by the public:				
Floating debt:				
Under 1-year marketables.....	42.9	58.8	45.6	50.6
Savings notes.....	5.8	6.0		
F, G, J, and K savings bonds.....	22.6	21.0	14.9	13.1
Miscellaneous demand debt ¹	3.4	3.5	3.5	3.0
Total floating debt.....	74.6	89.3	63.9	66.7
Intermediate and longer term issues:				
E and H savings bonds.....	35.3	36.7	41.4	41.5
Investment Series B bonds.....	9.1	8.6	7.5	7.2
Marketable maturing in:				
1-5 years.....	33.3	24.9	42.3	38.8
5-10 years.....	19.8	15.5	14.2	11.3
Over 10 years.....	24.8	26.1	28.4	26.5
Total, held by the public.....	122.3	111.7	133.8	125.3
Total debt.....	267.4	275.2	276.7	270.6
Percent floating debt to total.....	27.9	32.4	23.1	24.7

¹ Includes investment series A bonds, depositary bonds, matured debt on which interest has ceased, and debt bearing no interest.

The amount held by the public. Floating debt: The under-1-year maturities at the end of 1952 were \$42.9 billion. That rose in 1953, because we inherited a lot of debt maturing that year, and 1954, so we had a jump to \$58.8 billion.

That was worked down to \$45.6 billion in 1956, and is now \$50.6 billion, which is higher than it was at the end of 1952, but it is lower than it was in 1953 when you take into account the maturities that slapped us in the face in 1953 and 1954.

Savings notes, those are the 3-year notes which the Treasury used to sell to corporations and others so they could use them for taxpayments, but they were redeemable on demand. That is, a corporation could bring them around any time and get their money, or use them to pay taxes, and we terminated that because we found it to be an undesirable form of debt. But it was something we had to take care of.

The next is F, G, J, and K savings bonds. Those were the larger savings bonds, in lots as large as \$100,000, which were sold, some to the banks, some to the trusts, some to individuals. But that again proved to be a very awkward kind of savings bond because it was held by large holders who could shift their money around, and they began turning the stuff in, so that has gone from \$22.6 billion down to \$13.1 billion. We were hit with \$3 billion of that in the past year, and we had to dig up the cash to take care of it, so that was part of the floating debt. We paid that down by \$9 billion in 4 years, or a little more.

Miscellaneous demand debt: That is not as important. That is series A investment bonds, and depository bonds in banks, and a few other things like that. It does not vary much.

In that total of the floating debt, we had practically \$75 billion. It ran up on us to \$89 billion by the end of 1953. There was nothing we could do about it. We tried to push some of it out, but those were the maturities that existed. That was reduced by the end of 1956 to \$63.9 billion, and it is up a little bit for June 30, to \$66.7 billion.

But if you will compare that with the high point, the floating debt as defined in this way, it is down more than \$20 billion from what it was in 1953; and from that point of view, the job of the debt manager is a lot easier than it was when we took over.

Here is the rest of the debt:

Intermediate and longer term issues. We put the E and H savings bonds in that. That, in a sense, is demand debt, but experience has shown it is a relatively stable figure; even with the redemptions that you had in the past 12 months, the amount of E and H bonds outstanding has continued to increase a little. While the sales are less than the redemptions, the accumulated interest is enough to take care of that, so that this year that actually has been increasing.

So from the point of view of the debt manager, that is a part of the debt that does not bother us. It is a good, solid part of the debt. That is held by millions of our people, and it is only in that way that you can get that very wide distribution.

Now, the investment series B bonds, I have referred to. Those were the $2\frac{3}{4}$ percent bonds that are convertible into 5-year notes, so that they can become short-term debt or relatively short-term debt, and about a third of the \$15 billion that were issued have been converted that way.

Then the marketables: Maturing in 1 to 5 years are up from 1952, but they are down from 1956.

The 5 to 10 years are down.

The over 10 years is up a little. That is the long-term bond area.

Now take the bottom figure, the percentage of the floating debt to the total was 27.9. It rose to 32.4 percent. It is down to 24.7 percent. So it is a little better than it was. So we have made progress in our efforts to reduce the amount of floating debt, which the Treasury may be called upon to handle each year.

The floating debt as defined above has two basic ingredients: (1) Publicly held marketable securities maturing within 1 year—including callable bonds when they actually are taken care of; and (2) non-marketable demand debt which is payable practically on demand and is in the hands of rather large holders who move freely from one investment to another in response to changing market conditions.

We do not include series E and H savings bonds, the small saver's bonds, as part of the floating debt since they are not as sensitive to fluctuations in market interest rates and the total outstanding is quite stable in contrast to the widely fluctuating volume of other savings bonds and savings notes.

Chart F presents data on the "floating debt" over the last decade. This type of debt was reduced by more than \$10 billion between December 1952 and December 1956, and the figure at the end of last year was more than \$25 billion below the all-time peak in 1953.

² Includes \$1,214,000,000 nonmarketable issues.

Source: Office of the Secretary of the Treasury.

This type of debt, the floating debt, was reduced by more than \$10 billion between December 1952 and December 1956, and the figure at the end of last year was more than \$25 billion below the all-time peak in 1953, which reflected largely the inheritance of scheduled maturities from earlier years and financing growing out of the 1953 deficit.

While the under-1-year marketable debt held outside Federal Reserve banks and Government investment accounts was \$21½ billion

higher at the end of 1956 than in 1952, it was nevertheless \$13 billion below its all-time peak in 1953.

In contrast, this part of the floating debt rose by more than \$10 billion between 1946 and 1952, when primary reliance was placed on the issuance of short-term securities and the passage of time kept shortening the debt.

CHART F

THE FLOATING DEBT*

*Held outside of Federal Reserve Banks and Gov't Invest. Accts.

†Excluding A to E and H Savings Bonds.

One of the most important ways in which the floating-debt picture has changed, as you will note from the chart, is through the reduction of nonmarketable demand debt in the hands of large investors. It has been reduced by \$13 billion since 1952.

The elimination of the sale of short-term savings notes in the fall of 1953, and the recent dropping of sales of the investment-type J and K savings bonds as of April 30, 1957, represent major steps in the reduction of the more volatile Treasury demand debt.

8. Opening up the long-term market and adding to the supply of intermediate-term securities: In the absence of extensive debt payoffs, the objective of reducing the floating debt can be accomplished only by selling more securities outside the 1-year area.

Chart G shows the history of Treasury financing over the past decade, year by year, in terms of the relative amounts of short term and longer term financing.

The chart also shows the seasonal borrowing which has grown during recent years—borrowing repaid out of increasingly heavy taxpayments each spring up until 1956, when the return to a more even quarterly distribution of corporate-tax payments began.

CHART G

VOLUME OF TREASURY MARKET FINANCING

(Excluding Weekly Roll-Over of Bills)

*Notes originally 20 months or less to maturity.

As chart G shows, there was a modest amount of intermediate-term securities issued in 1949 and 1950—those are notes, \$4.7 billion in 1949 and \$12.2 billion in 1950—which helped to reduce the Treasury's financial burden in 1951.

Two short-term bonds were sold in 1952. The major efforts at debt extension, however, have been made during the past 4½ years.

Since 1952, the Treasury has sold \$41¼ billion of long-term bonds. The first of these, the 3¼s, totaling \$1.6 billion, in the spring of 1953, represented the Treasury's first long-term market issue since the end of World War II financing.

Then in 1955, we sold \$2.7 billion of the 3-percent bonds of 1995, the longest Treasury bond issued since the Panama Canal bonds were issued in 1911.

This \$41¼ billion of long bonds, together with the \$26½ billion of 5- to 10-year bonds issued in 1953 and 1954.

This \$23½ billion, I can correct that figure for the financing we just concluded, that becomes \$26 billion of 2- to 5-year notes issued since 1952, has thus made it possible for the Treasury to keep up with the ever-shortening public debt, and start reducing a little the annual volume of Treasury market financings.

Also, the long-term offerings gave greater breadth and depth to the free long-term Government securities market.

A complete list of marketable securities issued since January 1, 1946, which mature in more than 2 years, is shown in appendix A; and then in appendix B we have given a complete list of all the securities, except bills, we put out since we have been in.

Before every Treasury financing, we canvass the market for a long-term bond among dealers and potential buyers. In these 4½ years, I do not think we have failed to take advantage of any favorable opportunities to sell bonds successfully.

Our job in calendar 1957 is larger than in 1956, and perhaps a little above 1955. During the first half of the year we completed \$22 billion of financing. \$3 billion of that was extended beyond 3 years through the issuance of Treasury notes, so our record of debt extension in the first half of 1957 was already somewhat ahead of 1956.

On July 3, we sold \$3 billion of March 1958 tax bills for cash, that is, by inviting bids, as you know, and as will be covered later, we are now completing the refunding of nearly \$24 billion of August and October maturities, more than \$14½ billion of which are held by Federal Reserve banks or Government investment accounts.

I have a little section later which reviews that whole operation, so you will have the whole picture.

We will have a December maturity, which arises from this last financing, to refund, and we will also have more seasonal tax anticipation financing before then. That is, we will sell some Treasury bills or certificates that will mature at time of tax payments next year and can be paid off out of taxes.

This will bring our total job for 1957 to more than \$55 billion, exclusive of weekly Treasury bill offerings.

Treasury bills outstanding as of Aug. 1, 1957

	Rate of interest (percent) ¹	Date of issue	Amount issued
Treasury bills (maturity value)—series maturing:			
Aug. 8, 1957-----	2.909	May 9, 1957	\$1,699,381,000

Total-----			21,901,285,000

¹ Treasury bills are sold on a discount basis with competitive bids for each issue. The average sale price gives an approximate yield on a bank discount basis as indicated for each series.

Office of the Secretary of the Treasury, July 31, 1957.

If Federal Reserve bank holdings are omitted, the total job this year is only about \$35 billion—that is, the total job we have had to do in 1957.

These financings continue to be in competition with very heavy demands for funds in the capital markets. They require attractive rates and careful planning.

I think I will repeat what I said before, that they constitute a problem, but not a crisis, Mr. Chairman. We are not in a crisis in Government financing.

9. Encouraging thrift by selling more securities to individuals. I have already mentioned that individuals' holdings of Government securities have been growing and now stand near their all-time high.

The major factor in this growth has been the series E and H savings bonds program. The vigorous promotion of this program, aided by an improvement in terms in May 1952—I want to give credit for a very sound step taken in May 1952 to improve the savings bond program.

But vigorous promotion of this program, aided by an improvement in terms in May 1952, brought an increase of more than \$6 billion in E- and H-bond holdings during the 4 years ending December 1956.

The core of this thrift program has been the payroll savings plans, under which about 8 million workers are now buying savings bonds regularly. We estimate that approximately 40 million Americans now own \$41½ billion of these E- and H-bonds.

Some figures on E and H savings bonds may be interesting.

This table shows the growth of E and H savings bonds averages for calendar years, in billions of dollars.

Growth of E and H savings bonds, averages for calendar years

[In billions of dollars]

Annual averages	Cash sales and redemptions			Interest accruals	Net change in outstanding	Amount outstanding, end of period
	Sales	Redemptions	Net

¹ Less than \$50 million.

Source: Office of the Secretary of the Treasury, July 25, 1957.

Of course, the heavy loss was in the 1956-57 period until we changed the rate. It has picked up a little, but not very much, because the interest rates have gone on up, the general market rates.

The record of savings bonds sales during the 4 years 1953-56 has been better on the average than during other periods since the end of the war. Redemptions have risen somewhat in recent years—partly because of the cashing of bonds which have reached their 10-year maturity in increasing amounts. Nevertheless, the net excess of cash sales over redemptions of these bonds was higher in 1953-56 than in either earlier postwar period.

About a year ago, as you gentlemen know, savings bond sales started to slow down under the impact of higher interest returns available in alternative forms of savings. Then, as your committee is aware, the Treasury received from the Congress authority to raise from 3 to 3¼ percent the overall yield on E- and H-bonds if held to maturity. The interim yields have also been increased.

Savings bonds are not sold primarily for their yield but for their security, their redeemability, and their convenience. However, the buyer must feel he is getting a fair rate. The action you took was helpful.

The savings-bond program is one of the best means we have of achieving a wider distribution of the debt and of encouraging the overall volume of savings which the country so much needs to keep pace with the tremendous demands of the people for all forms of goods and services.

In summary, then, these are the ways in which the Treasury has sought to manage the debt so as to make it less of a disrupting influence on our economy. We have not always been able to move as fast as we might like toward our long-range objective of achieving a better debt distribution, but we have reduced the floating debt and the bank-held debt and so reduced the inflationary threat which the debt carries. In addition, we have widened the sale of savings bonds and reopened the market for long-term bonds.

10. Now, let me say a word about the techniques of debt management. Before I conclude, I want to discuss with you briefly the way in which the Treasury approaches each of its debt management decisions which involve the issuance of new marketable certificates, notes, and bonds.

Each Treasury financing represents an important event in the money markets of the country. It is, therefore, essential that the Treasury take every precaution to get information from every useful source in making decisions about these operations.

In the course of exploring the facts relating to a new Government issue, the Treasury consults a great many people. We get valuable help from the Federal Reserve Board and the 12 Federal Reserve banks, with their offices throughout the country which are in contact with a large number of people and with the money and capital markets. I might add that the Federal Reserve Bank in New York is particularly helpful. They have a group of very able officers, and their help to us in deciding about Treasury issues has been invaluable, and I say that not just because I was an officer of that bank for 18 years, Mr. Chairman.

We maintain contact with the people who handle investments of commercial banks, savings banks and insurance companies, pension funds—State, municipal, corporate and other private funds—security dealers, and trust companies which have money to invest.

I may say we did not put in this statement that we also get monthly reports from banks and other principal holders of Government bonds as to their holdings, so we have a statistical series that runs back pretty well and gives us changes in the security holdings of the principal holders.

We rely upon the banks and security dealers to keep their customers informed about our offerings of securities, in addition to our public announcements. After a new issue is announced the banks and dealers do an enormous amount of writing and telephoning to their customers to tell them about the new issue. In this way, hundreds of thousands of investors are reached promptly.

The rates of interest which our securities carry are determined basically by the quotations in the Government securities market. Many millions of dollars of Government securities are bought and sold every day in the free market and the price determined in this way indicates the rates we have to pay on new issues.

Perhaps the best indication of the pricing of new Treasury issues is the record of the prices at which our issues have sold in the market on the day they were actually issued, usually a week or 10 days after the subscription books were closed.

In 1953 the Treasury put on the market almost \$44 billion of certificates, notes, and bonds—those securities on which we had to decide on a rate of interest. These issues were quoted in the market on the issue date at an average price of par and 5 and one-half thirty-seconds of a dollar per \$100 bond. Prices in the Government securities market are quoted in dollars and thirty-seconds; a thirty-second is equal to $3\frac{1}{8}$ cents.

In 1954 we sold \$59 $\frac{1}{2}$ billion of this type of security, and the price on those in the market on the issue date was par and eleven thirty-seconds. Money rates were going down a little. It was a more favorable market.

Since then, our pricing has worked out even closer: Exactly par on the average on \$49 billion of such issues in 1955, and par and one thirty-second on \$33 billion in 1956, and exactly par again on \$16 billion of new coupon issues in the first half of 1957. Appendix B shows these figures in detail, for each issue, what it was quoted at on the day of issuance and the first day it was quoted. And I will give you the figures on our latest 4-percent job in full, also, later.

These figures encompass the entire \$201 $\frac{1}{2}$ billion of certificates, notes and bonds we issued from January 1953 through June 1957. The problem is to make each new issue attractive enough to sell without being too generous.

The attractiveness of a new issue is affected by such influences as the expectation of the market on interest rates and the volumes of funds purchasers have available for investment. Also large issues and longer-term issues have to have a little more margin to assure their successful sale. That is one reason the 1954 issues show a little more margin, because quite a number of those were bonds.

In addition to these coupon securities, certificates, notes, and bonds, the Treasury sells from \$1.6 billion to \$1.8 billion of 91-day Treasury bills at public auction each week and from time to time tax anticipation bills are also offered on the same bid basis; they may be 9 months, 6 months, whatever it works out.

The rates at which these securities sell are determined by the market—not by the Treasury. We have sold more than \$375 billion of securities in this way since January 1953—actually much more than we have sold with interest rates fixed by the Treasury.

The interest rates on these bills, together with the yields on purchases and sales of all types of securities in the open market, build up a pattern of interest rates which makes it reasonably clear what rate a new issue of securities has to carry to be sold successfully. The difference is usually a difference of an eighth one way or the other in your decision.

Thus, our discussions prior to a financing are not so much concerned with the rates of interest as with the question of what kind of security we should sell: a bond issue, over 5 years to maturity; an issue of notes, 1 to 5 years; or a short-term certificate, 1 year or less; or a bill—and just what maturity.

The advice we receive is frequently conflicting and the Secretary makes his decision, subject to Presidential approval on maturities over 1 year, only in the last hour before the public announcement. That is literally true.

11. Now, let me take up the $3\frac{1}{4}$ s that have been discussed at considerable length on the floor of the Senate and the House over a period, and also this last offering. The offering of the $3\frac{1}{4}$ s in 1953. This general plan of preparation for financing was followed when the Treasury offered the $3\frac{1}{4}$ percent bonds of June 1978–83 in the spring of 1953.

This was not only the first long-term marketable bond that the Treasury had offered since 1945, but it was also the first to be put out without Federal Reserve market support for a much longer period. As you know, the Federal Reserve used to be in there supporting the market for a bond issue.

As you will remember, inflationary pressures were heavy in the last part of 1952 and early 1953, under the impact of a then record demand for money. Despite this heavy demand for private funds, we were assured that there were some funds available for investment in a long-term Government bond.

Our offering of the $3\frac{1}{4}$ s presented as difficult a pricing problem as the Treasury has ever had to face. We had to set the interest rate on the new issue in a market in which prices were moving gradually lower—a market which was still in the process of adjusting to freer market conditions.

Our longest outstanding bond, the Victory $2\frac{1}{2}$ s of December 1967–72, had fallen from almost three-quarters of a point above par—2.45 percent yield—to $95\frac{1}{2}$ —2.80 percent yield—between the Federal Reserve-Treasury accord in March 1951 and the end of 1952.

Let me say that again: Before we came in, in the 2 years 1951 and 1952, the prices of the Victory $2\frac{1}{2}$ s had fallen 5 points, so they would be priced at $95\frac{1}{2}$ in December 1952.

By April 8, 1953, when the $3\frac{1}{4}$ s were announced, it had fallen to 94; that is $1\frac{1}{2}$ points more. The big fall took place before we came in. At 94, they yielded 2.90.

Now, somebody said the other day that we did this in a $2\frac{3}{4}$ percent market. That is just nonsense. The Victory $2\frac{1}{2}$ s were quoted when we put out the $3\frac{1}{4}$ s at 2.90 yield basis.

There were no long-term Treasury issues outstanding which would serve as a real guide to the interest rate such an issue should carry. The Victory 2 $\frac{1}{2}$ s were 10 $\frac{1}{2}$ years shorter than the new issue, and the market curve of rates, if you plot out a curve, rose as maturities lengthened. One-year money was worth about 2 $\frac{1}{8}$ percent as far as Government securities were concerned, and 5-year money a little more than 2 $\frac{1}{2}$ percent. I am giving you the mathematics of this.

Therefore we took the market curve on outstanding Treasury issues and extended it parallel to the curve on high-grade corporate issues, retaining, of course, a proper spread between the two types of obligations.

That curve produced a rate of 3.08 percent as of June 15, 1978, which was the call date on the new bonds, and 3.12 as of June 15, 1983, the maturity date of the new bonds.

The 3 $\frac{1}{4}$ coupon would appear to offer a rate, therefore, approximately 15 basis points—15 one-hundredths of 1 percent—above the market curve, but the spread would be much less than that if you take into consideration the fact that we were issuing the bond in competition with outstanding issues available in the market at a discount, another technical point, which had a capital gains advantage for tax purposes.

The Victory 2 $\frac{1}{2}$ s at 94 were as attractive to a corporate taxpayer in aftertax yield as a new hypothetical 3.10 percent issue at par would be if both were held to a 1972 maturity.

I do not know whether that is clear to you. But if you buy a discount bond, you pay your regular income taxes on the coupon, and then you pay a capital gains tax when it matures for the 5 points that you gain when it is redeemed at par. You pay only half the tax on the capital gain, so that on these quotes you will find they have to quote the outstanding bonds just on a strict yield basis, to take account of the capital gain.

This 3 $\frac{1}{4}$ percent rate proved sufficient to enable the Treasury to sell \$1.2 billion of the new bonds for cash and to induce the holders of \$0.4 billion of maturing F and G savings bonds to exchange them for the new issue.

We gave all the F and G bonds maturing in 1953 the option of exchanging for the new bond, and 400 million of them took advantage of it. That was less than a third of the amount that could have.

The estimated yield spread of about 15-basis points above the market was quite modest, however, compared to the 23-basis point average spread between the 11 new high-grade corporate issues put out during 1953 and the outstanding corporate market. That is, when a corporation sells a bond in the market, a new bond, it has to pay a higher yield than the outstanding seasoned bonds. If you are doing an underwriting job you have to pay a higher yield, as you all know, and there was an average spread of 30-basis points on the 58 new high-grade corporate bonds that had been issued since January 1, 1951, in relation to the outstanding market, taking Moody's Aaa bonds as a basis.

Nevertheless, the 3 $\frac{1}{4}$ percent rate was not sufficient to give a real incentive—I would like to put in the “real,” because there are always

some speculators around—to speculators who thought they could turn over the new issue at a profit.

The first price quotation in the market on the new $3\frac{1}{4}$ s was par and $\frac{1}{32}$ on April 15, 1953. That is what the market said it was worth on this bond that was supposed to be so overpriced. Trading on the new bond between that date and the issue of the bond fluctuated between a high of par and $\frac{1}{32}$ and a low of $99\frac{25}{32}$.

On the issue date of May 1, the $3\frac{1}{4}$ s were selling in the market at $99\frac{29}{32}$ —that is at a discount—with a yield to the buyer of 3.26 percent. It was mid-July before the new $3\frac{1}{4}$ s again rose above par.

These figures demonstrate, I believe, that the $\frac{3}{4}$ percent rate was the lowest rate at which we could possibly have sold at 25- to 30-year bond in a free market in the spring of 1953.

12. Our current refunding: This same general pattern of financing was also followed in our most recent refunding program which was announced Thursday, July 18. As you know, this offering did not involve the raising of any new cash. It was concerned solely with the refunding of four maturing issues: \$12,056 million $2\frac{3}{4}$ -percent notes maturing August 1, \$3,792 million 2-percent notes maturing August 15, \$7,271 million $3\frac{1}{4}$ -percent certificates maturing October 1, and \$824 million $1\frac{1}{2}$ -percent notes maturing October 1, \$23,943 million total maturing issues, of which more than \$14 $\frac{1}{2}$ billion was held by Federal Reserve banks and Government investment accounts.

With an unprecedented heavy demand for funds in the private area we were convinced quite early in our studies that there was no substantial demand for long-term Government securities. The package offering that we decided upon included two certificates and a note, to be issued on August 1: A $3\frac{5}{8}$ -percent certificate maturing in 4 months (December 1, 1957), a 4-percent certificate maturing in 12 months (August 1, 1958), and a 4-percent note maturing in 4 years (August 1, 1961), but redeemable at the option of the holder in 2 years (August 1, 1959). The choice of all 3 issues was given to the holders of the August maturities but the October holders were allowed to choose only between the 2 longer issues. It did not make much sense to give an October 1 holder an option of converting into December 1, you see, only 2 months, so we let them spread it out.

This package was designed to provide a very short security for corporations and other short-term investors who want their money before the end of the year, an attractive 4-percent 1-year security for other short-term investors, and a longer 4-percent issue which would appeal to 2 somewhat different groups of buyers: (1) those who were not sure that they wanted to invest funds for as long as 4 years in case interest rates continue to rise and, therefore, liked the idea of being able to redeem at the end of 2 years, and (2) those who felt that the present heavy demand for money is perhaps close to its peak and were anxious to get part of their portfolios invested for a longer period than 2 years at a 4-percent rate on the theory that a 4-percent rate might not be available again for a long time.

The pricing on these three issues was done in line with the outstanding market. The market pattern of yields at noon on July 18, just before the announcement was made, showed rates of approximately $3\frac{1}{2}$ percent at the 4-month point on the curve, 3.90 percent at the

1-year point, 3.95 percent at the 2-year point, and 3.98 percent at the 4-year point.

This pricing was as close or closer to the market curve than the average pricing that the Treasury has done during the entire period of more than 6 years since the Federal Reserve-Treasury accord in 1951.

The new pricing was not, however, quite as thin as on the issues that we put out in February and May of this year, when new short-term issues fell slightly below par on their first market quotation.

The large volume was also a factor in pricing the new issues. When you are dealing with \$24 billion, you can't cut it quite as thin as you can when you have four to sell.

All three new issues showed closing bid-price quotations of par and one thirty-second on the first day of trading—Monday, July 22, I may say they went down to an even par bid Tuesday afternoon and Wednesday morning.

The operation was successful. The cash turn-in of \$1.1 billion on this refunding—these are preliminary figures—was the smallest percentage of publicly held maturities turned in for cash of any refinancing since March a year ago.

Furthermore, we succeeded in selling \$2½ billion of the new 4-year notes, again helping to keep the debt from shortening.

When we term this a successful operation we do so with full recognition that this refunding alone has added one-tenth of 1 percent to the computed interest rate on the entire public debt, with an increase of about \$250 million in our computed annual interest charge.

More than one-half of this added interest comes back directly to the Treasury since \$14½ billion of the \$24 billion maturity was held by the Federal Reserve banks and 90 percent of their net earnings are returned to us.

The remainder of approximately \$100 million does not represent a net addition to the Federal budget since a substantial share of it will be paid back to the Treasury in taxes.

We would prefer to do our borrowing at lower rates. Naturally, any debtor would. We fully recognize, however, that this is one of the costs to the American taxpayers of a monetary and credit policy which is the primary bulwark against the loss of untold billions of dollars through inflation.

I have presented the background of the 3¼ percent bond issue and the recent financing to illustrate the point that the Treasury does not force rates up, as sometimes stated. It has always been our policy to sell our securities at the lowest interest rates at which the maturities offered can be sold.

Attached to this statement are appendixes A and B which will give you the complete information about the offerings. The first one, appendix A, going back to 1946, and showing the amounts of each issue of securities that was put out beyond the one-year maturity—these public issue securities, 2 to 5 years, 5 to 10, and over 10.

And the other, appendix B, shows every issue of marketable securities other than Treasury bills that have been put out by this administration.

EXHIBIT 41.—Statement by Under Secretary of the Treasury Burgess, August 9, 1957, before the Senate Finance Committee Hearings on the Financial Condition of the United States

It has been a privilege to have had the opportunity to appear before this committee.

I have been glad to participate because I believe that it is imperative that we have an enlarged public understanding of current monetary and fiscal policies and their influence on the levels of living of every American family. Your committee, in these hearings, and the study of other groups in parallel investigations, aid in developing increased public interest and knowledge.

I would like to summarize what appear to me to be the most important facts which have been developed in these hearings up to this point.

1. The economy is, and for some time has been, operating at a very high level.

Employment is at an all-time peak. We are producing more goods and services than ever before. Personal income is at a high level and is widely shared throughout the population. This has encouraged a large volume of purchases, with resort to extensive credit to augment purchases further, and without the usual resistance to price increases.

2. After 4 or 5 years of stable prices, we have been faced with a renewal of inflationary pressures, and it is important that this should be curbed.

As Secretary Humphrey said in his opening statement, "The threat of renewed inflation is perhaps our most serious domestic economic problem."

While some few benefit from inflation, it is a cruel injustice to the great majority of our people and ultimately saps the economic vitality of a nation.

It runs the risk of "boom and bust," a point that Senator Bennett made so clearly. If these economic movements go so far that they are badly out of balance, then the resulting crack is much more severe than if they are checked earlier.

3. The Federal Reserve has been following monetary policies intended to resist inflationary pressures.

Its principal policy has been to limit the growth of credit and, hence, exercise some restraint on the demand for goods and services, and thereby restrain prices.

As a consequence of this policy and the heavy demand for funds, interest rates have been rising.

4. This administration has followed fiscal practices designed to resist inflationary pressures.

For the past 2 years, the budget has been balanced and the surplus has been applied to debt reduction. Some of the public debt has been shifted from banks and into the hands of the public, and the floating debt has been reduced. Governmental expenditures were reduced through 1955, but both defense and nondefense items increased in the 1957 and 1958 budgets.

It is true that, in cutting taxes in 1954 and in helping housing, small business, and the farmer, the administration may have increased demands for goods and services somewhat, but these measures simply

gave some relief in those areas where the impact of credit restraint has been felt most severely.

5. To date, these monetary and fiscal practices have not fully overcome the inflationary pressures.

Consumer prices have risen for 15 of the past 16 months. While the amount of these monthly rises has been small, the consumer price index is now nearly 5 percent higher than it was 16 months ago.

There is some evidence that the current inflationary pressures may abate in the near future, though this is uncertain. Furthermore, such abatement may prove temporary unless measures are taken which affect the underlying causes.

6. This raises the question whether these policies should be relaxed or whether there is some better way to deal with inflation.

The relaxation of these policies has serious dangers. It would result in increasing the demand for goods and accentuating the inflation.

7. We should not underrate the effectiveness of present policies but should have patience to allow them to work.

These are the policies which have been effective in this country and in other countries over many years. They have proved historically powerful influences for economic stability. They require time and patience to become effective.

8. No feasible alternatives to present policies have been presented in these hearings.

The alternatives of direct controls are not desirable.

Governmentally enforced wage or price controls, or forced savings, during peacetime, are inconsistent with our traditions of freedom.

Specific curbs on credit for particular purposes during peacetime are an undesirable interference with the individual's freedom and discriminate against a particular segment of our society.

9. A more anti-inflationary governmental fiscal policy is desirable.

In the present high state of prosperity in this country, the Federal Government should have a larger surplus and should be retiring debt more rapidly.

This is probably the most effective step which could be taken by the Federal Government.

10. Similar restraint in excessive spending should be practiced by States and municipalities, businessmen, and consumers.

All such segments of the population have been increasing their debts at much more rapid rates than the Federal Government.

There needs to be greater public recognition of the dangers of over-expansion and overconsumption—on borrowed money—at a time like this.

The citizens of the country cannot look to the Federal Government alone for the necessary restraint in meeting this situation.

11. Such restraint should be matched by equal restraint on the part of business and labor in their demands for profit and wage increases.

As was pointed out by one of the members of your committee, a principal cause of the current renewal of inflationary pressures is the continued—

increases in profits and wages greater than increases in productivity.

President Eisenhower, in his Economic Report of last January, said:

Business and labor leadership have the responsibility to reach agreements on wages and other labor benefits that are fair to the rest of the community as well as to those persons immediately involved. Businesses must recognize the broad public interest in the prices set on their products and services.

12. Such restraint throughout all segments of the economy is necessary for lasting abatement of inflationary pressures.

The monetary and fiscal practices of the past several years may be bringing about a lessening of the current inflationary pressures. But continued vigilance must be maintained against their recurrence.

13. The needed economic statesmanship on the part of Federal, State, and local governments, the consumer, business, and labor, will arise only from an appreciation of the evils of inflation.

Restraint is inevitably unpopular.

It can be achieved only if the alternatives are recognized as even less desirable.

14. And finally, it is for these reasons that I believe that such a hearing as your committee is conducting may prove a most useful instrument.

Such a hearing develops and disseminates the information needed to make the public aware of the disastrous results of inflation and the necessity for self-restraint to prevent it.

EXHIBIT 42.—Statement by Assistant Secretary of the Treasury Kendall, July 29, 1957, before the House Ways and Means Committee on the report on and amendments to the Antidumping Act

The scheduling of these hearings is very much appreciated.

Even at the risk of oversimplification it might clear the atmosphere a little bit in this highly technical field if right now it is pointed out that the amendments suggested are for the purpose of accomplishing two objectives.

First, put an end to the anomalous situation whereby sales can be made at less than fair value, with injury to American industry, but no dumping duties collected;

Second, bring the value definitions of this 1921 law up to date.

There will be arguments advanced by a number of people appearing before you that we do not go far enough, or that we go too far. You will be told on the one hand that dumping duties should be imposed in almost every case of price discrimination, irrespective of whether there is in fact injury to American producers. You will be told on the other hand that the dumping law should be invoked only where American producers are about to be put out of business entirely.

Many say that this is middle of the road legislation. I don't agree. Rather do I think that our proposal is intended to construct a wide and all-inclusive highway toward accomplishing the twin objectives and one which will stand the test of time with its pendulum which moves in the field of economy and Government from one side to the other of the tariff problem as the years go by.

In my judgment, neither of the views which you will hear proposed by understandable and worthy proponents of such views is tenable and, after the lengthy study and careful consideration given by the Bureau of Customs and by Mr. Hendrick who is here with me, a complete new law is not what is required but rather the comparatively simple and common sense changes which are recommended by this study within the framework of a congressional directive.

The congressional directive

The directive of the Congress in the Customs Simplification Act of 1956 addressed to the Secretary of the Treasury was a review of the operation and effectiveness of the Antidumping Act of 1921 after consultation with the United

States Tariff Commission. I should like to say that the Commission has been of very real help in all of our deliberations leading up to the report and the proposed bill which were presented to the House and to the Senate in the latter part of January.

This provision of the Customs Act of 1956 reflected the concern of many Americans and American businessmen and industry representatives that at worst the Antidumping Act was not effective and was not carrying out the purposes for which it had been enacted; and at best thirty-six years is a long time, many changes have occurred in international trade and in industry in general, and that a good hard look should be taken first at the administration of the act and secondly at its effectiveness.

As you know, the Secretary, after consultation with the Tariff Commission, was to report to the Congress within six months of the date of the enactment of the statute, which turned out to be early in February, and recommend any amendment considered desirable or necessary to provide for greater certainty, speed, and efficiency in the enforcement of the Antidumping Act.

Objectives of Antidumping Act

Before getting into the technicalities of the amendments which we are proposing, and they are technical, I should like to discuss the objectives behind them so that they may be weighed and decided upon in the atmosphere of trade and industry rather than just pure legal language.

The first thing to bear in mind is that we are as always considering the best interests of the United States. These interests are inseparably associated with the best interests of American industry and American trade. Obviously, it is to the best interests of American industry that foreign producers' dumping price raids which injure American industry should be made actionable. They should be met with full and swift enforcement of the law.

However, we believe it is not to the best interests of either the United States or of American industry if you assess dumping duties merely because of technicalities, where there has not been injury and where common sense shows that action is not warranted. This does not help American industry. On the other hand such findings invite retaliation by other countries. This is a bad thing for our export markets. Not only this: Increases in price caused by dumping duties hurt the American consumer and they hurt American industries processing foreign imports.

There is absolutely no reason that we can find from our study why complete and vigilant protection of American industry cannot go hand in hand with a careful weighing of the facts in each of the cases where suspected dumping is called to attention.

What constitutes dumping actionable under the law

I would like to step back for a moment and examine with you what has become today the traditional belief and philosophy of the administration as to what actually constitutes dumping.

The approach to the problem is complicated because of differing interpretations given to the word. The Antidumping Act does not define "dumping." The generally accepted economists' view is that the word "dumping" merely means export sales below home price. On the other hand it is also clear that these same economists feel that such sales should not be subject to duties except when there is injury. I have a memorandum on this subject which, if you desire, I can put in the record.

In any event the act clearly provides that dumping duties are to be imposed only if two elements are present: first, sales at less than fair value and, secondly, injury to a United States industry. The administration believes that this is right.

Administration of the law

The Treasury Department calculates whether there are sales at less than fair value. The Tariff Commission investigates the facts as to injury and draws the conclusion as to whether or not injury has occurred. That is one of the reasons why, in the Customs Simplification Act of 1956, the Secretary of the Treasury was directed to make his report after consulting with the United States Tariff Commission.

As you probably know—and this is parenthetical—after we had drawn our first draft of the report and proposed legislation and after that draft had been discussed by members of my staff and the staff of the Tariff Commission, I sat down

in conference with the individual members of the Tariff Commission to go over the report as well as the amendment and the consequent two papers presented you are the result of a meeting of the minds of the Commissioners and the Treasury.

Sales at less than fair value

Now how do we determine whether or not there have been sales at less than "fair value" under the Antidumping Act? Really the "fair value" we are talking about is a term of art. Ordinarily it means the *price for consumption in the country of export*, or, to use the language of the trade, the *home consumption price*.

To find whether there are sales at less than fair value, you compare the foreign producer's home consumption price with his price to the United States purchaser. Let us suppose that we have an item sold for home consumption in country X and also by that country to the United States, with prices as follows:

Home consumption price	\$20. 00
Price to U. S. A.	15. 00
Difference	5. 00

This is a typical case of sale at less than fair value.

Adjustments

In comparing the two prices it is necessary to reduce them to comparable terms. The simplest way to do this is to calculate them on an f. o. b. factory basis. Here is an example. Let us suppose that a merchant in country X goes to a factory there and says, "I want to buy one hundred bicycles. I am going to sell these in country X." The factory owner says: "Here they are. Cost is \$20 a bicycle. Take them away." Then suppose an American importer goes to the same factory and says, "I want to buy one hundred bicycles, to import into the United States." The factory owner says: "Here they are. Cost is \$20 a bicycle. Take them away. You take care of getting them to the United States."

This is not selling at less than fair value.

The example is, as you will recognize, oversimplified. Actually the price to the United States will generally include various charges for which adjustments must be made.

Transportation

For instance, if in the bicycle case above cited the factory manager had said to the American importer: "Cost is \$20 a bicycle, and I will take care of the shipping charges," then the situation would be as follows:

Home consumption price	\$20. 00
Price to U. S. A.	\$20. 00
Less ocean transportation	3. 00
Price to U. S. A. f. o. b. factory	17. 00
Difference	3. 00

Because of the adjustment this is selling at less than fair value.

Quantity differentials

Adjustment may be made for quantity differentials in line with the ordinary course of trade for the merchandise under consideration. For example, if the American purchaser of bicycles from country X buys 10,000 bicycles, he might reasonably expect a lower price than the purchaser of 100.

Circumstances of sale

If the home consumption sale and the sale to the United States market are made under differing circumstances, adjustment can be made for that. Let us suppose that the bicycle manufacturer in country X gives a service guaranty for bicycles purchased for use in country X, but none for bicycles exported to the United States. The servicing costs him \$0.50 per bicycle. At the same time he pays for American dealers' advertising of the country X bicycle at the rate of \$2.00 a bicycle, but does not pay for advertising bicycles sold for use in country X. The price comparison would be as follows, assuming a price in each case of \$20 per bicycle.

Home consumption price.....	\$20. 00
Less servicing cost.....	\$0. 50
Plus advertising cost.....	2. 00
Adjustment.....	1. 50
Adjusted home consumption price.....	21. 50
Price to U. S. A.....	20. 00
Difference.....	1. 50

This would be a sale at less than fair value.

Remission of import duties and internal taxes

Further by way of reducing the price to the United States market and the home consumption price to comparable terms, allowance is made, in calculating this price, for various internal taxes, such as sales taxes, which are remitted by the country of export.

“Such or similar” merchandise

If a foreign producer sells his product only to the United States, there is no way to determine fair value by reference to his home consumption sales, because he makes none. In this case we can determine fair value on the basis of the home consumption price charged by other producers in the same country. Another way of determining fair value is by reference to comparable merchandise produced by the same or other producers. There was once a case of shovels sold to the United States with long handles. The producing country had no market for such shovels; its workmen used shovels with short handles. We would base fair value on the short handled shovels sold for home consumption, making adjustment for the fact that long handles cost more than short ones.

Third country prices

If comparison with home consumption prices is not feasible because home consumption sales are not made in sufficient quantities to be representative, then comparison will be made with sales for exportation to countries other than the United States.

Cost of production

In the absence of home consumption or third country sales or offers, fair value is based on what is now called cost of production, or what we would propose under the amendment be called constructed value.

Withholding of appraisement

So much for fair value. For a moment I would like to turn to something which should appropriately be called to your attention here. While fair value is being determined and immediately upon suspicion of sales at a dumping price we withhold appraisement. This means that final determination of the duty cannot be calculated and paid until decision on the question of dumping has been reached.

This insures that every entry can be made subject to a dumping duty when a finding of dumping is finally made. Withholding of appraisement necessarily creates uncertainty. It is a major deterrent, often more feared than the imposition of the duty.

Determination as to injury

If the Treasury determines there are not sales at less than fair value, the case is closed. If it determines there are sales at less than fair value, the case goes to the Tariff Commission for determination as to injury. With its staff of experts experienced in escape clause, peril point, and similar investigations, this is a job it is well qualified to handle.

If the determination is that there is injury, dumping duties are assessed, the collection of which is again a duty of the Treasury.

The amendments proposed

Having given you this sketchy background of the law and its administration, let me turn to the amendments proposed.

At the outset, what we have been looking for and what we propose to you are amendments which contribute to the certainty, speed, and enforcement of the Antidumping Act. We believe firmly that certain definitions should be incor-

porated in the act and the modifications which we propose are those needed to carry into effect this stated purpose. With equal firmness, there are certain terms in the act which we believe should be left broad and undefined.

The amendments proposed—first objective

As stated, the first objective to be accomplished by the amendments is to assure that dumping duties will be collected in all cases where there are sales at less than fair value, with injury to American industry.

Duty measured by third country price.—There are cases where the foreign producer is principally an exporter. He sells mostly to other countries; little within his own country. Under these circumstances we judge fair value by the prices to third countries—that is, to countries other than his own and other than the United States. But if we get a finding under the Antidumping Act, we must under the present law measure dumping duties by the difference between the price to the United States and the price for consumption in the country of export. Under the proposed amendment the same measuring equation would be applicable to both determinations.

Duty measured by restricted home consumption price.—A second type of situation, slightly more complicated, but of even greater importance, is where the home consumption sales are in substantial volume, but are not “freely offered.”

Let us suppose that most country X bicycles are sold for consumption in country X, and sold at \$20.00 a unit, but with a clause in the contract limiting the area in which the country X purchaser may resell. Such a contract renders the sales within country X “restricted”—they are not “freely offered.” They can not be used, under the present law, in calculating dumping duties. Reference must therefore be had under the present law to the sales to third countries (which, we will assume, are freely offered). Under the proposed amendment, the dumping duties would be calculated on the basis of the sales within country X. Here is the result, in figures:

	Number of bicycles sold	Unit price	Dumping duty under present law	Dumping duty under amendment
For home consumption.....	100,000	\$20.00	-----	-----
For export to third countries.....	1,000	15.25	-----	-----
For export to U. S. A.....	50,000	15.00	-----	-----
Dumping duty per unit.....			\$0.25	\$5.00

Once again we have a case of sales at less than fair value. I find it hard to believe that the dumping duty should be calculated on the basis of sales to third countries. Or, if the price for consumption in country X was \$15.00 instead of \$20.00, and thus not less than the price to the United States, I would find it equally hard to believe that any dumping duties should be imposed based on the \$15.25 third country price.

Restricted home consumption sales are common practice in many foreign countries, especially those which have cartels. As a result, at present and for some years it has been possible that we may have a finding under the act; yet we are unable either to collect dumping duties or the dumping duties are so infinitesimal as hardly to deter a foreign producer. Concomitantly, this failure and apparent impotency are the source of a good deal of irritation as well as a real detriment to American industry.

The amendments proposed—second objective

As to the second of our objectives: There are a number of technical terms used in the Antidumping Act which are also used in the law relating to valuation for assessment of ordinary duties. Among these are the definitions of “sold or . . . offered for sale,” “ordinary course of trade,” “such or similar merchandise,” “usual wholesale quantities.” These definitions were brought up to date, as to valuation for ordinary duties, in the Customs Simplification Act of 1956. We feel that they should be incorporated also, to the extent applicable, in the Antidumping Act to achieve uniformity, avoid needless confusion, and make the body of customs laws more cohesive.

Injury under the Antidumping Act

We are not suggesting an amendment to the act which will define what is meant by "injury," although a great many persons have strongly urged a definition in terms of injury bordering on bankruptcy while a great many others have argued with equal vigor doing away with the injury test altogether. The conflict is one of long standing.

Legislative history

If we look at the legislative history, we find that certain members of Congress in 1921 were considering the problem quite simply from the standpoint of price differential, without any reference to injury. Others adopted a test bordering on destruction of an American industry. The resultant law was a compromise. A price differential alone was not enough; injury, too, must be present; although the degree of injury was not defined.

Shortly after the law was passed the Treasury in effect announced that its determination of price differential was going to be made simply on the basis of arithmetic, without any reference to whether the import price was "fair"—meaning "equitable." This policy has never been seriously challenged by Congress.

In 1954 a careful reexamination of the Antidumping Act was made, as a result of which the law was changed so as to place in the quasi-judicial forum of the Tariff Commission, an arm of the United States Congress, the decision on injury. The decision on fair value remained in the Treasury.

Sales less than fair value not of themselves unfair

Selling at less than fair value, as we define it (that is the foreign exporter selling to the United States at a price less than his price for consumption in the country of exportation, calculated f. o. b. foreign factory) is a benefit to the American consumer and to the American reprocessor, as well as the American importer. It may or may not injure an industry in the United States. The fact that a sale is at less than "fair value" is not of itself an indication of injury, nor does it indicate the price is "unfair." "Fair" in this sense does not mean "equitable"; it merely means what a willing purchaser pays to a willing seller for consumption in the country of export, that is, the fair market value.

Comparison of delivered prices U. S. A. for injury determination

Essentially American industry does not look to the foreign competitor's foreign price. American industry looks to what the foreign product sells for in the United States. That means delivered price. If the delivered price of the foreign product is lower than the price of the comparable American product, we have an indication—one indication—that there may be injury. On the other hand, if the delivered price of the foreign product is not lower than the price of the comparable American product, the foreign producer is not underselling American competition, although he may be selling at less than fair value. Here is no price raid, or injury to American industry.

Definition of injury and industry not required

To try to define "injury" is very much like trying to define precisely some of the phases of the common law or of equity where the court's tradition may and should come to its judgment by weighing all of the factors in balance; and in any one case the balance may be very different from that of another. Injury to a large corporation or to the owner of a chain of stores may be very different from injury to the corner grocer. Injury to one industry may be very different from injury to another. Under the same set of facts mathematically opposite conclusions or differing conclusions could be drawn. These are questions of economics, not sensitive to either exact science or to predetermined close lines or channels of thought.

So, too, does "industry" beggar proper definition when one is concerned with comparisons. And we have felt right along that the act should neither define industry nor injury for these reasons.

It is interesting to note that on the one hand some people think injury should be very broadly defined while others would narrow the definition of injury until it disappears. The incompatibility of these differing points of view is strangely compelling. To us neither is correct and the Tariff Commission's hands and minds must not be fettered to the end that their determination may be as realistic as is possible within the set of facts before them—realistic from the standpoint of pure business judgment.

In general summation, the Treasury welcomed the mandate of the Congress with true objectivity and has had the careful, expert guidance of Mr. Hendrick; the practical, hardheaded approach of the many able people of the Bureau of Customs; and also from time to time, distinguished scholarly assistance from the outside.

What you have before you in our report and in our proposed amendments results from exhaustive studies. The proposal for legislation, on this basis, represents what we believe to be an Antidumping Act which will meet your requirements now and will do so for a long time to come.

Organization and Procedure

EXHIBIT 43.—Treasury Department orders relating to organization and procedure

No. 81 (REVISED), REVISION, DECEMBER 3, 1956.—ABOLITION OF THE COMMITTEE ON PRINTING AND PUBLICATION

This order supersedes Treasury Department Order No. 81 (Revision No. 2) of October 30, 1953, and abolishes the Committee on Printing and Publication set up by that order.

The Committee's functions were to supervise generally all printing and binding originating in and procured for the Department, and to recommend printing regulations for the Department, subject to approval of the Administrative Assistant Secretary. The Administrative Assistant Secretary shall continue to be responsible for these functions.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 83 (REVISED), REVISION, APRIL 9, 1957.—DESIGNATIONS RELATIVE TO THE SECURITY OFFICER AND PERSONNEL SECURITY OFFICER

Pursuant to the provisions of Executive Orders No. 10450 and 10501 and of Treasury Department Orders No. 82, Revised, and 160, Revised, Mr. Francis J. Gafford, Assistant to the Secretary, has been designated as Security Officer and Personnel Security Officer for the Treasury Department. Mr. A. Glenn Meerdink shall serve as Alternate Legal Officer.

All officers and employees of the Treasury Department are directed to comply with requests for information received from the persons designated above and to cooperate with them to the fullest possible extent.

This order supersedes Treasury Department Order No. 83 (Revised), dated January 17, 1956.

FRED C. SCRIBNER, Jr.,
Acting Secretary of the Treasury.

No. 83 (REVISED), REVISION, MAY 16, 1957.—DESIGNATION OF ALTERNATE PERSONNEL SECURITY OFFICER

Pursuant to the provisions of Executive Orders No. 10450 and 10501 and of Treasury Department Orders No. 82, Revised, and 160, Revised, Mr. Francis J. Gafford, Assistant to the Secretary, has been designated as Security Officer and Personnel Security Officer for the Treasury Department. Mr. Thomas M. Hughes is designated as Alternate Personnel Security Officer. Mr. A. Glenn Meerdink shall serve as Alternate Legal Officer.

All officers and employees of the Treasury Department are directed to comply with requests for information received from the persons designated above and to cooperate with them to the fullest possible extent.

This order supersedes Treasury Department Order No. 83 (Revised), dated April 9, 1957.

FRED C. SCRIBNER, Jr.,
Acting Secretary of the Treasury.

No. 148. (REVISED), REVISION, APRIL 18, 1957.—SUPERVISION OF BUREAUS OF THE TREASURY DEPARTMENT

The following assignments of bureaus of the Treasury Department are hereby ordered:

Under Secretary (Mr. W. Randolph Burgess):
 Assistant Secretary (Mr. Laurence B. Robbins):
 Office of Production and Defense Lending:
 Defense Lending Division.
 Federal Facilities Corporation.
 Reconstruction Finance Corporation (In liquidation).
 Fiscal Assistant Secretary (Mr. William T. Heffelfinger):
 Bureau of Accounts.
 Office of the Treasurer.
 Bureau of the Public Debt.
 Office of the Comptroller of the Currency.
 United States Savings Bonds Division.
 Office of International Finance (including Foreign Assets Control).
 Assistant to the Secretary (Mr. Nils A. Lennartson):
 Information Service.
 Assistant to the Secretary (Mr. Paul I. Wren).
 Special Assistant to the Secretary (Mr. Frank A. Southard, Jr.).
 Assistant Secretary (Mr. David W. Kendall):
 United States Coast Guard.
 United States Secret Service.
 Bureau of Customs.
 Bureau of the Mint.
 Bureau of Narcotics.
 Assistant to the Secretary (Mr. James P. Hendrick).
 Technical Assistant to the Secretary for Enforcement.
 Assistant Secretary (Mr. Fred C. Scribner, Jr.):
 Internal Revenue Service.
 Administrative Assistant Secretary (Mr. William W. Parsons):
 Office of Administrative Services.
 Office of Budget.
 Office of Personnel.
 Bureau of Engraving and Printing.
 Assistant to the Secretary (Mr. Francis J. Gafford):
 Personnel Security Office.
 General Counsel (Vacancy):
 Legal Division.
 Assistant to the Secretary (Mr. Russell E. Train):
 Legal Advisory Staff.
 Deputy to the Secretary [in charge of tax policy] (Mr. Dan Throop Smith):
 Analysis Staff.

G. M. HUMPHREY,
Secretary of the Treasury.

No. 150-42, JULY 27, 1956.—REMOVAL OF PANAMA CANAL ZONE, PUERTO RICO, AND THE VIRGIN ISLANDS FROM INTERNAL REVENUE REGIONS AND DISTRICTS

By virtue of the authority vested in me as Secretary of the Treasury it is hereby ordered:

1. The Panama Canal Zone is removed from the Internal Revenue District, Jacksonville, and from the Atlanta Region; and Puerto Rico and the Virgin Islands of the United States are removed from the Internal Revenue District, Lower Manhattan, and from the New York City Region.

2. The Commissioner shall, to the extent of authority otherwise vested in him, provide for the administration of the United States internal revenue laws in the Panama Canal Zone, Puerto Rico, and the Virgin Islands.

3. This order shall not be deemed to affect the procedures for administrative appeal existing immediately prior to August 1, 1956.

4. This order shall be effective as of August 1, 1956.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 150-43, OCTOBER 5, 1956.—REDESIGNATION OF OFFICE OF ASSISTANT COMMISSIONER OF INTERNAL REVENUE AS OFFICE OF ASSISTANT TO THE COMMISSIONER

By virtue of the authority vested in me as Secretary of the Treasury, the office of Assistant Commissioner of Internal Revenue (Planning), in the Washington Headquarters Office of the Internal Revenue Service, as established in Treasury Department Order No. 150-24, dated April 10, 1953, is redesignated as the office of Assistant to the Commissioner.

The provisions of Treasury Department Order No. 150-24 are revised accordingly by this order.

G. M. HUMPHREY,
Secretary of the Treasury.

No. 150-44, NOVEMBER 16, 1956.—ESTABLISHMENT OF THE OFFICE OF ADMINISTRATIVE ASSISTANT TO THE COMMISSIONER OF INTERNAL REVENUE

By virtue of the authority vested in me as Secretary of the Treasury, including that conferred by Section 2 of Reorganization Plan No. 1 of 1952, the office of Assistant Commissioner of Internal Revenue (Administration), as established in Treasury Department Order No. 150-24, dated April 10, 1953, is hereby abolished. It is determined that there shall be in the national office of the Internal Revenue Service the office of Administrative Assistant to the Commissioner.

This order is effective December 1, 1956.

G. M. HUMPHREY,
Secretary of the Treasury.

No. 150-45, APRIL 22, 1957.—AUTHORIZATION OF THE COMMISSIONER OF INTERNAL REVENUE TO PRESCRIBE REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FIREARMS ACT

The Commissioner of Internal Revenue is hereby authorized to prescribe all needful rules and regulations for the enforcement of the Federal Firearms Act (U. S. C., Title 15, Chapter 18), subject to approval by the Secretary or his delegate.

FRED C. SCRIBNER, Jr.,
Acting Secretary of the Treasury.

No. 158 (REVISED), REVISION, AUGUST 23, 1956.—DESIGNATION OF OFFICERS TO WITNESS ASSIGNMENTS OF REGISTERED ISSUES OF THE UNITED STATES

Department Circular No. 300, Revised, prescribing regulations with respect to United States bonds and notes, makes provision for the assignment of registered issues at the Treasury Department. The following officers are hereby authorized to witness such assignments:

The Secretary of the Treasury.
The Under Secretaries of the Treasury.
The Assistant Secretaries of the Treasury.
The General Counsel of the Treasury.
The Commissioner of the Public Debt.
The Assistant Commissioner of the Public Debt.
The Deputy Commissioner of the Public Debt.
The Chief of the Division of Loans and Currency, Bureau of the Public Debt.
The Assistant Chief of the Division of Loans and Currency.
The Treasurer of the United States.
The Deputy and Acting Treasurer of the United States.
The Assistant Deputy Treasurer of the United States.
The Chief of the Securities Division, Office of the Treasurer of the United States.
The Assistant Chief of the Securities Division.
The Assistant to the Chief of the Securities Division.

No other officers in the Treasury Department at Washington are authorized to witness the assignments of registered issues of the United States.

The attention of all officers authorized to witness assignments is called to the Department's requirement that the witnessing officer must make certification that the person executing the assignment appeared personally before him, that such person was known or proved to him to be the payee of the particular security assigned, or his duly constituted assign, and that such person executed the transfer, acknowledging it to be his free act and deed. Witnessing officers will be held to strict accountability in those respects, and will be expected to respond in respect to any losses resulting from want of care on their part. The witnessing officer must affix to the assignment his official signature, title, and address, and the date of the assignment.

A. N. OVERBY,
Acting Secretary of the Treasury.

NO. 165 (REVISED), AMENDMENT, OCTOBER 29, 1956.—DELEGATION TO THE COMMISSIONER OF CUSTOMS OF AUTHORITY TO TAKE FINAL ACTION IN CERTAIN PENALTY AND LIQUIDATION DAMAGE CASES

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950 (3 CFR, 1950 Supp. Ch. III), it is hereby ordered that subparagraph (h) of Treasury Department Order No. 165, Revised, issued on November 2, 1954 (T. D. 53654; 19 F. R. 7241), as amended December 5, 1955 (T. D. 53966; 20 F. R. 9320), is further amended to read as follows:

"(h) No decision with respect to any claim (including claim for liquidated damages), fine, or penalty (including forfeiture) in excess of \$20,000 shall be made without the approval of the Secretary of the Treasury, except that such approval shall not be required with respect to any claim (including claim for liquidated damages), fine, or penalty (including forfeiture) incurred or arising under:

"(1) Section 3114, Revised Statutes, as amended (19 U. S. C. 257), for failure to report, make entry, and pay duties on certain equipments and repairs for certain vessels;

"(2) Section 432, Tariff Act of 1930 (19 U. S. C. 1432), for omitting from the vessel manifest any articles to be retained on board as sea stores, ship's stores, or bunker coal or bunker oil, or for landing any such articles without the required permit;

"(3) Section 453, Tariff Act of 1930 (19 U. S. C. 1453), for lading or unlading merchandise or baggage valued at \$500 or more without obtaining the required license or permit;

"(4) Section 460, Tariff Act of 1930, as amended (19 U. S. C. 1460), for failure to report or to file a manifest as required by Section 459, Tariff Act of 1930, as amended (19 U. S. C. 1459) in the following cases:

"(i) Violations due to ignorance of the reporting requirements or to inadvertence and either no merchandise, or only typical personal or souvenir merchandise which would have been free of duty, if entered, is carried on the vessel or vehicle, or

"(ii) Where the violation is the first offense, although not due to ignorance or inadvertence, and no intended commercial use or threat to the revenue is involved;

"(5) Section 584, Tariff Act of 1930, as amended (19 U. S. C. 1584), for having on board, or unlading from, a vessel or vehicle, any merchandise which is not included or described in the manifest or does not agree therewith;

"(6) Section 8 or 204 (b), Anti-Smuggling Act, approved August 5, 1935 (19 U. S. C. 1708, 1584), for failure of a vessel not exceeding 500 net tons importing spirits, wines, or other alcoholic liquors to have the certificate required by Section 7 of the Anti-Smuggling Act (19 U. S. C. 1707);

"(7) Section 585, Tariff Act of 1930, as amended (19 U. S. C. 1585), in respect of any vessel or vehicle which departs or attempts to depart from any collection district without making the required report or entry, or unlades any merchandise before such report or entry;

"(8) Section 592, Tariff Act of 1930 (19 U. S. C. 1592), if the Commissioner finds that the decision is in accordance with an established policy of mitigation or remission which has been approved by the Secretary in a factually similar case;

"(9) The Act of February 24, 1915 (46 U. S. C. 14), for false oath to obtain a register for a wrecked vessel;

"(10) Section 4143, Revised Statutes (46 U. S. C. 21), for false oath as to ownership by owner to obtain registry of vessel;

"(11) Section 4163, Revised Statutes (46 U. S. C. 33), for false oath by agent or attorney to obtain registry of a vessel;

"(12) Section 4177, Revised Statutes, as amended (46 U. S. C. 45), in respect of documented vessels failing to have the required number permanently marked;

"(13) Section 4179, Revised Statutes (46 U. S. C. 50), for changing, or engaging in deceptive practices with respect to, the name of a documented vessel;

"(14) Section 4189, Revised Statutes, as amended (46 U. S. C. 60), in respect of any vessel for which any certificate of registry, enrollment or license, or other record or document granted in lieu thereof is knowingly and fraudulently obtained or used;

"(15) Section 4153, Revised Statutes, as amended (46 U. S. C. 77), in respect of documented vessels for failing to have the number denoting net tonnage permanently marked;

"(16) Section 4339, Revised Statutes (46 U. S. C. 272), for refusal to take, or for taking falsely, the required oath with respect to equipment and repairs for vessels;

"(17) Section 4337, Revised Statutes (46 U. S. C. 278), in respect of vessels proceeding on a foreign voyage while enrolled and licensed or licensed;

"(18) Section 1 of the act of May 28, 1906 (46 U. S. C. 292), in respect of foreign-built dredges engaging in dredging in the United States;

"(19) Section 4365, Revised Statutes (46 U. S. C. 311), in respect of vessels licensed for the fisheries and found within three leagues of the coast with foreign merchandise exceeding \$500 in value on board without having the permission to touch and trade at foreign ports required by Section 4364, Revised Statutes (46 U. S. C. 310);

"(20) Section 4370, Revised Statutes, as amended (46 U. S. C. 316 (a) and (d)), in respect of any vessel employed in towing in violation of subsection (a) of that section, as amended, or of any foreign vessel engaging in salvaging operations not excepted or authorized by subsection (d) of that section, as amended;

"(21) Section 7, act of June 19, 1886, as amended (46 U. S. C. 319), in respect of certain vessels trading coastwise, or engaged in the fishery, without a valid document and in respect of such vessels having on board foreign merchandise or taxable alcoholic liquors on which the duties or taxes have not been paid or secured to be paid;

"(22) Section 4377, Revised Statutes, as amended (46 U. S. C. 325), in respect only of licensed vessels employed in any other trade than that for which licensed, found with a forged or altered license or one granted for any other vessel, or found with any foreign merchandise or taxable alcoholic liquors on board on which the duties or taxes have not been paid or secured to be paid;

"(23) Section 4240, Revised Statutes (46 U. S. C. 723), in respect of any vessel transporting to a foreign port any property taken from a wreck within United States jurisdiction off the coast of Florida;

"(24) Section 27, Merchant Marine Act, 1920, as amended (46 U. S. C. 883), in respect of merchandise transported coastwise in a vessel ineligible under that section to engage in such transportation;

"(25) Bonds taken pursuant to Section 308, Tariff Act of 1930, as amended (19 U. S. C. 1308), if the Commissioner is satisfied that the importation was properly entered under Section 308 and there was no intent to defraud the revenue or delay the payment of duty;

"(26) Bonds taken pursuant to Section 304, Tariff Act of 1930, as amended (19 U. S. C. 1304), if the marking duty due under Section 304 of the tariff act has been deposited and the Commissioner is satisfied that the importer was not guilty of negligence or bad faith in permitting the not-properly-marked articles to be distributed, has been diligent in attempting to secure compliance with the marking requirements, and has attempted by all reasonable means to effect redelivery;

"(27) Bonds taken pursuant to Section 551, Tariff Act of 1930, as amended (19 U. S. C. 1551), if the Commissioner is satisfied that all the merchandise in respect of which the claim for liquidated damages was incurred has actually been exported or destroyed and that any failure to obtain customs supervision was without intent to evade any law or regulation;

"(28) Bonds taken pursuant to Section 565, Tariff Act of 1930 (19 U. S. C. 1565);

"(29) Bonds taken pursuant to Section 1 (par. 1101), Tariff Act of 1930, as amended (19 U. S. C. 1001, par. 1101), if no loss of revenue is involved; and

"(30) Any bond for failure to make entry and deposit estimated duties and

taxes or for failure to produce required documents within the time required by the law or regulation, if the Commissioner is satisfied that such failure was not due to any purpose to evade any law or regulation."

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 165-5, OCTOBER 17, 1956.—DELEGATION TO THE COMMISSIONER OF CUSTOMS OF FUNCTIONS UNDER PUBLIC LAW NO. 362, 84TH CONGRESS, 1ST SESSION

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950 (3 CFR, 1950 Supp., Ch. III), there are transferred to the Commissioner of Customs all the functions of the Secretary of the Treasury under Public Law No. 362, 84th Congress, 1st Session (act of August 11, 1955, 21 U. S. C. 198a, 198b, 198c).

The functions herein transferred may be delegated by the Commissioner of Customs to subordinates as he deems necessary.

The transfer of functions to the Commissioner of Customs by this order is in addition to the transfer of functions to the Commissioner of Narcotics by Treasury Department Order No. 180-3, dated August 22, 1955, published in the Federal Register on August 26, 1955. The intent of the two orders is to transfer the functions to the two commissioners to be performed in their respective fields of operation.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 165-6, JUNE 26, 1957.—DELEGATION TO THE COMMISSIONER OF CUSTOMS OF AUTHORITY TO MAKE CERTAIN REFUNDS OF IMPORT TAXES

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950 (3 CFR, 1950 Supp., Ch. III) and Section 6418 (a) of the Internal Revenue Code of 1954, as amended, there is hereby delegated to the Commissioner of Customs the authority contained in Section 6418 (a) of the Internal Revenue Code, as amended, to make refunds of import taxes paid under Section 4501 of the Internal Revenue Code of 1954, as amended, or any extensions thereof, with respect to manufactured sugar or articles composed in chief value of manufactured sugar.

The authority herein delegated may be redelegated by the Commissioner of Customs to other officers or employees of the Customs Service in such manner as the Commissioner shall direct.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

Nos. 167-22 THROUGH 167-29.—DELEGATION OF FUNCTIONS TO THE COMMANDANT, U. S. COAST GUARD

No. 167-22, July 24, 1956

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950 and 14 U. S. C. 631, there are transferred to the Commandant, U. S. Coast Guard, the functions of the Secretary of the Treasury under:

1. Public Law 548, 84th Congress, approved June 4, 1956.
2. Public Law 549, 84th Congress, approved June 4, 1956. The Commandant shall have final action on appeals made in accordance with Section 1 (d) of this act.
3. Public Law 64, 84th Congress, approved June 8, 1955.

The Commandant may make provisions for the performance by subordinates in the Coast Guard of all functions contained in the above acts except the issuance of regulations and the action taken on appeals made in accordance with Section 1 (d), Public Law 549, 84th Congress.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 167-23, July 27, 1956

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950 and 14 U. S. C. 631, there are transferred to the Commandant, U. S. Coast Guard, the functions of the Secretary of the Treasury under the act of June 4, 1956 (Public Law 550, 84th Congress), an act which relates to the establishment, maintenance, and operation of aids to maritime navigation on fixed structures.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 167-24, August 30, 1956

Pursuant to the authority vested in me by Reorganization Plan No. 26 of 1950, and 14 U. S. C. 631, there is hereby delegated to the Commandant, U. S. Coast Guard, the authority under 14 U. S. C. 650, as amended by Public Law No. 1014, dated August 7, 1956, to: Continue the Coast Guard supply fund; prescribe regulations for designating the classifications of material to be stocked under the fund; and increase the existing capital of the fund by the value of usable materials transferred thereto from Coast Guard inventories carried in other accounts. Existing regulations for accounting for the fund are hereby confirmed and continued.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

No. 167-25, September 10, 1956

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950 and 14 U. S. C. 631, there is transferred to the Commandant, U. S. Coast Guard, the function of the Secretary of the Treasury in Public Law 916 of the 84th Congress (act of August 2, 1956) to specify effective date of retirement for physical disability for uniformed members of the Coast Guard.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 167-26, November 8, 1956

By virtue of authority vested in me by Reorganization Plan No. 26 of 1950 (10 U. S. C. 2311 and 14 U. S. C. 631), there are transferred to the Commandant, U. S. Coast Guard, the functions of the Secretary of the Treasury under:

1. Chapter 137, Title 10, United States Code, except the authority to make determinations and decisions under clauses (11)-(16) of Section 2304 (a), or Section 2307 (a).

2. Clause (11) of Section 2304 (a), Title 10, United States Code, but only for contracts requiring the expenditure of not more than \$25,000.

The Commandant may make provision for the performance by subordinates in the Coast Guard of any of the functions transferred by paragraph 1, and by the Comptroller of the Coast Guard of the function transferred by paragraph 2.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 167-27, November 27, 1956

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950 (3 CFR, 1950 Supp., Ch. III), there is transferred to the Commandant, U. S. Coast Guard, the function of issuing true and certified copies of shipping articles containing the names of the crews of vessels bound on foreign voyages from ports of the United States, as provided in Section 4575 of the Revised Statutes, as amended (46 U. S. C. 676).

The Commandant may make provision for the performance by subordinates in the Coast Guard of the function transferred.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 167-28, December 3, 1956

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950 and 14 U. S. C. 631, there are transferred to the Commandant, U. S. Coast Guard, the functions of the Secretary of the Treasury under the act of August 1, 1956 (Public Law 881, 84th Congress), an act which provides benefits for the survivors of servicemen and veterans.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 167-29, January 25, 1957

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950 and 14 U. S. C. 631, there is transferred to the Commandant, U. S. Coast Guard, the function of the Secretary of the Treasury under 14 U. S. C. 248 (a), which provides for annual convening of a board to select certain captains for retention.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 170-3, JANUARY 9, 1957.—ESTABLISHMENT OF POSITION OF DEPUTY TO THE SECRETARY

There is hereby established in the Office of the Secretary the position of Deputy to the Secretary. By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950, the functions and responsibilities of the position, Special Assistant to the Secretary in Charge of Tax Policy, are hereby transferred to the position of Deputy to the Secretary.

This order amends Treasury Department Orders No. 148 (Revision No. 2), dated August 3, 1955, and No. 150-41, dated February 13, 1956.

G. M. HUMPHREY,
Secretary of the Treasury.

No. 170-4, APRIL 26, 1957.—DELEGATION OF FUNCTIONS TO THE ADMINISTRATIVE ASSISTANT SECRETARY CONCERNING THE EXCHANGE STABILIZATION FUND, AND DESIGNATION OF PERSONS AUTHORIZED TO SIGN OFFICIAL PAPERS IN HIS ABSENCE

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950, it is hereby ordered that:

(1) The Administrative Assistant Secretary is authorized to approve personnel payrolls and other obligation and disbursing documents relating to the administrative expenses of the Exchange Stabilization Fund. This authority shall not affect existing allotment, budgetary, accounting, and certification procedures presently followed with respect to the expenditures and personnel of the Exchange Stabilization Fund.

(2) In the absence of the Administrative Assistant Secretary, the following are authorized to sign as Assistant to the Administrative Assistant Secretary the documents relating to the administrative expenses of the Exchange Stabilization Fund and all other classes of official papers which the Administrative Assistant Secretary is authorized to sign:

Department Budget Officer.
Director of Personnel.
Director of Administrative Services.
Head, Management Analysis Staff.

This order shall be effective today.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

No. 177-11, JULY 10, 1956.—DELEGATION TO THE ASSISTANT NATIONAL DIRECTOR OF THE UNITED STATES SAVINGS BONDS DIVISION OF AUTHORITY TO NEGOTIATE CERTAIN CONTRACTS

1. Pursuant to a delegation of authority dated July 3, 1956, from the Administrator of General Services to the Secretary of the Treasury under the Federal Property and Administrative Services Act of 1949 (63 Stat. 377) as amended, and pursuant to authority of Section 307 (a) thereof, authority is hereby redelegated to the Assistant National Director of the United States Savings Bonds Division to negotiate, without advertising, under Section 302 (c) (9) of that act, contracts for the procurement of audio and visual services for use in connection with the fall program for promoting the sale of United States savings bonds.

2. The authority thus delegated to the Assistant National Director of the United States Savings Bonds Division shall be exercised by him personally or through such responsible subordinates as he may designate, and shall be exercised in accordance with all applicable limitations and requirements in the act, and in accordance with applicable policies, procedures, and controls prescribed by the General Services Administration.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 177-12, OCTOBER 23, 1956.—DELEGATION OF AUTHORITY PERTAINING TO RECORDS MANAGEMENT

By virtue of authority vested in me by Reorganization Plan No. 26 of 1950, there are transferred to the head of each bureau, to be exercised with respect to records management in his bureau, the functions of the Secretary of the Treasury under Section 506 of the Federal Records Act of 1950 (44 U. S. C. 396).

The head of each bureau may delegate the functions transferred herein to such subordinates in his bureau as he deems necessary.

A. N. OVERBY,
Acting Secretary of the Treasury.

No. 177-13, MARCH 19, 1957.—DELEGATION TO THE CHIEF DISBURSING OFFICER OF THE FUNCTION OF ISSUING CERTAIN CHECKS

By virtue of the authority vested in the Secretary of the Treasury by Reorganization Plan No. 26 of 1950 and consistent with the provisions of Executive Order No. 6166, dated June 10, 1933, as amended, there is hereby transferred to the Chief Disbursing Officer the function of issuing checks in payment of interest on public debt obligations of the United States. Such checks shall be issued over the title of the Secretary of the Treasury by the Chief Disbursing Officer or such Regional Disbursing Officer or officers as he may designate.

Such personnel, equipment, and records as are determined by the Commissioner of the Public Debt and the Chief Disbursing Officer to be necessary to perform the foregoing function shall be made available by the Bureau of the Public Debt to the Chief Disbursing Officer.

Funds heretofore or hereafter appropriated to the Bureau of the Public Debt covering this function shall, with the approval of the Secretary of the Treasury, be transferred to the appropriation of the Division of Disbursement.

This order shall be effective May 1, 1957: *Provided*, That its operation may be postponed in whole or in part by the Fiscal Assistant Secretary until not later than September 1, 1957.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

No. 180-4, JULY 24, 1956.—DELEGATION TO THE COMMISSIONER OF NARCOTICS OF AUTHORITY RELATIVE TO THE SURRENDER OF HEROIN AND ITS USE FOR SCIENTIFIC RESEARCH PURPOSES

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950, there is hereby delegated to the Commissioner of Narcotics, with right to redelegate, authority to perform any function of the Secretary of the Treasury under Section 1402 of Title 18 of the United States Code (Public Law 728, 84th Cong., 2nd Session) relating to the surrender of heroin and the use of heroin for scientific research purposes.

DAVID W. KENDALL,
Acting Secretary of the Treasury.

No. 182 (REVISED) REVISION, NOVEMBER 30, 1956.—DELEGATION OF FUNCTIONS PERTAINING TO THE SIGNING OF OFFICIAL PAPERS IN THE OFFICE OF THE TREASURER¹

By virtue of the authority vested in me by Section 304 of the Revised Statutes, as amended, (31 U. S. C. 144), and by Reorganization Plan No. 26 of 1950, and upon the recommendation of the Treasurer of the United States, I hereby authorize the persons who occupy the positions identified below in the Office of the Treasurer of the United States to sign as Special Assistant Treasurers or under their official titles, when required by the Treasurer of the United States, checks, letters, telegrams, and other official documents in connection with the business of the Treasurer's Office:

The Deputy and Acting Treasurer.
The Assistant Deputy Treasurer.
The Assistant to the Deputy and Acting Treasurer.
The Administrative Officer.
The Chief, General Accounts Division.
The Cashier, Treasurer's Office.
The Chief, Check Payment and Reconciliation Division.
The Asst. Chief, Check Payment and Reconciliation Division.
The Technical Asst. Chief, Check Payment and Reconciliation Division.
The Chief, Check Claims Division.
The Assistant Chief, Check Claims Division.
The Assistant to the Chief, Check Claims Division.
The Chief, Securities Division.
The Chief, Currency Redemption Division.
The Asst. Chief, Currency Redemption Division.

This order supersedes all prior authorizations to employees of the Treasurer's Office to sign checks, letters, telegrams, and other official documents in connection with the business of the Treasurer's Office.

A. N. OVERBY,
Acting Secretary of the Treasury.

No. 185, JUNE 28, 1957.—ESTABLISHMENT OF THE OFFICE OF DEFENSE LENDING AND TRANSFER OF FUNCTIONS PERTAINING TO LENDING AND LIQUIDATION

By virtue of the authority vested in me as Secretary of the Treasury, including the authority in Reorganization Plan No. 26 of 1950 and the authority in Reorganization Plan No. 1 of 1957, it is ordered as follows:

1. There are transferred to Assistant Secretary Laurence B. Robbins all of the functions of the Secretary of the Treasury under Reorganization Plan No. 1 of 1957. Assistant Secretary Robbins may make provisions for the performance of any of these functions and any of the functions under Section 409 of the Federal Civil Defense Act of 1950 and Section 302 of the Defense Production Act of 1950, as amended, heretofore transferred to him by Treasury Department Order No. 181-3, by subordinates in the Office of Defense Lending.

2. There is established the Office of Defense Lending which shall be under the supervision of Assistant Secretary Robbins and shall perform such of the functions transferred to him as he may assign to it.

¹ This order supersedes Treasury Department Order No. 182 (Revised), dated December 21, 1954.

3. The Defense Lending Division established by Treasury Department Order No. 181-3 is abolished.

4. Paragraphs 1, 2, and 3 of this order shall be effective July 1, 1957.

5. Effective at the close of September 30, 1957,¹ the Office of Production and Defense Lending established by Treasury Department Order No. 181-3 is abolished.

FRED C. SCRIBNER, Jr.
Acting Secretary of the Treasury.

Reporting and Accounting Changes

EXHIBIT 44.— Regulations governing the handling of certificates of deposit for credit in the general account of the Treasurer of the United States

[Department Circular No. 945 (Revised), Supplement No. 1, Amendment No. 1. Accounts]

TREASURY DEPARTMENT,
Washington, July 20, 1956.

To Heads of Government Departments and Agencies Whose Accounts Are Required to be Reconciled with Accounts Current of the Division of Disbursement, Treasury Department, and Others Concerned:

I. Purpose of these regulations

1. *General.* These regulations are issued to (a) amend Attachment No. 4⁷ of Supplement No. 1 of Department Circular No. 945—Revised, dated May 3, 1955, in order to provide for certain new deposit symbols, and (b) to establish a new form of consolidated abstract of deposits to be prepared by Federal Reserve Banks and branches and certain Treasury offices, in lieu of Treasury Form 17C which was temporarily adapted for this purpose.

2. *New deposit symbols.* Under the system for paying and reconciling checks drawn on the Treasurer of the United States by electronic data processing methods new 4-digit symbols will be assigned to all disbursing offices. Certain disbursing offices are being brought under the new system effective August 1, 1956. For the Division of Disbursement, Treasury Department, only the Washington regional office is affected on that date. The new symbols to be used on certificates of deposit affecting that office, beginning August 1, 1956, are shown in the following list, which also sets forth other changes made in symbols originally indicated on Attachment No. 4 of Supplement No. 1. It is planned that the new symbols for all other regional offices of the Division of Disbursement will be established effective January 1, 1957, and advice of such symbols will be forthcoming at a later date.

Treasury regional office locations	Office deposit symbols		Street address
	Former	New	
<i>A. Within continental United States</i>			
Washington 25, D. C.: Deposits affecting all accounts other than those listed below.	300	9000	Annex No. 1, Madison Place and Penn- sylvania Ave. N. W.
Exchange Stabilization Fund-----	329	4917

All other Deposit Funds, Secretary of the Treasury.	325	5091	
Neopit, Wisconsin (Branch of Chicago)-----		1429	Menominee Indian Mills.
New York Branch (Veterans' Administra- tion).		421	252 7th Ave., N. Y., N. Y.
Oak Ridge, Tenn. (Branch of Atlanta)-----	428	1428	P. O. Box 336.
<i>B. Outside continental United States</i>			
Honolulu, T. H.-----	1321	324	328 Federal Building.
Juneau, Alaska-----	1323	343	Box 921, 129 Federal and Territorial Building.
San Juan, Puerto Rico (Branch of New York).	1324	402	Box 3409, 231 Federal Bldg.

NOTE.—The changes in symbols shown on this page are already in effect, as modifications of Attachment No. 4 of Supplement No. 1.

¹ The termination date was changed to October 31, 1957, by an order dated September 30, 1957.

II. Consolidated abstract of deposits and debit vouchers, Treasury Form No. 17V

[This section is applicable to Federal Reserve Banks and branches and certain Treasury offices]

3. *Preparation and use of Treasury Form No. 17V (Attachment No. 1).* Consolidated Abstract of Deposits and Debit Vouchers functioned in the Treasurer's general account, Treasury Form No. 17V, is hereby prescribed to be prepared, beginning October 1, 1956, by Federal Reserve Banks and branches; the Office of the Treasurer of the United States, Cash Division; mint and assay offices of the Bureau of the Mint; and offices of the Bureau of the Public Debt affected, in lieu of Treasury Form No. 17C, to the extent that the latter form has been prepared heretofore by such offices for the special purpose of a consolidated abstract of deposits and debit vouchers.

(a) For each regular daily transcript of the Treasurer's general account, as well as for each consolidated transcript covering documents received from general depositaries, the Federal Reserve Banks and branches, the Treasurer's Cash Division, and the mints and assay offices will arrange the originals of certificates of deposit (Standard Form No. 201) and the originals of related debit vouchers (Treasury Form 5504) for each confirmation month according to each Treasury regional office affected within the forty-eight States, using the city identifications in the upper right corner of these documents as the primary guide.

(b) A separate Consolidated Abstract, Treasury Form No. 17V, will be prepared in an original and two copies for each Treasury regional office group of documents. With respect to the Treasury's Washington regional office a separate consolidated abstract is required for each of the four office deposit symbols involved, as indicated in the list under paragraph 2 above.

(c) The heading of each Form No. 17V will be completed to identify:

(1) The Federal Reserve Bank or branch, the Treasurer's Cash Division, or the mint or assay office.

(2) The Treasury regional office affected (city and office deposit symbol). It is possible that some certificates of deposit or debit vouchers will be received, following the effective date of a change in office deposit symbol, which bear the former symbol. Such documents should be included in the same Form 17V with documents for the corresponding new symbol. The symbol to be shown in the heading of the Form 17V should in all cases be the new symbol.

(3) The date of the transcript of the Treasurer's general account which the Form 17V supports.

If the separate consolidated abstract pertains to the separate consolidated transcript for general depositaries, blocks are provided for indicating whether the documents apply to the current month or a prior month.

(d) In those cases where a change is later required in the amount of a certificate of deposit or a debit voucher included in a consolidated abstract sent to a Treasury regional office, the Federal Reserve Bank or branch or the Treasurer's Cash Division will prepare, for the amount of the increase or decrease, respectively, (1) a debit voucher, if a certificate of deposit is to be decreased or if a debit voucher is to be increased; or (2) a certificate of deposit, if a certificate of deposit is to be increased or if a debit voucher is to be decreased. In either case an explanation should be shown on the reverse of the document as to the reason for the adjustment. These adjusting certificates of deposit or debit vouchers should be listed on the appropriate consolidated abstract to be included in the current transcript of the Treasurer's general account. The originals of such adjusting documents should be furnished to the Treasury regional office concerned in the regular manner and the appropriate copies sent to the depositors concerned.

4. *Distribution of copies of Treasury Form No. 17V.* Federal Reserve Banks and branches, the Treasurer's Cash Division, and mint and assay offices will distribute the copies of the new Form 17V as follows:

(a) The original will accompany the daily transcript to the Treasurer's office, in support of the respective totals carried to Treasury Form 17C which in turn, supports the total receipts stated on the transcript.

(b) The *first* copy, together with each original certificate of deposit and debit voucher listed thereon, will be forwarded to the Treasury regional office affected. For each of the last few days of the month, this material should be airmailed in those cases where regular mail would not be delivered to the Treasury regional office by the first business day of the following month. Also, the documents for transcripts of the last day of the month should be placed in the mail on that day.

(c) The *second* copy will be retained by the Federal Reserve Bank or branch, Treasurer's Cash Division, or the mint or assay office, as the case may be, together with (1) the duplicate copy of each certificate of deposit and debit voucher listed, or (2) the copy of the transmittal form received from general depositories on which are listed such documents as may be included in the consolidated abstracts, the copies of which documents are retained by the general depositories.

5. *Supply of Treasury Form No. 17V.* A supply of Treasury Form No. 17V will be furnished to Federal Reserve Banks and branches and mints and assay offices by the Office of the Treasurer of the United States in time to be used beginning October 1, 1956.

W. T. HEFFELFINGER,
Fiscal Assistant Secretary.

[Department Circular No. 945 (Revised), Supplement No. 1, Amendment No. 2 Accounts]

TREASURY DEPARTMENT,
Washington, February 11, 1957.

To Heads of Government Departments and Agencies Whose Accounts are Required To Be Reconciled With Accounts Current of the Division of Disbursement, Treasury Department, and Others Concerned:

I. Purpose of these regulations

1. *General.* These regulations are issued to (a) further amend Attachment No. 4 of Supplement No. 1 of Department Circular No. 945—Revised, dated May 3, 1955, in order to provide new deposit symbols for regional offices (other than Washington, D. C.) of the Division of Disbursement, Treasury Department, and (b) incorporate in Attachment No. 4 new deposit symbols established for the Washington regional office, effective August 1, 1956, as indicated in the first amendment, dated July 20, 1956, to Supplement No. 1 of Department Circular No. 945—Revised. There is attached hereto a revised attachment No. 4.

2. *New deposit symbols—Regional offices of the Division of Disbursement, Treasury Department.* Under the system for paying and reconciling checks drawn on the Treasurer of the United States by electronic data processing methods new 4-digit symbols have also been assigned to the other Treasury regional offices for use when such offices are brought under the new system. The new symbols will be used as deposit symbols and shown on certificates of deposit.

3. *Effective date.* The new 4-digit symbols indicated in Attachment No. 4—Revised will be used as deposit symbols, effective with the conversion date set forth for each symbol in Division of Disbursement Circular No. 116, Supplement No. 18, or any amendments thereof.

W. T. HEFFELFINGER,
Fiscal Assistant Secretary.

EXHIBIT 45.—Regulations governing claims for replacement of valuables or the value thereof, shipped pursuant to the Government Losses in Shipment Act

[Department Circular No. 577, Supplement No. 4. Accounts]

TREASURY DEPARTMENT,
Washington, December 7, 1956.

To the Heads of the Executive Departments, Independent Establishments, Agencies, Wholly Owned Corporations, Officers and Employees of the United States, Federal Reserve Banks When Acting on Behalf of the United States or Agencies Thereof, and Others Concerned:

Paragraph 6 of Treasury Department Circular No. 577 dated August 13, 1937, as amended by the Second Supplement dated November 22, 1943, and the Third Supplement dated May 27, 1953, has been rescinded.

Consignors are, therefore, no longer required to submit periodic reports to the Secretary of the Treasury on Form 10DD, revised, covering shipments of valuables. Consignors are not relieved, however, of keeping basic records from which they will be in a position in the event of loss of valuables to submit

adequate proof necessary to satisfy the Secretary of the Treasury when submitting a claim under the Government Losses in Shipment Act, that such loss or damage to shipments occurred while in course of shipment.

W. T. HEFFELFINGER,
Fiscal Assistant Secretary

EXHIBIT 46.—Treasury Department and General Accounting Office Joint Regulation No. 4 (Revised), Supplement No. 1, January 10, 1957

Subject: Modification of warrant procedures and elimination of certain checking accounts

As contemplated by paragraph 7 of Joint Regulation No. 4 (Revised), dated April 29, 1955, the Secretary of the Treasury and Comptroller General of the United States have determined that the provisions of paragraph 4 of said regulation, concerning the elimination of funded checking accounts for the issuance and payment of checks drawn on the Treasurer of the United States, shall become operative, not later than July 1, 1957, with respect to the additional disbursing activities designated below.

1. Post Office Department, exclusive of the separate accounts maintained under the postal savings system.
2. Library of Congress.
3. Government Printing Office.

JOSEPH CAMPBELL,
Comptroller General of the United States.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

EXHIBIT 47.—Regulations governing the implementation of the act to improve governmental budgeting and accounting methods and procedures

[Department Circular No. 987. Accounts]

TREASURY DEPARTMENT,
Washington, April 26, 1957.

To Heads of Bureaus, Treasury Department:

I. Public Law 863, approved August 1, 1956, amends the Budget and Accounting Procedures Act of 1950 by adding Section 106 as follows:

"Sec. 106. The head of each executive agency shall, in consultation with the Director of the Bureau of the Budget, take whatever action may be necessary to achieve, insofar as is possible, (1) consistency in accounting and budget classifications, (2) synchronization between accounting and budget classifications and organizational structure, and (3) support of the budget justifications by information on performance and program costs by organizational units."

The law further amends Section 3679 (g) of the Revised Statutes, as amended, by adding at the end thereof the following sentence:

"In order to have a simplified system for the administrative subdivision of appropriations or funds, each agency shall work toward the objective of financing each operating unit, at the highest practical level, from not more than one administrative subdivision for each appropriation or fund affecting such unit."

The head of each bureau should review his operations with the view of taking such further action as may be required to accomplish the foregoing objectives.

II. Public Law 863 also amends Section 113 of the Budget and Accounting Procedures Act of 1950 by adding at the end thereof the following new subsection:

"(c) As soon as practicable after the date of enactment of this subsection, the head of each executive agency shall, in accordance with principles and standards prescribed by the Comptroller General, cause the accounts of such agency to be maintained on an accrual basis to show the resources, liabilities, and costs of operations of such agency with a view to facilitating the preparation of cost-based budgets as required by Section 216 of the Budget and Accounting Act, 1921, as amended. The accounting system required by this subsection shall include adequate monetary property accounting records as an integral part of the system."

With respect to this provision, the pamphlet attached to Budget Circular 57-5 provides:

"In accordance with the principles and standards issued by the Comptroller General, the degree to which the accrual basis will be applied in individual agencies will vary with the kind of operations conducted. The accounting provisions of Public Law 863 mean at a minimum that all agency systems which currently develop only obligation and disbursement data should be refined to produce also at appropriate time intervals information on accrued expenditures—the cost of goods and services received. Depending on the type of program conducted by the agency, this change in the agency accounting system may involve further refinement to produce information on the cost of goods and services used, the cost of items procured or produced, or the cost of work in place. The accrual basis should be applied in each case to the extent that the additional information obtained will be more useful to agency management in the conduct of operations, and provide for more complete and accurate disclosure of financial status and the results of agency operations. In all cases, accounting on an accrual and cost basis must be integrated with such other accounting records as are needed to provide for control and information on obligations and to provide for information on disbursements."

In order to comply with these minimum accounting requirements of Public Law 863, the head of each bureau whose accounts currently develop only obligation and disbursement data will refine such accounts to also produce information on accrued expenditures, i. e., cost of goods and services received, as at the close of each fiscal year beginning with the fiscal year 1958. Bureaus which need such data more frequently than once annually may establish accounting procedure to produce such data at such time intervals as the information is useful.

The Bureau of Accounts and the Budget Office of the Treasury will cooperate with and assist bureaus in completing such action as may be required under this circular.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

EXHIBIT 48.—Treasury Department and General Accounting Office Joint Regulation No. 3, Amendment No. 2, May 20, 1957

Subject: Amendment of the definitions of available and unavailable receipts

Amendment No. 1, dated December 21, 1951, to Joint Regulation No. 3 is hereby amended by deleting the last unnumbered paragraph thereof concerning transactions of the civil service retirement and disability fund, since procedures have now been developed for the handling of all receipt transactions of the fund as available receipts under Joint Regulation No. 3. This amendment will be effective July 1, 1957.

JOSEPH CAMPBELL,
Comptroller General of the United States.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

EXHIBIT 49.—Regulations relating to delivery of checks and warrants to addresses outside the United States, its Territories, and possessions

[Department Circular No. 655. Supplement No. 11. Accounts]

TREASURY DEPARTMENT,
Washington, June 7, 1957.

Section 211.3 (a) of Department Circular No. 655, dated March 19, 1941 (31 C. F. R. 211.3 (a)), as amended, is hereby further amended to read as follows:

"The Secretary of the Treasury hereby determines that postal, transportation, or banking facilities in general or local conditions in Albania, Bulgaria, Communist-controlled China, Czechoslovakia, Estonia, Hungary, Latvia, Lithuania, Rumania, the Union of Soviet Socialist Republics, the Russian Zone of Occupation of Germany, and the Russian Sector of Occupation of Berlin, Germany, are such that there is not a reasonable assurance that a payee in those areas will actually

receive checks or warrants drawn against funds of the United States, or agencies or instrumentalities thereof, and be able to negotiate the same for full value."

Except to the extent they have been authorized by appropriate unrevoked licenses, or are authorized by specific license issued by the Department of Justice, Office of Alien Property, remittances by United States Government agencies from any accounts in which a German or Japanese interest existed on or before December 31, 1946, will continue to be restricted by Executive Order No. 8389, as amended, and rules and regulations issued pursuant thereto, including in particular General Ruling 11A, as amended. Attention is directed to the Foreign Assets Control Regulations issued by the Secretary of the Treasury on December 17, 1950, pursuant to Executive Order No. 9193, which prohibit transactions involving payments to nationals of China and North Korea except to the extent that they have been authorized by appropriate license.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

EXHIBIT 50.—Revised instructions governing the reporting of estimated foreign currency collections and requirements

[Department Circular No. 967 (Revised). Accounts]

TREASURY DEPARTMENT,
Washington, June 17, 1957.

To Heads of Government Departments and Agencies and Others Concerned:

This circular is issued pursuant to Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U. S. C. 66b), Executive Order No. 10488, dated September 23, 1953, and Section 4 (b) of Executive Order No. 10560, dated September 9, 1954, and contains revised instructions for reporting estimated foreign currency collections and requirements.

For purposes of the President's Budget, the Treasury must compile overall estimates of receipts to be derived from the sale of foreign currencies to Government agencies. Hence, the Treasury must obtain annually, from the agencies concerned, the following reports on estimated foreign currency collections and requirements:

1. Estimate of foreign currency collections

This report (Exhibit A)¹ will show the estimated amounts (stated in U. S. dollar equivalents) of foreign currencies to be acquired without purchase with dollars, under agreements with foreign governments and from other sources, providing all or part of such currencies are to be available for making expenditures chargeable to appropriations or other dollar fund accounts. More specifically, the estimate should include: (a) collections of currencies for credit to foreign currency accounts of the Treasury (20FT symbol accounts), and (b) collections of currencies which are authorized to be purchased immediately by disbursing officers (consular fees, repayments, etc.) and credited directly to receipt, appropriations, or other dollar fund accounts without passing through Treasury FT accounts. However, currencies for credit to those Treasury FT accounts which are available exclusively for transfer to agency FT accounts without reimbursement to the Treasury should not be reported.

Currencies which are restricted, by international agreement or otherwise, for sale to particular agencies, or for sale for particular purposes, will be identified and the nature of the restrictions noted.

This report should be detailed by kind (country) and source of currency (provision of law or agreements with foreign governments). The source should be identified by FT account symbol for all accounts for which a symbol has been established in the Treasury publication "Receipt, Appropriation, and other Fund Account Symbols and Titles." Collections of currencies which are authorized to be credited directly to dollar fund accounts may be reported in two columns—one for estimated credits to miscellaneous receipt accounts, and one for credits to all other accounts.

¹ Not reproduced here.

2. Estimate of foreign currency requirements

This report (Exhibit B)¹ will show the estimated gross requirements (stated in U. S. dollar equivalents) for foreign currencies to be used for making expenditures chargeable to appropriations or to other dollar fund accounts. The estimate should not include currencies which are to be acquired and expended without charge to dollar fund accounts.

The report will be in two sections. Section A will consist of one column and will include all requirements which may be met by currencies purchased by disbursing officers from any nonrestricted source including purchases from non-restricted Treasury FT accounts, purchases on the market, and purchases of fee collections, repayments, etc. Section B will include requirements which are to be met by purchase from those Treasury FT accounts which are restricted for sale to particular agencies or sale for particular uses.

This report will be detailed by kind (country) of currency and, in the case of restricted currencies, by the accounts from which the requirements are to be met.

The foregoing reports will be submitted by Government agencies which are responsible for administration under agreements with foreign governments involving the acquisition of such currencies, collect currencies as the result of loans or other credits, collect currencies incident to their operations, or require foreign currencies for making expenditures chargeable to appropriations.

Each report will include estimates for the current fiscal year (the fiscal year in progress at the time of the report) and the next succeeding year. As far as applicable the data for both years should be consistent with the regular budget estimates submitted to the Bureau of the Budget. The first reports under this revised instruction will cover the fiscal years 1958 and 1959.

All estimates will be stated in U. S. dollar equivalents and will reflect the market rate of exchange in effect on June 30 preceding the date of the report. Estimates of collections which are based on dollar amounts (for instance, the dollar amounts stated in agreements, or the dollar value of commodities to be sold for foreign currencies) must be adjusted to the market rate basis in all cases where the anticipated collection rate differs from the market rate.

All amounts may be rounded to thousands of dollars. No amount need be reported for which the estimate involving currency of any one country is less than five thousand dollars.

An original and one copy of each report should be submitted by September 30 of each year to the Division of Central Reports, Bureau of Accounts, U. S. Treasury Department.

Agencies are requested to follow the formats illustrated in Exhibits A and B of this circular.

Any questions concerning these reporting requirements should be discussed with the Division of Central Reports.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

EXHIBIT 51.—Statement relating to the preparation of the Combined Statement of Receipts, Expenditures and Balances of the United States Government

[Department Circular No. 965 (Revised), Supplement No. 1. Accounts]

TREASURY DEPARTMENT,
Washington, July 25, 1957.

To Heads of Government Departments and Agencies, and Others Concerned:

General

Section 15 of the act of July 31, 1894 (5 U. S. C. 264), requires the Secretary of the Treasury annually to lay before Congress, on the first day of the regular session thereof, a combined statement of the receipts and expenditures of the Government. This normally would be on the third of January of each year.

¹ Not reproduced here.

In order to include in this report information which would be in agreement with agencies' accounts and figures to be included in the Budget Document, the Treasury last year held the accounts open to afford a reasonable opportunity for executive agencies to work out any necessary corrections or adjustments before accounts were finally closed for the year. Agencies are required by the Bureau of the Budget's Circular No. A-11 to bring their budget submissions into agreement with data to be published in the Treasury's Combined Statement of Receipts, Expenditures and Balances.

While most agencies met the scheduled dates for submission last year, a sufficient number of agencies were late as to cause critical problems in meeting the deadlines for the publication of the final monthly Treasury statement and the annual Combined Statement. The procedures for disposing of balances of prior fiscal year appropriations required by the provisions of the act of July 25, 1956, Public Law 798, 84th Congress (31 U. S. C. 701), also impose upon the Treasury additional problems with respect to the time available for the closing of the central accounts of the Treasury and for preparation and printing of the Combined Statement. It is therefore of the utmost importance that the established dates be met by all reporting agencies.

Timing of action required

For the information and guidance of Government agencies, there is attached to this circular a schedule showing the dates by which time the various steps in the compilation and verification of the Combined Statement must be completed to meet the deadline imposed by law. Your cooperation in observing this schedule will be appreciated.

Submission of Section 1311 reports to the Treasury

Item 4 on the attached schedule covers the submission by September 30 of reports prepared under Section 1311 (b) of the Supplemental Appropriation Act 1955, Public Law 663, and Supplement No. 1 of General Regulations No. 127. In order to expedite processing for central accounting and reporting, it will be appreciated if the two copies (signed) requested in paragraph 10 of General Regulations No. 127 submitted to the Treasury, are forwarded directly to:

Division of Central Reports
Bureau of Accounts (Room 5036)
U. S. Treasury Department
Washington 25, D. C.

Additional reports required

General Regulations No. 127, issued June 28, 1956, requires that data on revolving funds and related accounts (not reported on Format A) shall be submitted in the form of statements of financial condition, prepared under the concepts of Treasury Circular No. 966 and that footnotes to such statements should include certain additional data.

A somewhat similar requirement was included in Budget Circular No. A-11 which contained the following provision:

Section 59—

"The appended tabulation will show the total balance available for future expenditure for the end of the year preceding the past year, and for each of the balance sheet dates, the net obligations against them, and the residual balance."

Many agencies will use signed copies of reports prepared under Treasury Circular No. 966 to satisfy the requirements of General Regulations No. 127. Agencies not using this method should take every precaution to insure that if separate statements are prepared they will be in agreement with those submitted to the Treasury.

In addition, in order to insure agreement between the Budget Document and the Treasury's annual Combined Statement of Receipts, Expenditures and Balances, it is requested that all agencies submit to Treasury, not later than September 30, that part of the tabulation required by Section 59 of Budget Circular A-11 (Revised) relating to the status of the fund balances as of the close of the fiscal year ended June 30, 1957.

W. RANDOLPH BURGESS,
Acting Secretary of the Treasury.

SCHEDULE WITH RESPECT TO THE PREPARATION OF THE COMBINED STATEMENT OF RECEIPTS, EXPENDITURES AND BALANCES OF THE UNITED STATES GOVERNMENT FOR THE FISCAL YEAR ENDED JUNE 30, 1957

1. Treasury will supply agencies with a preliminary statement, with respect to each appropriation or fund, showing the balance brought forward, current-year appropriations, nonexpenditure transfers, net disbursements, and closing balance by----- August 12
2. Treasury will deliver to agencies a similar statement which will include late accounts of collecting and disbursing officers, and other transactions or adjustments not received in time for incorporation in the preliminary statement, by----- September 16
3. Agency budget and fiscal officers should give attention currently to the taking of corrective actions with the Treasury but should complete their review and take all necessary actions indicated thereby not later than---- September 25
4. Budget submissions to the Bureau of the Budget and Section 1311 reports are due by----- September 30
5. Treasury will deliver chapters of the Combined Statement to the Bureau of the Budget and the agencies beginning-- November 1 to 15
(Closing date for adjustments with respect to any chapter will be fifth working day after release of the chapter by Treasury.)

Miscellaneous

EXHIBIT 52.—Letter from Secretary of the Treasury Humphrey, February 28, 1957, reporting to Congress on the financial condition and results of the operations of the highway trust fund

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

MY DEAR MR. SPEAKER: Section 209 (e) of the Highway Revenue Act of 1956 requires the Secretary of the Treasury to report to the Congress not later than the 1st day of March of each year on the financial condition and results of the operations of the highway trust fund during the preceding fiscal year and on its expected condition and operations during each fiscal year thereafter.

Since the trust fund was not in operation until this fiscal year, there is nothing to report on the financial condition and results of the operations during the preceding fiscal year.

With respect to the expected condition and operations of the trust fund during each fiscal year thereafter, the attached table presents the estimates of receipts and expenditures. Total receipts and expenditures for the entire period as presently estimated are essentially the same as the estimates prepared last year at the time the highway legislation was being considered. The limited actual experience covering the operation of the trust fund is not considered sufficient to require a substantial revision in estimates for the entire period. However, estimates for individual years have been revised to reflect recent trends which indicate that receipts and expenditures in the earlier years will be somewhat higher than originally anticipated. Relatively minor reductions in later years which offset the higher amounts in the earlier years have been incorporated in the attached estimates.

Very truly yours,

G. M. HUMPHREY,
Secretary of the Treasury.

Estimated receipts, expenditures, and balances of highway trust fund, fiscal years 1957-72

[In millions of dollars]

¹ Assuming primary, secondary, and urban authorizations totaling \$900 million annually, fiscal years 1960 to 1970, inclusive.

² Includes receipts and refunds after June 30, 1972, of taxes and refunds accrued on or before that date.

EXHIBIT 53.—Principal provisions of law enacted in 1957 (85th Congress, 1st Session) relating to acquisition and use of foreign currencies by the United States Government (Supplement to exhibit 56, page 304, of the 1956 Annual Report)

[This exhibit pertains to laws governing foreign currencies acquired by the United States Government without purchase with dollars, principally pursuant to intergovernmental agreements in connection with programs of foreign aid. The exhibit does not include foreign currency provisions of law of a minor nature, such as limitations contained in annual appropriation acts on amounts that must be used for purchase of foreign currencies owned by the United States Treasury; neither does it include provisions relating to acquisitions of currencies under earlier acts such as lend-lease and surplus property acts]

Act reference	Nature of provision
General Government Matters Appropriation Act, 1958, approved June 5, 1957, Public Law 85-48, Section 209, 71 Stat. 55.	General provisions of law that foreign currencies may be used only when reimbursement therefor is made to the U. S. Treasury from applicable appropriations of the Federal agencies concerned.
Mutual Security Appropriation Act, 1958, approved September 3, 1957, Public Law 85-279, Section 104, 71 Stat. 603.	Use of foreign currencies for payment of obligations legally incurred against foreign currencies or credits prior to July 1, 1953.
Mutual Security Act of 1957, approved August 14, 1957, Public Law 85-141: Section 2 (a) (3), 71 Stat. 355 Section 6: 204, 71 Stat. 358 Section 8 (a), 71 Stat. 360	Use of foreign currency repayments or recoveries for: Military assistance. Development Loan Fund. Special assistance.
Mutual Security Act of 1957, approved August 14, 1957, Public Law 85-141: Section 8 (c), 71 Stat. 361 Section 9 (c), 71 Stat. 363 Section 11 (b) (2), 71 Stat. 365	Use of foreign currencies received from the sale of surplus agricultural commodities: Amends Section 402 of 1954 act. Amends Section 505 of 1954 act. Amends Section 104 (h) of Public Law 480.
Public Law 85-128, approved August 13, 1957, 71 Stat. 345.	Amends Sections 103 (b) and 104 (e) of Public Law 480.
Public Law 85-241, approved August 30, 1957, Section 405, 71 Stat. 556.	Construction or acquisition of family housing and community facilities projects abroad. The value of the foreign currency used is reimbursable to the Commodity Credit Corporation from specified appropriations of the Department of Defense and from appropriate allotments or rental charges for civilian personnel.
Supplemental Appropriation Act, 1958, approved August 28, 1957, Public Law 85-170, Chapter IX, 71 Stat. 436.	Provision of law requiring reservation of foreign currencies by the Treasury Department for educational exchange activities for sale to the Department of State.
Supplemental Appropriation Act, 1958, approved August 28, 1957, Public Law 85-170, Chapter IX, 71 Stat. 436.	Provision of law relating to the acquisition of foreign currencies under the informational media guaranty program and the sale of such currencies for dollars.

EXHIBIT 54.—Letter of the Postmaster General to the Secretary of the Treasury certifying extraordinary expenditures contributing to the deficiencies of postal revenue for the fiscal year 1957.

WASHINGTON, D. C., November 13, 1957.

DEAR MR. SECRETARY: Pursuant to the provisions of the act of June 9, 1930 (39 U. S. C. 793), the amounts set forth below with respect to certain mailings during the fiscal year ended June 30, 1957, as determined under our present system of estimating, are certified to you in order that they may be separately classified on the books of the Treasury Department.

(a) The estimated amount which would have been collected at regular rates of postage on matter mailed during the year by officers of the Government, other than those of the Post Office Department, under the penalty privilege, including registry fees:

Postage.....¹ \$103, 000

(b) The estimated amount which would have been collected at regular rates of postage on matter mailed under the franking privilege by Members of Congress and others.....² 120, 000

(c) The estimated amount which would have been collected during the year at regular rates of postage on publications going free in the county..... 835, 000

(d) The estimated amount which would have been collected at regular rates of postage on matter mailed free for the blind during the year.....³ 949, 000

(e) The estimated difference between the postage revenue collected during the year on mailings of newspapers and periodicals published by and in the interests of religious, educational, scientific, philanthropic, agricultural, labor, and fraternal organizations, and that which would have been collected at zone rates of postage..... 2, 451, 000

Grand total..... 4, 458, 000

¹ Public Laws 286, 83d Congress, and 705, 84th Congress, require that departments and agencies of the Government, other than the Post Office Department and the Pan American Union and the Pan American Sanitary Bureau, pay postage on penalty mail and registry fees.

² Public Law 286 also provides for reimbursement by appropriation for the cost of handling matter mailed by Members of Congress and certain other legislative officials.

³ The \$949,000 is the amount that would be received computed at regular rates of postage. At rates applicable for paid matter for the blind, the potential postage would amount to \$239,000.

Sincerely yours,

ARTHUR E. SUMMERFIELD,
Postmaster General.

TABLES

NOTE.—In tables where figures have been rounded to a specified unit and where calculations have been made from unrounded figures, the details may not check to the totals shown.

Bases of Tables

The figures in this report are shown on the basis of (a) the *Daily Statement of the United States Treasury*, (b) the *Monthly Statement of Receipts and Expenditures of the United States Government*, (c) warrants issued, (d) public debt accounts, and (e) administrative accounts and reports. Where no basis is indicated, the figures are derived from administrative reports prepared according to various specifications. Where more than one basis is used in a single table that covers a period of years, the dates of the changes in bases are stated.

Data on the first two bases are derived from the publications indicated by their titles. The monthly statement was first published in February 1954, and states budget results which previously had been shown in the daily statement. At the same time, the latter publication became a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. (See exhibits 69, 70, and 71 in the 1954 Annual Report.) The sources of data used in these two publications and the description of the other bases of tables in this report are hereinafter described.

Daily Statement of the United States Treasury

Since February 1954 (with comparative figures retroactive for the full fiscal year 1953), the *Daily Statement of the United States Treasury* has covered only transactions which clear through the Treasurer's account. For each business day, it reflects cash deposits and withdrawals in that account, and the status of the account.

No distinction is made as to type of account (budget, trust, etc.) in reporting deposits and withdrawals, which are segregated in a limited number of classifications. The deposits are on the basis of certificates of deposit cleared through the accounts of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued adjusted by means of clearing accounts to the total checks paid. Except for relatively minor amounts, noncash interfund and intragovernmental transactions are excluded. In order to facilitate current reporting and classification, Federal Reserve Banks report by telegraph at the close of each day the balance they carry in the Treasurer's account and certain other information. The public debt figures in the daily Treasury statement are on the same basis as other transactions, i. e., on the basis of information shown on bank transcripts received and cleared by the Treasurer's Office frequently referred to as the "clearance" basis. During a period when a new marketable public debt issue is being sold or when an issue matures, reports of transactions are based upon telegrams received from the Federal Reserve Banks.

The daily Treasury statement before February 17, 1954, not only covered transactions cleared through the Treasurer's account but included certain transactions by Government agencies which were handled through commercial bank accounts. It carried information similar to that in the present daily Treasury statement on the status of the Treasurer's account and on public debt issuance, retirement, and amounts outstanding. Receipts and expenditures, however, were classified to show the budget results for a given period, and were used as a basis for reporting the results under the President's budget program as enacted by the Congress. Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures, however, have been reported on two bases as follows: (a) Expenditures through 1946 were shown on the basis of checks paid by the Treasurer of the United States; and (b) from 1947 through 1953, expenditures were on the basis of checks issued through the facilities of the Treasury Department's Division of Disbursement while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. (See the 1953 Annual Report of the Secretary of the Treasury for more detailed information on the daily Treasury statement.)

Monthly Statement of Receipts and Expenditures of the United States Government

In February 1954, this monthly statement replaced the daily statement as the primary source for budget results and other receipt and expenditure data classified by type of account. This statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information in the monthly statement is compiled from reports of the Treasurer of the United States and of other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of collecting and disbursing agencies during the reporting period. The net of transactions as compiled from these reports is reconciled in the monthly statement to changes in the cash balances in the Treasurer's account, cash held outside the Treasurer's account, and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collection basis while various other receipts are reported partially on a collection basis and partially on a deposits basis. Expenditures (except interest on the public debt) are reported on the basis of checks issued or cash payments made by disbursing officers. Figures on this basis are compiled from reports by disbursing officers of the amounts of checks drawn upon the Treasurer of the United States in payment of Government obligations, certain cash payments, and payments from funds held outside the Treasury. Transactions of an interfund or intragovernmental nature also are on this basis even though actual issuance of checks may not be involved. From February 1954 through May 1955, with comparative figures retroactive to the beginning of the fiscal year 1953, the public debt interest expenditure figures represented interest which became due and payable; beginning with June 1955, and cumulative figures for the fiscal year 1955, interest on the public debt is reported on an accrual basis.

Warrants issued

Until 1950, the use of warrants was an integral part of the accounting for receipts and expenditures and the basis for many earlier financial statements. The Budget and Accounting Procedures Act of 1950 permitted the Secretary of the Treasury and the Comptroller General of the United States jointly to waive the legal requirements with respect to the use of warrants.¹ There follows an explanation of the warrant basis for receipts and expenditures:

Warrants issued—Receipts

Section 305 of the Revised Statutes as amended (31 U. S. C. 147) provides that the receipts for all moneys received by the Treasurer of the United States "shall be indorsed upon warrants signed by the Secretary of the Treasury, without which warrant, so signed, no acknowledgment for money received into the public Treasury shall be valid." Covering warrants were prepared from certificates of deposit mailed to the Treasury, principally by Government depositaries, showing deposits received. The figures thus compiled were on a "warrants-issued" basis. Table 2 for the years prior to 1916 shows receipts on this basis. Since these certificates did not reach the Treasury simultaneously, all receipts for a fiscal year could not be covered into the Treasury by warrant of the Secretary immediately upon the close of the fiscal year. Therefore, certain certificates of deposit representing amounts deposited during one fiscal year were reported as the next year's receipts.

Prior to the fiscal year 1954, all collections of internal revenue and customs and miscellaneous receipts, with two exceptions,² were covered into the Treasury by warrants signed by the Secretary of the Treasury. Beginning with the fiscal

¹ Under the authority of this act, there were issued the following joint regulations: No. 1, effective November 1, 1950, eliminated the necessity for issuance of covering warrants, the requisitioning of funds and the use of accountable warrants in connection with repayments to appropriations; No. 2, effective May 1, 1951, provided that appropriated funds be made immediately available in the accounts of disbursing officers; No. 3, effective July 1, 1951, provided that certain special fund and trust fund receipts be credited directly to the accounts of disbursing officers; and No. 4, effective July 1, 1955, waived the requirements with regard to the requisitioning and advancing of funds to accountable officers and the issuance and countersignature of warrants acknowledging receipt of money to be covered into the Treasury.

² (1) Collections representing repayments to appropriations which, since November 1, 1950, have been covered into the Treasury and credited directly to the accounts of disbursing officers; and (2) certain special fund and trust fund receipts that have been appropriated, which, since July 1, 1951, have been immediately available to the collecting agency.

year 1954, the recording of all receipts in the receipt, appropriation, or fund accounts of the Treasury Department has constituted the official acknowledgment of moneys received and covered into the Treasury.

Warrants issued—Expenditures

The Constitution of the United States provides that "no money shall be drawn from the Treasury, but in consequence of appropriations made by law * * *." Section 305 of the Revised Statutes as amended (31 U. S. C. 147) requires that the Treasurer of the United States shall disburse the moneys of the United States upon warrants drawn by the Secretary of the Treasury. Prior to 1916, reports of expenditures were based on the amount of accountable and settlement warrants issued and charged to the appropriation accounts. Since accountable warrants covered advances to disbursing officers, such expenditure reports necessarily included the balances of funds remaining unexpended to the credit of the disbursing officers at the close of the fiscal year.³

Public Debt accounts

The figures reported on this basis represent transactions which have been audited by the Bureau of the Public Debt. It may be several months after a financing operation before all the transactions have been reported and audited. Therefore, the public debt figures on this basis differ from those reported in the daily Treasury statement, since the latter consist of transactions cleared through the Treasurer's account during the reporting period (see explanation under "Daily Statement of the United States Treasury," on page 327). A reconciliation of figures on the two bases is given in table 21.

Administrative accounts and reports

Certain tables in this report are developed from the accounts, records, and reports of the administrative agencies concerned, which may be on various bases. Among these are tables showing internal revenue collections, customs, postal receipts, sales of savings bonds by States, prices and yields of securities, customs statistics, foreign currency transactions in the accounts of the Secretary of the Treasury, and balance sheets, and statements of income and expense and source and application of funds of public enterprise funds which are based on the records of the reporting office.

Internal revenue collections (table 11) are stated partly on the basis of reports of directors of internal revenue representing collections made by these officers and partly on the basis of reports of deposits made directly to the Federal Reserve Banks under the depository receipt procedure.

Customs collections (table 12) are based upon reports of collectors of customs representing collections made during the period.

Postal revenues (table 14) are based upon reports of the Post Office Department prepared on a modified accrual basis (revenues earned less deferred box rentals, etc.).

Description of Accounts Relating to Cash Operations

Three classes of accounts are maintained with respect to the cash operations of the Federal Government. First, there are the accounts of fiscal officers or agents, collectively, who receive money for deposit in the United States Treasury or for other authorized disposition or make expenditures by drawing checks on the Treasurer of the United States or by effecting payments in some other manner. Then, there are the accounts of the Treasurer of the United States whose office, generally speaking, is responsible for the receipt and custody of money deposited by fiscal officers or agents and for the payment of checks drawn on the Treasurer and of public debt securities redeemed. Finally, a set of central accounts is maintained in the Treasury Department for the purpose of consolidating financial data reported periodically from these two operating segments so that the results of cash operations may be presented in central financial reports on a unified basis for the Government as a whole.

The central accounts relating to cash operations disclose (monthly as well as fiscal year) information on: (1) The Government's receipts by principal sources, and its expenditures according to the different appropriations and other funds

³ See footnote 1.

involved; and (2) the cash transactions, classified by types, together with certain directly related assets and liabilities, which underlie such receipts and expenditures. The accounting for receipts is substantially on the basis of collections and that for expenditures is on the basis of checks issued and cash payments made except that interest on the public debt is on an accrual basis. The structure of the accounts provides for a reconciliation, on a firm accounting basis, between the published reports of receipts and expenditures (and budget results) for the Government as a whole and changes in the Treasurer's cash balance—utilizing such factors as checks outstanding and deposits and cash not with the Treasury.

Within the central accounts, receipt and expenditure accounts are classified as follows:

Budget accounts ⁴

General fund receipt accounts.—In the general fund receipt accounts are recorded all receipts which are not earmarked by law for a specific purpose. General fund receipts consist principally of internal revenue collections, which include income taxes, excise taxes, estate, gift, and employment taxes. The remainder consist of customs duties and a large number of miscellaneous receipts, including such items as fees for permits and licenses, fines, penalties, and forfeitures; interest and dividends; rentals; royalties: sale of Government property; and seigniorage.

Special fund receipt accounts.—Special fund receipt accounts are credited with receipts from specific sources as authorized by law; such receipts may be expended only for the particular purposes specified by law. The Congress may appropriate these receipts for special purposes on an annual basis or for an indefinite period of time. Although such receipts are not available for general purposes, they are included in the totals of budget receipts. Examples of special fund receipts are those arising from rents and royalties under the Mineral Leasing Act, the revenue from visitors to Yellowstone National Park, the proceeds of the sale of certain timber and reserve lands, and other receipts authorized to be credited to the reclamation fund.

General and special fund expenditure accounts.—General and special fund expenditure accounts are established to record amounts (either specific or indefinite) appropriated by the Congress to be expended respectively for the general support of the Government or for a special purpose authorized by law. Such accounts are classified according to the limitations that the Congress may establish with respect to the period of availability for obligation of the appropriation, i. e., one-year, multiple-year, or without any time limit (referred to as "no-year"), and the agency having authority to enter into obligations and approve expenditures.

Revolving and management fund accounts.—These are funds authorized by specific provisions of law to: (a) Finance a continuing cycle of operations with receipts derived from such operations available without further action by Congress; or (b) facilitate accounting for and administration of intragovernmental operations. Treasury reports generally show the net effect of operations in the accounts (excess of disbursements or reimbursements for the period) which affect the budget surplus or deficit. These accounts are usually designated as "no-year" accounts which are without limitation as to period of availability for obligation or expenditure. Examples of such accounts include corporate revolving funds such as those under the Export-Import Bank of Washington, the Commodity Credit Corporation, and other revolving funds such as the general supply fund of the General Services Administration and the working capital fund of the Public Buildings Service.

Working fund accounts.—Working funds are accounts established to receive advance payments from other agencies or bureaus to be expended for purposes authorized by law. "Consolidated" working funds may receive advances from two or more appropriations. Expenditure transactions recorded in these accounts are stated net of advances credited and are classified under the agencies administering the accounts. The accounts are subject to the fiscal year limitations of the parent appropriations or other accounts from which advanced.

⁴ Represents only those accounts that determine the budget surplus or deficit of the United States Government.

Nonbudget accounts

Trust accounts.—These are accounts maintained to record the receipt and expenditure of moneys held in trust by the Government for the benefit of individuals, or classes of individuals, which may be expended only for carrying out the specific purposes or programs in accordance with the terms of a trust agreement or statute. Within the category of trust accounts, there is a subcategory of trust revolving funds which are accounts used to carry on a cycle of business-type operations. Unlike the funds in general and special accounts, the trust funds are not available for general or special purposes and do not enter into the budget surplus or deficit. The receipts of many trust funds, especially the major ones, not needed for current benefits and other payments, are invested in United States securities. Some of the major trust accounts are the Federal old-age and survivors insurance trust fund, unemployment trust fund, civil service retirement fund, and the national service life insurance fund.

Deposit fund accounts.—Deposit funds are established to account for receipts that are either (a) held in suspense temporarily and later refunded or paid into some other fund of the Government upon administrative or legal determination as to the proper disposition thereof, or (b) held by the Government as banker or agent for others and paid out at the direction of the depositor. Such funds are not available for paying salaries, expenses, grants, or other expenditures of the Government. As in the case of the trust funds, the transactions in these accounts are not included in the budget totals.

¹ Except that public debt figures are on basis of daily Treasury statements for all years shown. Guaranteed obligations for 1934-39 on basis of Public Debt accounts, and for 1940 and thereafter on basis of daily Treasury statements. Excludes guaranteed obligations held by the Treasury.

² Total budget receipts less refunds of receipts, and less transfers of tax receipts to the Federal old-age and survivors insurance trust fund beginning in fiscal year 1937; the railroad retirement account beginning in fiscal year 1938; and Federal disability insurance trust fund and highway trust fund beginning in fiscal year 1957.

³ Expenditures are "net" after allowance for reimbursements to appropriations, receipts of revolving fund appropriations, and receipts credited to disbursing accounts of corporations and agencies having authority to use collections without formal covering into the Treasury. The figures include transfers to trust accounts. Beginning with 1951, the net investments by wholly owned Government corporations and agencies in public debt securities are excluded from budget expenditures and are included in trust account and other transactions. The expenditure figures also exclude public debt retirements chargeable to the sinking fund, etc., under special provisions of law. Effective July 1, 1948, payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and disposition of earnings are excluded from both receipts and expenditures. Prior year adjustments of such payments are shown in table 2, footnote 3.

⁴ Consists of transactions of trust and deposit fund accounts, net investments by Government agencies in public debt securities, and net redemptions or sales of obligations of Government agencies in the market (see table 7). Investment by wholly owned Government corporations in public debt securities are included in budget expenditures before 1951. Retirements of national bank notes chargeable against the increment on gold (fiscal years 1935-39) are excluded.

⁵ For checks outstanding, telegraphic reports from Federal Reserve Banks, public debt interest accrued and unpaid effective June 30, 1955, and covering interest expenditures for the full fiscal year 1955 (previously included from November 1949 as interest checks and coupons outstanding), see table 41, and beginning with the fiscal year 1954, deposits in transit and cash held outside the Treasury, net increase, or decrease (-). For 1955 includes adjustment of -\$207,183,853 for effect on balance in Treasurer's account due to reclassification in November 1954 of Post Office disbursing accounts.

¹ Prior to May 26, 1938, the limitation applied to particular segments of the debt, not to the total.² The total amounts of the statutory limitations in effect from February 19, 1941, to date are summarized in table 27. Guaranteed securities held outside the Treasury are included in the limitation beginning April 3, 1945. Savings bonds are included at current redemption value beginning June 26, 1946; before that date they are included at maturity value. In the debt outstanding, savings bonds are carried at current redemption value.³ Sec. 114 (f) of the Economic Cooperation Act of 1948, approved Apr. 3, 1948, required that the sum of \$3,000,000,000 be transferred to a trust fund entitled "Foreign Economic Cooperation Trust Fund," and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this was to charge the budget in the fiscal year 1948 for expenditures made in the fiscal year 1949, with consequent effect on the budget surplus or deficit of those years. This bookkeeping transaction had no effect on the actual timing of either receipts or expenditures. In order to simplify comparison of figures between years, the transactions shown in this table do not take into account the transfer of \$3,000,000,000 in the fiscal year 1948 to the Foreign Economic Cooperation trust fund; expenditures of \$3,000,000,000 during the fiscal year 1949 from the Foreign Economic Cooperation trust fund are treated as budget expenditures in this table. If effect is given to Sec. 114 (f) of the Economic Cooperation Act of 1948, the budget results for the fiscal years 1948 and 1949 would be as follows:

	Fiscal year 1948	Fiscal year 1949
Budget receipts.....	\$42,210,770,493	\$38,245,667,810
Budget expenditures.....	36,791,300,649	37,057,107,858
Budget surplus.....	5,419,469,844	1,188,559,952

⁴ Includes adjustment of -\$207,183,858 which reflects the reclassification, begun in November 1954, of Post Office Department and postmasters' disbursing accounts (formerly treated as liability accounts of the Treasurer of the United States) to net expenditures on the basis of cash receipts and expenditures as reported by the Post Office Department.⁵ Revised.

Receipts and

TABLE 2.—*Receipts and expendi-*

* Revised.

¹ From 1789 to 1842 the fiscal year ended Dec. 31; from 1844 to date, on June 30. Figures for 1843 are for a half year, Jan. 1 to June 30.² For postal receipts and expenditures, see table 14.³ Effective Jan. 3, 1949, amounts refunded by the Government, principally for the overpayment of taxes, have been reported as deductions from total receipts rather than as expenditures. Also, effective July 1, 1948, payments to the Treasury, principally by wholly owned Government corporations for retirement of capital stock and for disposition of earnings, have been excluded in reporting both budget receipts and expenditures. Neither of these changes affects the size of the budget surplus or deficit. Prior year figures, beginning with the fiscal year 1931, have been adjusted accordingly for comparative purposes. The amounts that have been adjusted on account of refunds of receipts and capital transfers for the fiscal years 1931 through 1948 are as follows:

	Refunds of receipts	Capital transfers		Refunds of receipts	Capital transfers
1931.....	\$74,081,709	1940.....	\$78,704,894	\$43,756,731
1932.....	81,812,320	1941.....	80,189,469	299,741,000
1933.....	58,483,799	1942.....	84,775,537	18,000,000
1934.....	51,286,138	1943.....	70,325,408	9,815,514
1935.....	70,553,357	1944.....	257,254,269
1936.....	47,019,926	1945.....	1,678,777,924	16,167,609
1937.....	49,989,542	\$250,000	1946.....	2,973,027,879	37,881,965
1938.....	93,037,478	1947.....	3,006,090,396	210,136,503
1939.....	61,426,683	1948.....	2,271,874,777	262,896,807

⁴ Total receipts less: refunds of receipts beginning with fiscal year 1931; transfer of tax receipts to the Federal old-age and survivors insurance trust fund beginning in fiscal year 1937; to the railroad retirement account beginning in fiscal year 1938; and to the Federal disability insurance trust fund and highway trust fund beginning in fiscal year 1957.⁵ Excludes civil expenditures under War and Navy Departments in Washington through 1915. After 1915 includes all expenditures made by the Departments of the Army (including rivers and harbors and Panama Canal), Navy, and, beginning with the fiscal year 1949, the Air Force. Beginning with 1952, Department of Defense expenditures not classified under any one of these three departments are included in "Other."

⁶ Title was changed pursuant to act of July 26, 1947. Figures for Department of the Army include expenditures of Department of the Air Force from funds made available prior to fiscal year 1949. Expenditures for Office of the Secretary of Defense and interservice activities of the Defense Department are included in "Other."

⁷ The practice of including statutory debt retirements in budget expenditures was discontinued effective with the fiscal year 1948. Such expenditures are not included in this table, nor does the "Surplus or deficit" take into account such expenditures. Table 32 shows details of statutory debt retirements.

⁸ Includes the tonnage tax through 1931. Beginning with 1932 the tonnage tax has been covered into the general fund as miscellaneous receipts and is included in this table in "Other receipts."

⁹ Expenditures for the Department of the Air Force (established September 18, 1947) formerly included under Department of the Army.

¹⁰ Sec. 114 (f) of the Economic Cooperation Act of 1948, approved Apr. 3, 1948, required that the sum of \$3,000,000,000 be transferred to a trust fund entitled "Foreign Economic Cooperation Trust Fund" and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this was to charge the budget in the fiscal year of 1948 for expenditures made in the fiscal year 1949, with consequent effect on the budget surplus or deficit of those years. This bookkeeping transaction had no effect on the actual timing of either receipts or expenditures. In order to simplify comparison of figures between years, the transactions shown in this table do not take into account the transfer of \$3,000,000,000 in the fiscal year 1948 to the Foreign Economic Cooperation trust fund; expenditures of \$3,000,000,000 during the fiscal year 1949 from the Foreign Economic Cooperation trust fund are treated as budget expenditures in this table. If effect is given to Sec. 114 (f) of the Economic Cooperation Act of 1948, the budget results for the fiscal years 1948 and 1949 would be as follows:

	Fiscal year 1948	Fiscal year 1949
Budget receipts.....	\$42,210,770,493	\$38,245,667,810
Budget expenditures.....	36,791,300,649	37,057,107,858
Budget surplus.....	5,419,469,844	1,188,559,952

¹¹ Beginning with the fiscal year 1951, investments of wholly owned Government corporations in public debt securities are excluded from budget expenditures and included with other investments under "Trust account and other transactions." See tables 5 and 7.

* Revised.

† Less than \$500.

¹ Internal revenue and customs receipts are stated on the basis of reports of collections received from collecting officers. Other receipts are reported on the basis of confirmed deposits in Treasury operating accounts.

² Distribution between income taxes and employment taxes made in accordance with provisions of Sec. 201 of the Social Security Act, as amended, for transfer to the Federal Old-Age and Survivors Insurance trust fund and the Federal disability insurance trust fund (42 U. S. C. 401 (a)).

³ Individual income taxes withheld[†] have been increased \$125,538,728, representing adjustments to correct estimates for the quarter ended Dec. 31, 1956, and prior quarters. Individual income taxes—[†] have been reduced \$1,402,520, representing adjustment to correct estimates for 1954 and prior calendar years. The employment taxes and appropriations to the trust fund have been reduced by the net of the above amounts

(\$134,136,208). These adjustments are made pursuant to Sec. 201 (a) of the Social Security Act, as amended.

⁴ Includes adjustment of \$57,435,885 of prior year receipts from bonuses, rentals, and royalties received from oil and gas leases transferred to a deposit fund account by authority of the Comptroller General pending settlement with the State of Louisiana.

⁵ Reflects reduction of \$340,000,000, taxes on self-employed individuals transferred to "employment taxes" below.

⁶ Transfers of amounts equivalent to certain excise tax receipts (included in "Excise taxes" above) are made monthly to the highway trust fund on the basis of estimates by the Secretary of the Treasury as required by Sec. 209 (c) (3) of the Highway Revenue Act of 1956 (23 U. S. C. 173 (c)).

⁷ Amounts equal to taxes on carriers and their employees (minus refunds) are transferred to the railroad retirement account.

District of Columbia:							
Federal payment	500	300		600	500	22,559	19,893
Loans to D. C. for capital outlay						3,300	2,300
Unclassified expenditure transfers	64	-17	-74	99	64		
Total budget expenditures	5,742,636	5,583,878	5,987,155	5,944,200	6,278,904	69,433,078	66,539,776
Budget surplus (+), or deficit (-)	+445,596	+5,152,936	-1,731,140	-662,446	+5,409,036	+1,595,572	+1,625,553

^a Includes reduction of \$54,080,000, representing transfer from Federal old-age and survivors insurance trust fund for refunding F. I. C. A. and self-employment taxes.

^b Expenditures are stated on the basis of checks issued and cash payments made as reported by Government disbursing officers.

^c Includes reimbursement of \$8,000,000 from disaster loan revolving fund.

^d Expenditures for fiscal year 1956 from appropriations classified under the caption "Direct forces support" are now included in this classification.

^e Production credit corporations were merged in the Federal intermediate credit banks as of Jan. 1, 1957, pursuant to the Farm Credit Act of 1956, approved July 26, 1956 (12 U. S. C. 1027). The act provided for the transfer to the banks of all of the corporation's assets and liabilities except their investments in production credit associations which are transferred to the Farm Credit Administration. These amounts represent cash and holdings of public debt securities transferred to the merged corporations.

^f Operations for the last half of 1957 (as mixed-ownership corporations) are classified as trust enterprise funds and are included in trust account expenditures.

^g Includes not expenditures in the amount of \$1,121,833,409 representing intragovernmental transactions.

^h Amounts included for current month are estimated and are adjusted in the following month.

ⁱ Includes reimbursements for administrative support furnished to other agencies amounting to approximately \$16,649,000.

^j Gives effect to reimbursements for administrative support furnished to other agencies amounting to \$41,737,706.

^k Effective with the fiscal year 1955 the basis for accounting and reporting interest on the public debt was changed from a due and payable basis to an accrual basis.

TABLE 4.—*Public enterprise (revolving) funds, fiscal years 1956 and 1957*

MEMORANDUM¹

Government sponsored enterprises:
 Not guaranteed by the United States:
 Banks for cooperatives
 Federal home loan banks
 Federal land banks

¹ Production credit corporations were merged in the Federal intermediate credit banks as of Jan. 1, 1957, pursuant to the Farm Credit Act of 1956, approved July 26, 1956 (12 U. S. C. 1027). The act provided for the transfer to the banks of all of the corporation's assets and liabilities except their investments in production credit associations which are transferred to the Farm Credit Administration. These amounts represent cash and holdings of public debt securities transferred to the merged corporation. Operations for the last half of 1957 (as mixed-ownership corporations) are classified as trust enterprise funds and are included in trust account expenditures.

² In March 1957, the association exchanged preferred stock in the amount of \$50,000,000 for notes in the same amount held by the Secretary of the Treasury, in accordance with

³ Takes into account accrued interest, discount, or premium of securities purchased, and net amortization or repayments relating to these items.

⁴ Under a revised classification, the security transactions of Government-sponsored enterprises are included in deposit fund accounts (net), and excluded from net sales or investments of Government agencies in public debt securities and net sales or redemptions of obligations of Government agencies in the market.

⁵ Includes adjustment of \$99,325,700, due to reclassification. (Also, see footnote 6.) In addition includes net investment of guaranteed securities in the amount of \$16,650 for the Office of the Administrator, Housing and Home Finance Agency.

*Less than \$500,000.

¹ Consists of civil service and foreign service retirement funds.² Includes District of Columbia, Indian tribal funds, island possessions, adjusted service certificate fund, increment resulting from reduction in weight of gold dollar, and through 1950, seigniorage on silver. Thereafter any such seigniorage is included under budget receipts. Beginning with the fiscal year 1954, includes the railroad unemployment insurance administration fund, previously classified as a budget account.³ Includes reimbursement for certain administrative expenses met out of general fund appropriations, and beginning Dec. 31, 1952, for employment tax refunds as provided under Sec. 109 (a) (9) of the Social Security Act Amendments of 1950.⁴ Includes adjusted service certificate fund, District of Columbia, Indian tribal funds, expenditures chargeable against increment on gold, and beginning in the fiscal year 1950, accounts relating to operations under the Mutual Security Act and other funds appropriated to the President. Beginning with fiscal 1954, includes the railroad unemployment insurance administration fund, previously classified as a budget account. Beginning with fiscal 1955, includes the Federal employees' insurance fund (net); and trust revolving funds (net).⁵ Includes net investments in public debt securities by certain trust accounts. (See footnote 11.)⁶ Excludes Foreign Economic Cooperation trust fund. (See table 1, footnote 7.)⁷ Included with similar security transactions of other agencies shown later in this table.⁸ Includes net investments in public debt securities.⁹ Includes transactions by the Air Force and the Army beginning 1952.¹⁰ Includes \$300 million redemption for adjustment of excess transfers. (See table 3, footnote 9.)¹¹ Consists of adjusted service certificate fund prior to 1951; beginning with that year includes also investments of other accounts which for prior years are included in expenditures of "Other trust funds and accounts" and "Deposit fund accounts (net)." Beginning with fiscal year 1957 includes Federal intermediate credit banks, Federal National Mortgage Association (secondary market operations), and judicial survivors annuity fund.¹² Included net in budget expenditures.¹³ Includes guaranteed securities beginning in fiscal year 1955. For current amounts see table 5.¹⁴ Included net in deposit fund expenditures.¹⁵ For current details see table 5.

TABLE 10.—*Effect of financial operations on the public debt, actual for the fiscal year 1957 and estimated for 1958 and 1959*

[In millions of dollars. On basis of 1959 Budget document]

	1957 actual	1958 estimate	1959 estimate
Budget surplus, or deficit (—)	1,596	—388	466
Net receipts, or expenditures (—), including investments, of trust accounts and other transactions	195	183	—560
Increase, or decrease (—) in outstanding checks, deposits in transit, etc. ¹	—518	—42	94
Increase (—) in cash held outside the Treasury	—5	—17	-----
Decrease, or increase (—) in balance in Treasurer's account	956	—410	-----
Decrease, or increase (—) in public debt	2,224	—673	-----
Balance in Treasurer's account:			
Beginning of year	6,546	5,590	6,000
Change during year	—956	410	-----
End of year	5,590	6,000	6,000
Public debt outstanding:			
Beginning of year	272,751	270,527	271,200
Change during year	—2,224	673	-----
End of year	270,527	² 271,200	² 271,200

¹ Gives effect to changes in amounts of outstanding checks, deposits in transit, public debt interest checks, coupons, accruals outstanding, and telegraphic reports from Federal Reserve Banks.

² Because of wide swings in receipts and expenditures and the heavy concentration of taxes in the latter half of the fiscal year, there will be periods during the year when the public debt will be considerably greater than this amount.

Fiscal year	Alcohol taxes \$					Excise taxes				Documents, other in- struments, and playing cards \$
	Distilled spirits	Beer	Wines	Other, in- cluding occu- pational taxes	Total alcohol taxes	Tobacco taxes \$			Total to- bacco taxes, etc.

NOTE.—These figures are from Internal Revenue Service reports of collections and are not directly comparable to budget receipts from internal revenue as reported in other tables. The differences in amounts occur because of differences in the time when payments are included in the respective reports. Tax payments are included in budget receipts when reported in the account of the Treasurer of the United States. Through 1954, the payments were included in Internal Revenue Service collection reports after the returns to which they applied had been received in internal revenue offices.

Under arrangements begun in 1950, for withheld income tax and old-age insurance taxes and later extended to railroad retirement taxes and many excises, these taxes are paid currently into Treasury depositories and the depository receipts, as evidence of such payment, are attached to quarterly returns to the Internal Revenue Service. Under this procedure, the payments are included in budget receipts in the month in which the depository receipts are issued to taxpayers.

Revised accounting procedures effective July 1, 1954, extended this practice to Internal Revenue Service collection reports, so that these reports likewise include depository receipts in the month in which they are issued instead of the previous practice of including them in the month in which tax returns supported by the receipts were received in directors' offices. It is not possible to make a complete classification of excise taxes paid into depositories until the returns are received. Accordingly, the item "Unclassified excise taxes" includes the amount of "undistributed depository receipts", i. e., the amount of depository receipts issued, less the amount of depository receipts received with returns and distributed by classes of tax.

¹ For figures for 1863-1915, see 1929 annual report, p. 419; and for 1916-1928, see 1947 annual report, p. 310.

² Beginning with January 1951, withheld income taxes and old-age insurance taxes on employees and employers and beginning with January 1957 disability insurance taxes on employees and employers also are paid into the Treasury in combined amounts without separation as to type of tax. The distribution of amounts of these taxes by type is based on estimates made in accordance with provisions of Section 201 (a) of the Social Security Act, as amended (42 U. S. C. 401 (a)), for withheld income taxes and old-age insurance taxes, and beginning with January 1957, also for Federal disability insurance taxes. Similarly, for the same periods, the old-age insurance and disability insurance taxes on self-employment income are combined with income tax other than withheld. Individual income taxes withheld by employers in the fiscal year 1951 through 1956 include amounts subsequently transferred to the Government of Guam, under the provisions of the act approved August 1, 1950 (48 U. S. C. 1421 h). For 1957 these amounts are excluded.

³ Beginning with 1952 includes the tax on business income of exempt organizations. Includes income tax on the Alaska Railroad, which was repealed effective for taxable years ending after June 30, 1952.

⁴ Repealed for years ending in period July 1, 1926, through June 30, 1932, and for years ending after June 30, 1945. Beginning with 1951 included under "Miscellaneous excise taxes, All other."

⁵ Beginning with 1954 includes amounts of tax collected in Puerto Rico upon alcohol and tobacco products of Puerto Rican manufacture coming into the United States; data for earlier years are exclusive of such amounts.

⁶ Includes stamp taxes on bonds, issues of capital stock, deeds of conveyance, transfers of capital stock and similar interest sales, playing cards, and silver bullion sales or transfers.

⁷ Includes taxes on sales under the act of October 22, 1914; manufacturers', consumers', and dealers' excise taxes under war revenue and subsequent acts; and for 1932 and subsequent years, manufacturers' excise taxes under the act of 1932, as amended. Soft drink taxes are included under "Miscellaneous excise taxes, All other."

⁸ Beginning with 1933 includes manufacturers' excise taxes on jewelry, furs, and toilet preparations; beginning 1942 includes manufacturers' excise taxes on phonograph records, musical instruments, and luggage. The tax on phonograph records for 1933 through 1941 was not reported separately and is included in "Radio and television receiving sets and phonographs, parts."

⁹ Repealed by Revenue Act of 1951. Collections for the fiscal years 1953-57 are included under "Miscellaneous excise taxes, All other."

¹⁰ Includes collections from sources other than the miscellaneous excise taxes shown, and also (a) certain delinquent taxes collected under repealed laws, except automobile taxes for 1929 and 1930 which are included under "Manufacturers' excise taxes, All other," and capital stock taxes prior to 1951 which are shown under "Capital stock"; (b) internal revenue, collected through customs offices for 1929-33; subsequently such collections are included under "Alcohol taxes"; and (c) various other taxes not shown separately.

¹¹ Includes undistributed depository receipts and unapplied collections of excise taxes.

¹² Consists of agricultural adjustment taxes.

¹³ Includes unidentified and excess collections, depository receipts outstanding six months or more for which no tax accounts were found, and profit from sale of acquired property. For 1954 and earlier years such amounts are included in "Miscellaneous excise taxes, All other."

TABLE 12.—*Customs collections¹ and refunds, fiscal years 1956 and 1957*

¹ For figures from 1789 through 1910 see Secretary's annual report for 1946, p. 419.² Includes adjusted losses, etc., postal funds and expenditures from postal balances, but excludes departmental expenditures in Washington, D. C., through 1922, and amounts transferred to the civil service retirement and disability fund, 1921 through 1926. From 1927 to date includes salary deductions paid to and deposited for credit to the retirement fund.³ On bases of warrants issued prior to 1922, the daily Treasury statements 1922 through 1953, and the "Combined Statements of Receipts, Expenditures and Balances of the United States Government" beginning with 1954.⁴ Represents advances to the Postmaster General to meet estimated deficiencies in postal revenues, reduced by repayments from prior year advances. These figures exclude any allowance for offsets on account of extraordinary expenditures or the cost of free mailings contributing to the deficiency of postal revenues certified to the Secretary of the Treasury by the Postmaster General (see exhibit 54).⁵ Excludes payments from general fund appropriation "Additional Compensation, Postal Service", pursuant to act of November 8, 1919, as follows: 1920—\$35,698,400; 1921—\$1,374,015; and 1922—\$6,700. Also excludes transfers to the civil service retirement and disability fund, on account of salary deductions, as follows: 1921, \$6,519,683; 1922, \$7,899,000; 1923, \$8,284,081; 1924, \$8,679,658; 1925, \$10,266,977; and 1926, \$10,472,289 (see note 2).⁶ Repayment of unexpended portion of prior years' advances.⁷ Transactions for 1954 through 1957 are on the basis of cash receipts and expenditures as reported by the Post Office Department. This basis differs from that used in reports of the Postmaster General, which are on a modified accrual basis.⁸ See letter of the Postmaster General in the end exhibit in this and earlier annual reports.

TABLE 15.—*Cash income and outgo, fiscal years 1950-57*

[In millions of dollars. On basis of daily Treasury statements through 1952, and on basis of the daily Treasury statements and the "Monthly Statement of Receipts and Expenditures of the United States Government" for 1953-57]

crease in sec-
urities held by
the public, or
decrease (—)

trust account transactions, etc. Because of later reclassifications of certain transactions, the cash deposits and withdrawals may differ from those originally published in the final Treasury statements.

* Less than \$500,000.

¹ Revised.

² For further detail, see table 6.

³ For further detail, see table 7.

⁴ Treated as noncash refund deductions from receipts when issued and as cash refund deductions when redeemed.

⁵ Consists of seigniorage on silver and increment resulting from reduction in the weight of the gold dollar; excluded from receipts from the public but included in cash deposits in the Treasurer's account.

⁶ Includes net change in balances in Government-sponsored enterprise deposit fund accounts with the Treasurer of the United States.

⁷ As measured by net security transactions reflected in Treasury reports, on the basis that Government-sponsored enterprises obtain funds for their operations through direct borrowing from the public or by cashing United States securities which they hold, and apply the net income received from their operations to the redemption of their obligations in the market and to the purchase of United States securities.

⁸ Not reported prior to 1954.

⁹ Beginning with 1954, figures in this column include small amounts of net security transactions by other agencies, in accordance with the classification followed by the Bureau of the Budget. In table 7, these amounts are excluded from deposit fund expenditures and included with appropriate security transactions.

¹⁰ Excludes revolving fund receipts representing acquired securities amounting to \$1,643,070 (par value).

¹¹ Consists of Federal intermediate credit bank franchise tax through December 1956 and, beginning 1957, also reimbursement by the Panama Canal Company for expenses and services.

¹² Includes reimbursements for administrative and other expenses, and for refunds of taxes; dividend, interest, and related payments by trust enterprise funds, including Federal intermediate credit bank franchise tax beginning after December 1956, and repayment of loans and advances by trust enterprise funds.

¹³ Consists of payment of earnings and repayment of capital stock to the Treasury through 1952, and beginning 1955, payment of franchise tax by banks for cooperatives.

¹⁴ Consists of United States and Government corporation shares of contributions to employees' retirement funds; and payments to the railroad retirement account (for creditable military service), the unemployment trust fund, veterans' life insurance funds, trust fund for technical services and other assistance under the agricultural conservation program, the District of Columbia; and awards of the Indian Claims Commission.

¹⁵ Includes District of Columbia share of contributions to the civil service retirement fund, payments by the Railroad Retirement Board to the Federal old-age and survivors insurance trust fund, transfers from the civil service retirement fund to the foreign service retirement fund, and transfers from the railroad unemployment insurance administration fund to the unemployment trust fund.

¹⁶ Accrued discount on savings bonds and bills less interest paid on savings bonds and bills received.

¹⁷ Public debt interest accrued and unpaid beginning June 30, 1955, effective date of the change in accounting and reporting interest on the public debt from a due and payable basis to an accrual basis. For 1954, consists only of public debt interest checks and coupons outstanding. Not reported as a separate clearing account prior to 1954.

¹⁸ Net increase, or decrease (—).

¹⁹ Treated as noncash expenditures at the time of issuance of the securities and as cash expenditures at the time of their redemption; net issuance or redemption (—).

²⁰ Issued in 1936 in exchange for adjusted service certificates held by veterans of World War I. The bonds matured in 1945.

²¹ Issued in 1947 in payment for accumulated leave. The last of these bonds matured in 1951.

²² Part of the United States subscription to the capital of the International Bank for Reconstruction and Development and to the International Monetary Fund was paid in the form of noninterest-bearing, nonconvertible notes payable on demand (see 1947 Annual Report of the Secretary of the Treasury, pages 48, 350, and 385). The last of the notes issued to the Bank was redeemed in 1950.

²³ By wholly owned Government enterprises; beginning 1951, such net investments are reported separately and are not included in expenditures (see table 7).

²⁴ Checks outstanding less deposits in transit, and changes in other accounts; net increase, or decrease (—). Prior to 1954 includes also public debt interest due and unpaid (see also footnote 16).

²⁵ Excludes investments representing acquired securities amounting to \$1,643,070 (par value) and donation of securities amounting to \$45,900 (par value).

²⁶ Accrued discount on savings bonds and bills, which is included in the principal of the public debt, less interest paid on savings bonds and bills redeemed.

²⁷ Treated as noncash transactions at the time of issuance and as cash transactions at the time of redemption; net issuance, or redemption (—).

²⁸ Excluded from borrowing because the transactions are treated as expenditures in VI.

²⁹ Excluded from borrowing because the transactions are treated as deductions from receipts in III.

³⁰ Consists of only those transactions in public debt securities and agency obligations not cleared through the Treasurer's account.

Public Debt, Guaranteed Obligations, Etc.

I.—Outstanding

TABLE 16.—Principal of the public debt, 1790–1957

[On basis of Public Debt accounts from 1790 through 1915, and on basis of daily Treasury statements from 1916 to date, see "Bases of Tables" and Note]

NOTE.—From 1790-1842, the fiscal year ended December 31; from 1843, on June 30. Detailed figures for 1790-1852 are not available on a basis comparable with those of later years. The amounts for 1790-1852, except for 1835, are from the 1900 annual report of the Secretary of the Treasury; for 1835, from the 1834-35 annual reports, pp. 504 and 629; for 1853-55, from the "Statement of Receipts and Expenditures of the Government from 1855 to 1855 and Principal of Public Debt from 1791 to 1855" compiled from the Register's official records; from 1856-1915, from the monthly debt statements and revised figures in the Secretary's annual reports; and for 1916 to date, from the "Statement of the Public Debt" in the daily Treasury statements.

¹ Revised.

² Exclusive of bonds issued to the Pacific railroads (acts of 1862, 1864, and 1878), since statutory provision was made to secure the Treasury against both principal and interest, and the Navy pension fund, which was not a debt as principal and interest were the property of the United States. The Statement of the Public Debt included the railroad bonds from issuance and the Navy fund from September 1, 1866, until the Statement of June 30, 1890.

³ Based on the Bureau of the Census estimated population for continental United States.

^{*} Revised.

¹ Includes certain obligations not subject to statutory limitation. For amounts subject to limitation, see table 1.

² Consists of obligations issued by certain Government corporations and credit agencies, obligations which are guaranteed by the United States as to both principal and interest. They were first authorized in 1932, but no such obligations were outstanding at the end of the fiscal years 1932 and 1933.

³ Based on Bureau of the Census estimated population for continental United States.

Total debt subject to limitation ¹⁹	279,154,184,365.85

- (c) Various.
(d) June 25, 1910.

TAX STATUS:

(e) Any income derived from Treasury bills of this issue, whether interest or gain from the sale or other disposition does not have any exemption, as such, and less from the sale or other disposition of any such bills does not have any special treatment, as such, under the Internal Revenue Code or laws amendatory or supplementary thereto. The bills are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. For purposes of taxation the amount of discount at which the bills are originally sold by the United States is to be considered to be interest.

(f) Income derived from these securities is subject to all taxes now or hereafter imposed under the Internal Revenue Code or laws amendatory or supplementary thereto. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. The following is applicable to savings bonds only: For the purposes of taxation any increment in value of savings bonds represented by the difference between the price paid and the redemption value received (whether at or before maturity) shall be considered as interest.

Attention is invited to Treasury Decision 4550 ruling that bonds, notes, bills, and certificates of indebtedness of the Federal Government or its agencies, and the interest thereon, are not exempt from the gift tax.

(g) Exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess profits and war profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds authorized by the act approved Sept. 24, 1917, as amended, the principal of which does not exceed in the aggregate \$5,000 owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above.

(h) Exempt from the payment of all taxes or duties of the United States, as well as from all taxation in any form by or under State, municipal, or local authority. (The Supreme Court has held that this exemption does not extend to estate or inheritance taxes, imposed by Federal or State authority.)

(i) These issues, being investments of various Government funds and payable only for the account of such funds, have no present tax liability.

In hands of foreign holders.—Applicable only to securities issued prior to Mar. 1, 1941: Bonds, notes, and certificates of indebtedness of the United States, shall, while beneficially owned by a nonresident alien individual, or a foreign corporation, partnership, or association, not engaged in business in the United States, be exempt both as to principal and interest from any and all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority.

MEMORANDUM RELATING TO OTHER OBLIGATIONS

Obligations of the United States payable on presentation:	Amount
United States registered interest checks payable.....	\$214,216,913.44
United States interest coupons due and outstanding.....	129,181,836.83
Interest payable with and accrued discount added to principal of United States securities.....	9,851,131.98
Total.....	353,249,882.25

¹ Reconciliation of summary to the basis of daily Treasury statements is shown in table 21.

² Redeemable at the option of the United States on and after dates indicated, except where otherwise stated. In case of Treasury bonds and Treasury bonds, Investment Series B-1975-80, now outstanding, such bonds may be redeemed only on interest dates, and 4 months' notice of redemption must be given.

³ Treasury bills are noninterest-bearing and are sold on a discount basis with competitive bids for each issue. The average sale price of these series gives an approximate yield on a bank discount basis (360 days a year) as indicated opposite each issue of bills. This yield differs slightly from the yield on a true discount basis (365 days a year) which is shown in the summary in table 21.

⁴ Acceptable for payment of income and profits taxes the Sept. 15, 1937.

⁵ Includes exchange made by the Federal Reserve System of \$713,818,000 of Treasury Bonds, Investment Series B-1975-80, for Treasury notes of Series EO-1957.

⁶ Not called for redemption on first call date. Callable on succeeding interest payment dates.

⁷ Redeemable, at par and accrued interest, to the date of payment, at any time upon the death of the owner at the option of the fully constituted representative of the deceased owner's estate, provided entire proceeds of redemption are applied to payment of Federal estate taxes from the deceased owner's estate.

⁸ The items not subject to the statutory debt limitation are keyed to this footnote and consist of: (a) Panama Canal bonds; (b) certain matured debt; and (c) certain debt bearing no interest.

⁹ Amounts issued and retired for Series E, F, and J include accrued discount; amounts outstanding are stated at current redemption values. Amounts issued, retired, and outstanding for Series G, H, and K are stated at par value.

¹⁰ During this additional 10-year period interest on bonds bearing issue dates of May 1, 1941, through April 1, 1942, will accrue at the rate of 2½ percent simple interest each year for the first 7½ years, and then increase for the remaining 2½ years to bring the aggregate interest return to approximately 2.90 percent, compounded semiannually. On bonds bearing issue date of May 1, 1942, and subsequent dates, interest will accrue after maturity at the rate of approximately 3 percent per annum, compounded semiannually, for each half-year period of the extension period.

¹¹ Approximate yield if held from issue date to end of 10-year extension period.

¹² If held from issue date to end of 10-year extension period, bonds of this series dated Jan. 1, 1942, through Apr. 1, 1942, yield approximately 2.90 percent and those dated May 1, 1942, through Dec. 1, 1942, yield approximately 2.95 percent.

¹³ Matured bonds of this series yield approximately 2.95 percent if held from issue date to end of 10-year extension period, and unmatured bonds of this series yield approximately 2.90 percent if held to maturity.

¹⁴ Bonds with issue dates February through April 1957, at the option of the owner, may be held and will accrue interest for additional 10 years.

¹⁵ Deduct.

¹⁶ May be exchanged at option of owner for marketable 1½ percent 5-year Treasury notes, dated Apr. 1 and Oct. 1 next, preceding the date of exchange.

¹⁷ For detailed information see 1956 annual report, page 435.

¹⁸ After deducting amounts officially estimated to have been lost or irrevocably destroyed.

¹⁹ The statutory debt limit of \$275 billion was increased by \$6 billion beginning Aug. 28, 1954, and ending June 30, 1956, by acts approved Aug. 28, 1954, and June 30, 1955 (31 U. S. C. 757b); and by \$3 billion beginning July 1, 1956, and ending on June 30, 1957, by an act approved July 9, 1956 (70 Stat. 519).

AUTHORIZING ACTS:

- (a) Sept. 24, 1917, as amended.
(b) Aug. 5, 1909, Feb. 4, 1910, and Mar. 2, 1911.

NOTE.—For obligations held by the Treasury and reflected in the public debt, see table 116.

¹ These obligations have been issued on various dates and are payable on various dates. Interest is payable semiannually, Jan. 1 and July 1. All unmatured obligations, except the Series A debentures, are redeemable on any interest day or days, on 3 months' notice.² The National Housing Act as amended by the National Housing Act Amendments of 1938, approved Feb. 3, 1938, reads in part as follows: "Such debentures as are issued in exchange for property covered by mortgages insured under Section 203 or Section 207 prior to the date of enactment of the National Housing Act Amendments of 1938 shall be subject only to such Federal, State, and local taxes as the mortgages in exchange for which they are issued would be subject to in the hands of the holder of the debentures."³ Such debentures as are issued in exchange for property covered by mortgages insured after the date of enactment of the National Housing Act Amendments of 1938 shall be exempt, both as to principal and interest, from all taxation (except surtaxes, estate, inheritance, and gift taxes) now or hereafter imposed by the United States, by any Territory, dependency, or possession thereof, or by any State, county, municipality, or local taxing authority." Under the Public Debt Act of 1941, interest upon and gain from the sale of debentures shall have no exemption under the Internal Revenue Code or laws amendatory or supplementary thereto, except such debentures as may be issued on contracts entered into prior to Mar. 1, 1941.⁴ Income derived from these securities is subject to all taxes, now or hereafter imposed under the Internal Revenue Code or laws amendatory or supplementary thereto. The securities are subject to surtaxes, estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, county, municipality, or local taxing authority.⁵ In accordance with the act approved Aug. 11, 1955 (12 U. S. C. 4748a), the "Military housing insurance fund" became known as "Armed services housing mortgage insurance fund."⁶ Includes debentures called for redemption on July 1, 1957, at par plus accrued interest, as follows: Series AA, \$1,047,000; Series L, \$15,650; Series R, \$12,150; Series T, \$162,950; and Series H, \$2,254,200.⁷ Funds have been deposited with the Treasurer of the United States for payment of outstanding matured principal and interest obligations guaranteed by the United States.

Federal Reserve notes (face amount), act of December 23, 1913, as amended. ¹						1,558,998,166.90	725,836,573,834.96

¹ The faith of the United States is solemnly pledged to payment of deposits made in postal savings depository offices with accrued interest thereon.

² Under the Public Debt Act of 1941, income derived from deposits made subsequent to March 1, 1941, is subject to all Federal taxes.

³ Interest payable quarterly from first day of month next following date of deposit.

⁴ Offset by cash in designated depository banks amounting to \$27,211,262, which is secured by the pledge of collateral as provided in the regulations of the Postal Savings System, having a face value of \$27,615,000; Government securities with a face value of \$1,459,053,000; and cash in possession of the System and other net assets of \$66,317,276.

⁵ Offset by Government securities with a face value of \$6,752,000; and other assets.

⁶ Federal Reserve notes are obligations of the United States and shall be receivable by all national and member banks and Federal Reserve Banks and for all taxes, customs, and other public dues. They are redeemable in lawful money on demand at the Treasury Department, Washington, D. C., or at any Federal Reserve Bank.

⁷ In actual circulation, exclusive of \$845,262,655.04 redemption fund deposited in the Treasury and \$850,889,965 of their own Federal Reserve notes held by the issuing banks. The collateral security for Federal Reserve notes issued consists of \$11,848,000,000 in gold certificates and in credits with the Treasurer of the United States payable in gold face certificates, \$16,905,000,000 face amount of U. S. Government securities, and \$93,755,000 face amount of commercial paper. Notes issued by a Federal Reserve Bank are a first lien against the assets of such Bank.

TABLE 26.—*Statutory limitation on the public debt and guaranteed obligations, June 30, 1957*

[In millions of dollars]

PART I.—STATUS UNDER LIMITATION, JUNE 30, 1957

	Amount
Maximum amount of securities which may be outstanding at any one time, under limitations imposed by Section 21 of the Second Liberty Bond Act, as amended (31 U. S. C. 757b), provides for a limit of \$275 billion, except that this limitation was increased by \$6 billion beginning on Aug. 28, 1954, and ending on June 30, 1956, by acts approved Aug. 28, 1954 (68 Stat. 895), and June 30, 1955 (69 Stat. 241); and by \$3 billion beginning on July 1, 1956, and ending on June 30, 1957, by an act approved July 9, 1956 (70 Stat. 519).....	275,000

July 1, 1957.....	275,000,000,000		

Note.—A summary of debt limitations from 1917 through 1940 fixed by Section 21 of the Second Liberty Bond Act, as amended, appears in the 1940 annual report, p. 70. The annual report for 1941, pp. 28-30, contains a summary of Section 2 of the Public Debt Act of 1941, which consolidated into Section 21 of the Second Liberty Bond Act, as amended, all authority to issue direct obligations of the United States and increased the limit to more than the combined total of separate limitations in effect previously.

¹ Guaranteed securities held outside the Treasury were not included in the statutory debt limitation until April 3, 1945.

² Since June 26, 1946, U. S. savings bonds have been included in the public debt at their current redemption value. Prior to that time for purposes of the limitation, they were carried at maturity value.

³ Public Law 686, approved Aug. 28, 1954, authorized that the public debt limit be increased temporarily until June 30, 1955, by \$6,000,000,000.

⁴ Public Law 124, approved June 30, 1955, continued the temporary increase of \$6,000,000,000 until June 30, 1956.

⁵ Public Law 678, approved July 9, 1956, authorizes the public debt limit to be temporarily increased by \$3,000,000,000 during the period beginning on July 1, 1956, and ending on June 30, 1957.

II.—Operations

¹ Reconciliation of summary to the basis of the daily Treasury statement is shown in table 21.

² Amounts issued and retired for Series E, F, and J, include accrued discount; amounts outstanding are stated at current redemption values. Amounts issued, retired, and outstanding for Series G, H, and K, are stated at par value.

³ Deduct.

⁴ Represents excess of unclassified redemptions over unclassified sales—deduct.

⁵ Represents issues in which there were no transactions during the fiscal year 1957; for amount of each issue outstanding (unchanged since June 30, 1956) see 1956 annual report, p. 435.

TABLE 30.—*Issues, maturities, and redemptions of interest-bearing public debt securities, excluding special issues, July 1956–June 1957*

[On basis of daily Treasury statements, supplemented by special statements by the Bureau of the Public Debt on public debt transactions]

¹ For Treasury bills, average rates on bank discount basis are shown; for United States savings bonds, approximate yield to maturity is shown.

² Since May 1, 1957, Series E and H bonds are the only savings bonds on sale. Amounts represent accrued discount plus issue price of bonds in adjustment cases for Series F and for Series E and J not currently on sale. For Series E currently on sale and for Series J (prior to May 1957), amounts represent issue price plus accrued discount, and for Series H and for Series K (prior to May 1957), amounts represent issue price at par.

³ For United States savings bonds of Series E, F, and J, amounts represent current redemption value (issue price plus accrued discount); and for Series G, H, and K, amounts represent redemption value at par.

⁴ Includes exchanges of matured bonds of Series E for bonds of Series K that are not classified by yearly series.

⁵ Approximate yield if held to end of 10-year extension period.

⁶ If held from issue date to end of 10-year extension period, bonds of this series dated January 1, 1942, through April 1, 1942, yield approximately 2.9 percent and those dated May 1, 1942, through December 1, 1942, yield approximately 2.95 percent.

⁷ Matured bonds of this series yield approximately 2.95 percent if held from issue date to end of 10-year extension period, and unmatured bonds of this series yield approximately 2.9 percent if held to maturity.

⁸ Deduct: Represents excess of amounts transferred from unclassified sales and redemptions to sales and redemptions of designated series over amount received as unclassified sales and redemptions.

⁹ Deduct.

¹⁰ Separation between bonds bearing issue date of January 1957 and bonds bearing issue dates beginning with February 1957 was made May 31, 1957.

TABLE 31.—Public debt increases and decreases, and balances in the account of Treasurer of the U. S., fiscal years 1916-57

SUMMARY OF CHANGES IN THE PUBLIC DEBT, FISCAL YEARS 1916-57

[In millions of dollars]

Public debt:		
As of June 30, 1957.....	270,527.2	
As of June 30, 1915.....	1,191.4	
Net increase.....	269,335.8	
Increase:		
Excess of expenditures in deficit years.....	290,579.7	
Net increase in the balance in the account of Treasurer of the U. S.....	5,431.8	
Total increase.....	296,011.5	
Decrease:		
Statutory debt retirements.....	9,923.6	
Retirements from receipts in surplus years.....	16,752.1	
Total decrease.....	26,675.7	
Net increase in debt since June 30, 1915.....	269,335.8	

¹ Less than \$50,000.² Effective with the fiscal year 1948, statutory debt retirements have been excluded from budget expenditures; they are shown here for purposes of comparison.

TABLE 32.—Statutory debt retirements, fiscal years 1918–57

[In thousands of dollars. On basis of par amounts and of daily Treasury statements through 1947, and on basis of Public Debt accounts thereafter; see "Bases of Tables"]

¹ The division of net earnings and the payment of a franchise tax have been required by the act of March 24, 1923, as amended by the acts of May 19, 1932, August 19, 1937, and July 26, 1956 (12 U. S. C. 1072).

² Includes \$4,842,066.45 written off the debt Dec. 31, 1920, for fractional currency estimated to have been lost or destroyed in circulation.

³ Beginning with 1947, bonds acquired through gifts, forfeitures, and estate taxes are redeemed prior to maturity from regular public debt receipts.

⁴ Represents payments from net earnings, War Damage Corporation.

NOTE.—Series E and H are the only savings bonds now being sold. Series A-D were sold from March 1, 1935, through April 30, 1941. Series F and G were sold from May 1, 1941, through April 30, 1952. Series J and K were sold from May 1, 1952, through April 30, 1957. Sales figures for discontinued series represent accrued discount on outstanding bonds and adjustments.

* Less than \$50,000.

¹ Series G, H, and K are stated at par.

² Includes exchanges of matured Series E bonds for Series G bonds beginning with May 1954 and for Series K bonds beginning with May 1952.

³ Includes exchanges of Series 1941-F savings bonds for Treasury 3½% bonds of 1978-83.

⁴ Includes exchanges of Series 1941-G savings bonds for Treasury 3½% bonds of 1978-83.

NOTE.—Details by months from May 1944 for Series E, F, and G bonds will be found in the 1943 annual report, p. 608, and in corresponding tables in subsequent reports. Monthly detail for Series H, J, and K bonds will be found in the 1952 annual report, pp. 629 and 630, and in corresponding tables in subsequent reports.

¹ Less than \$50,000.

² See Note to table 35.

³ Includes total value of redemptions not yet classified between matured and unmatured bonds.

⁴ Amounts outstanding are at current redemption values, except for Series G, H, and K, which are stated at par.

⁵ Matured F and G bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, when they are transferred to matured debt upon which interest has ceased.

⁶ Reductions were made in issues and redemptions of Series E, H, F, G, J, and K in July 1954, to compensate for the erroneous inclusion of reissue transactions in June 1954 as reported in the daily Treasury statement. The amounts involved were as follows: \$18 million for issues of Series E and H and \$17 million for issues of Series F, G, J, and K; and \$35 million for unclassified retirements.

⁷ See table 35, footnote 2.

⁸ Includes sales to institutional investors in July 1948. See 1948 annual report, p. 194.

⁹ Includes sales to institutional investors during October, November, and December 1950. See 1951 annual report, p. 177.

NOTE.—Details of amounts of sales by months beginning May 1941 will be found in the 1943 annual report, p. 611, and in corresponding tables in subsequent reports.

Revised.

¹ Less than \$50,000 or 500 pieces.

² See Note to table 35.

³ Total includes \$10 denomination Series E bonds sold to Armed Forces only from June 1941 through March 1950. Details by years will be found in the 1952 annual report, p. 631.

⁴ Sale of \$200 denomination Series E bonds began in October 1945.

⁵ Includes sales of \$100,000 denomination Series E bonds which are purchasable only by trustees of employees' savings plans beginning April 1954, and personal trust accounts beginning January 1955.

⁶ Sale of \$10,000 denomination Series E bonds was authorized on May 1, 1952.

⁷ See table 36, footnote 5.

⁸ Sale of \$25 denomination Series F bonds was authorized in December 1941.

⁹ See table 36, footnote 7.

¹⁰ See table 36, footnote 8.

¹¹ See table 35, footnote 2.

¹ Less than 500 pieces.² See Note to table 35.³ Redemption data presented in annual reports prior to 1950 were on a different basis and therefore are not strictly comparable with the data in this table.⁴ Total includes redemption of \$10 denomination Series E bonds. Detail by fiscal years was last shown in the 1952 annual report, p. 633. Thereafter monthly detail for each fiscal year appears in a footnote to the redemptions by denominations table of successive annual reports. Details in thousands of pieces by months for the fiscal year 1957 follow:

July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May	June	Total
34	31	25	27	23	25	34	25	25	26	23	23	321

⁵ See table 35, footnote 2.⁶ See table 36, footnote 5.

TABLE 39.—*Sales of Series E and H savings bonds by States, fiscal years 1956, 1957, and cumulative*

[In thousands of dollars, at issue price. On basis of reports received by the Treasury Department, with totals adjusted to basis of daily Treasury statements]

NOTE.—Sales by States of the various series of savings bonds were published in the annual report for 1943, pp. 614-621, and in subsequent reports; and by months at intervals in the "Treasury Bulletin," beginning with the issue of July 1946. Since April 30, 1953, figures for sales of Series E and H bonds only have been available by States.

TABLE 40.—Percent of savings bonds sold in each year redeemed through each yearly period thereafter, by denominations ^{1 2}

[On basis of Public Debt accounts, see "Bases of Tables"]

NOTE.—The percentages shown in this table are the proportions of the value of the bonds originally sold in any calendar year which are redeemed (including redemption of bonds reissued as a result of partial redemptions) before July 1 of the next calendar year and before July 1 of succeeding calendar years. Both sales and redemptions are taken at maturity value.

¹ See note to table 35.

² For Series A-D savings bonds data, see the 1952 annual report, p. 635.

³ June 1, 1944, was the earliest issue date for bonds of the \$10 denomination. Sale was discontinued March 31, 1950.

⁴ October 1, 1945, was the earliest issue date for bonds of the \$200 denomination.

⁵ May 1, 1952, was the earliest issue date for bonds of the \$10,000 denomination.

⁶ Includes the \$100,000 denomination which may be purchased only by trustees of employees' savings plans beginning with April 1954, and personal trust accounts beginning with January 1955.

⁷ Series G savings bonds were not available in denominations of \$25. November 1941 was the earliest issue date for the \$25 denomination of Series F bonds.

IV.—Interest

TABLE 41.—*Amount of interest-bearing public debt outstanding, the computed annual interest charge, and the computed rate of interest, June 30, 1916-57, and at the end of each month during 1957*¹

[On basis of Public Debt accounts through June 1937, and subsequently on basis of daily Treasury statements, see "Bases of Tables"]

¹ Comparable monthly data 1929-36 appear in 1936 annual report, p. 442, and from 1937 in later reports. Annual interest charge monthly 1916-1929 appears in 1929 annual report, p. 509.² Includes discount on Treasury bills from June 30, 1930; the current redemption value from May 1935 of savings bonds of Series A-F and J; and beginning August 1941, the face amount of Treasury tax and savings notes. The face value of matured savings bonds and notes outstanding is included until all of the annual series have matured, when they are transferred to matured debt on which interest has ceased.³ For methods of computing annual interest charge and rate see note to following table. For computations on Treasury bills and savings bonds, see footnotes 3 and 4 to following table.

¹ See table 21 for amounts of public debt outstanding by security classes.
² Total includes Panama Canal bonds, postal savings bonds prior to 1956, and conversion bonds prior to 1947.

³ Included in debt outstanding at face amount, but the discount value is used in computing the annual interest charge and the annual interest rate.

⁴ The annual interest charge and annual interest rate on United States savings bonds are computed on the basis of the rate to maturity applied against the amount outstanding.

NOTE.—The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of the month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date. The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount.

* Less than \$500,000.

TABLE 43.—*Interest on the public debt by security classes, fiscal years 1954-57*¹

NOTE.—Amount of interest paid includes increase in redemption value of United States savings bonds and discount on unmatured issues of Treasury bills. Interest paid on guaranteed issues does not include amounts paid on demand obligations of Commodity Credit Corporation. Data for 1913-33 will be found in the 1948 annual report, p. 539, and for 1934-39 in the 1952 annual report, p. 645.

*Less than \$50,000.

¹ Figures for 1940 to 1949, inclusive, represent actual interest payments; figures for 1950 to 1954, inclusive, represent interest which became due and payable during those years without regard to actual payments; figures for 1955 to 1957, inclusive, are shown on an accrual basis.

V.—Prices and yields of securities

1957				3.35	3.42	3.55							

NOTE.—For bonds selling above par and callable at par before maturity, the yields are computed on the basis of redemption at first call date; while for bonds selling below par, yields are computed to maturity. Monthly averages are averages of daily figures. Each daily figure is an unweighted average of the yields of the individual issues. Yields before 1953 are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market. Commencing April 1953, yields, as reported by the Federal Reserve Bank of New York, are based on over-the-counter bid quotations. Taxable bonds are those on which the interest is subject to both the normal and surtax rates of the Federal income tax. This average commenced Oct. 20, 1941.

² Prior to October 1941 yields are on partially tax-exempt long-term bonds. For

January 1930 through December 1945 see the 1956 annual report, page 492, and for January 1919 through December 1929 see the 1943 annual report, p. 662.

³ Beginning Oct. 20, 1941, through Mar. 31, 1952, yields are based on bonds neither due nor callable for 15 years; beginning Apr. 1, 1952, through Mar. 31, 1953, on bonds neither due nor callable for 12 years.

⁴ Annual average is based on the single long-term series for January through March (see footnote 3) and the 10- to 20-year series thereafter.

⁵ Annual average covers 8½ months beginning April 15, the inception date of this series.

¹ Prices and yields (based on bid prices) on June 30, 1956 and 1957, are over-the-counter closing quotations, as reported to the Treasury Department by the Federal Reserve Bank of New York. Yields are percent per annum compounded semi-annually except that on securities having only one interest payment, they are computed on a simple interest basis.

² Excludes Treasury bills, which are fully taxable; and Panama Canal bonds, which are fully tax-exempt. For description and amount of each issue outstanding on June 30, 1957, see table 22, for information as of June 30, 1956, see 1956 annual report, page 399.

³ Yields are computed to earliest call date when prices are above par and to maturity date when prices are at par or below.

⁴ Beginning April 1953, prices are closing bid quotations. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included in the price range beginning October 1, 1939. Dates of highs and lows in case of reissue are the latest dates. Issues with original maturity of less than 2 years are excluded.

⁵ Called on May 14, 1956, for redemption on September 15, 1956.

NOTE.—For data from 1937 through 1940, see the 1952 annual report, pp. 764 and 765.

^{*} Less than \$50 million.[†] Revised.¹ Figures represent par values except in the case of data which include United States savings bonds of Series A-F and J, which are included on the basis of current redemption value.² Includes partnerships and personal trust accounts. Nonprofit institutions and corporate pension trust funds are included under "Miscellaneous investors."³ Exclusive of banks and insurance companies.⁴ Comprises trust, sinking, and investment funds of State and local governments, Territories, and possessions.⁵ Includes savings and loan associations, nonprofit associations, corporate pension trust funds, dealers and brokers, and investments of foreign balances and international accounts in this country.⁶ Data on daily Treasury statement basis. Since data exclude noninterest-bearing debt, they differ slightly from those in discussion of debt ownership. Includes special issues to Federal agencies and trust funds, and excludes guaranteed securities held by the Treasury.⁷ See table 48, footnote 4.⁸ Excludes obligations of the Philippine Islands after June 30, 1946, and Puerto Rico after June 30, 1952.

NOTE.—For data back to 1913, see 1946 annual report, p. 664, and 1949 annual report, p. 591.

¹ Less than \$500,000. ² Revised. n. a. Not available.³ The "total amount outstanding" of securities of the several issuers differs from the gross indebtedness of these issuers as the former excludes noninterest-bearing debt. The "total privately held securities" differs from the net indebtedness of the borrowers in several additional respects. The former is derived by deducting from the total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness, on the other hand, is derived by deducting from the gross indebtedness an amount equivalent to the total volume of sinking fund assets of the respective borrowers, but makes no allowance for any other public assets.⁴ In the case of data which include United States savings bonds, Series A-F, and J, the figures for these bonds represent current redemption value.⁵ On basis of daily Treasury statements. Excludes guaranteed securities held by the Treasury.⁶ Includes Federal land bank bonds only through June 30, 1946; on June 27, 1947, the United States proprietary interest in these banks ended. Excludes stocks and interagency loans.⁷ Securities the income from which is exempt from both the normal rates and surtax rates of the Federal income tax.⁸ Securities the income from which is exempt only from the normal rates of the Federal income tax. In the case of partially tax-exempt securities, interest derived from \$5,000 aggregate principal amount owned by any one holder is exempt from the surtax rates as well as the normal rates of the Federal income tax.⁹ Securities the income from which is subject to both the normal rates and the surtax rates of the Federal income tax.¹⁰ Special issues to Federal agencies and trust funds.¹¹ Excludes obligations of the Philippine Islands after June 30, 1946, and Puerto Rico after June 30, 1952.

TABLE 49.—*Summary of ownership of interest-bearing public debt and guaranteed obligations, June 30, 1956 and 1957*

* Less than \$500,000.

¹ Banks and insurance companies covered in the Treasury survey of ownership of securities issued or guaranteed by the U. S. Government account for approximately 95 percent of the amount of such securities owned by all banks and insurance companies in the United States. Details as to the ownership of each security are available in the Treasury Bulletin monthly for the above investors and semiannually for commercial banks classified by membership in the Federal Reserve System. Table 20 in this report shows from 1946-1957 the maturity distribution of marketable, interest-bearing public debt and guaranteed obligations.

² Securities held in trust departments are excluded.

³ Includes trust companies and stock savings banks.

⁴ Includes banks and insurance companies which are not covered in the Treasury survey (see footnote 1).

⁵ Consists of corporate pension trust funds and profit-sharing plans which involve retirement benefits. Quarterly data are presented in the Treasury Bulletin as supplemental information in a memorandum column accompanying the Survey of Ownership for each reporting date, beginning with December 31, 1953. The corresponding information from earlier reports, beginning with December 31, 1949, is summarized on page 30, of the March 1954 Treasury Bulletin.

⁶ Excludes guaranteed obligations held by the Treasury.

⁷ U. S. savings bonds other than Series G, H, and K are included at current redemption value. They were reported at maturity value by banks and insurance companies covered in the Treasury survey and have been adjusted to current redemption value for this table.

⁸ Includes depositary bonds held by commercial banks not included in the survey: \$90 million in 1956 and \$77 million in 1957.

¹ Revised.

² For further details on certain of these accounts, see tables 52 through 77.

³ Includes Series F and J savings bonds at current redemption value.

⁴ Includes a U. S. Government security of \$1,000,000 which was included in assets purchased from an insured institution to prevent default.

⁵ Figures are as of April 30, 1951.

⁶ Formerly shown as "Public works and other general funds."

⁷ Information on amount of Federal securities held by this fund prior to June 30, 1952, is not available.

⁸ Some of the investment transactions clear through the accounts of the Treasurer of the United States.

⁹ The corporation was liquidated during the fiscal year shown in the column heading. Production credit corporations were merged in the Federal intermediate credit banks as of January 1, 1957, pursuant to the act approved July 26, 1956 (12 U. S. C. 1027 (a)). Certain assets, including the Federal securities, and the liabilities of the corporations were transferred to the banks.

¹⁰ Excludes securities in the amounts of \$28,530,000, \$24,955,000, and \$23,625,000, held by the Atomic Energy Commission as of June 30, 1953, 1954, and 1957, respectively, which in turn are held by trustees for the protection of certain contractors against financial loss in event of a catastrophe.

TABLE 52.—*Adjusted service certificate fund, June 30, 1957*

[This trust fund was established in accordance with the provisions of the act of May 19, 1924 (38 U. S. C. 645-647). For further details see annual report of the Secretary for 1941, p. 135]

¹ Excludes \$25,000,000 of advances allocated to flood control, repayment of which is deferred to June 1, 1957.

² Repayments deposited are applied first to net interest charge, second to advances. Adjustments of payments between principal and interest are made on Treasury books after the close of the operating year of the agency.

³ The act of June 29, 1948 (62 Stat. 1130), provides that the obligation for repayment of advances be reduced by amounts spent for Federal activities at the project which are not considered part of the costs of the Boulder Canyon Project. Accordingly, the amount advanced for the operating year ended May 31, 1955, has been reduced by \$3,112,545.64 for these nonproject allocations.

⁴ Excludes interest at 3% compounded annually on adjustments for nonproject costs in prior years amounting to \$46,462.33.

⁵ Includes an adjustment of \$1,278,288.21 for prior years, pursuant to an act approved July 2, 1956 (70 Stat. 478), and advances of \$140,000 for the operating year 1957, less authorized deductions for operating years 1956 and 1957 totaling \$44,241.91.

⁶ Increased by \$1,278,288.21 for prior year adjustments authorized by the act of July 2, 1956.

TABLE 56.—*District of Columbia teachers' retirement and annuity fund, June 30, 1957*

[This fund was established in accordance with the provisions of the act of Aug. 7, 1946 (31 D. C. C. 702, 707), as successor to the District of Columbia teachers' retirement fund established under the act of Jan. 15, 1920, as amended, effecting the consolidation of the deductions fund and the Government reserve fund as of July 1, 1945]

¹ Appropriations are equivalent to the amount of taxes collected; see also footnote 2.² To cover employees of States and their political subdivisions; this provision was added by the Social Security Act Amendments of 1950 (42 U. S. C. 418).³ Excludes repayment of amortized premium amounting to \$338,836.14.⁴ In connection with payments of benefits to survivors of certain World War II veterans who died within three years after separation from active service (42 U. S. C. 417).⁵ Incidental recoveries, sale of publications, etc.⁶ Beginning in 1953.⁷ Paid directly from the trust fund beginning with the fiscal year 1947 under annual appropriation acts.⁸ Effective Dec. 30, 1949, public issues held by the fund are shown at face value. Total unamortized premium is shown separately below.⁹ Beginning May 1, 1953, represents net of premium and discount.¹⁰ Includes the following balances in the accounts as of June 30:

	1956	1957
Benefit payments.....	\$543,995,791.35	\$757,701,897.85
Salaries and expenses.....	5,239,214.75	7,463,330.98
Construction of building.....	798,809.86	394,888.63

TABLE 62.—*Foreign service retirement and disability fund, June 30, 1957*

¹ Includes the Government's contribution for creditable military service under the act of April 8, 1912, as amended by the act of August 1, 1956 (45 U. S. C. 228e-1 (n) (1)). Effective July 1, 1951 (65 Stat. 222 and 66 Stat. 371), appropriations of receipts are equal to the amount of taxes deposited in the Treasury (less refunds) under the Railroad Retirement Tax Act (26 U. S. C. 1500-1538).

² Does not include —\$1,315,310.52, representing the net change in unappropriated receipts during the fiscal year, as shown under trust receipts in the "Monthly Statement of Receipts and Expenditures of the United States Government," fiscal year 1957.

³ Does not include \$2,040,891.56, unappropriated receipts as of June 30, 1957.

⁴ Beginning Aug. 1, 1949, paid from the trust fund under Title IV, act of June 29, 1949 (63 Stat. 297), and subsequent annual appropriation acts.

NOTE.—Under Sec. 16 of the Refugee Relief Act of 1953, approved Aug. 7, 1953 (50 App. U. S. C. 1971n), the Secretary of the Treasury is authorized to make loans not to exceed \$5,000,000 in the aggregate, to public or private agencies to finance the transportation of immigrants from ports of entry to places of resettlement in the United States. Although no immigrant visas were authorized to be issued under this act after December 31, 1956 (50 App. U. S. C. 1971q), those issued through that date were honored, and the loan program continued until its end, June 30, 1957, at which time funds available for making loans expired.

TABLE 75.—*Unemployment trust fund, June 30, 1957*

[On basis of daily Treasury statements through 1952; thereafter on basis of "Monthly Statement of Receipts and Expenditures of the United States Government," adjusted for accruals. (See "Bases of Tables.") This trust fund was established in accordance with the provisions of Sec. 904 (a) of the Social Security Act of August 14, 1935 (42 U. S. C. 1104). For further details see Annual Report of the Secretary for 1941, p. 145]

¹ Includes adjustment of \$9,634.41 for prior year earnings.² Amount actually withdrawn against advances (see footnote 3).³ Advances and repayments for Territory of Alaska as authorized by law (42 U. S. C., 1321).⁴ Established by the Railroad Unemployment Insurance Act of 1938 (45 U. S. C. 360).⁵ Contributions under the Railroad Unemployment Insurance Act of 1938, as amended (45 U. S. C. 360 (a)), in excess of the amount specified for administrative expenses.⁶ Amounts equivalent to taxes collected from employers covered by Sec. 13 (d) and Sec. 13 (f) of the Railroad Unemployment Insurance Act during the period January 1936 to June 1939, inclusive.⁷ Includes adjustment of \$402.98 for prior year earnings.⁸ Reduced by \$10,037.39 for adjustment of prior year earnings.⁹ This account reflects amounts appropriated to the unemployment trust fund representing the excess of collections from Federal unemployment tax over employment security expenses as provided by law (42 U. S. C. 1101 (a)). Amounts credited to this account are transferred to the Federal unemployment account until the total amount equals the \$200 million reserve. Any remaining balance is credited to the State accounts (42 U. S. C. 1102, 1103 (a)).

¹ Includes \$2,630,000 transferred from Federal unemployment account.² Includes \$3,000,000 repaid to Federal unemployment account.³ Includes adjustment of \$9,634.41 for prior year earnings.⁴ Includes adjustment of \$402.98 for prior year earnings.⁵ Transfer of \$47,654,863.16 from undistributed appropriations reduced by \$10,037.39 to adjust prior year earnings.⁶ Net repayment from Alaska consisting of \$3,000,000 repaid by Alaska and \$2,630,000 transferred to Alaska from the Federal unemployment account.⁷ Includes transfers of \$47,654,863.16 to Federal unemployment account and \$33,376,030.98 to State accounts pursuant to 42 U. S. C. 1102, 1103, 1321 netted against appropriation on June 30, 1957, of \$71,195,220.32.TABLE 76.—*U. S. Government life insurance fund, June 30, 1957*

[This trust fund operates in accordance with the provisions of the act of June 7, 1924, as amended (38 U. S. C. 443). This act repealed the act of Sept. 2, 1914 (38 Stat. 712) which established a Bureau of War Risk Insurance in the Treasury Department and repealed the amending act of Oct. 6, 1917 (40 Stat. 398). For further details, see annual report of the Secretary for 1941, p. 142]

¹ Revised.² For a description of security held, see table 80, footnote 2.³ Includes any paper currency held outside the continental limits of the United States.⁴ Based on Bureau of the Census estimates of population.⁵ Does not include gold other than that held by the Treasury.⁶ These amounts are not included in the total, since the gold or silver held as security against gold and silver certificates and Treasury notes of 1890 is included under gold, standard silver dollars, and silver bullion, respectively.⁷ This total includes credits with the Treasurer of the United States payable in gold certificates in (1) the Gold Certificate Fund—Board of Governors, Federal Reserve

System, in the amount of \$18,283,837.300 and (2) the redemption fund for Federal Reserve notes in the amount of \$845,292.955.

⁸ Includes \$74,000,000 lawful money deposited as a reserve for postal savings deposits.⁹ The amount of gold and silver certificates and Treasury notes of 1890 should be deducted from this amount before combining with total money held in the Treasury to arrive at the total amount of money in the United States.¹⁰ Lowest amount since December 31, 1956.¹¹ Highest amount to date.

¹ Revised.

² Beginning June 30, 1922, form of circulation statement was revised to include in holdings of Federal Reserve Banks and agents, and hence in stock of money, gold bullion and foreign gold coin held by Federal Reserve Banks and agents, and to include in holdings of Federal Reserve Banks and agents and hence exclude from money in circulation, all forms of money held by Federal Reserve Banks and agents, whether as reserve against Federal Reserve notes or otherwise. For purposes of comparison, figures in this table for earlier years include these changes. For full explanation of this revision, see 1922 annual report, p. 433. The form of circulation statement was revised again beginning Dec. 31, 1927, so as to exclude earmarked gold coin from stock of money, and hence from money in circulation; to include in holdings of Federal Reserve Banks and agents, and hence in stock of money, gold held abroad for account of Federal Reserve Banks; and to include in all categories, minor coin (1-cent piece and 5-cent piece). Beginning Dec. 31, 1927, circulation statement is dated for end of month instead of beginning of succeeding month, as was practice theretofore, and figures on revised basis for "Money held in the Treasury" are used. For purposes of comparison, figures in

this table for earlier years include these changes. For explanation of this revision, see 1928 annual report, pp. 70-71. For figures for earlier years from 1860 through 1934, see annual reports for 1947, pp. 478-481, for 1952, p. 708, and for 1953, p. 551. Changes, minor in amount, are made in some figures in the June 30 circulation statements for use in these annual report tables.

³ Excludes gold and silver certificates and Treasury notes of 1890 outside Treasury. Beginning with 1934, excludes amount (gold certificates) held for Federal Reserve Banks and agents. These items are excluded since gold and silver held as security against them are included. Composition of the stock of money is shown in table 80. ⁴ From 1934 to date, amount (gold certificates) held for Federal Reserve Banks and agents is excluded from total money in Treasury, see footnote 2.

⁵ Composition of money in circulation is shown in table 81.

⁶ Based on Bureau of Census estimated population for continental United States. On November 9, 1953, \$300,000,000 of gold held in the Treasurer's account was used to purchase from the Federal Reserve System a like amount of public debt obligations which were retired.

¹ See table 79, footnote 1. For figures for earlier years from 1860, see annual reports for 1947, pp. 482-484, for 1952, p. 709, and for 1953, p. 552.

² Part of gold and silver included in stock of money is held as reserve against other kinds of money, as follows: (1) As reserve for United States notes and Treasury notes of 1890—gold bullion (gold coin and bullion prior to gold conservation actions of 1933 and 1934) varying in amount from \$150,000,000 to \$156,039,431 during years included in this table; (2) also as security for Treasury notes of 1890 (these notes are being canceled and retired on receipt)—an equal dollar amount in standard silver dollars; (3) as security for outstanding silver certificates—silver in bullion and standard dollars of monetary value equal to face amount of such silver certificates; and (4) as security for gold certificates—gold bullion (gold coin and bullion before gold actions of 1933 and 1934) of value at legal standard equal to face amount of such gold certificates. Federal Reserve notes are secured by deposit with Federal Reserve Banks with Federal Reserve agents of like amount of gold certificates (gold prior to actions of 1933 and 1934) or of gold certificates and such discounted or purchased paper as are eligible under terms of Federal Reserve Act, as amended, or from Feb. 27, 1932) of direct obligations of the United States. Federal Reserve Banks must maintain

reserves in gold certificates (gold for 1933 and prior years) of at least 25 percent (40 percent prior to passage of act of June 12, 1945) including redemption fund which must be deposited with the Treasurer of the United States against Federal Reserve notes in actual circulation ("Gold certificates" as herein used for 1934 and subsequent years include credits with Treasurer payable in gold certificates). Federal Reserve notes are obligations of United States and a first lien on all assets of issuing Federal Reserve Bank. Federal Reserve Bank notes at time of issuance were secured by direct obligations of United States or commercial paper; however, lawful money has been deposited with Treasurer for their redemption and they are in process of retirement. National bank notes at issuance were secured by direct obligations of the United States; lawful money has been deposited with Treasurer for their redemption and they are being retired.

³ Totals involve duplication to extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 have been excluded, however, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

¹ See table 70, footnote 1. For figures for earlier years from 1890, see annual reports for 1947, pp. 485-487, for 1952, p. 710, and for 1953, p. 553.² For description of reserves held against various kinds of money, see table 80, footnote 2.³ Gold Reserve Act of 1934, which was culmination of gold actions of 1933, vested in the United States title to all gold coin and gold bullion. Gold coin was withdrawn from circulation and formed into bars. Gold coin (\$287,000,000) shown on Treasury records as being then outstanding was dropped from monthly circulation statement as of Jan. 31, 1934.

TABLE 82.—*Location of gold, silver bullion at monetary value, and coin held by the Treasury on June 30, 1957*

[In thousands of dollars. On basis of reports received from various Treasury offices and Federal Reserve Banks which take into account those transactions in transit to the Treasurer's office as of June 30, supplemented by information taken from the Treasurer's accounts. Therefore, the figures shown in this table may differ from similar figures in other tables prepared on basis of daily Treasury statements]

							4.34

¹ Customs receipts, on the basis of reports of collecting officers, are credited to the districts in which the collections are made. Receipts in various districts do not indicate the tax burden of the respective districts since the taxes may be borne eventually by persons in other districts. Customs duties and proceeds of sales of insular government property for Puerto Rico (\$6,614,228) are deposited to the credit of the collector of customs of Puerto Rico.

² Bureau and foreign.

^r Revised.

¹ Amount of customs duties is calculated on basis of reports of Bureau of the Census showing quantity and value of merchandise imported. Figures back to 1867 may be found in the annual reports for 1930, p. 523; 1932, p. 382; and corresponding tables in subsequent reports.

TABLE 89.—Computed customs duties, value of dutiable imports, and ratio of computed duties to value of dutiable imports, by tariff schedules, calendar years 1946-56 and monthly, January 1956-June 1957¹

¹ Revised.

² Amount of customs duties is calculated on basis of reports of Bureau of the Census, showing quantity and value of merchandise imported. Total estimated duties and total value of dutiable imports will be found in table 90. For figures back to 1890 see annual reports for 1930, p. 525; 1932, p. 383; and corresponding tables in subsequent reports.

³ Taxes collected on dutiable commodities under revenue acts and Sugar Act of 1937 are included in appropriate schedules.

TABLE 90.—Value of dutiable imports for consumption and computed duties collected by countries, fiscal years 1956 and 1957

¹ In some instances appropriation titles have been changed from time to time without changes in the basic laws.

² Represents payments for penalty mail costs.

³ Consists of \$68,166,446, estimated cost of perishable food commodities acquired through price-support operations as ordered for distribution within States, pursuant to Sec. 416 of Public Law 439, 81st Congress (7 U. S. C. 1431), and \$57,834,374, cash payments to States to increase consumption of milk by children in school.

⁴ For additional payments from this appropriation, see part II.

⁵ Deduct: represents net repayments. These accounts were discontinued but their functions are continued under the two accounts immediately following.

⁶ See footnote 17 of following table.

⁷ See footnote 18 of following table.

⁸ Includes \$3,478, payments to States from grazing receipts, etc., public lands within grazing districts, and \$625, payments to States, grazing fees.

⁹ Special fund account repealed as a permanent appropriation, effective July 1, 1935, by Sec. 4 of the Permanent Appropriation Repeal Act (31 U. S. C. 725c). Annual appropriation provided for same object under the account immediately following.

¹⁰ Activities under this caption expired June 30, 1929.

¹¹ Represents payments under the soil bank program.

¹² These accounts consolidated with combined accounts immediately following.

¹³ For additional payments from this appropriation, see part I.

¹⁴ Formerly shown under Treasury Department.

¹⁵ Represents costs of fellowship and assistance programs.

¹⁶ Payments from emergency funds to or within States included in the following table but excluded from this table for the fiscal year 1957:

Part A—(see columns 12, 13 part, 17, 21, 22, 31, 35 part, 50, and 52 of following table)..... \$228, 193, 362

Part B—(see columns 61 part and 63 of following table)..... 84, 355, 051

Total..... 312, 548, 413

TABLE 99.—*Expenditures made by the Government as direct payments to States under cooperative arrangements and expenditures within States which provided relief and other aid, fiscal year 1957*

[The Treasury Department, for general information, has compiled from figures furnished by the Departments and establishments concerned the following statement, exhibiting by States and Territories the amounts paid to or within each under the appropriations for Federal aid to States shown under parts I and II in the preceding table]

PART A. FEDERAL AID PAYMENTS TO STATES AND LOCAL UNITS

States, Territories, etc.	Department of Agriculture ¹

¹ Expenditures are on basis of checks issued except for (1) value of commodities distributed as shown under "School lunch program" and under "Removal of surplus agricultural commodities" (value of commodities distributed is reported on basis of total cost to Government, including handling and transportation charges of commodities delivered during 1957 to schools and other recipient agencies within the States), and (2) value of Commodity Credit Corporation commodities donated.

² Includes \$14,659,931, value of commodities distributed to participating schools, and payments of \$3,249,074 made directly to private and parochial schools. In addition the school-lunch program is a recipient of some of the commodities reflected under the appropriation "Removal of surplus agricultural commodities," and under "Commodity Credit Corporation, value of commodities donated."

³ Consists of \$28,490,343, payments to States and Territories; \$129,404, payments to Arizona and New Mexico school funds; and \$46,497, payment to Minnesota (Cook, Lake, and Saint Louis counties).

⁴ Consists of payments made by Agricultural Research Service, \$500,000; Federal Extension Service, \$1,094,949; and Agricultural Marketing Service, \$1,160,000.

⁵ Consists of \$10,624,553, State and private forestry cooperation, and \$207,003, control of forest pests.

⁶ Includes: American Samoa, Canal Zone, Guam, Trust Territory of the Pacific, and certain foreign countries.

⁷ Represents penalty mail costs for which a breakdown by States is not available.

⁴² Based on State of permanent residence of recipient.⁴³ Consists of \$4,000 for Belgium; \$5,600 for Bermuda; \$22,300 for Canada; \$33,100 for England; \$6,250 for France; \$1,000 for Israel; \$2,000 for Italy; \$6,200 for Japan; \$1,600 for Netherlands; and \$25,000 for Sweden.⁴⁴ This expenditure is a part of a total appropriation available to the Foundation.⁴⁵ Payments are on an approved voucher basis.

Government Losses in Shipment

TABLE 100.—*Government losses in shipment revolving fund*

[Established July 8, 1937, under authority of the Government Losses in Shipment Act, as amended
(5 U. S. C 134-134h)]

SECTION I.—STATUS OF FUND AS OF JUNE 30, 1957

Transactions	Cumulative through June 30, 1956	Fiscal year 1957	Cumulative through June 30, 1957
Receipts:			
Appropriation.....	\$802,000.00		\$802,000.00
Transferred (Sept. 21, 1939) from securities trust fund.....	91,803.13		91,803.13
Recoveries of payments for losses.....	465,512.13	\$710.58	466,222.71
Repayments to the fund.....	3,924.32		3,924.32
Total receipts.....	1,363,239.58	710.58	1,363,950.16
Expenditures:			
Payments for losses.....	1,204,983.94	46,224.98	1,251,208.92
Other payments (refunds, etc.).....	92.57		92.57
Total expenditures.....	1,205,076.51	46,224.98	1,251,301.49
Balance in fund.....	158,163.07	-45,514.40	112,648.67
Total.....	1,363,239.58	710.58	1,363,950.16

SECTION II.—AGREEMENTS OF INDEMNITY ISSUED BY THE TREASURY
DEPARTMENT THROUGH JUNE 30, 1957 ¹

Agreements of indemnity	Number	Amount
Issued through June 30, 1956.....	340	\$2,592,201.97
Issued during the fiscal year 1957.....	39	71,978.27
Total issued.....	379	2,664,180.24
Canceled through June 30, 1957.....	28	1,027,685.47
In force as of June 30, 1957.....	351	1,636,494.77

Footnotes at end of table.

TABLE 100.—*Government losses in shipment revolving fund*—Continued

SECTION III—CLAIMS MADE AND SETTLED THROUGH JUNE 30, 1957

Claims	Number	Amount
Made through June 30, 1956.....	5, 582	\$3, 775, 798. 21
Made during the fiscal year 1957:		
Processed by the Deposits Branch, Bureau of Accounts.....	55	2, 980, 058. 49
Processed by the Bureau of the Public Debt.....	98	32, 245. 08
Total claims made through June 30, 1957.....	5, 735	6, 788, 101. 78
Settled through June 30, 1956.....	5, 562	3, 737, 433. 80
Settled during the fiscal year 1957:		
Processed by the Deposits Branch, Bureau of Accounts:		
Approved for payment out of the fund.....	23	14, 238. 38
Settled by credit in appropriate accounts.....	32	2, 940, 697. 84
Settled without payment or credit.....	3	44, 250. 40
Processed by the Bureau of the Public Debt:		
Approved for payment out of the fund:		
United States savings bond redemption cases.....	93	30, 434. 87
Armed forces leave bond redemption cases.....	8	1, 551. 73
Total settled through June 30, 1957.....	5, 721	6, 768, 607. 02
Unadjusted as of June 30, 1957 ²	14	19, 494. 76
Total.....	5, 735	6, 788, 101. 78

¹ The Government has not sustained any actual monetary loss in connection with its liability under these agreements of indemnity.

² Includes claims in process of adjustment by the Bureau of the Public Debt.

International Claims

TABLE 101.—*Mexican claims fund as of June 30, 1957*

[This special fund was established in accordance with the provisions of the act of Dec. 18, 1942, as amended (22 U. S. C. 667). For further details, see annual report of the Secretary for 1943, p. 189]

Status of the fund	Amount
Receipts:	
Payments from the Government of Mexico:	
Agrarian claims agreement of 1938.....	\$3,000,000.00
Expropriation agreement of 1941:	
Initial payment on ratification of agreement.....	3,000,000.00
Annual installments through November 1955.....	34,000,000.00
Appropriation by the United States Government covering amount of awards and appraisals on behalf of Mexican nationals.....	533,658.95
Total receipts.....	40,533,658.95
Expenditures:	
Amounts paid to American nationals, by fiscal years:	
1943.....	637,036.24
1944.....	6,333,636.13
1945.....	1,443,226.94
1946.....	4,993,915.36
1947.....	3,076,040.35
1948.....	4,354,144.31
1949.....	2,821,873.65
1950.....	2,586,320.53
1951.....	2,628,951.89
1952.....	2,425,573.61
1953.....	2,518,796.66
1954.....	2,482,539.56
1955.....	2,461,365.72
1956.....	1,582,850.47
1957.....	21,440.50
Total expenditures.....	40,367,711.92
Undisbursed balance June 30, 1957.....	165,947.03
Claims certified for payment:	
By the Secretary of State in accordance with:	
Decisions rendered by the General Claims Commission.....	201,461.08
Appraisals agreed upon by the commissioners designated by the Governments of the United States and Mexico, pursuant to the general claims protocol between the United States and Mexico, signed April 24, 1934.....	2,599,166.10
By the American Mexican Claims Commission:	
Decisions under the provisions of the Settlement of Mexican Claims Act of 1942.....	37,948,200.05
Total claims certified.....	40,748,827.23

¹ Under the Settlement of War Claims Act of 1928, payment of Class III awards was limited to \$100,000 until all Class I and Class II awards had been authorized for payment. Additional Class III awards payments were then to be made up to 80% of the total amount due for all three classes as of January 1, 1928. On February 27, 1953, the German Government agreed to pay \$87,500,000 (U. S. dollars) over a period of 25 years in full settlement of Germany's obligations on account of Class III awards and the award under Private Law 509. Through June 30, 1957, \$15 million has been paid under the agreement.

² Payments made in accordance with Public Law 375, approved August 6, 1947.

³ Amounts shown are gross, deductions for administrative expenses are shown below (see note 6).

⁴ Includes 317 partial payments for Class III awards and 1 partial payment under Private Law 509.

³ Interest accrued from January 1, 1928, to March 11, 1940, on \$26,612.06, representing awards plus interest to January 1, 1928. No applications filed by claimants. Time for filing applications expired March 11, 1940.

* Deductions of $\frac{1}{2}$ of 1 percent are made from each payment to cover administrative expenses. These amounts are covered into the Treasury as miscellaneous receipts.

TABLE 103.—*Yugoslav claims fund as of June 30, 1957*

[This special fund was established in accordance with the provisions of the act of March 10, 1950, as amended (22 U. S. C. 1627). For further details see annual report of the Secretary for 1954, p. 111]

NOTE.—“Gold and short-term dollars” include reported and estimated official gold reserves, and official and private short-term dollar holdings (principally deposits and U. S. Government securities with an original maturity of one year or less) as reported by banks in the United States. “U. S. Government bonds and notes” include estimated official and private holdings of U. S. Government securities with an original maturity of more than one year.

^{*} Revised.

¹ Less than \$500,000.

² Includes gold reserves of Bank of France and French dependencies only.

³ Does not include \$286 million of gold loaned by the Bank of France to the French Exchange Stabilization Fund on June 26, 1957.

⁴ No estimate made.

⁵ Includes gold and dollar holdings of the Bank for International Settlements, the European Payments Union, the Tripartite Commission for the Restitution of Monetary Gold, other Western European countries, and unpublished gold reserves of certain Western European countries.

⁶ Does not include gold holdings of the U. S. S. R.

⁷ Excludes sterling area countries and dependencies of European countries.

⁸ Excludes international institutions.

⁹ Principally the International Monetary Fund and the International Bank for Reconstruction and Development.

TABLE 107.—*Summary statement of receipts, withdrawals, and balances of foreign currencies acquired by the United States, principally under intergovernmental agreements, without purchase with dollars, July 1, 1956, through June 30, 1957—Continued*(Stated in U. S. dollar equivalent ¹)

Withdrawals:

Sold for dollars, proceeds credited to: ²	
Treasury receipt accounts and miscellaneous	\$186,672,088.02
Commodity Credit Corporation capital fund as reimbursement for commodities sold for foreign currencies (7 U. S. C. 1703)	67,845,265.13
United States Information Agency to reimburse the informational media guaranty fund (22 U. S. C. 1442 (c))	4,052,710.78
Total sold for dollars	258,570,063.93
Requisitioned for use without reimbursement to the Treasury pursuant to: ³	
Section 402, Mutual Security Act of 1954	422,839,869.91
Section 502 (a), Mutual Security Act of 1954	2,229.00
Section 104, Public Law 480	143,485,265.32
Trust agreements	9,084,511.18
Other authority	54,958.65
Total requisitioned without reimbursement	575,466,834.06
Total withdrawals	\$834,036,897.99
Adjustments for rate differences	-28,193,829.37
Balance held by Treasury Department June 30, 1957	1,128,124,576.66
Analysis of balance held by Treasury Department, June 30, 1957:	
Proceeds for credit to miscellaneous receipts	47,051,237.87
Proceeds for credit to agency accounts:	
Informational media guaranty funds	6,816,041.79
Commodity Credit Corporation capital funds	41,684,755.02
Held in trust	30,587,102.01
For program allocations under Sec. 104, Title I, of Public Law 480	1,001,985,439.97
Total	⁴ 1,128,124,576.66
Balances held by other executive agencies, June 30, 1957, for purpose of:	
Economic and technical assistance under Mutual Security Act	309,469,445.00
Programmed uses under Agricultural Trade Development and Assistance Act	25,340,258.31
Military family housing in foreign countries	11,905,951.88
Liquidation of obligations incurred prior to July 1, 1953 ⁵	303,801.48
Trust agreements with foreign countries	3,511,519.15
Other	980,054.12
Total	351,511,030.04

NOTE.—For detailed data on collections and withdrawals by country and program, see "Report on foreign currencies, fiscal year 1957," compiled by the Treasury Department, Bureau of Accounts.

¹ For the purpose of providing a common denominator, the currencies of 68 foreign countries are herein stated in U. S. dollar equivalents. It should not be assumed that dollars in amounts equal to the balances shown are actually available. The dollar equivalents were calculated at varying rates of exchange. Foreign currencies generated under the Public Law 480 program, comprising more than 73 percent of the total, and currencies generated under certain provisions of the Mutual Security Acts were converted at deposit rates provided for in the international agreements with the respective countries. The bulk of these currencies are available to agencies without reimbursement pursuant to legislative authority and, when disbursed to the foreign governments, will generally be accepted by them at the deposit or collection rates. Currencies available for sale for dollars and certain other United States uses were converted at market rates of exchange in effect on June 30, 1957, for most official disbursements. If all currencies were converted at current market rates, the U. S. dollar value of currencies held on June 30, 1957, in the Treasury and agency accounts would amount to the aggregate of \$1,275.7 millions as compared with \$1,479.6 millions shown in this table.

² Dollars acquired from the sale of foreign currencies are derived from charges against the dollar appropriations of the Federal agencies which use the currencies. These dollar proceeds are credited to miscellaneous receipts or other appropriate accounts on the books of the Treasury.

³ Includes advances pursuant to the cited provisions of the Agricultural Trade Development and Assistance Act of 1954, as amended; the Mutual Security Acts, as amended; withdrawal of foreign currency held in trust; and advances for liquidation of obligations incurred prior to July 1, 1953.

⁴ Represents the dollar value of currencies held in the accounts of the Treasury Department only. Currencies transferred to agency accounts pursuant to requisitions submitted to the Treasury Department, or as otherwise authorized, are accounted for by the agencies. Balances held by executive departments and agencies as of June 30, 1957, are stated at end of summary.

⁵ Section 103 of the Mutual Security Appropriation Act, 1957, continued available until expended the equivalent of \$2 million of foreign currencies for liquidation of obligations incurred prior to July 1, 1953, without reimbursement to the Treasury. Pursuant to this limitation, the equivalent of \$407,658.62 (net) had been made available to agencies during the period July 1, 1956, through June 30, 1957.

TABLE 108.—*Foreign currency balances held by the United States, June 30, 1957*

¹ Includes amounts postponed and unpaid under moratorium agreements for fiscal year 1932. For total principal and interest by country see Annual Report of the Secretary of Treasury for 1947, p. 107.

² The German Government was notified on April 1, 1938, that the Government of the United States would look to the German Government for the discharge of the indebtedness of the Government of Austria to the Government of the United States. A letter dated March 6, 1931, from Chancellor Auenauer to the Allied High Commission for Germany stated that Germany acknowledged liability for interest and similar charges on Austrian securities falling due between March 12, 1938, and May 8, 1945. Article 28 (f) of the Austrian State Treaty of May 15, 1955, recognized that these charges constitute a claim on Germany and not on Austria.

³ Represents payments deferred.

⁴ The act approved August 24, 1949 (20 U. S. C. 222-224), provides that any sum due or paid by the Government of Finland to the United States as the result of World War I shall be deposited in the Treasury and made available for educational and technical instruction and training in the United States for citizens of Finland, and to provide opportunities for American citizens to carry out academic enterprises in Finland. Payments by Finland through June 30, 1957, to totaling \$3,211,772.56, were made available pursuant to the act.

⁵ Includes semiannual payments of renewed principal on bonds.

⁶ The Hungarian Government deposited with the foreign creditors' account at the Hungarian National Bank an amount of pengo equivalent to the interest payments due from December 15, 1932, to June 15, 1937. The debt-funding and moratorium agreements with Hungary provide for payment in dollars to the United States.

The United States held obligations in the principal amount of \$29,808.78, which, together with accrued interest thereon, were canceled on October 6, 1939, pursuant to the agreement of April 14, 1938, between the United States and the Republic of Nicaragua, ratified by the United States Senate on June 13, 1938.

⁵ Excludes claim allowance of \$1,813,428.69 dated December 15, 1929.

⁹ Excludes payment by the Rumanian Government to the Treasury on June 15, 1940, of \$100,000, as "a token of its good faith and of its real desire to reach a new agreement covering" Rumania's indebtedness to the United States. Silver bullion in the amount of \$269,061.46 was paid to the United States on June 16, 1933, which payment was credited June 15, 1947.

¹⁰ Consists principally of proceeds of liquidation of assets of the Russian Government in the United States. (See Annual Report of the Secretary for 1922, p. 283.)

¹¹ This Government has not accepted the provisions of the moratorium.

438363—58—40

SOURCE.—U. S. Department of Commerce, Office of Business Economics.

NOTE.—Loans of less than 3 years duration extended under authority of Section 106 (b) of the Mutual Security Act of 1954, as amended, for the sale of military equipment by Government agencies and loans of less than 10 years duration under Section 103 (c) of the act, as amended, have not been reported by the lending agencies. Data on lend-lease, surplus property, and settlements for grants include approximately \$1,201,000,000 for surplus property and other credits outstanding and administered by Federal agencies other than the Treasury Department, and exclude about \$54,000,000 in defaulted short-term "cash" credits and deferred and otherwise past due interest. They also exclude the value of silver received by the United States Government (\$103,000,000), but not completely recorded in the accounts of the Treasury Department as of June 30, 1957.

*Less than \$500,000.

Secondary market operations	do	6,250.00	6,250.00	Do.
Office of the Administrator, liquidating programs	June 24, 1954	16,650.00	16,650.00	Obligations acquired.
Total obligations		50,434,550.00	25,209,100.00	

NOTE.—See table 119, Parts C and D, for data on other securities held by agencies shown on a gross basis. These data were formerly shown under "Other securities" on a net basis, i. e., loans made by agencies were netted by taking out the borrowings from the U. S. Treasury.

¹ This preferred stock was acquired in exchange for notes held by the Secretary of the Treasury.

² This Corporation was abolished, effective at the close of business June 30, 1957, in accordance with Reorganization Plan No. 1 of 1957. The functions of the Corporation were transferred to the Housing and Home Finance Administrator, the Administrator of General Services, the Administrator of the Small Business Administration, and the Secretary of the Treasury.

³ Production credit corporations were merged in the Federal intermediate credit banks as of January 1, 1957, pursuant to the act approved July 26, 1956 (12 U. S. C. 1027 (a)). The act provided for the transfer to the banks of all of the corporations'.

assets, liabilities, and capital, except their investments in the production credit associations, which were transferred to the Farm Credit Administration.

⁴ Includes \$50,000,000 representing notes exchanged for preferred capital stock.

⁵ Represents the industrial guaranty program formerly included in the "Guaranty Program" (see footnote 7).

⁶ Includes repayments to the Treasury in the amount of \$3,701,912.83 representing return of uncommitted funds. These repayments were not received in time for inclusion in the daily Treasury statement published for June 28, 1957.

⁷ In accordance with the act approved July 18, 1956 (22 U. S. C. 1442 (g)), all assets, liabilities, income, expenses, and charges of whatever kind pertaining to informational media guaranties formerly included in the "Guaranty program" have been transferred to this fund.

⁸ Consists of \$3,745,000 borrowed from the Treasury and \$9,230,000 transferred from the International Cooperation Administration. The latter amount includes \$8,550,000 guaranty program funds (see footnote 7).

*Less than \$500,000.

¹ Excludes guaranteed obligations of the Federal Farm Mortgage Corporation (in liquidation), Federal Housing Administration, and Home Owners' Loan Corporation (liquidated), amounting to \$265,400, \$106,434,150, and \$438,400 respectively.

² Corporation may also issue obligations guaranteed by the Secretary of the Treasury.

³ There are outstanding \$265,400 of guaranteed obligations in the hands of the public against this unused borrowing power.

⁴ Includes liability on a note amounting to \$92 million which was transferred from the Reconstruction Finance Corporation pursuant to Reorganization Plan No. 2 of 1954, effective at the close of business June 30, 1954.

⁵ Excludes obligations issued to the public which are not guaranteed by the United States.

⁶ Consists of industrial guaranties formerly included with "Industrial and informational media guaranties" (see footnote 9).

⁷ In addition to this amount, the Administration may borrow \$239 million from the Secretary of the Treasury pursuant to Public Law 85-118, approved August 2, 1957.

⁸ In accordance with the act approved August 2, 1957, the Administration may borrow \$209.5 million from the Secretary of the Treasury.

⁹ In accordance with the act approved July 18, 1956 (22 U. S. C. 1442 (g)), all assets, liabilities, income, expenses, and charges of whatever kind pertaining to informational media guaranties formerly included with "Industrial and informational media guaranties" have been transferred to this fund (see footnote 6).

¹⁰ Excludes authorization of \$3,175 million for subscription to the International Bank for Reconstruction and Development, and \$35 million for subscription to the International Finance Corporation.

World War II assets of the Reconstruction Finance Corporation in liquidation, other securities.....	7
United States Coast Guard, other securities.....	109
Total investment in international organizations, purchase money mortgages, etc...	3,662,395

NOTE.—For explanation of reporting coverage see note to table 118. For the detailed statements of financial condition by agencies heretofore shown in this table, see the *Treasury Bulletin* of December 1957.

¹ Activities reporting pursuant to Supplement No. 1 are mainly not business-type operations, but are included in the reporting coverage because they have significant assets and liabilities. The data in this column consist of 68 complete asset and liability reports, all but three of which are included for the first time. Excluded are assets from those activities reporting assets only (see Note to Table 118), which aggregate \$3,152,654 thousand, and also assets and liabilities of the Department of Defense, which has not yet furnished data pursuant to Supplement No. 1. All assets reported have been furnished to the House Committee on Government Operations for use in its report on assets of the Federal Government.

² The amounts shown in this column include both those activities reporting on a quarterly basis and those reporting only on an annual basis (with the exceptions indicated in footnote 1). The subtotal for activities reporting on a quarterly basis provides figures reasonably comparable with those in previous quarterly reports by this group of activities and with 1956 figures included in table 118 for "Certain other activities."

³ Excludes World War I funded and unfunded indebtedness of foreign governments, and World War II indebtedness of foreign governments involving lend-lease articles and surplus property sales agreements.

TABLE 120.—*Income and expense of Government corporations and certain other business-type activities, fiscal year 1957*¹

NOTE.—For explanation of reporting coverage see note to table 118. For the detailed statements of source and application of funds heretofore shown in this table, see the *Treasury Bulletin* of January 1958.

*Less than \$500.

¹ This table includes those activities that are submitting statements of source and application of funds on a quarterly basis. The activities included in Table 119, Part A, which submitted statements of financial condition on an annual basis only, pursuant to Supplement No. 1 to Department Circular No. 966, are not required to submit statements of source and application of funds.

TABLE 122.—*Restoration of amounts of capital impairment of the Commodity Credit Corporation, pursuant to the act of March 8, 1938, as amended*¹

Less surplus returned to Treasury.....				138,208,747.19
Net charge to Treasury to restore amounts of capital impairment.....				5,311,987,178.78

NOTE.—This table does not include reimbursements to the Corporation for losses under programs for which appropriations or cancellations were authorized by specific legislation.

¹ The act of March 8, 1938, as amended, provides for an annual appraisal of the assets and liabilities of the Corporation by the Secretary of the Treasury and the restoration of amounts of any capital impairment. Beginning with the fiscal year 1954, the appraisal basis was changed by an act approved March 20, 1954, from the lower of cost or market for the month of June to a cost basis (15 U. S. C. 713a-1).

TABLE 123.—*Reconstruction Finance Corporation*¹ notes canceled and cash recoveries made through June 30, 1957

	Cancellations ²	Cash recoveries	
	Total through June 30, 1957	Fiscal year 1957	Total through June 30, 1957
Allocations to governmental agencies, funds for relief pursuant to authorization or direction of Congress, administrative expenses in connection therewith, and interest paid on funds borrowed for these purposes (act approved Feb. 24, 1938, (15 U. S. C. 611a))	\$2,780,673,280.61	-----	\$760,656,667.11
Funds advanced to Federal Housing Administration (act approved Mar. 28, 1941, (12 U. S. C. 1737))	5,000,000.00	-----	5,000,000.00
Repurchased capital stock of Federal home loan banks (act approved June 30, 1947, (15 U. S. C. 606 note))	122,672,200.00	-----	122,672,200.00

SOURCE.—"Federal Real and Personal Property Inventory Reports" compiled by the House Committee on Government Operations.

NOTE.—All properties reported are shown in gross amounts without deductions for allowances for losses and depreciation. Only wholly owned Government corporations and wholly owned assets are included. Assets held under trust arrangements and interagency assets, including public debt securities owned, are excluded. The properties have been valued at acquisition cost or estimated cost when the actual costs were not known. Public domain is shown at estimated current values. Properties acquired as gifts or without cost to the Government are recorded by the agencies at no value and therefore not reported. It is the firm belief of the committee that estimated present day evaluations on Federal realty should be used in Federal property inventory reports, rather than to have such realty listed at acquisition cost or of "no value."

¹ Not evaluated in the 1955 report.

SOURCE.—“Federal Real and Personal Property Inventory Reports” compiled by the House Committee on Government Operations.

NOTE.—All properties reported are shown in gross amounts without deductions for allowances for losses and depreciation. Only wholly owned Government corporations and wholly owned assets are included. Assets held under trust arrangements and interagency assets including public debt securities owned are excluded. The properties have been valued at acquisition cost or estimated cost when the actual costs were not known. Public domain is shown at estimated current values. Properties acquired as gifts or without cost to the Government are recorded by the agencies at no value and

therefore not reported. It is the firm belief of the committee that estimated present day evaluations on Federal realty should be used in Federal property inventory reports, rather than to have such realty listed at acquisition cost or of “no value.”

1 Represents equipment and supplies in the supply system as reported by Department of Defense.

2 Represents military, general, and production equipment as reported by Department of Defense.

3 Includes industrial funds as reported by Department of Defense.

Personnel

TABLE 127.—*Number of employees in the departmental and field services of the Treasury Department, quarterly from June 30, 1956, to June 30, 1957*¹
